

## Bystander Intervention Resource Guide Ad Hoc Subcommittee Report.

Members: Denice Renteria, London McBride, Ifu Nweke, Samia Bano

The mandate of our ad hoc subcommittee is to create some flyers/promotional materials that will highlight resources for Bystander Intervention, particularly those resources that were shared during the training for bystander intervention in public spaces, hosted by EHRAC a few months ago.

Please see attached a flyer we have produced that highlights the organization "Right To Be".

In addition to this flyer, our ad hoc subcommittee is drafting another flyer to highlight the website dontcallthepolice.com which offers Community-based alternatives to police. Note: We will present this resource in a manner which will make it clear that we are not anti-law enforcement, and make clear for people when it is appropriate to call the police and when it may be better to utilize alternatives to police.

### Resource for Bystander Intervention in Public Spaces

In recent history, we've been witnessing a spike in disrespect, harassment, and hate violence.

The Culver City's **Equity & Human Relations Advisory Committee (EHRAC)** hosted a training for bystander intervention in public spaces. Bystander intervention is proven to be a very effective way to combat hate, discrimination, and prejudice!

The training highlighted **the 5 D's, i.e. 5 methods of Bystander Intervention** that are designed to be safe and not to escalate situations.

Learn the 5 D's at:
