

Proposal

Wittman Enterprises, LLC is pleased to offer the City of Culver City all billing and collection functions, reporting requirements, and ePCR Software Package described in this response based on the following fee schedule.

If the City terminates the fully-executed contract for any reason prior to the end of the contract term, the contracted software amortization and payout schedule will be enforced at that time. Price quotes do not reflect any software or hardware upgrade or replacement costs. Any requests for the return of ePCR software will be subject to the same terms of early contract termination and payout schedules. Because CAD integration and interface, hardware, and similar costs are unknown to us and beyond our control, any unpaid conversion/integration/interface fees and/or outstanding equipment balances will be due in full from the City at the end of the contracted term.
