BUILDING DIVISION

APPLICATION FOR ELECTRICAL PERMIT

LICENSED CONTRACTOR'S DECLARATION

I HEREBY AFFIRM THAT I AM LICENSED UNDER PROVISIONS OF CHAPTER 9 (COMMENCING WITH SECTION 7000) OF DIVISION 3 OF THE BUSINESS AND PROFESSIONS CODE, AND MY LICENSE IS IN FULL FORCE AND EFFECT.

LICENSE CLASS C10 LICENSE NO. 248739
DATE 7-21-82 CONTRACTOR _____

OWNER-BUILDER DECLARATION

I HEREBY AFFIRM THAT I AM EXEMPT FROM THE CONTRACTOR'S LICENSE LAW FOR THE FOLLOWING REASON (SEC. 70315, CALIFORNIA BUSINESS AND PROFESSIONS CODE: ANY CITY WHICH REQUIRES A PERMIT TO CONSTRUCT, ALTER, IMPROVE, DEMOLISH OR REPAIR ANY STRUCTURE, PRIOR TO ITS ISSUANCE, ALSO REQUIRES THE APPLICANT FOR SUCH PERMIT TO FILE A SIGNED STATEMENT THAT HE IS A LICENSED CONTRACTOR PURSUANT TO THE PROVISIONS OF THE CONTRACTOR'S LICENSE LAW. (CH. 9 (COMMENCING WITH SEC. 7000) OF DIV. 3 OF THE B. &P.C.) OR THAT HE IS EXEMPT THEREFROM AND THE BASIS FOR THE ALLEGED EXEMPTION. ANY VIOLATIONS OF SEC. 7031.5 BY ANY APPLICANT FOR A PERMIT SUBJECTS THE APPLICANT TO A CIVIL PENALTY OF NOT MORE THAN FIVE HUNDRED DOLLARS ($500.00):

- ☐ I , AS OWNER OF THE PROPERTY, OR MY EMPLOYEES WITH WAGES AS THEIR SOLE COMPENSATION, WILL DO THE WORK, AND THE STRUCTURE IS NOT INTENDED OR OFFERED FOR SALE (SEC. 7044, B. & P. C.: THE CONTRACTOR'S LICENSE LAW DOES NOT APPLY TO AN OWNER OF PROPERTY WHO BUILDS OR IMPROVES THEREON, AND WHO DOES SUCH WORK HIMSELF OR THROUGH HIS OWN EMPLOYEES, PROVIDED THAT SUCH IMPROVEMENTS ARE NOT INTENDED OR OFFERED FOR SALE. IF, HOWEVER, THE BUILDING OR IMPROVEMENT IS SOLD WITHIN ONE YEAR OF COMPLETION, THE OWNER-BUILDER WILL HAVE THE BURDEN OF PROVING THAT HE DID NOT BUILD OR IMPROVE FOR THE PURPOSE OF SALE.).
- ☐ I, AS OWNER OF THE PROPERTY, AM EXCLUSIVELY CONTRACTING WITH LICENSED CONTRACTORS TO CONSTRUCT THE PROJECT (SEC. 7044, B. & P.C.: THE CONTRACTOR'S LICENSE LAW DOES NOT APPLY TO AN OWNER WHO CONTRACTS FOR SUCH PROJECTS WITH A CONTRACTOR(S) LICENSED PURSUANT TO THE CONTRACTOR'S LICENSE LAW.).
- ☐ I AM EXEMPT UNDER SEC. _____, B. & P. C. FOR THIS REASON:

DATE _____ OWNER _____

WORKER'S COMPENSATION DECLARATION

I HEREBY AFFIRM THAT I HAVE A CERTIFICATE OF CONSENT TO SELF-INSURE OR A CERTIFICATE OF WORKER'S COMPENSATION INSURANCE OF A CERTIFIED COPY THEREOF (SECTION 3201, CA LABOR CODE).

POLICY NO. ON FILE COMPANY _____

- ☐ CERTIFIED COPY IS HEREBY FURNISHED.
- ☐ CERTIFIED COPY IS FILED WITH THE DEPARTMENT OF BUILDING & SAFETY.

DATE _____ APPLICANT _____

CERTIFICATE OF EXEMPTION FROM WORKER'S COMPENSATION INSURANCE

I CERTIFY THAT IN THE PERFORMANCE OF THE WORK FOR WHICH THIS PERMIT IS ISSUED, I SHALL NOT EMPLOY ANY PERSON IN ANY MANNER SO AS TO BECOME SUBJECT TO THE WORKEP'S COMPENSATION LAW OF CALIFORNIA.

DATE _____ APPLICANT _____

NOTICE TO APPLICANT: IF, AFTER MAKING THIS CERTIFICATION OF EXEMPTION, YOU SHOULD BECOME SUBJECT TO THE WORKEP'S COMPENSATION PROVISIONS OF THE LABOR CODE, YOU MUST FORTHWITH COMPLY WITH SUCH PROVISIONS OR THIS PERMIT SHALL BE DEEMED REVOKED.

CONSTRUCTION LENDING AGENCY

I HEREBY AFFIRM THAT THERE IS A CONSTRUCTION LENDING AGENCY FOR THE PERFORMANCE OF THE WORK FOR WHICH THIS PERMIT IS ISSUED (SEC. 3907, CIV. C.).

LENDER'S NAME _____
LENDER'S ADDRESS _____

I CERTIFY THAT I HAVE READ THIS APPLICATION AND STATE THAT THE ABOVE INFORMATION IS CORRECT. I AGREE TO COMPLY WITH ALL CITY AND STATE LAWS RELATING TO THE BUILDING CONSTRUCTION, AND HEREBY AUTHORIZE REPRESENTATIVES OF THIS CITY TO ENTER UPON THE ABOVE-MENTIONED PROPERTY FOR INSPECTION PURPOSES.

Bill Lewis 7-21-82
SIGNATURE OF OWNER OR CONTRACTOR ONLY DATE

APPLICATION IS HEREBY MADE TO THE DIRECTOR OF BUILDING AND SAFETY FOR A PERMIT SUBJECT TO THE CONDITIONS AND RESTRICTIONS SET FORTH IN THE CULVER CITY MUNICIPAL CODE AND OTHER APPLICABLE CODES.

1. EACH PERSON UPON WHOSE BEHALF THIS APPLICATION IS MADE AND EACH PERSON AT WHOSE REQUEST AND FOR WHOSE BENEFIT WORK IS PERFORMED UNDER OR PURSUANT TO ANY PERMIT ISSUED AS A RESULT OF THIS APPLICATION AGREES TO, AND SHALL, INDEMNIFY AND HOLD HARMLESS THE CITY OF CULVER CITY, ITS OFFICERS, AGENTS AND EMPLOYEES IN ACCORDANCE WITH THE PROVISIONS OF THE CULVER CITY MUNICIPAL CODE.
2. ANY PERMIT ISSUED AS A RESULT OF THIS APPLICATION BECOMES NULL AND VOID IF WORK IS NOT COMMENCED WITHIN ONE HUNDRED TWENTY (120) DAYS FROM DATE OF ISSUANCE OF SUCH PERMIT.

Culver City, California 90230

Registration No. 017319
1 tube inspected

Dear Dr. Custer:

This is to report the findings of a radiation safety survey made in accordance with the California Radiation Control Regulations by the Los Angeles County Health Department on March 27, 1975, of the x-ray facility located at the above address. This report is limited to those items which need improvement. Items in paragraphs containing section references are required per Title 17, California Administrative Code.

Registration

Section 30115 requires the registrant to report to the Department within 30 days, any change in the name or address of the registrant or location of the installation. Please complete and return to the California Department of Health the 'Report of Change' forms enclosed with this report.

Thank you for your cooperation. If you have any questions regarding the survey, or this report, please contact this office at 974-7891.

Very truly yours,

RALPH R. SACHS, M.D., M.P.H.
Deputy Director, Community Health Services

PART 2. EVACUATION PLANS AND PROCEDURES.

A. Evacuation Alarms - Describe the type of alarm signals that will be used to start an evacuation at this facility:

No

B. Evacuation drills.

Evacuation drills and records proving you have held such drills are required by California law. The drill record does NOT have to be mailed to the Fire Department with this business plan, but shall be maintained for a period of three years and shall be available for review by Fire Department personnel. The record shall include the facilitator's name, title, facility location, date of drill, and the signature of the facilitator. For your convenience, a form for recording this information is included with this packet. Make additional copies, as needed.

EVACUATION DRILL RECORD

Business Name: Fox Hill DRY cleaner

Street Address: 6223 Bristol Parkway, Culver City, CA 90230

Date of evacuation drill: 1-15-93

Brief description of drill: In case chemical spill, Keep Away from Chemical Area and Evacuate to outside fresh Air.

Facilitator's Name: [redacted]

Facilitator's Title: OWner

I hereby certify, under penalty of perjury, that I facilitated the evacuation drill as described above.

Signature of Facilitator [redacted]

Date Signed: 1-18-93

Date of evacuation drill: _____

Brief description of drill: _____

_____

Facilitator's Name: _____

Facilitator's Title: _____

I hereby certify, under penalty of perjury, that I facilitated the evacuation drill as described above.

Signature of Facilitator _____

Date Signed: _____

MAKE ADDITIONAL COPIES OF THIS FORM, AS NEEDED.

PART 4. TRAINING

Every Business handling hazardous materials above the minimum limits shall provide training for their employees in the following areas:

A. **Methods for safe handling of hazardous materials.**
B. **Procedures for notification and coordination with emergency agencies, in the event of a spill or threatened spill.**
C. **Use of emergency response equipment and supplies under the control of the handler.**
D. **Emergency mitigation procedures in response to a release or threatened release of hazardous material.**
E. **Tasks assigned to employees in the event of a hazardous materials emergency.**
F. **Evacuation procedures.**

Describe the type of training programs you either are currently using or will use during the next year to provide the required employee training. As training is completed, enter the completion date by the appropriate training description.

MAKE ADDITIONAL COPIES OF THIS FORM, AS NEEDED.

PART 5. PREVENTION

Part of the emergency pre-planning process is to identify potential hazards BEFORE an emergency, then either eliminate the hazard (if feasible) or prepare to handle the hazard should an emergency occur. To help you in this task, the form below is designed to help you identify potential hazards and to plan for minimizing the hazard. Complete this information for each hazardous materials storage location within your facility.

Hazardous Materials Storage Location: Back Side of Working Room and in Cleaning Machine.

Potential hazard(s) at this location:

A. _____

_____

B. _____

_____

C. _____

_____

Prevention Measures to be taken at this location:

A Near the Back Room

CULVER CITY HAZARDOUS MATERIALS DISCLOSURE PROGRAM

EMERGENCY COORDINATOR TASK COMPLETION SHEET

The Emergency Coordinator for your business should use this form when handling hazardous materials incidents at your facility. This form will serve as a handy checklist to help insure that all necessary steps have been completed. A check mark (✓) should be placed in the left-hand corner when each task is completed during the incident. In addition, the requested information would be written on the form. When the Fire Department responds to a hazardous materials emergency call at your facility, your Emergency Coordinator will be asked for a copy of this completed form by Fire Department personnel.

____ **Activate internal facility alarms or communication systems.**

____ **Start pre-arranged mitigation and evacuation plans.**

____ **Identify the specific names and amounts of the chemicals involved (USE THE EMERGENCY CHEMICAL IDENTIFICATION FORM, ATTACHED).**

____ **Notify the Fire Department.** **Time:**_____

____ **Notify the Office of Emergency Services.** **Time:**_____

____ **Notify the National Response Center.** **Time:**_____

____ **Notify surrounding facilities in danger.** **Time:**_____

____ **Choose an employee to direct emergency response units to the emergency scene.**

____ **Account for all evacuated personnel.**

____ **Have resource material available for use by responding agencies, such as maps, diagrams, material safety data sheets, etc.**

____ **When the incident was discovered: Date:**_____ **Time:**_____

____ **Describe the nature and extent of the incident:** _____

_____

____ **Identify actions taken by the business to control the incident. Be ready to describe these actions to Fire Department personnel.**

____ **Secure the incident scene to include treatment, storage or disposal of hazardous materials or waste involved.**

____ **Other Steps (describe on additional sheet, and attach to this one.)**

THIS FORM SHALL BE GIVEN TO THE EMERGENCY RESPONDERS UPON THEIR ARRIVAL AT THE FACILITY

CULVER CITY HAZARDOUS MATERIALS DISCLOSURE PROGRAM

BUSINESS PLAN

General Overview --

The State of California and the Federal Government have passed legislation requiring every business which handles, uses or stores hazardous materials above certain quantities to report what materials they handle, how much they handle, and to create an in house emergency plan to prepare in advance for hazardous materials emergencies. This plan, called a *BUSINESS PLAN*, must be reviewed for approval by Fire Department personnel. State law provides fines of up to $2,000 per day for failure to complete the Business Plan by the submission deadline.

To help you not only to prepare your Business Plan, but also to help make it an effective tool for your in-house planning, and to provide the Fire Department with the emergency information it needs, we have created this Business Plan booklet. Much of the information needed is already filled out. Lines are left for the other information you need to fill out for your business. Also included are forms you can use to track your training programs, evacuation plans, and to collect vital information needed by the Fire Department in an actual emergency.

When the Plan is completed, keep a copy for your use, and send a copy to the Fire Department so we can review it (as required by State law). Should you have any questions regarding the Business Plan, call (213) 202-5827 or 202-5800 for assistance.

Thank you for your help in completing this Business Plan. By working together, we can all help to make our community a safer place to live and work.

Sincerely,

Michael L. Olson
Fire Chief

MLO/kms

NOTICE OF ADMINISTRATIVE CHARGES

CHARGES

Culver City Municipal Code Ordinance 96-025 authorizes administrative assessment cost recovery charges relating to the enforcement of the Municipal Code.

It shall be a violation for any person, firm, entity or corporation to fail to comply within the prescribed time with "orders to comply" issued by the Culver City Fire Department.

Where the violation has not been corrected within the time period prescribed, additional compliance inspection(s) shall be assessed one hundred dollars (**$100.00**) for the first additional inspection, and

If compliance is still not achieved, a further administrative charge of five hundred dollars (**$500.00**) per each additional inspection required shall be assessed. **Such violation also will be subject to separate criminal prosecution.**

APPEALS

The "Initial Warning" cannot be appealed. If you wish to contest First and subsequent Notices and Order to Comply and/or the administrative fee assessment, you must file a written objection with the City Clerk's office within ten (10) days of the receipt of such Notice and Order to Comply. All appeals will be heard by the Municipal Code Appeals Committee. The hearing will be informal and you will be advised of the hearing date.

If you wish to appeal your Order to Comply and Administrative Assessment, you should be advised:

1. The Municipal Code Appeals Committee cannot change the provision of the Municipal Code or the Fire Code. If you believe the either Code is unreasonable, too harsh, too lenient, or unfair, and if you desire a change in the law, you must ask that the Code be amended. Amendment of the Municipal Code is exclusively within the control of the City Council; amendments to provisions of the Fire Code shall be directed to the State Fire Marshal's office.

2. If you wish to appeal, you must state a reason for your appeal. Reasons the Appeals Committee will consider are:
   (a). You are not the person responsible for causing or maintaining the violation;
   (b). The violation did not happen;
   (c). The condition noted does not violate the Code;
   (d). The time given to correct the violation was inadequate;
   (e). There are exceptional circumstances that the Appeals Committee should consider.

If you are unable to prove one of the reasons listed, it is unlikely your appeal will be successful.

CITY HALL 9770 CULVER BLVD., CULVER CITY, CA. 90232-0507

If you have more than one hazardous material at your site, the worst hazard level for each category is listed on the sign for all your hazardous materials. For example, if you have a material that has a health rating of 1, a fire rating of 3, and a reactivity rating of 0 (1-3-0), and if you have another material with a health rating of 2, a fire rating of 2, and a reactivity rating of 3 (2-2-3), your sign would show a health rating of 2, a fire rating of 3, and a reactivity rating of 3 (2-3-3).
Through this system, Fire Fighters can tell at a glance the worst-case hazard levels that can be found within the building. This can be of great assistance in an emergency!

WHERE DO I GET THE SIGNS?

The Culver City Fire Department will provide signs at our cost ($5 each for vinyl backed or $10 each for aluminum backed). The signs are available at the Fire Department Administration Office at City Hall, 4095 Overland Avenue, Culver City. If you choose to buy your own signs from another source, they must be NFPA 704 Identification Signs, with 7 1/2 inch by 7 1/2 inch borders.

HOW DO I FIND OUT WHAT NUMBERS I NEED TO PUT ON THE SIGNS?

The NFPA has determined the ratings for over 1400 hazardous materials commonly used in the business. If you prepare a list of what hazardous materials you handle, the Fire Department will tell you what numbers you need to use. If your list is short, tell the Fire Fighters as they are inspecting you business or call the fire Department at (310) 202-5827, and we can give you the information over the phone. If your list is long, please bring your list to the Fire Administration office at 4095 Overland Avenue, Culver City, and we will be happy to assist you.

WHERE DO THE SIGNS GO?

The signs must be located at the entrances where hazardous materials are located. Entrances may be to the rear or side as well as the front of a building or structure. The number of, and location of signs, will be determined by the fire department personnel inspecting your business.

WHO WILL HANG AND MAINTAIN MY SIGNS?

Each business will hang and maintain their signs in the predetermined locations, and must maintain these signs as long as they handle hazardous materials. When hanging your sing, please remember it is a diamond shaped sign. The red quadrant is the tip, while the white quadrant is the bottom (please see the illustration).

QUESTIONS ?????

If you have any questions regarding the Hazardous Materials Identification Program please call the Culver City Fire Department at (310) 202-5827.

INSTRUCTIONS FOR THE HAZARDOUS MATERIALS FEES INVOICE

Items 1 through 5 of the Invoice should be filled out by the Inspection Team at the time of inspection. Furthermore, if your business at this location does not use hazardous materials, or uses only a few hazardous materials, you may find all items on the form have been completed for you by the Culver City Fire Department inspection team. If this is the case, make out your check and mail your forms as directed at the bottom of the form.

If your business uses more than a couple types of hazardous materials, chances are that all or part of Items 6 through 9 may have been left for you to complete. The instructions for these items are provided below.

Item 6. If your business handles hazardous materials in amounts equal to or greater than reportable quantities, place a check mark ( ) in the box by the number 6, and write $75 in the space at the right of the form for Item No. 6. If you are unsure if you handle reportable quantities or are not sure what is considered a "hazardous material", see the instructions and information sheets in your forms packet.

Item 7. This item is designed to charge on the basis of the average daily amount of hazardous materials your business handles during the course of a year, as measured in pounds. Exemptions from "per pound" fees are provided in certain cases. The calculations are made as follows:

A Through D -- Use the "Exemption" worksheet to determine the amounts to write in subsections A through D for Item 7.

E. Total Pounds of Hazardous Materials Exempt from "Per Pound Fees -- Add the total number of pounds written in subsections B, C, and D, and write that sum on both lines for subsection 7 E.

F. Pounds Subject to "Per Pound" Fees -- Subtract the amount on line 7 E from the amount on line 7 A.

H. Amount of "Per Pound" Fee Owed -- Multiply the amount on line 7 F by the amount on line 7 G, and enter the product on both lines for subsection 7 H.

Item 8A. Number of Underground Tanks -- On line 8 A, enter the number of underground tanks you actively use for the storage of hazardous materials. Only count tanks which are 100% underground.

C. Amount Owed for Underground Tank Storage -- Multiply the amount on Line 8 A by the amount on Line 8 B, and enter the product on both lines of Subsection 8 C.

Item 9. Total Amount Owed for Hazardous Materials -- Add the amounts on Lines 6, 7H, and 8C, and write the sum on both spaces of Line 9.

When you are done, place your completed forms, including the white copy of the invoice and a check for that amount, in the envelope provided for you. Be sure that the address shown on the bottom of the invoice form shows through the window on the envelope. To avoid penalties, be sure to mail the completed forms, invoice, and payment within 45 days from date of inspection.

CULVER CITY HAZARDOUS MATERIALS DISCLOSURE PROGRAM

BUSINESS PLAN

General Overview --

The State of California and the Federal Government have passed legislation requiring every business which handles, uses or stores hazardous materials above certain quantities to report what materials they handle, how much they handle, and to create an in house emergency plan to prepare in advance for hazardous materials emergencies. This plan, called a *BUSINESS PLAN*, must be reviewed for approval by Fire Department personnel. State law provides fines of up to $2,000 per day for failure to complete the Business Plan by the submission deadline.

To help you not only to prepare your Business Plan, but also to help make it an effective tool for your in-house planning, and to provide the Fire Department with the emergency information it needs, we have created this Business Plan booklet. Much of the information needed is already filled out. Lines are left for the other information you need to fill out for your business. Also included are forms you can use to track your training programs, evacuation plans, and to collect vital information needed by the Fire Department in an actual emergency.

When the Plan is completed, keep a copy for your use, and send a copy to the Fire Department so we can review it (as required by State law). Should you have any questions regarding the Business Plan, call (213) 202-5827 or 202-5800 for assistance.

Thank you for your help in completing this Business Plan. By working together, we can all help to make our community a safer place to live and work.

EMERGENCY COORDINATOR TASK COMPLETION SHEET

The Emergency Coordinator for your business should use this form when handling hazardous materials incidents at your facility. This form will serve as a handy checklist to help insure that all necessary steps have been completed. A check mark (✓) should be placed in the left-hand corner when each task is completed during the incident. In addition, the requested information would be written on the form. When the Fire Department responds to a hazardous materials emergency call at your facility, your Emergency Coordinator will be asked for a copy of this completed form by Fire Department personnel.

_____ **Activate internal facility alarms or communication systems.**

_____ **Start pre-arranged mitigation and evacuation plans.**

_____ **Identify the specific names and amounts of the chemicals involved (USE THE EMERGENCY CHEMICAL IDENTIFICATION FORM, ATTACHED).**

_____ **Notify the Fire Department.** **Time:**_____

_____ **Notify the Office of Emergency Services.** **Time:**_____

_____ **Notify the National Response Center.** **Time:**_____

_____ **Notify surrounding facilities in danger.** **Time:**_____

_____ **Choose an employee to direct emergency response units to the emergency scene.**

_____ **Account for all evacuated personnel.**

_____ **Have resource material available for use by responding agencies, such as maps, diagrams, material safety data sheets, etc.**

_____ **When the incident was discovered: Date:**_____ **Time:**_____

_____ **Describe the nature and extent of the incident:** _____

_____

_____ **Identify actions taken by the business to control the incident. Be ready to describe these actions to Fire Department personnel.**

_____ **Secure the incident scene to include treatment, storage or disposal of hazardous materials or waste involved.**

_____ **Other Steps (describe on additional sheet, and attach to this one.)**

THIS FORM SHALL BE GIVEN TO THE EMERGENCY RESPONDERS UPON THEIR ARRIVAL AT THE FACILITY

B. OPTIONAL NOTIFICATIONS

Your business may also wish to contact the following in the event of a hazardous materials emergency:

* **Hazardous Waste Contractor**

  Name AAD Disposal **Phone** (213) 582-5900

* **Insurance Company**

  Name Henderson Insurance **Phone** (213) 592-3317

* **Poison Control Center (Northridge Toxicology Center) (800) 682-9000 (Emergency Use Only!)**

PART 2. EVACUATION PLANS AND PROCEDURES.

A. Evacuation Alarms - Describe the type of alarm signals that will be used to start an evacuation at this facility:

_____

_____

_____

_____

B. Evacuation drills.

Evacuation drills and records proving you have held such drills are required by California law. The drill record does NOT have to be mailed to the Fire Department with this business plan, but shall be maintained for a period of three years and shall be available for review by Fire Department personnel. The record shall include the facilitator's name, title, facility location, date of drill, and the signature of the facilitator. For your convenience, a form for recording this information is included with this packet. Make additional copies, as needed.

EVACUATION DRILL RECORD

Business Name: Fox Hill Dry cleaner

Street Address: 6223 Bristol Parkway, Culver City, CA 90230

Date of evacuation drill: March 15, 1995

Brief description of drill: In case chemical spill, Keep Away From chemical Area & Evacuate to outside Fresh Air.

Facilitator's Name: [redacted]

Facilitator's Title: Owner

I hereby certify, under penalty of perjury, that I facilitated the evacuation drill as described above.

Signature of Facilitator [redacted]

Date Signed: 5-1-95

Date of evacuation drill: _____

Brief description of drill: _____

_____

Facilitator's Name: _____

Facilitator's Title: _____

I hereby certify, under penalty of perjury, that I facilitated the evacuation drill as described above.

Signature of Facilitator _____

Date Signed: _____

MAKE ADDITIONAL COPIES OF THIS FORM, AS NEEDED.

PART 4. TRAINING

Every Business handling hazardous materials above the minimum limits shall provide training for their employees in the following areas:

A. **Methods for safe handling of hazardous materials.**
B. **Procedures for notification and coordination with emergency agencies, in the event of a spill or threatened spill.**
C. **Use of emergency response equipment and supplies under the control of the handler.**
D. **Emergency mitigation procedures in response to a release or threatened release of hazardous material.**
E. **Tasks assigned to employees in the event of a hazardous materials emergency.**
F. **Evacuation procedures.**

Describe the type of training programs you either are currently using or will use during the next year to provide the required employee training. As training is completed, enter the completion date by the appropriate training description.

MAKE ADDITIONAL COPIES OF THIS FORM, AS NEEDED.

PART 5. PREVENTION

Part of the emergency pre-planning process is to identify potential hazards BEFORE an emergency, then either eliminate the hazard (if feasible) or prepare to handle the hazard should an emergency occur. To help you in this task, the form below is designed to help you identify potential hazards and to plan for minimizing the hazard. Complete this information for each hazardous materials storage location within your facility.

Hazardous Materials Storage Location: Back Side of working Room, and in cleaning Machine

Potential hazard(s) at this location:

A. _____

_____

B. _____

_____

C. _____

_____

Prevention Measures to be taken at this location:

A Near the Back Room

_____

_____

Estimated date of completion: _____

Actual date of completion: _____

B. _____

_____

Estimated date of completion: _____

Actual date of completion: _____

C. _____

_____

Estimated date of completion: _____

THIS FORM SHALL BE GIVEN TO THE EMERGENCY RESPONDERS UPON THEIR ARRIVAL AT THE FACILITY

CULVER CITY
HAZARDOUS MATERIALS DISCLOSURE PROGRAM
INVOICE FORM INSTRUCTIONS

ITEM **INSTRUCTION**

1. Enter your business name.
2. Enter the facility's site address.
3. Enter the facility's phone number.
4. Leave this line blank.
5. Enter your Hazmat Account Number from the mailing label of the envelope in which this packet arrived.
6. If you have reportable quantities of hazardous materials at this site, enter "$75" on the line to the right. This is a "flat fee" that ALL businesses with reportable quantities must pay.
7. Pounds of Reportable Hazardous Materials.
   A. Enter the total pounds of hazardous materials you are reporting on this line. Use the "Average Daily Amount" you reported for each substance on Hazmat Form 3. (Note:to convert gallons to pounds for the purposes of this billing, multiply gallons by 8.35. To convert cubic feet of gas at standard temperature and pressure to pounds, multiply cubic feet by 0.75).

   Note: To save money on your bill, if any of the materials you have are recycled, kept in underground tanks, or "prepackaged for direct sale to the public", enter the number of pounds of that material on lines 7B, 7C, and 7D. These items are exempt from the "per pound" fees, and will be subtracted from your total pounds. These exemptions are as follows:

   B. Enter the number of pounds of reportable materials you recycle on this line.
   C. Enter the number of pounds of reportable materials kept in tanks which are 100% underground.
   D. Enter the number of pounds of reportable materials pre-packaged for direct sale to the public. This means your business does not repackage the materials, and sells the material directly to the public, not to another business.
   E. Add lines B, C, and D, then enter the sum in both of the blanks on line 7E. This is your total pounds exempt from the "per pound" fee.
   F. Subtract line 7E from line 7A, and enter the result on line 7F. This is your total pounds subject to the "per pound" fee.
   H. Multiply the amount on line 7F by the amount on line 7G, then place the result in both blanks of line 7H. This is your "per pound" portion of your fee.

8. Underground Tanks.
   A. Enter the number of underground tanks you actively use to store hazardous materials on Line 8A.
   C. Multiply the number on line 8A by the number on line 8B, then place the result in both blanks on line 8C. This is your underground tank portion of the fee.

9. TOTAL FEE -- Add lines 6, 7H, and 8H, then place the total on line 9. This is your total hazardous materials fee for the year.

After you have completed the Invoice Form, remove the yellow copy for you to keep for your records. Make out a check to: CITY OF CULVER CITY for the amount shown. Mail your check, invoice, and reporting forms to: CULVER CITY TREASURER, P.O. BOX 507, CULVER CITY, CALIFORNIA 90232-0507.

If you have any questions about this form, please call the Fire Department Monday through Friday at (213) 202-5800.

DATA ELEMENT	*INFORMATION REQUIRED*
Solid, Liquid, or Gas	**Check the appropriate box to show if this material is a solid, a liquid or a gas. Check only one box of the three.**
Pure, Mixture, or Waste	**Check the appropriate box to show if this material is a pure chemical, a mixture of chemicals, or a hazardous waste. Check only one box of the three. If the material is a waste, provide an estimate of the annual amount of this specific waste generated.**
Extremely Hazardous Material	**If this material is shown on the list of extremely hazardous materials, then put check mark in this box.**
Radioactive	**If the material is radioactive, check the appropriate box and fill in the number of curies.**
Waste Classification	**If the material is a waste, enter the appropriate California State waste 3-digit code (See Table of Waste Codes included with this packet).**
Physical & Health Hazard Categories	**Check all the hazard category boxes that apply to this material. The specific hazards are shown on the Material Safety Data Sheet (MSDS) for this material. (If you don't have an MSDS for this material, obtain one from your vendor.) The hazard categories are as follows:** ***FIRE*** **- Materials that are flammable or combustible, or can add to a fire, such as oxidizers.** ***REACTIVE*** **- Materials that can react immediately and dangerously with other chemical substances or with water.** ***SUDDEN PRESSURE RELEASE*** **- Materials such as compressed gases or explosives.** ***IMMEDIATE HEALTH*** **- Materials that can cause immediate injuries, major or minor (i.e., acids, irritants, etc.).** ***DELAYED HEALTH*** **- Materials that can cause delayed health effects, such as known or suspected carcinogens (causes cancer), teratogens (causes birth defects), etc.**
Amount & Time at Facility	***UNITS OF MEASURE*** **- Check the unit of measure that is most appropriate for the material being reported (gallons, pounds, cubic feet, grams, kilograms, or "other" at standard temperature and pressure). If "other" is chosen, write in the measurement type.** ***MAXIMUM DAILY AMOUNT*** **- Fill in the *most* of a chemical substance you have at this site *at any one time*. This is most likely the amount you have right after a large delivery, and would equal the amount of the delivery PLUS whatever you already had on hand at the time of the delivery (in storage, in equipment), etc. See the example on the next page.**

DATA ELEMENT	*INFORMATION REQUIRED*
"P"	**In this column, enter the code that best describes the storage pressure for the specific material and location. Use codes below:**

CODE	*STORAGE PRESSURE*
1	Stored at normal (ambient) pressure.
2	Stored at greater than ambient pressure
3	Stored at less than ambient pressure (i.e. in a vacuum)

"T" — **In this column, enter the code that best describes the storage temperature for the specific material and location. Use codes below:**

CODE	*STORAGE TEMPERATURE*
4	Ambient (room) temperature
5	Greater than ambient (room) temperature
6	Less than ambient (room) temperature
7	Cryogenic conditions

Location — **Enter a brief narrative that describes the storage location. (e.g. "North-west corner of storage shed #2").**

Mixture — **If the material listed is a mixture, provide the following information for each of the three most hazardous components (this information is found in the MSDS for the material):**

- Chemical name
- CAS#
- % of the mixture, by weight (if a range, use the highest number in the range).
- EHS? If this part of the mixture is on the list of Extremely Hazardous Substances (EHS), enter "Yes" in this box. If it not on the list, enter "No".

Billing Exemptions — **If this material falls into one of the following categories, it is exempt from "per pound" fees (although the flat fee will still apply). Check any boxes that apply. The categories are follows:**

Recycled - **This material is recycled.**

Prepackaged for direct sale to the public - **This material is received prepackaged and is sold directly by your business to the public. Items your business receives in bulk containers and then puts into smaller containers do not qualify. Neither do materials sold by your business to another business.**

Stored in below-ground tanks - **Materials stored in tanks where the tank is 100% below ground level.**

FILL OUT A COMPLETE "CHEMICAL INFORMATION" BLOCK FOR EVERY REPORTABLE HAZARDOUS AND EXTREMELY HAZARDOUS MATERIAL HANDLED BY YOUR FACILITY.

CULVER CITY HAZARDOUS MATERIALS DISCLOSURE PROGRAM

BUSINESS EMERGENCY PLAN

PART 1. EMERGENCY NOTIFICATIONS

A handler of hazardous materials is required to immediately report any release or threatened release of hazardous materials to the Culver City Fire Department. Failure to do so may result in criminal and/or civil prosecution.

A. REQUIRED NOTIFICATIONS

In the event of a release or threatened release of hazardous materials, call each of the following agencies:

AGENCY	*PHONE NUMBERS*
Culver City Fire Department	911
California Office of Emergency Services	(800)852-7550
National Response Center	(800)424-8802

Provide the following information when you call:
* Name of the person and business.
* Business street address.
* Location of the incident.
* Type of incident (spill, gas release, etc.)
* The name(s) of the chemical substance(s) involved.
* The amount of the chemical substances involved.
* The extent of injuries, if any.
* Possible hazards to human health and/or the environment.
* Emergency call-back phone number [redacted]

If a chemical spill or release at your facility could create a toxic cloud or a liquid stream that could drift beyond your facility, then, identify nearby facilities that could be in imminent danger.

To the North:
Facility Marshall **Phone** [redacted]

Facility _____ **Phone** ( ) _____-_____

To the South:
Facility _____ **Phone** ( ) _____-_____

Facility _____ **Phone** ( ) _____-_____

To the East:
Facility _____ **Phone** ( ) _____-_____

Facility _____ **Phone** ( ) _____-_____

To the West:
Facility VACANT **Phone** ( ) _____-_____

Facility De Voe Travel service **Phone** [redacted]

Part 2. Continued

EVACUATION PLANNING

C. Describe the evacuation routes, emergency exits, and staging areas for employees in each work area at this facility. (A "staging area" is a specific location where your personnel meet after an evacuation, where you make sure everyone got out safely).

1. **Working area:** Alteration Room Area
   Evacuation route: Front Door (Alteration Room)
   Emergency exits: Front Door
   Staging area:
2. **Working area:** Press Area
   Evacuation route: Front Door and Back Door
   Emergency exits: Back Door
   Staging area:
3. **Working area:** Counter Area
   Evacuation route: Front Door
   Emergency exits: Alteration Room
   Staging area:
4. **Working area:** Cleaning Area
   Evacuation route: Front Door - Back Door
   Emergency exits: Alteration Room Front Door
   Staging area:
5. **Working area:** Office (Back Room)
   Evacuation route: Office 2 Door
   Emergency exits: Front Door and Side Door ant
   Staging area: Alteration Room Front Door

MAKE ADDITIONAL COPIES OF THIS FORM, AS NEEDED.

PART 3. EMPLOYEE RESPONSIBILITIES.

Every business is required to develop an emergency plan. Part of this plan shall include the pre-assignment of important emergency duties to specific employees, and training of employees to carry out these emergency duties. Provide this information below for those employees who will carry out the emergency duties.

JOB TITLE: Owner or Manager

TRAINING RECORDS
FOR HAZARDOUS MATERIALS AND EMERGENCIES

In addition to planning and conducting training programs, each employer should maintain training records for no less than three years. For your convenience, a form for recording this information is provided for your use. These reports do not have to be mailed back to the Fire Department with the Business Plan, but should be available to Fire Department personnel upon request. Make as many additional copies of this form as you need.

A BUSINESS IS REQUIRED BY LAW TO NOTIFY THE CULVER CITY FIRE DEPARTMENT WITHIN 30 DAYS OF ANY OF THE FOLLOWING EVENTS:

1. **Change of business address.**
2. **Change of business ownership.**
3. **Change of business name.**
4. **Cessation of business operation (quitting business).**
5. **Use or handling of a previously undisclosed hazardous material.**
6. **A 100% increase in the quantity of a previously disclosed hazardous material.**

IN ADDITION, IF A BUSINESS HANDLES EXTREMELY (ACUTELY) HAZARDOUS MATERIALS, THE BUSINESS MUST NOTIFY THE CULVER CITY FIRE DEPARTMENT WITHIN 30 DAYS OF ANY OF THE FOLLOWING EVENTS:

1. **A modification, change, or addition to your facility which either increases your usage of extremely hazardous materials by 10% or greater, or substantially increases the risk in handling extremely hazardous materials at that address.**

2. **If you have prepared a Risk Management and Prevention Program, any changes to your operations and/or procedures which require changes in your Risk Management and Prevention Program.**

A COPY OF THE PLAN SHALL BE RETAINED AT YOUR BUSINESS FOR REVIEW BY THE FIRE DEPARTMENT PERSONNEL.

I CERTIFY, UNDER PENALTY OF PERJURY, THAT THE ENCLOSED INFORMATION IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE.

FORM REVISED 12/10/96

CULVER CITY
HAZARDOUS MATERIALS
IDENTIFICATION PROGRAM

REQUIREMENT FOR HAZARDOUS MATERIALS IDENTIFICATION SIGNS

To meet the requirements of the Uniform Fire Code, all businesses that have more than a certain amount of hazardous materials at their business site must identify each location where hazardous materials are stored, dispensed, used or handled. These locations must be identified with specialized signs. Information is presented below to help you understand if this sign program applies to you, the purpose for these signs and how to comply with the regulations.

DOES MY BUSINESS HANDLE HAZARDOUS MATERIALS?

According to the California Health and Safety Code (H&SC) Section 25501(j) a "hazardous material " is "...any material that, because of its quantity, concentration, physical or chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released...". In other words, if there is any kind of hazard associated with a material, it is a "hazardous material ". This includes items such as gasoline most solvents, many cleaning products, pesticides, etc.

HOW MUCH "HAZARDOUS MATERIALS" MUST MY BUSINESS HANDLE BEFORE I AM REQUIRED TO INSTALL HAZARDOUS MATERIALS SIGNS?

If your business handles any kind of hazardous material that requires a permit from the Fire Department, or if your business handles *AT ANY ONE TIME* a hazardous material equal to or greater than 55 gallons for a liquid, 500 pounds for a solid, or 200 cubic feet for a gas, then you are REQUIRED to have hazardous materials signs installed. These signs are required by Sections 80.104(e), 80.301 (d), and 80.401 (a) of the Uniform Fire Code (UFC).

WHAT ARE THESE SIGNS AND WHAT DO THEY TELL THE FIRE DEPARTMENT?

These signs are based on the National Fire Protection Association (NFPA) Standard No. 704, which is used throughout the United States to help identify the hazards associated with hazardous materials. The sign is diamond shaped, and divided into four sections (see illustration, right). The left quadrant is colored blue, and stands for health hazard. The top quadrant is red in color, and represents fire hazard. The right quadrant is yellow, and shows the likelihood of reactivity with other chemicals. The bottom quadrant is white, and is reserved for special hazards (i.e. oxidizer, water reactive, radioactive).
A number is placed in each quadrant, ranging from 0 to 4. "0 " represents no hazard, while "4 " represents the worst hazard.

Culver City
Hazardous Materials Disclosure Program
Certification Statement for 1995

I certify, under penalty of purgery, to the best of my knowledge, that none of the inventory amounts of the hazardous materials handled by my business have increased by more than 10% for any hazardous material reported by this business to the Culver City Fire Department for calendar year 1994. Furthermore, this business has not handled any hazardous or extremely hazardous material at or above reportable quantities in 1995 that were not reported to the Culver City Fire Department in 1994.

NOTICE OF CONDITIONS NOT IN COMPLIANCE WITH THE FIRE REGULATIONS AND ORDER TO COMPLY

Fire Control #: [redacted]
Engine Co. Name: 936
Inspected By: STORMS

O/C 1. ADDRESS NUMERALS & BUSINESS LICENSE — BUSINESS LICENSE #: _____

(X) a. UFC 10.208 Business must have address numbers readily visible from the street.
( ) b. CCFD Business must have a current Culver City business license.

2. FIRE PROTECTION EQUIPMENT

( ) a. UFC 10.301 You must provide ____ Fire extinguishers for proper Fire Protection.
( ) b. UFC 10.302 Fire Extinguishers be serviced, mounted and identified with a sign.
( ) c. UFC 10.302 Your extinguisher(s) system is/are due for their annual maintenance. Kitchen hood systems are required to be serviced semi-annually.
( ) d. Title 19, Sec. 904-904.5 Automatic sprinkler systems and/or standpipes must have a quarterly maintenance inspection and 5-year service. Records of both must be kept. Five-year service date is _____.
( ) e. UFC 10.206a Provide and maintain access to and visibility of Fire Department connection.
( ) f. NFPA 13.3 Secure the sprinkler control (OS & Y) valve in the open position with a chain and padlock.
( ) g. UBC 3802b 3803d,4, 3805d Restore the exterior Fire Department hose connections to the fire sprinkler and standpipe system to proper operating condition.
( ) h. UFC 10.302.2 Replace the defective fire hose on the interior standpipe hose connection.
( ) i. UFC 10.302 Re-rack the fire hose. Fire hose shall be maintained in readiness.
( ) j. UMC 2003a Clean the filters, hoods and ducts over cooking surface in the kitchen.

3. ELECTRICAL

O/C ( ) a. UFC 85.104 Circuit breakers may not be taped or secured in the "ON" position.
( ) b. UFC 85.106 Extension cords are prohibited and may not be used in place of fixed wiring.
( ) c. UFC 85.107 Multi-plug adapters are prohibited unless equipped with U.L. Listed circuit breakers.
O/C (X) d. NEC 400-3, Discontinue the use of unapproved electric wiring.
O/C (X) e. NEC 370.15 Provide and maintain approved cover plates on all electrical outlets, switches, junction and pull boxes.

4. CLEARANCES & EXITS

( ) a. BC33.3a Clear Aisle's to a minimum of 36/44"
( ) b. UFC 85.108 Minimum 30" clearance shall be provided in front of electrical panels.
( ) c. UFC 10.206 Access clearance shall be provided around fire protection equipment.
( ) d. UFC 11.404 Minimum 36" clearance shall be provided on all sides of heating equipment.
( ) e. NFPA 13 Clearance between the bottom of sprinkler heads and the top storage shall not be less than 18 inches
( ) f. UFC 10.302 Remove all obstructions to the interior standpipe outlet.
( ) g. UFC 11.302 Provide and maintain clearance of more than 24" between the top of all storage and the ceiling.
( ) h. UFC 12.103 All exit doors must be unobstructed.
( ) i. UFC 12.108 Exit signs shall be installed at required exit doorways and where other wise necessary to indicate the direction of egrees when the exit serves an occupant load of 50 or more.
( ) j. UBC 3313 Repair and maintain the required illuminated exit signs in operable condition at all times the building is occupied
( ) k. UFC 12.104e Remove blocking devices from all automatic or self-closing doors.
( ) l. UBC 3305 Provide and maintain approved automatic closing device(s) required on fire door(s).
( ) m. UFC 12.104a Repair the exit door to permit free and proper operation.
( ) n. UBC 3304c Discontinue the use of and remove all unapproved locks, latches, hasps, fasteners or bolts from the required exit door.
( ) o. UBC 3304c Exit doors shall be openable from the inside without the use of a key or any special knowledge or effort.
( ) p. UFC 11.201 Improve and maintain house keeping standards

5. HAZARDOUS MATERIALS

( ) a. UFC 80.103 A Hazardous Materials Disclosure must be submitted for 55 gallons, 500 pounds or 200 cubic feet of a hazardous material.
( ) b. UFC 80.104d MSDS shall be kept on premises at all times.
( ) c. UFC 80.104e Provide approved 704 signs for building. Appropriately label chemical or hazardous waste containers.
( ) d. UFC 74.107 All compressed gas cylinders shall be adequately secured to prevent falling or being knocked over.
( ) e. UFC 45.202 Discontinue unapproved spraying of flammable liquids and provide an approved spray booth for this operation.
( ) f. UFC 45.201f Provide metal waste cans for rags or waste impregnated with finishing materials.
( ) g. UFC 45.201 Clean or replace the spray booth filters.
( ) h. UFC 26.104 Provide an approved flammable liquid storage cabinet for storage of 10 or more gallons of flammable liquid.
( ) i. UFC 79.802 Discontinue gravity dispensing of flammable or combustible liquids.
( ) j. UFC 79.802d Provide and maintain adequate grounding and bonding for the flammable liquid dispensing.
( ) k. UFC 79.806 Discontinue dispensing. handling or draining of flammable or combustible liquids as flammable vapors may reach a source of ignition.
( ) l. UFC 79.104a Provide approved safety containers for the storage and handling of flammable or combustible liquids.

6. STRUCTURAL

( ) a. UBC 10.401 Repair the ceiling, as necessary, to maintain the required fire resistive construction.
( ) b. UBC 10.401 Repair the wall(s), as necessary, to maintain the required resistive construction.
( ) c. UBC 1706b Repair the trash chute door(s), as necessary, to make them self-closing.
( ) d. UFC 11.406 Provide and maintain all trapdoors and scuttle covers in a closed position at all times.

THE FOLLOWING FORMS ARE FOR USE IN THE EVENT OF AN ACTUAL OR THREATENING HAZARDOUS MATERIALS EMERGENCY.

FILL THESE FORMS OUT COMPLETELY, AND BE READY TO HAND THEM TO THE FIRE DEPARTMENT PERSONNEL WHEN THEY ARRIVE AT THE EMERGENCY SCENE.

IN THE EVENT OF AN EMERGENCY,

CALL 911

Part 2. Continued

EVACUATION PLANNING

C. Describe the evacuation routes, emergency exits, and staging areas for employees in each work area at this facility. (A "staging area" is a specific location where your personnel meet after an evacuation, where you make sure everyone got out safely).

1. **Working area:** Alteration Room
   Evacuation route: Front Door (Alteration Room)
   Emergency exits: Front Door
   Staging area:
2. **Working area:** Press Area
   Evacuation route: Front Door and Back Door
   Emergency exits: BACK Door
   Staging area:
3. **Working area:** Counter Area
   Evacuation route: Front Door
   Emergency exits: " "
   Staging area:
4. **Working area:** Cleaning Area
   Evacuation route: Front Door – Back Door
   Emergency exits: " "
   Staging area:
5. **Working area:**
   Evacuation route:
   Emergency exits:
   Staging area:

MAKE ADDITIONAL COPIES OF THIS FORM, AS NEEDED.

PART 3. EMPLOYEE RESPONSIBILITIES.

Every business is required to develop an emergency plan. Part of this plan shall include the pre-assignment of important emergency duties to specific employees, and training of employees to carry out these emergency duties. Provide this information below for those employees who will carry out the emergency duties.

JOB TITLE: Owner or Manager

EMERGENCY FUNCTION(S):

A. Call 911

B. Turn off Boiler

C. Turn off Electric System

D. Evacuate All Employees

E. _____

Has this employee received training in these functions? (Check one): ☒ **YES** ☐ **NO**

TRAINING RECORDS
FOR HAZARDOUS MATERIALS AND EMERGENCIES

In addition to planning and conducting training programs, each employer should maintain training records for no less than three years. For your convenience, a form for recording this information is provided for your use. These reports do not have to be mailed back to the Fire Department with the Business Plan, but should be available to Fire Department personnel upon request. Make as many additional copies of this form as you need.

Employee Name: [redacted]

Employee Title: spoter and owner

Training Provided: 6 years Experience and Red the Rules printed Programs.

A BUSINESS IS REQUIRED BY LAW TO NOTIFY THE CULVER CITY FIRE DEPARTMENT WITHIN 30 DAYS OF ANY OF THE FOLLOWING EVENTS:

1. **Change of business address.**
2. **Change of business ownership.**
3. **Change of business name.**
4. **Cessation of business operation (quitting business).**
5. **Use or handling of a previously undisclosed hazardous material.**
6. **A 100% increase in the quantity of a previously disclosed hazardous material.**

IN ADDITION, IF A BUSINESS HANDLES EXTREMELY (ACUTELY) HAZARDOUS MATERIALS, THE BUSINESS MUST NOTIFY THE CULVER CITY FIRE DEPARTMENT WITHIN 30 DAYS OF ANY OF THE FOLLOWING EVENTS:

1. **A modification, change, or addition to your facility which either increases your usage of extremely hazardous materials by 10% or greater, or substantially increases the risk in handling extremely hazardous materials at that address.**

2. **If you have prepared a Risk Management and Prevention Program, any changes to your operations and/or procedures which require changes in your Risk Management and Prevention Program.**

A COPY OF THE PLAN SHALL BE RETAINED AT YOUR BUSINESS FOR REVIEW BY THE FIRE DEPARTMENT PERSONNEL.

I CERTIFY, UNDER PENALTY OF PERJURY, THAT THE ENCLOSED INFORMATION IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE.

CULVER CITY HAZARDOUS MATERIALS DISCLOSURE PROGRAM

FACILITY INFORMATION FORM

HAZ MAT FORM 1

Reporting Period 1/1 to 12/31 19 92 **Date Received** 1-8-93

SECTION 1. FACILITY & OWNER/OPERATOR IDENTIFICATION

BUSINESS NAME: Fox Hill Dry Cleaner

FACILITY STREET ADDRESS: 6223 Bristol Parkway

CITY: Culver City **STATE:** CA **ZIP CODE:** 90230 **ACCOUNT#:** [redacted]

DUN & BRADSTREET #: _____ **SIC CODE (4 Digit #):** _____

NATURE OF BUSINESS: Dry cleaners

OWNER/OPERATOR NAME: [redacted] **PHONE NO.** [redacted]

MAILING ADDRESS (If Different): Same as Above

CITY: _____ **STATE:** _____ **ZIP CODE:** _____

SECTION 2. HAZARDOUS MATERIALS USAGE

1. Hazardous Materials - **California law says you must report all HAZARDOUS materials you handle, use or store which is equal to or exceeds 55 gallons (for liquids), 500 pounds (for solids), or 200 cubic feet (for gases) *AT ANY ONE TIME*. Does the amount of hazardous materials your business handles *AT ANY ONE TIME* at this site within a calendar year exceed these amounts? (To find out what is considered a "hazardous material", see page 1 of this packet). If yes, place a check mark in one of the boxes below:**

☒ **YES** ☐ **NO**

2. Extremely Hazardous Materials - **Federal law establishes reportable amounts of Extremely Hazardous Materials. (To find out which chemicals are considered "Extremely Hazardous" and what amounts are considered "reportable quantities", see the Environmental Agency's list of extremely hazardous materials included in this packet). Does this business at this site handle, use, or store AT ANY ONE TIME amounts of Extremely Hazardous Materials equal to or greater than "reportable quantities"? If yes, place a check mark in one of the boxes below:**

☐ **YES** ☐ **NO**

If your answer to both questions was "NO", go to Section 5. If you answered "YES" to either question, please fill out Sections 3, 4, and 5.

SECTION 3. EMERGENCY CONTACTS/FACILITY EMERGENCY COORDINATOR

	PRIMARY	SECONDARY

CULVER CITY HAZARDOUS MATERIALS DISCLOSURE PROGRAM

SITE PLAN DRAWING

HAZ MAT FORM 2

INSTRUCTIONS: **In the matrix on the other side of this sheet, draw a diagram of your business site. Include a separate sheet for every floor of each building of the facility. At a minimum, show the following information on your map:**

Scale of map.
Site orientation (North, South, etc.).
Loading areas.
Parking areas.
Internal roads.
Storm and sewer drains.
Adjacent property use.
Locations and names of adjacent streets and alleys.
Access and egress points.
Location of each storage area for hazardous materials.
Location of each hazardous material handling area.
Location of emergency response equipment, such as equipment for fire suppression, First aid equipment, protective clothing, mitigation equipment, etc.

NOTE: **When you fill out HazMat Form 3 (Chemical Information Form), you will use the matrix coordinates on this map to show where each hazardous material is stored or handled (e.g. acetone is at "A-3", waste oil is stored at "C-4", etc.). This will help Fire Fighters in the event of a fire or hazardous materials spill at your facility.**

ALTERNATIVE METHOD **-- If you already have a good site diagram, and if it can be reduced to an 8 1/2 inch by 11 inch page and still be legible, then you can submit that map instead of this form. Just draw the matrix over the map, and make sure it shows all the information listed above.**

CULVER CITY HAZARDOUS MATERIALS DISCLOSURE PROGRAM

INSTRUCTIONS FOR THE CHEMICAL INVENTORY DATA FORM (HAZMAT FORM 3)

NOTE: You must complete a separate Chemical Description block for each hazardous material and hazardous waste that you handle at your facility in amounts equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure). You must also complete a separate Chemical Description block for each extremely hazardous substance handled in amounts greater than the Federal reportable quantity or in amounts equal to or greater than 500 pounds, whichever is less.

If you claim trade secret status for any materials inventoried, list all trade secret information on separate Chemical Description pages. Do not mix trade secret information and non-trade secret information on the same page. Check the appropriate box at the top of each page to identify the information on that page as either trade secret or non-trade secret.

To complete this form, you will need information from the Material Safety Data Sheets (MSDS) for your hazardous materials. You are required by both State and Federal law to keep a current copy of an MSDS for each hazardous material you handle. If you need additional MSDS's, you should request them from your vendor.

FACILITY IDENTIFICATION BLOCK

Enter your facility name, site address, and account number. (Your account number is printed on the mailing label of the envelope this packet arrived in. If you have thrown away your envelope, call the Fire Department at (310) 202 5800 during regular business hours and we will look it up for you).

CHEMICAL INFORMATION BLOCK

Chemical Description --

DATA ELEMENT	*INFORMATION REQUIRED*
Common Name	Enter the common name of the chemical or waste.
CAS#	Enter the Chemical Abstracts Service number for the material. (It is listed on the MSDS for this material).
Chemical Name	Enter the chemical name of the substance using the proper chemical terminology. Avoid use of trade names.
UN/NA (DOT) #	Enter the 4-digit material ID# as listed in the DOT emergency response guidebook. This number is often listed on your shipping papers.

DATA ELEMENT	*INFORMATION REQUIRED*
Amount & Time at Facility (Continued)	***AVERAGE DAILY AMOUNT*** **- This is the *average* amount of the chemical substance you have on hand at any one time. You should include the amount in storage, in your equipment, and any other amount of that same chemical you have at your facility in any form. This amount should never be lower than the minimum daily amount you always keep on hand. (See example below).**

Example: A dry cleaner always has 60 gallons of solvent in his dry cleaning machine, and another 5 gallons in his filter. In addition, he keeps a 55-gallon drum of dry cleaning solvent in storage which, over time, is slowly used up until he orders a new barrel. Since he never has less than 65 gallons in his equipment, and has a daily average over time of, say, 25 gallons in his storage drum, his "Average Daily Amount" of dry cleaning solvent is 65+25=90 gallons. His "Maximum Daily Amount would be the 65 gallons plus the 55 gallons that he has right after delivery of a new barrel, for a total of 130 gallons.

DAYS ON SITE **- Enter the total number of days during the previous calendar year that the material was on site (usually 365 days, in most cases).**

LARGEST CONTAINER **- Enter the total capacity of the largest container or series of interconnected containers on site for this specific material.**

Storage Codes & Locations — **This section of the form relies on development of a facility map (see HazMat Form 2) and use of a coding system to show type of storage, storage temperature, and storage pressure. These codes are explained below. Complete a new row for every separate location where you have this material stored at your facility.**

Grid Coordinate — **Enter the grid coordinate from HazMat Form 2 which best describes the location of this material (e.g. "B-7", "C-3", etc.).**

"C" — **In this column, enter the code that best describes the type of storage container at the location specified on this row. Use the codes below:**

CODE	*STORAGE TYPE*
A	Above-ground tank
B	Below-ground tank
C	Tank inside building
D	Steel drum
E	Plastic or non-metal drum
F	Can
G	Carboy
H	Silo
I	Fiber drum

CODE	*STORAGE TYPE*
J	Bag
K	Box
L	Cylinder
M	Glass bottle or jug
N	Plastic bottle or jug
O	Tote bin
P	Tank wagon
Q	Rail car
R	Other

CULVER CITY FIRE DEPARTMENT

Fire Control #: F91016
Engine Co. Name: E3C
Inspected By: _____

NOTICE OF CONDITIONS NOT IN COMPLIANCE WITH THE FIRE REGULATIONS AND ORDER TO COMPLY

BUSINESS LICENSE #: _____

1. ADDRESS NUMERALS & BUSINESS LICENSE

( ) a. UFC 10.208 Business must have address numbers readily visible from the street.
( ) b. CCFD Business must have a current Culver City business license.

2. FIRE PROTECTION EQUIPMENT

( ) a. UFC 10.301 You must provide ____ Fire extinguishers for proper Fire Protection.
( ) b. UFC 10.302 Fire Extinguishers be serviced, mounted and identified with a sign.
( ) c. UFC 10.302 Your extinguisher(s) system is/are due for their annual maintenance. Kitchen hood systems are required to be serviced semi-annually.
( ) d. Title 19, Sec. 904-904.5 Automatic sprinkler systems and/or standpipes must have a quarterly maintenance inspection and 5-year service. Records of both must be kept. Five-year service date is _____.
( ) e. UFC 10.206a Provide and maintain access to and visibility of Fire Department connection.
( ) f. NFPA 13.3 Secure the sprinkler control (OS & Y) valve in the open position with a chain and padlock.
( ) g. UBC 3802b 3803d,4, 3805d Restore the exterior Fire Department hose connections to the fire sprinkler and standpipe system to proper operating condition.
( ) h. UFC 10.302.2 Replace the defective fire hose on the interior standpipe hose connection.
( ) i. UFC 10.302 Re-rack the fire hose. Fire hose shall be maintained in readiness.
( ) j. UMC 2003a Clean the filters, hoods and ducts over cooking surface in the kitchen.

3. ELECTRICAL

( ) a. UFC 85.104 Circuit breakers may not be taped or secured in the "ON" position.
( ) b. UFC 85.106 Extension cords are prohibited and may not be used in place of fixed wiring.
( ) c. UFC 85.107 Multi-plug adapters are prohibited unless equipped with U.L. Listed circuit breakers.
( ) d. NEC 400-3, Discontinue the use of unapproved electric wiring.
(X) e. NEC 370.15 Provide and maintain approved cover plates on all electrical outlets, switches, junction and pull boxes.

4. CLEARANCES & EXITS

( ) a. BC33.3a Clear Aisle's to a minimum of 36/44"
( ) b. UFC 85.108 Minimum 30" clearance shall be provided in front of electrical panels.
( ) c. UFC 10.206 Access clearance shall be provided around fire protection equipment.
( ) d. UFC 11.404 Minimum 36" clearance shall be provided on all sides of heating equipment.
( ) e. NFPA 13 Clearance between the bottom of sprinkler heads and the top storage shall not be less than 18 inches
( ) f. UFC 10.302 Remove all obstructions to the interior standpipe outlet.
( ) g. UFC 11.302 Provide and maintain clearance of more than 24" between the top of all storage and the ceiling.
( ) h. UFC 12.103 All exit doors must be unobstructed.
( ) i. UFC 12.108 Exit signs shall be installed at required exit doorways and where other wise necessary to indicate the direction of egrees when the exit serves an occupant load of 50 or more.
( ) j. UBC 3313 Repair and maintain the required illuminated exit signs in operable condition at all times the building is occupied
( ) k. UFC 12.104e Remove blocking devices from all automatic or self-closing doors.
( ) l. UBC 3305 Provide and maintain approved automatic closing device(s) required on fire door(s).
( ) m. UFC 12.104a Repair the exit door to permit free and proper operation.
( ) n. UBC 3304c Discontinue the use of and remove all unapproved locks, latches, hasps, fasteners or bolts from the required exit door.
( ) o. UBC 3304c Exit doors shall be openable from the inside without the use of a key or any special knowledge or effort.
( ) p. UFC 11.201 Improve and maintain house keeping standards

5. HAZARDOUS MATERIALS

( ) a. UFC 80.103 A Hazardous Materials Disclosure must be submitted for 55 gallons, 500 pounds or 200 cubic feet of a hazardous material.
( ) b. UFC 80.104d MSDS shall be kept on premises at all times.
(X) c. UFC 80.104e Provide approved 704 signs for building. Appropriately label chemical or hazardous waste containers. NOT DONE
( ) d. UFC 74.107 All compressed gas cylinders shall be adequately secured to prevent falling or being knocked over.
( ) e. UFC 45.202 Discontinue unapproved spraying of flammable liquids and provide an approved spray booth for this operation.
( ) f. UFC 45.201f Provide metal waste cans for rags or waste impregnated with finishing materials.
( ) g. UFC 45.201 Clean or replace the spray booth filters.
( ) h. UFC 26.104 Provide an approved flammable liquid storage cabinet for storage of 10 or more gallons of flammable liquid.
(X) i. UFC 79.802 Discontinue gravity dispensing of flammable or combustible liquids. NOT DONE
( ) j. UFC 79.802d Provide and maintain adequate grounding and bonding for the flammable liquid dispensing.
( ) k. UFC 79.806 Discontinue dispensing, handling or draining of flammable or combustible liquids as flammable vapors may reach a source of ignition.
( ) l. UFC 79.104a Provide approved safety containers for the storage and handling of flammable or combustible liquids.

6. STRUCTURAL

(X) a. UBC 10.401 Repair the ceiling, as necessary, to maintain the required fire resistive construction.
( ) b. UBC 10.401 Repair the wall(s), as necessary, to maintain the required resistive construction.
( ) c. UBC 1706b Repair the trash chute door(s), as necessary, to make them self-closing.
( ) d. UFC 11.406 Provide and maintain all trapdoors and scuttle covers in a closed position at all times.

7. ADDITIONAL VIOLATIONS

( ) CLEAN DUST GENERAL HOUSE CLEANING

SUMMARY: TETRACHLOROETHYLENE 2-0-0

PURSUANT TO SECTION 20.36.220, LOS ANGELES COUNTY CODE*, PERMISSION IS HEREBY GRANTED TO PROCEED WITH THE CLOSURE DESCRIBED ABOVE SUBJECT TO THE ATTACHED CONDITIONS AND LIMITATIONS. THIS AUTHORIZATION EXPIRES 180 DAYS FROM THE DATE BELOW. YOU MUST CONTACT THE FIELD OFFICE INDICATED ON THE ENCLOSED NOTIFICATION REQUIREMENTS SHEET NO LATER THAN 72 HOURS PRIOR TO THE START OF WORK. PLEASE NOTE THAT INSPECTORS CAN BE CONTACTED FROM 8:00 a.m. to 9:30 a.m. MONDAY THROUGH FRIDAY ONLY.

SOIL SAMPLING REQUIRED: ☒ NO ☐ YES (SEE ATTACHED)

JAMES A. NOYES
Director of Public Works

BY _____ DATE 12/26/02

Mc, Sec 29-5

* ☐ CITY MUNICIPAL SECTIONS APPLY.

Complete the Attached Certification of Compliance with Los Angeles County Lobbyist Ordinance

AUTHORIZATION FOR CLOSURE
INDUSTRIAL WASTE CONTROL PROGRAM
CONDITIONS AND LIMITATIONS

A. GENERAL

1. This closure authorization is limited to closure of industrial wastewater pretreatment facilities NOT permitted as hazardous waste treatment units pursuant to Chapter 6.5, California Health & Safety Code, or underground storage tanks pursuant to Title 11, Division 4, Los Angeles County Code.

2. All work shall be carried out in full compliance with all applicable Federal, State and local laws, ordinances, rules and regulations.

3. The Environmental Programs Division (EPD) shall be notified in writing 30 days in advance of any facility closure unless this requirement is specifically waived by the Director of Public Works.

4. The applicant shall demonstrate that no pollution or nuisance will be created by the proposed closure.

5. All fees due to EPD for the operation and/or maintenance of the facility subject to closure through the date of closure shall be paid.

6. A fee pursuant to Section 20.36.270, Los Angeles County Code, or applicable city code shall accompany this application.

B. PRIOR TO STARTING WORK

1. All wastewater generating operations tributary to the facility to be closed shall be terminated or directed to alternative approved facilities.

2. All accumulated industrial and/or hazardous wastes shall be removed from the industrial waste pretreatment facility.

3. All required plumbing and/or sewer abandonment permits shall be obtained from the Building Official prior to capping any drains, sewers or private sewer systems.

4. Inspection notification(s) shall be made as directed by this approval.

C. APPLICABLE TO ALL CLOSURES

1. Sewer laterals serving the wastewater pretreatment facility to be closed and any open sewer connections shall be removed or severed and capped immediately downstream from such facility and shall include the removal of sample box, cleanout, trap and vent associated with the facility.

2. The severed outlet line shall be capped off with a fast-setting cement or other approved equivalent material.

3. All inlets, floor sinks, drains, trenches or other fixtures tributary to the pretreatment facility shall be removed or permanently sealed with a fast setting cement or other approved equivalent material.

4. If at any time evidence of an unauthorized discharge from the facility or tributary facilities is discovered, the applicant shall notify EPD within 24 working hours and shall take all necessary steps to secure any contaminated soils or residues.

5. No work shall be covered until all required inspections have been made.

D. PERMANENT CLOSURE IN PLACE

1. Closure in place is allowed only when specified by this authorization.

2. Prior to backfill, any samples required by this approval shall be taken.

3. Upon completion of all work required above, the pretreatment facility shall be backfilled with sand, pea gravel or other approved material and compacted to within a maximum of 4 inches below grade.

4. The remaining 4 inches (minimum) shall be filled with concrete or equivalent approved material.

5. All backfill operations shall be carried out in compliance and in accordance with applicable Building Code requirements.

E. PERMANENT CLOSURE BY REMOVAL

1. Upon completion of all work required by Conditions A through C above, the pretreatment facility shall be excavated and transported to a legal point of disposal.

2. Prior to backfill, any samples required by this approval shall be taken.

3. All excavation and backfill operations shall be carried out in compliance with applicable Building Code requirements.

F. REQUIRED REPORTS

1. Within 30 days of the date of closure, the applicant shall furnish EPD a closure report describing all work done, results of any required sampling, disposition of any contaminated soils or materials found and evidence of compliance with Conditions B1, B2, B3, C4, D2, E1 and E2.

2. The closure report shall include any additional requirements made a part of this approval.

CERTIFICATION OF COMPLIANCE WITH LOS ANGELES COUNTY LOBBYIST ORDINANCE

This is to certify that I, as permit applicant, for the project located at _____
LOCATION ADDRESS

am familiar with the requirements of Los Angeles County Code Chapter 2.160 et seq., (relating to the Los Angeles County Lobbyist Ordinance) and all persons acting on behalf of myself have complied and will continue to comply therewith through the application process.

_____ _____
APPLICANT (PRINT NAME) APPLICANT SIGNATURE

_____ _____
COMPANY NAME (If employed by an entity/agency) DATE

INSPECTION NOTIFICATION REQUIREMENTS

Pursuant to Los Angeles County Code, Section 20.36.220, and the Conditions and Limitations of the attached Industrial Wastewater Pretreatment Facilities Closure Authorization, you are required to complete the following notifications indicated below within the time period specified prior to commencement of work on this closure.

ALL REQUIRED PLUMBING AND/OR SEWER ABANDONMENT PERMITS, SHALL BE OBTAINED FROM THE BUILDING OFFICIAL (APPROPRIATE CITY OR COUNTY) PRIOR TO CAPPING ANY DRAINS, SEWER OR PRIVATE SEWER SYSTEM.

Instructions

Column 1: Identify all U.S. EPA hazardous waste codes that apply to this shipment.
Column 2: Choose the appropriate treatability group: Non-Wastewater (NWW) or Wastewater (WW).
Column 3: Enter the appropriate Subcategory, if applicable, and also enter "Contaminated Soil" or "Debris" if the waste will be treated using one of the alternative treatment technologies provided by 268.49 (c)-soil, or 268.45- debris.
Column 4: Enter the letter of the appropriate paragraph from below or from page 2 of this form.
Column 5: For F001-F005, please enter the Reference Number(s) for the constituents in your waste stream subject to treatment.
Column 6: For F039, D001-D043, Debris and Contaminated Soil; please list the Reference Numbers for any Underlying Hazardous Constituents.

If no UHC's are present upon generation check here x
Check here if end facility will check for all UHC's ☐

Profile Number or Manifest Line Item	U.S. EPA Hazardous Waste Codes	NWW	WW	Waste Stream	How Must This Waste be Managed?	Regulated Constituents For F001-F005	Underlying Hazardous Constituents for D001-D043, Debris or Soil

A. THIS RESTRICTED WASTE REQUIRES TREATMENT TO THE APPLICABLE STANDARD. This waste must be treated to the applicable performance based treatment standard set forth in 40CFR Part 268 Subpart C, 268.32, Subpart D, 268.40 or RCRA Section 3004(d) prior to land disposal
B. THIS HAZARDOUS DEBRIS IS SUBJECT TO THE ALTERNATIVE TREATMENT STANDARDS OF 40 CFR 268.45
G. THIS LAB PACK DOES NOT CONTAIN ANY WASTES IDENTIFIED AT APPENDIX IV TO PART 268. I certify under penalty of law that I personally have examined and am familiar with the waste and that the statement above is true and that this lab pack will be sent to a combustion facility in compliance with the alternative treatment standards for lab packs at 40 CFR 268.42(c). I am aware that there are significant penalties for submitting a false certification including possibility of fine or imprisonment.

INSPECTOR FIELD NOTES

Tuesday, March 30, 2021 4:53 PM - DEBORAH BERNHARD

Dry cleaning business has closed. The site was observed vacant and confirmed with business owner, Mr. Sang Son, closure occurred in February 2021 - as such C1 date was set to 02/28/21. There were no new occupants at time of on site investigation. Hazardous waste permit has been inactivated as of February 2021.

Though the site was closed - there was no evidence of abandonment or release evident through the glass doors. Per Mr. Son,

he returned the dry-cleaning machine to the manufacturer as it was leased. All hazardous waste was disposed prior to facility closure. Awaiting final disposal records from Mr. Son.

LOG SHEET

INSPECTOR FIELD NOTES

Routine inspection conducted at a dry cleaning facility located in Culver City; therefore, hazardous waste inspection conducted - this site is under the jurisdiction of Culver City PA for hazardous materials. In reviewing disposal records/manifests, the facility is determined to be a small quantity generator. Primary waste stream is PERC sludge which is removed from the dry cleaning machine

OPENING CONFERENCE:
Consent to conduct inspection requested and subsequently granted by Sang Son, owner. Mr. Son was informed that the intent of the inspection was to determine compliance with Federal, State and local regulations, requirements, and ordinances. Ownership information verified – no changes since last inspection. Verified the facility has 7 employees.

WALK THROUGH:
Mr. Son accompanied during the walk through of the facility.
HazMat Inventory:
Under Culver City PA Jurisdiction
HazWaste Observed at Time of Inspection:
1 x 55-gallon drum of PERC sludge
The facility uses one Lindus dry cleaning machine - PERC solvent

DOCUMENT REVIEW:
CUPA Permit current
CERS ID: 10300183
HMBP reviewed & accepted
EPA ID: CAL000173185 - active per HWTS
3+ years of Consolidated Manifests retained on site
Veolia manages waste disposal for this facility

VIOLATIONS & CLOSING CONFERENCE:
No violations observed at time of inspection.
Inspection Report reviewed with Mr. Son. Verified email address and obtained signature on inspection report.

OVERALL INSPECTION COMMENTS

Consent Given By:
Sang Youl Son

Attention: Your facility may be subject to reinspection at any time to verify compliance. Failure to comply with the violations cited may result in reinspection fees, late submittal and noncompliance penalty for CERS, permit revocation, and/or administrative/civil/criminal penalties per Los Angeles County Code. Any time granted for correction of the violation(s) does not preclude any enforcement action by this Department or other agencies.

It is improper and illegal for any County officer, employee or inspector to solicit bribes, gifts, or gratuities in connection with performing their official duties. Improper solicitations include requests for anything of value such as cash, discounts, free services, paid travel or entertainment, or tangible items such as food or beverages. Any attempt by a County employee to solicit bribes, gifts or gratuities for any reason should be reported immediately to either the County manager responsible for supervising the employee or the Fraud hotline at (800) 544-6861 or www.lacountyfraud.org. YOU MAY REMAIN ANONYMOUS.

☐ **NOTICE TO COMPLY: THE VIOLATION(S) CITED MUST BE CORRECTED BY** _____.

☐ **RETURN CERTIFICATION OF COMPLIANCE FOUND ON BACK OF THIS NOTICE.**

Attention: The items checked are in violation. A reinspection may occur at any time to verify compliance. Non-compliance could result in reinspection fees, permit revocation, and/or administrative/civil/criminal penalties. Any time granted for correction of the violation(s) does not preclude any enforcement action by this Department or other agencies.

It is improper and illegal for any County officer, employee or inspector to solicit bribes, gifts or gratuities in connection with performing their official duties. Improper solicitations include requests for anything of value such as cash, discounts, free services, paid travel or entertainment, or tangible items such as food or beverages. Any attempt by a County employee to solicit bribes, gifts or gratuities for any reason should be reported immediately to either the County manager responsible for supervising the employee or the Fraud Hotline at (800) 544-6861 or www.lacountyfraud.org. **YOU MAY REMAIN ANONYMOUS.**

Mr. Roger B. Kintz, M.S.
Hazardous Materials Specialist II
Health Hazardous Materials Division
South Bay District
24300-A Narbonne Avenue
Lomita, CA 90717

Dear Mr. Kintz:

As I said to you over our conversation on the phone, I am sending you copies of recent perc disposal receipts for 1997. Also enclosed is the AAD invoice for the 14 filters and 13 gallons of perc waste which I had kept for less than 3 months.

If I did not meet the requirements, please advise me on what needs to be done. I will, as always, do my best to meet the requirements. Thank you for your suggestion on the wet process dry cleaning.

Yours truly:

Yong S. Lee

GENERATOR CERTIFICATION

Generator certifies that waste described on attached manifest is Waste Tetrachloroethylene generated by dry-cleaning operation and it has been packaged in accordance with transporter's specification. This also certifies that all ownership of above described materials are transferred to transporter for the purpose of recycling, incineration, disposal or other purpose deemed appropriate. Generator understands that all accounts are on C.O.D. basis. If no one is available to make payment at the time of service, generator will make full payment within 10 days of the date of service. No statements will be sent. Generator hereby asks AAD to mail the generator a monthly reminder notice on all unpaid invoices. The charge for this additional service is $3.00 per reminder notice per month per invoice. Generator agrees to pay AAD 1.75% interest per month on all past due invoices. In the event of default the generator also agrees to pay AAD any and all costs including collection costs, court cost and attorney fees. AAD certifies it is permitted by appropriate governmental agencies to accept your dry cleaning Tetrachloroethylene Waste.

Violations: The conditions or practices checked below represent a violation of the referenced section of Title 22, California Code of Regulations (22 CCR, Div 4.5, Ch 10, Sec 66260.1 et seq), and/or Health & Safety Code Chapter 6.5 (H&S, Div 20, Ch 6.5, Sec 25100 et seq) for which there are civil and criminal penalties. Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. **You are directed to correct the violations within the times specified. Failure to do so will be considered an additional violation.**

HAZARDOUS WASTE DETERMINATION

Correction Date ___/___/___

01 ☐ Provide a hazardous waste determination for (CCR 66262.11)

DISPOSAL

Correction Date ___/___/___

Discontinue the illegal disposal of hazardous waste and/or extremely hazardous waste to an unauthorized location (H&S 25189.5):

02 ☐ trash/dumpster/ground;
03 ☐ storm drain;
04 ☐ sewer/septic system with a permit;
05 ☐ unpermitted facility.
06 ☐ Discontinue the disposal of hazardous materials containers which are not legally empty (CCR 66261.7)

EPA NUMBER/PERMITS

Correction Date ___/___/___

Obtain the following from the Cal-EPA:

07 ☐ EPA Identification Number (contact Cal-EPA, 916-324-1781, for ID number) (CCR 66262.12);
08 ☐ on-site waste treatment/disposal permit for (CCR 66270.1)

09 ☐ extremely hazardous waste permit for handling and disposal of (CCR 67430.1)

STORAGE AND MANAGEMENT OF CONTAINERS

Correction Date 11/1/97

Discontinue the on-site accumulation of hazardous waste:

10 ☒ longer than 90 days without an extension from DTSC (CCR 66262.34(c));
11 ☒ longer than 90 days after 100 kg has been accumulated (CCR 66262.34(b));
12 ☐ longer than 1 year or 90 days after 55 gallons has been accumulated at satellite storage.

Label the waste container with the following:

22 ☒ the words, "HAZARDOUS WASTE" (CCR 66262.34(f));
14 ☐ description of contents / hazardous property of waste / generator name and address (CCR 66262.34(f));
13 ☒ accumulation start date (CCR 66262.34(f)).

Provide hazardous waste containers which are:

15 ☐ in good condition (CCR 66265.171);
16 ☐ compatible with waste contents (CCR 66265.172);
17 ☐ closed/sealed during storage (CCR 66265.173);
18 ☐ handled/stored/segregated to minimize waste release/reaction (CCR 66265.177(c));
19 ☐ inspected at least weekly (CCR 66265.174).
25 ☐ Label hazardous materials properly within 10 days or handle as hazardous waste (CCR 66261.2(f)(1)).
26 ☐ Store hazardous materials properly within 96 hours or handle as hazardous waste (CCR 66261.2(f)(2)).
20 ☐ Properly manage used oil filters (CCR 66266.130).
21 ☐ Properly manage spent lead-acid storage batteries (CCR 66266.81).

a letter 12/2/97

3 x 55 g Dm Perc Hazardous waste in near room 2 - drums @ one full one drums are full, do not store longer than 90 days.

TANK REGULATIONS

Correction Date ___/___/___

23 ☐ Discontinue storing incompatibles in the same tank (CCR 66265.199).
24 ☐ Inspect tank and tank equipment daily and document in the operating record of the facility (CCR 66265.195).

27 ☐ Obtain a storage permit for tanks greater than 5,000 gallons of hazardous waste (CCR 66262.34(d)).
28 ☐ Provide proper secondary containment for hazardous waste tank systems (CCR 66265.193).
29 ☐ Provide a written assessment for tank system (CCR 66262.192).

RECORDKEEPING
Correction Date __/__/__
30 ☐ Keep waste analysis/test records for at least three years (CCR 66262.40(c)).
31 ☐ Send Biennial Report to DTSC (CCR 66262.41).
32 ☐ Retain copies of biennial and exception reports for at least three years (CCR 66262.40(b)).

TRAINING
Correction Date __/__/__
33 ☐ Provide a training program (CCR 66265.16).
34 ☐ Train and supervise personnel within six months of hire date and retrain as needed (CCR 66265.16(b)).
36 ☐ Keep training records on site (CCR 66265.16(d)).
37 ☐ Maintain training records until closure of facility or for at least three years (for former employees) (CCR 66265.16(e)).

CONTINGENCY PLAN/BUSINESS PLAN
Correction Date __/__/__
38 ☐ Submit a contingency/business plan (CCR 66265.53(b)).
39 ☐ Complete contingency/business plan (CCR 66265.52).
40 ☐ Maintain copy of plan on site (CCR 66265.53).
41 ☐ Amend and update plan as necessary (CCR 66265.54).
42 ☐ Assign Emergency Coordinator to facility (CCR 66265.55).

PREPAREDNESS AND PREVENTION
Correction Date __/__/__
43 ☐ Maintain facility to minimize possibility of fire or release of hazardous waste or constituents (CCR 66265.31).
44 ☐ Provide an internal communications or alarm system (CCR 66265.32(a)).
45 ☐ Provide a device capable of calling outside emergency help (CCR 66265.32).
46 ☐ Provide access to communication/alarm system during waste handling (CCR 66265.34).
47 ☐ Provide fire/spill control or decontamination system (CCR 66265.32(c)).
48 ☐ Test and maintain emergency equipment (CCR 66265.33).
49 ☐ Maintain required aisle space (CCR 66265.35).

MANIFEST/RECEIPTS
Correction Date 11/1/97
50 ☐ Discontinue shipping hazardous waste without a manifest (CCR 66262.42).
57 ☐ Maintain manifest copy for three years from shipment (CCR 66262.40).
51 ☒ Maintain completed modified manifest/receipt(s) on site for at least three years (CCR 66263.42).
52 ☐ Maintain used oil manifest/receipt(s) on site for at least three years (H&S 25250.8).
53 ☐ Provide manifest copies to DTSC within 30 days (CCR 66262.23).
54 ☐ Complete all applicable sections of the manifest (CCR 66262.23).
55 ☐ Determine status of waste when TSD facility manifest copy is not received within 30 days (CCR 66262.42).
56 ☐ Send Exception Report to DTSC within 45 days (CCR 66262.42).
58 ☐ Provide proper documentation for excluded recyclable materials (H&S 25143.10).

Provide copy of recent pcc disposal receipt for 1997

TRANSPORT
Correction Date __/__/__
59 ☐ Discontinue shipping hazardous waste by transporters lacking an EPA ID No. (CCR 66262.12).
60 ☐ Discontinue shipping hazardous waste to TSD facilities lacking an EPA ID No. (CCR 66262.12).

OTHER
Correction Date __/__/__
61 ☐ Provide Hazardous Waste Management Performance Plan and Report for review (H&S 25244.21).
62 ☐ Provide a copy of LDR notice/certification for each shipment of restricted hazardous waste (CCR 66268.7).
63 ☐ Provide a corrective action plan for unauthorized releases of hazardous waste or constituents (H&S 25187).
64 ☐ Legally remove hazardous waste/contamination before the closure of the facility (CCR 66265.11).

Notice of Violation and Order to Comply

COUNTY OF LOS ANGELES • FIRE DEPARTMENT
Health Hazardous Materials Division

Owner: Kyu C. Lee	Date: 7-6-94
Business: Fox Hills Dry Cleaners	Refer Reply To: J Thompson
Address: 6223 Bristol Parkway	HEALTH HAZARDOUS MATERIALS DIVISION 24300-A Narbonne Av Lomita CA 90717 Office (310) 534-6270 Fax (310) 539-6948
City, ZIP Code: Culver City 90230	

Violations: The conditions or practices checked below represent a violation of the referenced section of Title 22, California Code of Regulations (22 CCR, Div 4.5, Ch 10, Sec 66260.1 et seq), and/or Health & Safety Code Chapter 6.5 (H&S, Div 20, Ch 6.5, Sec 25100 et seq) for which there are civil and criminal penalties. Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. **You are directed to correct the violations within the times specified. Failure to do so will be considered an additional violation.**

HAZARDOUS WASTE DETERMINATION
Correction Date __/__/__

01 ☐ Provide a hazardous waste determination for (CCR 66262.11)

DISPOSAL
Correction Date __/__/__

Discontinue the illegal disposal of hazardous waste and/or extremely hazardous waste to an unauthorized location (H&S 25189.5):

02 ☐ trash/dumpster/ground;
03 ☐ storm drain;
04 ☐ sewer/septic system with a permit;
05 ☐ unpermitted facility.
06 ☐ Discontinue the disposal of hazardous materials containers which are not legally empty (CCR 66261.7)

EPA NUMBER/PERMITS
Correction Date __/__/__

Obtain the following from the Cal-EPA:

07 ☐ EPA Identification Number (contact Cal-EPA, 916-324-1781, for ID number) (CCR 66262.12);
08 ☐ on-site waste treatment/disposal permit for (CCR 66270.1)
09 ☐ extremely hazardous waste permit for handling and disposal of (CCR 67430.1)

STORAGE AND MANAGEMENT OF CONTAINERS
Correction Date 7/22/94

Discontinue the on-site accumulation of hazardous waste:

10 ☐ longer than 90 days without an extension from DTSC (CCR 66262.34(c));
11 ☐ longer than 90 days after 100 kg has been accumulated (CCR 66262.34(b));
12 ☐ longer than 1 year or 90 days after 55 gallons has been accumulated at satellite storage.

Label the waste container with the following:

22 ☒ the words, "HAZARDOUS WASTE" (CCR 66262.34(f));
14 ☒ description of contents / hazardous property of waste / generator name and address (CCR 66262.34(f));
13 ☐ accumulation start date (CCR 66262.34(f)).

Provide hazardous waste containers which are:

15 ☐ in good condition (CCR 66265.171);
16 ☐ compatible with waste contents (CCR 66265.172);
17 ☐ closed/sealed during storage (CCR 66265.173);
18 ☐ handled/stored/segregated to minimize waste release/reaction (CCR 66265.177(c));
19 ☐ inspected at least weekly (CCR 66265.174).
25 ☐ Label hazardous materials properly within 10 days or handle as hazardous waste (CCR 66261.2(f)(1)).
26 ☐ Store hazardous materials properly within 96 hours or handle as hazardous waste (CCR 66261.2(f)(2)).
20 ☐ Properly manage used oil filters (CCR 66266.130).
21 ☐ Properly manage spent lead-acid storage batteries (CCR 66266.81).

Waste oil 5 gal pails: labels are oily and unreadable.

TANK REGULATIONS
Correction Date __/__/__

23 ☐ Discontinue storing incompatibles in the same tank (CCR 66265.199).
24 ☐ Inspect tank and tank equipment daily and document in the operating record of the facility (CCR 66265.195).

Rec'd. 7-6-94 pt

LOS ANGELES COUNTY - DEPARTMENT OF HEALTH SERVICES
SMALL QUANTITY GENERATOR CONTINGENCY PLAN

You are required by the California Code of Regulations, Title 26 to design, operate and maintain your business to minimize hazards to human health and the environment from any unplanned releases of hazardous materials.

Section 1 General Business Information

Name of Business FOX Hill DRY Cleaner

Address 6223 Bristol Parkway City Culver Zip CA 90230

Phone Number (310) 649 - 3042 Emergency Phone (213) 936 - 4002

Description of Business DRY Clean

Number of Employees 3 Operating Hours 7:30AM - 7PM M( ) T(X) W(X) TH(X) F(X) Sat(X) Sun( ) 8:30-6p

Business Owner K. C. LEE Phone Number (310) 649 - 3042

Address 6223 Bristol Parkway City Culver Zip CA 90230

Property Owner LEEDS & STRAUSS Enterprises Phone Number (619) 792 - 2500

Section 2 Hazardous Material / Waste Activities - List all chemicals at your business.

RAW MATERIALS				HAZARDOUS WASTE	
Chemical Name or Trade Name*	Specific Usage	Quantity of Chemicals Stored	Manner of Storage	Quantity of Waste Stored	Manner of Storage
PERC	DRY Cleaning	70 GAL	MACHINE DRUM	14 Filters	DRUM
				LIQUID Waste	Small DRUM

* obtain from your supplier the Material Safety Data Sheets for trade name chemicals and attach to this form.

Section 3 Emergency Coordinator

Your company is required to list the names, addresses, and telephone numbers for your emergency coordinators (EC). The EC shall have the authority to commit resources and shall have the responsibility for coordinating the company's activities to mitigate an unplanned release of hazardous materials.

Name of EC K. C. LEE After Hours Phone (213) 936-4002

Address 848 S. Curson Ave. City L. A. Zip CA 90036

Alternate EC _____ After Hours Phone _____

Address _____ City _____ Zip _____

Section 4 Notification

The EC must notify the following agencies in the event of a release, fire, or explosion which could threaten human health or the environment.

Fire 911 Health (213) 890-4317 Police 911

If the EC determines that evacuation of local areas may be advisable, the EC shall notify the above agencies and the State Office of Emergency Services at 1-800-852-7550.

List an Emergency Response Contractor you may use in the event of a major Hazardous Materials spill.

Name AAD DISPOSAL Emergency Phone (213) 582-5900

List all hospitals or clinics you may use in the event of hazardous materials exposures or injuries.

Hospital or Clinic KOREAN MEDICAL CENTER Phone (213) 731-0681

Address 3544 W. Olympic Blvd. City L.A. CA 90019

The EC shall report to the Fire Department within 15 days all details of any incident where this contingency plan was activated.

Section 5 Emergency Procedures

Attach a description of what your employees will do to prevent or stop a hazardous materials spill at your facility. (Training is required for procedures involving the handling of hazardous materials.)

Section 6 Site Map

Attach a map of your company and indicate the locations of the following which apply:

- (1) Layout work areas
- (2) Fire Extinguishers
- (3) Chemical Storage
- (4) Alarms -Telephones
- (5) Employee Protection Eq.
- First aid stations
- (6) Gas & electrical shut-off
- Emergency Exits
- (7) Waste Storage
- Offices & Restrooms
- (8) All Drains & Clarifiers
- Emergency Shut-offs
- (9) Materials Safety Sheets
- Underground Tanks
- (10) Above Ground Tanks
- Evacuation Routes
- Emergency Equipment
- Leak detection devices

- Indicate schools, residences, and public gathering places less than a block away from your facility.

Section 7 Additional Requirements

This Contingency Plan must be updated on a continuous basis and copied to our office. This Contingency Plan is designed for your use in the event of a hazardous material incident. You must keep copies of your completed plan at your facility at all times. Review the contents of the plan with your employees and make the location of your completed plan known and accessible to them.

Send your completed Contingency Plan to the following address:

L.A. Co. Fire Dept.

Jaramillo, Lettie

From: Tresierras, Mario
Sent: Friday, February 23, 2007 11:27 AM
To: Komolafe, Karen
Cc: Jaramillo, Lettie; Uyehara, Michael
Subject: RE: Photo Fast - FA #5703

After reviewing the file, for this account I am updating the 5301 to indicate the effective start date to be changed from 7/1/05 to 11/8/00 based on the inspection file indicating [redacted] as the owner on that date. I am assuming that inspector Uyehara observed the current operator as a non-generator and back dated closing of the account to 11/2004 based on information from the current business owner indicating he started the business at that address in 2004. An update will occur by my STC early next week.
Thanks,
MT

Subject: Photo Fast - FA #5703

Hi Mario,

Please verify if Photo Fast is out of business eff 11/04. The account was invoiced for fy05/06 because it was reactivated to billable eff 7/1/05.
Thanks.

LIST ORDER OF INSPECTION AS FOLLOWS: I. OPENING CONFERENCE II. WALK THROUGH III. DOCUMENTS IV. CLOSING CONFERENCE V. VIOLATIONS

ADVISORY ISSUED TO CONDUCT THE FOLLOWING:

LA City 323.890.4089

1. Ensure residual "retrograde" chemicals are disposed properly. You may be eligible to utilize local household hazardous waste "roundup" facility contact 1-800552 5218 for info. Provide for periodic retrograde chemical removal to minimize hazardous due to lack of storage space capacity.

2. As your facility may only periodically reclaim silver offsite, maintain records to document service/maintence of treatment unit to document in writing frequency, type of silver harvesting/service. Be advised that you are directed to provide receipt from transporter for pickup of waste silver flake/filters.

3. Improve housekeeping/storage practices in area to minimize spills or potential for spills of chemicals. Properly

ONSITE HAZARDOUS WASTE TREATMENT NOTIFICATION FORM

FACILITY SPECIFIC NOTIFICATION

For Use by Hazardous Waste Generators Performing Treatment Under Conditional Exemption and Conditional Authorization, and by Permit By Rule Facilities

☑ Initial
☐ Amended

Please refer to the attached Instructions before completing this form. You may notify for more than one permitting tier by using this notification form, DTSC 1772. You must attach a separate unit specific notification form for each unit at this location. There are different unit specific notification forms for five of the categories and an additional notification form for transportable treatment units (TTU's). You only have to submit forms for the tier(s)/category(ies) that cover your unit(s). Discard or recycle the other unused forms. Number each page of your completed notification package and indicate the total number of pages at the top of each page at the 'Page __ of __'. Put your EPA ID Number on each page. Please provide all of the information requested; all fields must be completed except those that state 'if different' or 'if available'. Please type the information provided on this form and any attachments.

The notification fees are assessed on the basis of the highest tier the notifier will operate under and will be collected by the State Board of Equalization. ***DO NOT SEND YOUR FEE PAYMENT WITH THIS NOTIFICATION FORM.***

I. NOTIFICATION CATEGORIES

Indicate the number of units you operate in each tier. This will also be the number of unit specific notification forms you must attach. Conditionally Exempt Small Quantity Treatment operators may not operate units under any other tier.

Number of units and attached unit specific notifications for each tier reported.

A. ___ Conditionally Exempt-Small Quantity Treatment (CESQT)
B. ✓ Conditionally Exempt-Specified Wastestream (CESW)
C. ___ Conditionally Authorized (CA)
D. ___ Permit by Rule (PBR)
E. ___ CE--Commercial Laundry (CE-CL)
F. ___ Conditionally Exempt-Limited (CEL)

III. RADIOACTIVE MATERIALS OR WASTE

YES	NO	
☐	☑	Does the facility use, store or treat radioactive materials or radioactive waste?

IV. TYPE OF COMPANY: STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODE:

Use either one or two SIC codes (a four digit number) that best describe your company's products, services, or industrial activity.

Example: *7384 Photofinishing lab* *7218 Industrial launderers*

First: 7384 PHOTOFINISHING LAB Second: _____ _____

V. PRIOR PERMIT STATUS: *Check yes or no to each question:*

YES	NO		
☐	☑	1.	Did you file a PBR Notice of Intent to Operate (DTSC Form 8462) in 1992 for this location?
☐	☑	2.	Do you now have or have you ever held a state or federal hazardous waste facility full permit or interim status for any of these treatment units?
☐	☑	3.	Do you now have or have you ever held a state or federal full permit or interim status for any other hazardous waste activities at this location?
☐	☑	4.	Have you ever held a variance issued by the Department of Toxic Substances Control for the treatment you are now notifying for at this location?
☑	☐	5.	Has this location ever been inspected by the state or any local agency as a hazardous waste generator?

VI. PRIOR ENFORCEMENT HISTORY: *Not required from conditionally exempt generators or commercial laundries.*

YES	NO	
☐	☐	Within the last three years, has this facility been the subject of any convictions, judgments, settlements, or final orders resulting from an action by any local, state, or federal environmental, hazardous waste, or public health enforcement agency? (For the purposes of this form, a notice of violation does not constitute an order and need not be reported unless it was not corrected and became a final order.)
☐		If you answered Yes, check this box and attach a listing of convictions, judgments, settlements, or orders and a copy of the cover sheet from each document. (See the Instructions for more information)

VII. ATTACHMENTS: *Attachments are not required from commercial laundries.*

☑	1.	A plot plan/map detailing the location(s) of the covered unit(s) in relation to the facility boundaries.
☐	2.	A unit specific notification form for each unit to be covered at this location.

VIII. CERTIFICATIONS: *This form must be signed by an authorized corporate officer or any other person in the company who has operational control and performs decision-making functions that govern operation of the facility (per Title 22, California Code of Regulations (CCR) Section 66270.11). All three copies must have original signatures.*

Waste Minimization I certify that I have a program in place to reduce the volume, quantity, and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment.

Tiered Permitting Certification I certify that the unit or units described in these documents meet the eligibility and operating requirements of state statutes and regulations for the indicated permitting tier, including generator and secondary containment requirements. I understand that if any of the units operate under Permit by Rule or Conditional Authorization, I will also provide the required financial assurance for closure of the treatment unit by October 1, 1996.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete.

I am aware that there are substantial penalties for submitting false information, including the possibility of fines and imprisonment [redacted]

to operate 60 days after submitting a complete notification. DTSC may shorten the time period between notification and authorization when the owner or operator establishes good cause. If you need to be authorized sooner than the standard 60-day period, please check the box below and state the reason. Your authorization will be automatically effective on the date your completed notification form is received by DTSC. (Use additional sheets, if necessary.)

YES

☐ Reason: _____

OPERATING REQUIREMENTS:

Please note that generators treating hazardous waste onsite are required to comply with a number of operating requirements which differ depending on the tier(s). These operating requirements are set forth in the statutes and regulations, some of which are referenced in the Tier-Specific Fact Sheets available from DTSC's regional and headquarters offices.

SUBMISSION PROCEDURES:

***All three** forms must have **original** signatures, not photocopies.* You must **submit two copies** of this completed notification by certified mail, return receipt requested, to:

Department of Toxic Substances Control
Program Data Management Section, HQ-10
Attn: TP Notifications - Form 1772
400 P Street, 4th Floor, Room 4453 (walk in only)
P.O. Box 806
Sacramento, CA 95812-0806

You must also **submit one copy** of the notification and attachments to the local regulatory agency in your jurisdiction as listed in Appendix 2 of the instruction materials. You must also retain a copy as part of your operating record.

PLEASE, DO NOT SEND YOUR FEE PAYMENT WITH THIS FORM.

CONDITIONALLY EXEMPT - SPECIFIED WASTESTREAMS

UNIT SPECIFIC NOTIFICATION

(pursuant to Health and Safety Code Section 25201.5(c))

The Tier-Specific Fact Sheets contain a summary of the operating requirements for this category. Please review those requirements carefully before completing or submitting this notification package.

UNIT NAME SILTECH-ECOTECH UNIT ID NUMBER #001

NUMBER OF TREATMENT DEVICES: 0 Tank(s) 3 Container(s)/Container Treatment Area(s)

Each unit must be clearly identified and labeled on the plot plan attached to Form 1772. Assign your own unique number to each unit. The number can be sequential (1, 2, 3) or using any system you choose.

Enter the estimated monthly total volume of hazardous waste treated by this unit. This should be the maximum or highest amount treated in any month. Indicate in the narrative (Section II) if your operations have seasonal variations.

I. WASTESTREAMS AND TREATMENT PROCESSES:

Estimated Monthly Total Volume Treated: _____ pounds and/or 50 gallons

YES	NO	
☐	☑	Is the waste treated in this unit radioactive?
☐	☑	Is the waste treated in this unit a bio-hazardous/infectious/medical waste?
☐	☑	Is remotely generated hazardous waste (HSC 25110.10) treated in this unit?

The following are the eligible wastestreams and treatment processes. Please check all applicable boxes:

☐ 1. **Treating resins mixed or cured in accordance with the manufacturer's instructions (including one-part and pre-impregnated materials).**

☐ 2. **Treating containers of 110 gallons or less capacity that contained hazardous waste by rinsing or physical processes, such as crushing, shredding, grinding, or puncturing.**

☐ 3. **Drying special wastes, as classified by the department pursuant to Title 22, CCR, Section 66261.124, by pressing or by passive or heat-aided evaporation to remove water.**

☐ 4. **Magnetic separation or screening to remove components from special waste, as classified by the department pursuant to Title 22, CCR, Section 66261.124.**

NOTE

5. **<u>NO AUTHORIZATION IS NEEDED</u> to neutralize acidic or alkaline (base) wastes from the regeneration of ion exchange media used to demineralize water. (To be eligible for this exemption, this waste cannot contain more than 10 percent acid or base by weight.) (Effective January 1, 1995).**

☑ 6. **<u>NO AUTHORIZATION IS NEEDED</u> to neutralize acidic or alkaline (base) wastes from the food processing industry. (Effective January 1, 1996).**

☐ 7. **Recovery of silver from photofinishing. The volume limit for conditional exemption is 500 gallons per generator (at the same location) in any calendar month.**

NOTE **Silver recovery from photofinishing is completely exempt from authorization requirements if the quantity treated is 10 gallons or less in any calendar month. Do not complete this form if you qualify for this exemption. (Retain documentation verifying your eligibility for this exemption, such as developer invoices.)**

CONDITIONALLY EXEMPT - SPECIFIED WASTESTREAMS
UNIT SPECIFIC NOTIFICATION
(pursuant to Health and Safety Code Section 25201.5(c))

8. **Gravity separation of the following, including the use of flocculants and demulsifiers if:**

☐ a. The settling of solids from the waste where the resulting aqueous/liquid stream is not hazardous.

☐ b. The separation of oil/water mixtures and separation sludges, if the average oil recovered per month is less than 25 barrels (42 gallons per barrel). *(NOTE: AB 483 (Ch 625, 1995) allows certain used oil/water separation under new the CEL category. See Form 1772L and CEL Fact Sheet.)*

☐ 9. **Neutralizing acidic or alkaline (basic) material by a state certified laboratory, a laboratory operated by an educational institution, or a laboratory which treats less than one gallon of onsite generated hazardous waste in any single batch. (To be eligible for conditional exemption, this waste cannot contain more than 10 percent acid or base by weight.)**

☐ 10. **Hazardous waste treatment is carried out in quality control or quality assurance laboratory at a facility that is not an offsite hazardous waste facility.**

☐ 11. **A wastestream and treatment technology combination certified by the Department pursuant to Section 25200.1.5 of the Health and Safety Code as appropriate for authorization under CESW.**

Please enter certification number:_____ (See Appendix 5)

☐ 12. **The treatment of formaldehyde or glutaraldehyde by a health care facility using a technology combination certified by the Department pursuant to section 25200.1.5 of the Health and Safety Code.**
Please enter certification number: _____

II. **NARRATIVE DESCRIPTIONS:** *Provide a brief description of the specific waste treated and the treatment process used.*

1. SPECIFIC WASTE TYPES TREATED: C-41; RA-4; FIXER; BLEACH FIX

2. TREATMENT PROCESS(ES) USED: ELECTROLYTICALLY REMOVED SILVER FROM SOLUTION TO APPROXIMATELY 200 P.P.M. & THEN PASS SOLUTION THROUGH METAL EXCHANGE FILTERS TO REDUCE SILVER CONCENTRATION TO BELOW 5 P.P.M. BEFORE DISCHARGING TO SEWER.

III. **RESIDUAL MANAGEMENT:** *Check Yes or No to each question as it applies to all residuals from this treatment unit.*

YES	NO	
☑	☐	1. Do you discharge non-hazardous aqueous waste to a publicly owned treatment works (POTW)/sewer?
☐	☑	2. Do you discharge non-hazardous aqueous waste under an NPDES permit?
☑	☐	3. Do you have your residual hazardous waste hauled offsite by a registered hazardous waste hauler?

If you do, where is the waste sent? *Check all that apply.*

☑ a. Offsite recycling
☑ b. Thermal treatment
☐ c. Disposal to land
☐ d. Further treatment

☐	☑	4. Do you dispose of non-hazardous solid waste residues at an offsite location?
☐	☑	5. Other method of disposal. Specify:_____

CONDITIONALLY EXEMPT - SPECIFIED WASTESTREAMS
UNIT SPECIFIC NOTIFICATION
(pursuant to Health and Safety Code Section 25201.5(c))

IV. BASIS FOR NOT NEEDING A FEDERAL PERMIT:

In order to demonstrate eligibility for one of the onsite treatment tiers, facilities are required to provide the basis for determining that a hazardous waste permit is not required under the federal Resource Conservation and Recovery Act (RCRA) and the federal regulations adopted under RCRA (Title 40, Code of Federal Regulations (CFR)).

Choose the reason(s) that describe the operation of your onsite treatment units:

☐ 1. The hazardous waste being treated is not a hazardous waste under federal law although it is regulated as a hazardous waste under California state law.

☐ 2. The waste is treated in wastewater treatment units (tanks), as defined in 40 CFR Part 260.10, and discharged to a publicly owned treatment works (POTW)/sewering agency or under an NPDES permit. 40 CFR 264.1(g)(6) and 40 CFR 270.2.

☐ 3. The waste is treated in elementary neutralization units, as defined in 40 CFR Part 260.10, and discharged to a POTW/sewering agency or under an NPDES permit. 40 CFR 264.1(g)(6) and 40 CFR 270.2.

☐ 4. The waste is treated in a totally enclosed treatment facility as defined in 40 CFR Part 260.10; 40 CFR 264.1(g)(5).

☐ 5. The company generates no more than 100 kg (approximately 27 gallons) of hazardous waste in a calendar month and is eligible as a federal conditionally exempt small quantity generator. 40 CFR 260.10 and 40 CFR 261.5.

☐ 6. The waste is treated in an accumulation tank or container within 90 days for over 1000 kg/month generators and 180 or 270 days for generators of 100 to 1000 kg/month. 40 CFR 262.34, 40 CFR 270.1(c)(2)(i), and the Preamble to the March 24, 1986 Federal Register.

☑ 7. Recyclable materials are reclaimed to recover economically significant amounts of silver or other precious metals. 40 CFR 261.6(a)(2)(iv), 40 CFR 264.1(g)(2), and 40 CFR 266.70.

☐ 8. Empty container rinsing and/or treatment. 40 CFR 261.7.

☐ 9. Other: Specify:_____

_____

V. TRANSPORTABLE TREATMENT UNIT: *Check Yes or No. Please refer to the Instructions for more information.*

YES	NO	
☐	☑	Is this unit a Transportable Treatment Unit?

If you answered yes, you must also complete and attach Form 1772E to this page.

LOG SHEET

INSPECTOR FIELD NOTES

Routine inspection conducted at retail, pharmacy and health goods facility located in Culver City; therefore, hazardous waste inspection was conducted - hazardous materials fall under Culbver City jurisdiction. The facility reports itself as a RCRA LQG in CERS; however, in reviewing disposal records/manifests, the facility generator status in the past 12 calendar months is SQG.

OPENING CONFERENCE:
Consent to conduct inspection requested and subsequently granted by Jay Simmons, Supervisor. Mr. Hernandez was informed that the intent of the inspection was to determine compliance with Federal, State and local regulations, requirements, and ordinances. Ownership information verified – no changes since last inspection. Verified program element aligned with number of employees who monitor and handle hazardous waste program.

WALK THROUGH:
Mr. Simmons accompanied during the walk through of the facility.
HazMat Inventory:
All quantities of HW fall below threshold for reporting.
HazWaste Observed at Time of Inspection:
Pharmacy:
1 x 20 gal container of returned/expired medicine and empty containers
Retail store:
Hazardous waste collected from returned/damaged products
Observed ~20 gal containers of the following hazardous waste streams:
1 x Flammable (AF)
1 x Universal (UW)
1 x Corrosive bases (CB)
1 x Corrosive acids (CA)
1 x Oxidizer (OX)
1 x Toxic (TX)
All containers were marked with accumulation start date
Photo processing - all digital - no HW
Managers trained on proper HW Management practices
All bins observed properly labeled
Weekly inspection Log - available - reviewed
Waste accumulation area clean and organized
Spill Kit available

Business:	FA #:	Date:
CVS PHARMACY #9573	FA0045092	08/01/2019

Waste is removed every 1-2 months by Stericycle

DOCUMENT REVIEW:
CUPA Permit current - posted
CERS ID: 10301791
HMBP to be jointly reviewed by Culver City
EPA ID: active per HWTS
Manifest dated: 3+years of manifests maintained in folder on site. Past 12-months reviewed at time of inspection
Contingency Plan reviewed
Biennial report submitted in 2017 by 3E Company for CVS

VIOLATIONS & CLOSING CONFERENCE:
No violations observed at time of inspection.
Inspection Report reviewed with Mr. Simmons. Verified email address and obtained signature on inspection report.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	Yes

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	No

Hazardous Waste

Is your facility a Hazardous Waste Generator?	Yes
Does your facility treat hazardous waste on-site?	No
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	No
Does your facility consolidate hazardous waste generated at a remote site?	No
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	No
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	Yes
Is your facility a Household Hazardous Waste (HHW) Collection site?	No

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	No
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	No
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	No

Additional Information

This facility is registered as a large-quantity generator (LQG) of RCRA "acute" hazardous waste, consisting mainly of warfarin and nicotine-containing pharmaceutical waste in amounts exceeding the 2.2 lbs monthly threshold.

SITE QUESTIONNAIRES

ADVANCED ENVIRONMENTAL CONCEPTS INC

Environmental Site Assessment Owner Questionnaire

As part of the Phase I environmental site assessment standard process, adopted by ASTM International, this questionnaire was constructed in accordance with "E 1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process."

Purpose: In conducting an environmental site assessment, **Advanced Environmental Concepts, Inc. (AEC)** will evaluate the following subject property for any indication of hazardous waste or hazardous material releases into the environment. The purpose of this questionnaire is to assist **AEC** in conducting a more thorough investigation with information from the property Owner, Owner's representative, or current lessee/tenant that is not readily available in public records. When answering this questionnaire, please be as thorough as possible. If an employee has pertinent knowledge of the property, please have them finish a copy of the questionnaire, as well. You may fax the completed questionnaire(s) to **(661) 395-1616** or email them to **vanessa@advanced-ec.com**.

Subject Property: **Fox Hills Plaza (6201-6299 Bristol Parkway)**
APNs: 4134-018-004, -005, and -006
Culver City, California

1. Please list the legal description of the property. THE LAND REFERRED TO HEREIN IS SITUATED IN THE CITY OF CULVER CITY, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:
PARCELS 1 AND 2 OF PARCEL MAP NO. 3773, IN THE CITY OF CULVER CITY, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 53, PAGE 41 OF PARCEL MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.
APN: 4134-018-004 (AFFECTS PARCEL 1); 4134-018-005 (AFFECTS PORTION OF PARCEL 2) AND 4134-018-006 (AFFECTS PORTION OF PARCEL 2)

2. Are you aware of any violations for unauthorized use, toxic spill incidents, or unauthorized releases of hazardous materials listed for the subject property? A former dry cleaner used to occupy the site which has known PCE contamination in a relatively localized area

3. What is the onsite water supply for potable use and irrigation use? Irrigation wells and/or district water? Any groundwater monitoring wells? Water supply for potable and irrigation is by Golden State Water company. There are 3 groundwater monitoring wells onsite

4. Please list the dates of construction for all structures on the property. Construction date of structures are 1974-1975

5. Please list the current and historical ownership (name and address of owners) for the property. Is the property being leased? Current ownership is Bristol Parkway Investors, LLC located at 5862 West 3rd Street, Los Angeles, CA 90036. The prior owner was Bristol Parkway Propco, LLC located at 9777 Wilshire Blvd Suite 470, Beverly Hills, CA 90212

• ENVIRONMENTAL CONCEPTS WITH DESIGN IN MIND •
220 E. TRUXTUN AVENUE BAKERSFIELD, CA 93305 661/395-1646 FAX 661/395-1616

6. Do you have a current Restricted Materials Permit with the County for any ag chemical application? (Please attach a copy) Unknown

7. Are there any onsite oil or gas wells? No

8. Are you aware of any prior investigations conducted at the subject property? Yes, several phase I and phase II site investigations have been conducted as well as subsurface investigations

9. Are there any former or current Underground Storage Tanks (USTs) onsite? Unknown

10. Please list all of the Aboveground Storage Tanks (ASTs) on the property. No ASTs

11. What company provides electrical service for the property? Southern California Edison

12. Are there any subsurface leachfields and/or septic systems onsite? Unknown

13. Are you operating under Regulatory Permits? If so, please provide copies. No
    a. Regional Water Board (Treatment Ponds, etc.)? No
    b. Community Water System (Well Water)? No
    c. Air Quality Permits? No
    d. UST/AST Compliance Permits? No

14. Has fill material been imported to the subject property? Please explain. No

ADVANCED ENVIRONMENTAL CONCEPTS INC

Environmental Site Assessment User Questionnaire

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must provide the following information to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Purpose: In conducting an environmental site assessment, **Advanced Environmental Concepts, Inc. (AEC)** will evaluate the following subject property for any indication of hazardous waste or hazardous material releases into the environment. The purpose of this questionnaire is to assist **AEC** in conducting a more thorough investigation with information from the User or User's representative that is not readily available in public records. When answering this questionnaire, please be as thorough as possible. If an employee has pertinent knowledge of the property, please have them finish a copy of the questionnaire, as well. You may fax the completed questionnaire(s) to **(661) 395-1616** or email them to **vanessa@advanced-ec.com**.

Subject Property: **Fox Hills Plaza (6201-6299 Bristol Parkway)**
APNs: 4134-018-004, -005, and -006
Culver City, California

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law? (40 CFR 312.25) Please checkmark the most appropriate response:

   ☒ I *have not* reviewed the records and ***do not know*** if there are any filed or recorded environmental liens.
   ☐ I *have* reviewed the records, and ***No, there aren't any*** filed or recorded environmental liens.
   ☐ I *have* reviewed the records, and ***Yes, there are*** environmental liens. Explain:

_____
_____
_____

2. Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law? (40 CFR 312.26) Please checkmark the most appropriate response:

   ☒ I *have not* reviewed the records and ***do not know*** if there are any filed or recorded AULs or any AULs in place at the site.
   ☐ I *have* reviewed the records, and ***No, there aren't any*** filed or recorded AULs or any AULs in place at the site.
   ☐ I *have* reviewed the records, and ***Yes, there are*** AULs or any AULs in place at the site. Explain:

_____
_____
_____

• ENVIRONMENTAL CONCEPTS WITH DESIGN IN MIND •
220 E. TRUXTUN AVENUE BAKERSFIELD, CA 93305 661/395-1646 FAX 661/395-1616

3. Does the Title Report provide any information pertaining to environmental cleanup liens or activity and use limitations (AULs) for the subject property? Please checkmark the most appropriate response:

   ☒ I *have not* reviewed the Title Report and ***do not know*** if it provides environmental cleanup liens or AULs information.
   ☐ I *have* reviewed the Title Report, and ***No, it does not*** provide environmental cleanup liens or AULs information.
   ☐ I *have* reviewed the Title Report, and ***Yes, it does*** provide environmental cleanup liens or AULs information. Explain:

_____
_____
_____

4. As the User of the ESA and the person seeking to qualify for the LLP, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? (40 CFR 312.28) Please checkmark the most appropriate response:

   ☒ ***No, I do not*** have any specialized knowledge and/or experience related to the property or nearby properties.
   ☐ ***Yes, I do*** have specialized knowledge and/or experience related to the property or nearby properties. Explain:

_____
_____
_____

5. As the User of this ESA, based on your knowledge and experience related to the property, are you aware of any information pertaining to a reduction in value for the subject property relative to any known environmental issues? Please checkmark the most appropriate response:

   ☒ ***No, I do not*** have any information about a reduction in property value relative to environmental issues.
   ☐ ***Yes, I do*** have information about a reduction in property value relative to environmental issues. Explain:

_____
_____
_____

6. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? Please checkmark the most appropriate response:

   ☐ ***No, I do not*** believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Proceed to question #6a.
   ☒ ***Yes, I do*** believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Skip to question #7.

• ENVIRONMENTAL CONCEPTS WITH DESIGN IN MIND •
220 E. TRUXTUN AVENUE BAKERSFIELD, CA 93305 661/395-1646 FAX 661/395-1616

a. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? (40 CFR 312.29) Please checkmark the most appropriate response:

☐ ***No, I have not*** considered the idea that known or believed contamination at the site has caused the lower purchase price.
☐ ***Yes, I have*** considered the idea that known or believed contamination at the site has caused the lower purchase price. Explain:

_____
_____
_____

7. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? (40 CFR 312.30)

a. What are the past uses of the property?

☐ I ***do not*** know.
☒ I ***do*** know. Explain:
All previous environmental reports and findings have been shared with the environmental professional
_____
_____
_____

b. What (if any) specific chemicals are present, or once were present, at the property?

☐ I ***do not*** know.
☒ I ***do*** know. Explain:
PCE & TCE from former dry cleaner
_____
_____
_____

c. What (if any) spills or other chemical releases have taken place at the property?

☒ I ***do not*** know.
☐ I ***do*** know. Explain:

_____
_____
_____

d. What (if any) environmental cleanups have taken place at the property?

☒ I ***do not*** know.
☐ I ***do*** know. Explain:

_____
_____
_____

8. As the User of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property? (40 CFR 312.31) Please checkmark the most appropriate response:

☐ ***No, I do not know and/or do not have any*** experience with any obvious indicators that point to the presence or likely presence of contamination at the property.
☒ ***Yes, I do know and/or do have*** experience with obvious indicators that point to the presence or likely presence of contamination at the property. Explain:

Based on the findings of the previous environmental reports

9. Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site? Please checkmark the most appropriate response:

☒ ***No, I am not*** aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site.
☐ ***Yes, I am*** aware of pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site. Explain:

10. Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site? Please checkmark the most appropriate response:

☒ ***No, I am not*** aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products, in, on, or from the site.
☐ ***Yes, I am*** aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products, in, on, or from the site. Explain:

11. Are you aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? Please checkmark the most appropriate response:

☒ ***No, I am not*** aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.
☐ ***Yes, I am*** aware of a notice from a government entity (or multiple government entities) regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Explain:

I.2 Construction Noise Calculations

Project: 6201 Bristol Parkway Exterior Unmitigated

Construction Noise Impact on Sensitive Receptors

Parameters

Leq to L10 factor	3

For Receptor R1 and R2 a 8 db reduction is applied to the exterior given that exterior uses (courtyard/pool) have a blocked line of sight from the hotel structure itself to the Project Site

				R1-Marriott Hotel to the South					R2 - Hotel to the west					R3 - Parkway Plaza Apartment to the east					R4 - Hillside Memorial Park and Mortuary to the southeast					R5 - Commercial Uses to the north				
Construction Phase **Equipment Type**	**No. of Equip.**	**Reference Noise Level at 50ft, Lmax**	**Acoustical Usage Factor**	**Distance (ft)**	**Lmax**	**Leq**	**L10**	**Estimated Noise Shielding, dBA**	**Distance (ft)**	**Lmax**	**Leq**	**L10**	**Estimated Noise Shielding, dBA**	**Distance (ft)**	**Lmax**	**Leq**	**L10**	**Estimated Noise Shielding, dBA**	**Distance (ft)**	**Lmax**	**Leq**	**L10**	**Estimated Noise Shielding, dBA**	**Distance (ft)**	**Lmax**	**Leq**	**L10**	**Estimated Noise Shielding, dBA**

Project: 6201 Bristol Parkway Interior with Windows Open Unmitigated

Construction Noise Impact on Sensitive Receptors

ESA

Parameters

Leq to L10 factor	3

Inlcudes previous exterior mitigation reduction plus an additional 13 dB reduction from exterior to interior attenuation with windows open.

				R1-Marriott Hotel to the South					R2 - Hotel to the west					R3 - Parkway Plaza Apartment to the east					R5 - Commercial Uses to the north

Threshold (Ambient + 5 dB)						**68.8**					**61.5**					**66.7**					**71.2**		
Significant Impact?						**No**					**No**					**No**					**No**		

Source for Ref. Noise Levels: LA CEQA Guides, 2006 & FHWA RCNM, 2005

#REF!

Project: 6201 Bristol Parkway Exterior Mitigated

Construction Noise Impact on Sensitive Receptors

Parameters

Leq to L10 factor	3

For Receptor R1 and R2 a 8 db reduction is applied to the exterior given that exterior uses (courtyard/pool) have a blocked line of sight from the hotel structure itself to the Project Site

A 8 dB reduction is applied to all receptors to account for a 8 db reduction with the use of improved mufflers.

				R1-Marriott Hotel to the South					R2 - Hotel to the west					R3 - Parkway Plaza Apartment to the east					R4 - Hillside Memorial Park and Mortuary to the southeast					R5 - Commercial Uses to the north

Project: 6201 Bristol Parkway Interior with Windows Open Mitigated

Construction Noise Impact on Sensitive Receptors

ESA

Parameters

Leq to L10 factor	3

Inlcudes previous exterior mitigation reduction plus an additional 13 dB reduction from exterior to interior attenuation with windows open.

Earth Mover	Yes	69	0.011	75	59	0.002
Small Bulldozer	Yes	58	0.003	75	48	0.0006

Source:

Federal Transit Administration, *Transit Noise and Vibration Impact Assessment Manual,* 2018.

Notes:

* Values taken from Table 7-4.

** Based on the formula VdB = 20 x LOG10 (v/v_{ref}), where v_{ref} is equal to 1×10^{-6} in/sec (see page 111).

The approximate rms vibration velocity level (v) is calculated from PPV using a crest factor of 4 (see page 184).

*** Based on the formula $PPV(D) = PPV(25\ ft) \times (25/D)^{N}$, where D is equal to the distance (see page 185).

N = soil type classification factor (typically ranges from 1 to 1.5)

Appendix J
Fire Flow Capacity Analysis

28 August 2025

MEMORANDUM

To: David Montgomery, Culver City Fire Department

From: Christopher D. Pittner, P.E., QISP
Tyler Colyer, P.E.

Subject: Fire Flow Capacity Analysis
6201-6299 Bristol Parkway, Culver City, California
(EKI C40307.00)

EKI Environment & Water, Inc. (EKI) is pleased to submit this memorandum to summarize our findings for the 6201-6299 Bristol Parkway Development Project (Project) fire flow capacity analysis. This study was performed to support TA Group, Inc. (Client) with the Golden State Water Company (GSWC) application for water service.

The results below summarize (1) the available fire flow capacity on existing 10- and 12-inch water mains along Bristol Parkway and Green Valley Circle, respectively, and (2) the required fire flow per the California Fire Code (CFC) for the Project based on current conceptual plans.

We request that the Culver City Fire Department Fire Marshal (Fire Marshal) review these findings and provide an initial determination about the required fire flow for the Project. The fire flow analysis will be updated based on this initial determination, as needed.

BACKGROUND

The Project will be developed on a 7.05-acre site located at 6201-6299 Bristol Parkway in Culver City, California (City). The Project would include the demolition of an existing office building on the project site and the construction of a new, 8-story mixed use development with 846 total multi-family residential (MFR) units (810 market rate units and 36 affordable units), 11,406 square feet of retail space, 1,201 off-street parking spaces, and a variety of amenities including a gym, pool, and co-working space.

FIRE-FLOW REQUIREMENTS

As seen in **Attachment A** and summarized below in Table 1, per email correspondence dated 30 October 2024, MVE Architects have provided the planned occupancy designations, types of construction, total square footage, and other information in support of fire flow requirement calculations.

Per CFC B104.3, for Type 1A construction, the fire flow calculation area shall be calculated as the area of the three largest successive floors. For the Project, this results in a total area greater than 166,501 square feet (sqft). The fire flow calculation area for the Type IIIA garage is unmodified and is greater than 295,901 sqft.

Table 1 – Planned Occupancy Designation

Location	Occupancy Designation (Floor)	Area (sqft)
Total Area of Parking Garage	Type I-A / S-2 - (Level-B to 8)	534,095
Residence	Type I-A / R-2 - (Level-1 to 3) & (South of Garage Level 4 to 8)	304,425
Residence	Type III-A / R-2 - (Level-4 to 8)	662,862
Total Area of Residence	Type I-A & III-A / R-2 - (Level-1 to 8)	**967,287**[1]

Thus, as seen in **Attachment B**, per CFC Tables B105.1(2) and B105.2, the Type IA and IIIA building types require fire flows of 6,000 gallons per minute (gpm) for a duration of four hours. This flow rate can be reduced to 25% of that value with the installation of a National Fire Protection Agency (NFPA) 13 compliant automatic sprinkler system in accordance with Section 903.3.1.1, which is planned for this Project. Thus, the total fire flow requirement for the Project is calculated to be 1,500 gpm for four hours.

OFF-SITE FIRE FLOW

As seen in **Attachment C**, two fire flow tests have been conducted by the GSWC in support of the Project. For the hydrant on the 10-inch diameter water main located on Bristol Parkway, the fire flow availability is approximately 4,111 gpm with a 20 pound per square inch (psi) residual pressure. For the hydrant on the 12-inch diameter water main located on Green Valley Circle, the fire flow availability is approximately 5,000 gpm with a 20 psi residual pressure. Based on this review of the hydrant flow test data, the City's water distribution system should meet the required fire flow of 1,500 gpm for the Project without the need for additional system improvements.

ON-SITE FIRE FLOW

The backflow assembly for fire service shall be installed following GSWC standard detail P-35B and shall be from a manufacturer on the University of Southern California list of Approved Backflow Prevention Assemblies (including Watts, Ames, or Zurn). As seen in **Attachment D**, the head loss through an example 8-inch backflow assembly is approximately 5 psi at 1,500 gpm. Based on preliminary calculations for head loss through the double check valve assembly and on-site piping, it is recommended that an 8-inch diameter pipe be installed to provide 1,500 gpm at the furthest hydrant while maintaining 20 psi residual pressure.[2]

As seen in **Attachment E**, the Project has two hydrants located directly adjacent to the property line. Additionally, a planned fire lane is shown along the western boundary of the property with three hydrants

[1] The draft Project CEQA document dated August 2025 shows an increase to 1,023,015 sqft of residential floor area. The fire flow calculations herein are unchanged from previous area estimates as the area of the three largest floors would still be above the maximum size bin per CFC B104.3 for Type IA and IIIA construction.
[2] Methods and formulas used in determining fire flow data shall conform to NFPA291 Recommended Practice for Fire Flow Testing and Marking of Hydrants, 1995 Edition.

installed. Based on these preliminary assumptions, the Project is compliant with CFC Appendix C for hydrant location and distribution.

Pipe sizing will be refined as the Project's fire suppression system design is confirmed as the pressure and flow at the fire suppression system point of connection likely drives design requirements for on-site infrastructure.

CONCLUSIONS

Based on the hydrant flow test data, review of applicable regulations, and analysis conducted, the Project is compliant with the CFC **(Attachment F)** and Culver City Fire Code Chapter 9.02 with the existing water system infrastructure in conjunction with on-site hydrants and fire suppression system. No additional improvements to GSWC infrastructure have been identified to increase fire flow availability and it is assumed that no GSWC water system modeling analysis is required to support the Project. We request that the Fire Marshal review this assessment and provide guidance on any additional requirements not discussed herein.

Subject: RE: 1637 Bristol Parkway - Required Information for Plumbing Design

Paul and Raymond
Please provide the following data as required to request fire flow tests from Golden State Water co.

- Occupancy designations –
  (**MVE:** Main occupancies of the building includes: Occupancy **S-2** for the garage and Occupancy **R-2** for the residence portion of the building. (In addition to the main occupancy we have accessory occupancy where is less than 10% of the main building occupancy @: Occupancy A3 for the Pool and pool deck area / Occupancy A2 for the amenity and Market portion of the project / Occupancy B for leasing area – Not sure if you need to account for these accessory occupancies)

- Type of Construction (residential vs garage) –
  (**MVE:** Construction **Type I-A** for the entire 9 levels of garage (level-B through Level-8), plus the two levels of Gym, Leasing, and Market volumes, in addition to all residence located 'paper' south of the Garage at Level-4 to level-8, as well all residence on Level-1 through 3. (in short: the entire garage from Level-B to Roof and its south adjacent dwellings at upper levels-4 to 8, as well as all spaces below level-4 are Type I-A construction).

Construction **Type III-A** for the entire residence portion of the project from Level-4 to Level-8, except dwelling units 'paper' south of the garage at Level-4 to Level-8.

- Total Square footages (maybe broken down between residential and parking structure). Will you have separate fire sections of the building for flow calcs, or will it be based on total building? –
- (**MVE:** Fire flow calc to include the entire building. See building calcs below.)

Total Area of Parking Garage - Type I-A / S-2 - (Level-B to 8): **485,946 SQF**
Total Area of Gym - Type I-A / A-3 - (Level-2 and 3): **7,0040 SQF**
Total Area of Market - Type I-A / A-3 - (Level-3): **3,729 SQF**
Total Area of leasing - Type I-A / A-3 - (Level-3): **5,930 SQF**
Total Area of Amenity - Type I-A / A-3 - (Level-8): **5,554 SQF**
Total Area of Pool - Type I-A / A-3 - (Level-8): **16,164 SQF**

Residence - Type I-A / R-2 - (Level-1 to 3) & (south of garage Level 4 to 8: **304,425 SQF**
Residence - Type III-A / R-2 - (Level-4 to 8): **662,862 SQF**
Total Area of residence - Type I-A & III-A / R-2 - (Level-1 to 8): 967,287 SQF

- Number of stories –
  (**MVE: 5 levels of Type III-A** construction over/ **3 levels of Type I-A construction**: Total of **8 story Building**)
  Project contains 3 story of type I-A construction on paper left side of the garage vs. 1 story on the right side of the garage due to sloped side as you know. See attached section for clarification.

The provisions contained in this appendix are not mandatory unless specifically referenced in the adopting ordinance or legislation of the jurisdiction.

User note:

About this appendix: *Appendix B provides a tool for the use of jurisdictions in establishing a policy for determining fire-flow requirements in accordance with Section 507.3. The determination of required fire flow is not an exact science, but having some level of information provides a consistent way of choosing the appropriate fire flow for buildings throughout a jurisdiction. The primary tool used in this appendix is a table that presents fire flow based on construction type and building area based on the correlation of the Insurance Services Office (ISO) method and the construction types used in the International Building Code®.*

Section B101 General

B101.1 Scope
The procedure for determining fire-flow requirements for buildings or portions of buildings hereafter constructed shall be in accordance with this appendix. This appendix does not apply to structures other than buildings.

Section B102 Definitions

B102.1 Definitions
For the purpose of this appendix, certain terms are defined as follows:

FIRE FLOW. The flow rate of a water supply, measured at 20 pounds per square inch (psi) (138 kPa) residual pressure, that is available for fire fighting.

FIRE-FLOW CALCULATION AREA. The floor area, in square feet (m^2), used to determine the required fire flow.

Section B103 Modifications

B103.1 Decreases

The fire code official is authorized to reduce the fire-flow requirements for isolated buildings or a group of buildings in rural areas or small communities where the development of full fire-flow requirements is impractical.

B103.2 Increases

The fire code official is authorized to increase the fire-flow requirements where conditions indicate an unusual susceptibility to group fires or conflagrations. An increase shall be not more than twice that required for the building under consideration.

B103.3 Areas Without Water Supply Systems

For information regarding water supplies for fire-fighting purposes in rural and suburban areas in which adequate and reliable water supply systems do not exist, the fire code official is authorized to utilize NFPA 1142.

Section B104 Fire-Flow Calculation Area

B104.1 General

The fire-flow calculation area shall be the total floor area of all floor levels within the exterior walls, and under the horizontal projections of the roof of a building, except as modified in Section B104.3.

B104.2 Area Separation

Portions of buildings that are separated by fire walls without openings, constructed in accordance with the *California Building Code*, are allowed to be considered as separate fire-flow calculation areas.

B104.3 Type IA and Type IB Construction

The fire-flow calculation area of buildings constructed of Type IA and Type IB construction shall be the area of the three largest successive floors.

Exception: Fire-flow calculation area for open parking garages shall be determined by the area of the largest floor.

Section B105 Fire-Flow Requirements for Buildings

B105.1 One- And Two-Family Dwellings, Group R-3 and R-4 Buildings and Townhouses

The minimum fire-flow and flow duration requirements for one- and two-family dwellings, Group R-3 and R-4 buildings and townhouses shall be as specified in Tables B105.1(1) and B105.1(2).

TABLE B105.1(1)
REQUIRED FIRE FLOW FOR ONE- AND TWO-FAMILY DWELLINGS, GROUP R-3 AND R-4 BUILDINGS AND TOWNHOUSES

FIRE-FLOW CALCULATION AREA (square feet)	AUTOMATIC SPRINKLER SYSTEM (Design Standard)	MINIMUM FIRE FLOW (gallons per minute)	FLOW DURATION (hours)
0—3,600	No automatic sprinkler system	1,000	1
3,601 and greater	No automatic sprinkler system	Value in Table B105.1(2)	Duration in Table B105.1(2) at the required fire-flow rate
0—3,600	Section 903.3.1.3 of the *California Fire Code* or Section 313.3 of the *California Residential Code*	500	$^1/_2$
3,601 and greater	Section 903.3.1.3 of the *California Fire Code* or Section 313.3 of the *California Residential Code*	$^1/_2$ value in Table B105.1(2)	1

For SI: 1 square foot = 0.0929 m^2, 1 gallon per minute = 3.785 L/m.

TABLE B105.1(2)

—	—	191,401-Greater	138,301-Greater	85,101-Greater	8,000	

For SI: 1 square foot = 0.0929 m^2, 1 gallon per minute = 3.785 L/m, 1 pound per square inch = 6.895 kPa.

a. Types of construction are based on the *California Building Code*.

b. Measured at 20 psi residual pressure.

B105.2 Buildings Other Than One- And Two-Family Dwellings, Group R-3 and R-4 Buildings and Townhouses

The minimum fire-flow and flow duration for buildings other than one- and two-family dwellings, Group R-3 and R-4 buildings and townhouses shall be as specified in Tables B105.2 and B105.1(2).

Exception: ***[SFM]*** *Group B, S-2 and U occupancies having a floor area not exceeding 1,000 square feet, primarily constructed of noncombustible exterior walls with wood or steel roof framing, having a Class A roof assembly, with uses limited to the following or similar uses:*

1. *California State Parks buildings of an accessory nature (restrooms).*
2. *Safety roadside rest areas, (SRRA), public restrooms.*
3. *Truck inspection facilities, (TIF), CHP office space and vehicle inspection bays.*
4. *Sand/salt storage buildings, storage of sand and salt.*

TABLE B105.2

REQUIRED FIRE FLOW FOR BUILDINGS OTHER THAN ONE- AND TWO-FAMILY DWELLINGS, GROUP R-3 AND R-4 BUILDINGS AND TOWNHOUSES

AUTOMATIC SPRINKLER SYSTEM (Design Standard)	MINIMUM FIRE FLOW (gallons per minute)	FLOW DURATION (hours)
No automatic sprinkler system	Value in Table B105.1(2)	Duration in Table B105.1(2)
Section 903.3.1.1 of the *California Fire Code*	25% of the value in Table B105.1(2)[a]	Duration in Table B105.1(2) at the reduced flow rate
Section 903.3.1.2 of the *California Fire Code*	25% of the value in Table B105.1(2)[b]	Duration in Table B105.1(2) at the reduced flow rate

For SI: 1 gallon per minute = 3.785 L/m.

a. The reduced fire flow shall be not less than 1,000 gallons per minute.

b. The reduced fire flow shall be not less than 1,500 gallons per minute.

B105.3 Water Supply for Buildings Equipped With an Automatic Sprinkler System

For buildings equipped with an approved automatic sprinkler system, the water supply shall be capable of providing the greater of:

1. The automatic sprinkler system demand, including hose stream allowance.
2. The required fire flow.

INFORMATION ON FIRE FLOW AVAILABILITY
(To be Completed by Water Purveyor)

THE FIRE HYDRANT NEAREST THE PROPOSED STRUCTURE IN WITHIN _____ FEET VIA VEHICULAR ACCESS. THE FIRE FLOW SERVICE WILL BE RENDERED FROM A ____ INCH DIAMETER WATER MAIN		
MAIN LOCATED ON		
CITY OR AREA Culver City		
(# FEET)	(DIRECTION)	OF (NEAREST CROSS STREET)

UNDER NORMAL OPERATING CONDITIONS THE FIRE FLOW AVAILABLE FROM THIS _____ HYDRANT IS _____ GPM AT 20 PSI RESIDUAL FOR 2 HOURS AT _____PSI STATIC		
WATER Golden State Water Company A Subsidiary of American States Water Company PURVEYOR	DATE	
SIGNATURE	TITLE	TELEPHONE # 562-907-9200

Part III

CONDITIONS FOR APPROVAL BY BUILDING AND SAFETY DIVISION
(To be Completed by Building Department)

THE FIRE FLOW MAY BE APPROVED FOR SINGLE AND TWO-FAMILY DWELLINGS WHEN THE ABOVE INFORMATION IS COMPLETE AND SHOWS THAT THE FOLLOWING MINIMUM REQUIREMENTS ARE MET AND THE PROPERTY IS NOT IN FIRE ZONE 4.

THE WATER SYSTEM IS CAPABLE OF DELIVERING AT LEAST 750 GPM AT 20 PSI FOR TWO HOURS. THE DISTANCE FROM THE STRUCTURE TO THE FIRE HYDRANT DOES NOT EXCEED 450 FEET VIA VEHICULAR ACCESS.

APPROVED BY	DATE
OFFICE	

THIS APPROVAL IS VALID FOR SIX (6) MONTHS

Where the Water Service does not meet the requirements of the Building and Safety Division, Fire Department approval of plot plan will be required before a Building Permi can be issued by the Building Department and all approvals by the Fire Department will be issued by the Fire Prevention Division only.

Example Double Check Detector Assembly Cutsheet – Zurn Model 350DA

Model 350DA

Double Check Detector Assembly

Application

Designed for installation on water lines in fire protection systems to protect against both backsiphonage and backpressure of polluted water into the potable water supply. Model 350DA shall provide protection where a potential health hazard does not exist. Incorporates metered by-pass to detect leaks and unauthorized water use.

Materials

Main valve body	Ductile Iron ASTM A 536
Access covers	Ductile Iron ASTM A 536
Coatings	NSF Approved fusion epoxy finish
Internals	Stainless steel, 300 Series
	NORYL™
Fasteners	Stainless Steel, 300 Series
Elastomers	EPDM (FDA approved)
	Buna Nitrile (FDA approved)
Polymers	NORYL™
Springs	Stainless Steel, 300 Series

Options

(Suffixes can be combined)

- ☐ - with OS & Y gate valves (standard)
- ☐ L - less shut-off valves (flanged body connections)
- ☐ LM - less water meter
- ☐ - with gallon meter (standard)
- ☐ CFM - with cu ft meter
- ☐ CMM - with cu meter meter
- ☐ G - with groove end gate valves
- ☐ FG - with flanged inlet connection and grooved outlet connection
- ☐ PI - with Post Indicator Gate Valve
- ☐ GF - with flanged inlet connection and grooved outlet connection
- ☐ BG - with grooved end butterfly valves with integral monitor switches (2 1/2" - 10")

Accessories

- ☐ Repair kit (rubber only)
- ☐ Thermal expansion tank (Model XT)
- ☐ OS & Y Gate valve tamper switch (OSY-40)

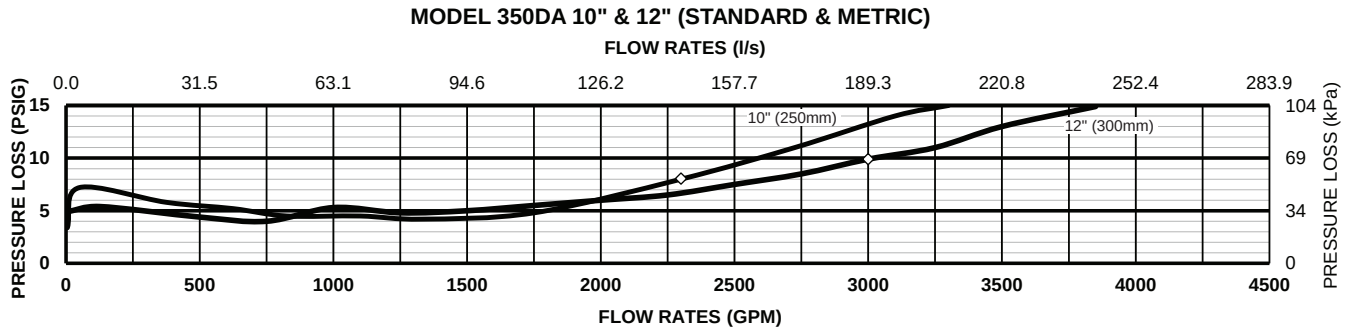
MODEL 350DA 10" & 12" (STANDARD & METRIC)



Typical Installation

Local codes shall govern installation requirements. Unless otherwise specified, the assembly shall be mounted at a minimum of 12" (305mm) and a maximum of 30" (762mm) above adequate drains with sufficient side clearance for testing and maintenance. The installation shall be made so that no part of the unit can be submerged.

OUTDOOR INSTALLATION

Specifications

The Double Check Detector Backflow Prevention Assembly shall be certified to NSF/ANSI/CAN 61, ASSE® Listed 1048, and supplied with full port gate valves. The main body and access cover shall be epoxy coated ductile iron (ASTM A 536), the seat ring and check valve shall be Noryl™, the stem shall be stainless steel (ASTM A 276) and the seat disc elastomers shall be EPDM. The first and second check valves shall be accessible for maintenance without removing the device from the line. The Double Check Detector Backflow Prevention Assembly shall be a ZURN WILKINS Model 350DA.

* The *California Code of Regulations* (CCR), Title 19, Division 1 provisions that are found in the *California Fire Code* are a reprint from the current CCR, Title 19, Division 1 text for the code user's convenience only. The scope, applicability and appeals procedures of CCR, Title 19, Division I remain the same.

The provisions contained in this appendix are not mandatory unless specifically referenced in the adopting ordinance or legislation of the jurisdiction.

User note:

About this appendix: *Appendix C focuses on the location and spacing of fire hydrants, which is important to the success of fire-fighting operations. The difficulty with determining the spacing of fire hydrants is that every situation is unique and has unique challenges. Finding one methodology for determining hydrant spacing is difficult. This particular appendix gives one methodology based on the required fire flow that fire departments can work with to set a policy for hydrant distribution around new buildings and facilities in conjunction with Section 507.5.*

Section C101 General

C101.1 Scope
In addition to the requirements of Section 507.5.1, fire hydrants shall be provided in accordance with this appendix for the protection of buildings, or portions of buildings, hereafter constructed or moved into the jurisdiction.

Exception: [SFM] *Group B, S-2 and U occupancies having a floor area not exceeding 1,000 square feet, primarily constructed of noncombustible exterior walls with wood or steel roof framing, having a Class A roof assembly, with uses limited to the following or similar uses:*

1. California State Parks buildings of an accessory nature (restrooms).

2. Safety roadside rest areas, (SRRA), public restrooms.

3. Truck inspection facilities, (TIF), California Highway Patrol (CHP) office space and vehicle inspection bays.

4. Sand/salt storage buildings, storage of sand and salt.

Section C102 Number of Fire Hydrants

C102.1 Minimum Number of Fire Hydrants for a Building

The number of fire hydrants available to a building shall be not less than the minimum specified in Table C102.1.

TABLE C102.1
REQUIRED NUMBER AND SPACING OF FIRE HYDRANTS[h]

FIRE-FLOW REQUIREMENT (gpm)	**MINIMUM NUMBER** OF HYDRANTS	**AVERAGE SPACING** BETWEEN HYDRANTS[a, b, c, f, g] (feet)	**MAXIMUM DISTANCE FROM ANY** POINT ON STREET OR ROAD **FRONTAGE TO A HYDRANT[d, f, g]**
1,750 or less	1	500	250
1,751—2,250	2	450	225
2,251—2,750	3	450	225
2,751—3,250	3	400	225
3,251—4,000	4	350	210
4,001—5,000	5	300	180
5,001—5,500	6	300	180
5,501—6,000	6	250	150
6,001—7,000	7	250	150
7,001 or more	8 or more[e]	200	120

For SI: 1 foot = 304.8 mm, 1 gallon per minute = 3.785 L/m.

a. Reduce by 100 feet for dead-end streets or roads.

b. Where streets are provided with median dividers that cannot be crossed by fire fighters pulling hose lines, or where arterial streets are provided with four or more traffic lanes and have a traffic count of more than 30,000 vehicles per day, hydrant spacing shall average 500 feet on each side of the street and be arranged on an alternating basis.

c. Where new water mains are extended along streets where hydrants are not needed for protection of structures or similar fire problems, fire hydrants shall be provided at spacing not to exceed 1,000 feet to provide for transportation hazards.

d. Reduce by 50 feet for dead-end streets or roads.

e. One hydrant for each 1,000 gallons per minute or fraction thereof.

f. A 50-percent spacing increase shall be permitted where the building is equipped throughout with an approved automatic sprinkler system in accordance with Section 903.3.1.1 of the *California Fire Code*.

g. A 25-percent spacing increase shall be permitted where the building is equipped throughout with an approved automatic sprinkler system in accordance with Section 903.3.1.2 or 903.3.1.3 of the *California Fire Code* or Section P2904 of the *California Residential Code*.

h. The fire code official is authorized to modify the location, number and distribution of fire hydrants based on site-specific constraints and hazards.

Section C103 Fire Hydrant Spacing

C103.1 Hydrant Spacing
Fire apparatus access roads and public streets providing required access to buildings in accordance with Section 503 shall be provided with one or more fire hydrants, as determined by Section C102.1. Where more than one fire hydrant is required, the distance between required fire hydrants shall be in accordance with Sections C103.2 and C103.3.

C103.2 Average Spacing
The average spacing between fire hydrants shall be in accordance with Table C102.1.

Exception: The average spacing shall be permitted to be increased by 10 percent where existing fire hydrants provide all or a portion of the required number of fire hydrants.

C103.3 Maximum Spacing
The maximum spacing between fire hydrants shall be in accordance with Table C102.1.

Section C104 Consideration of Existing Fire Hydrants

C104.1 Existing Fire Hydrants
Existing fire hydrants on public streets are allowed to be considered as available to meet the requirements of Sections C102 and C103. Existing fire hydrants on adjacent properties are allowed to be considered as available to meet the requirements of Sections C102 and C103 provided that a fire apparatus access road extends between properties and that an easement is established to prevent obstruction of such roads.

Chapter 1
Introduction

This study presents the transportation assessment for the proposed mixed-use development project (Project) at 6201 Bristol Parkway (Project Site) in the City of Culver City, California (City). The methodology and base assumptions used in the analysis were established in conjunction with the Culver City Public Works Department (CCPWD) Mobility and Traffic Engineering Division.

PROJECT DESCRIPTION

The Project proposes the demolition of 65,149 square feet (sf) of existing retail uses and the construction of a new mixed-use residential and commercial project with 846 multi-family housing units, including 36 units of affordable housing, and 11,406 sf of ground-floor, neighborhood-serving commercial space. Completion of the Project is anticipated in Year 2030.

Vehicular access to the Project Site would be provided by two separate driveways on Green Valley Circle and a third driveway on Bristol Parkway. The first driveway (Driveway A) on Green Valley Circle west of Fox Hills Drive would provide right-turn ingress and egress to the Project Site. The second driveway (Driveway B) on Green Valley Circle east of Fox Hills Drive and the third driveway (Driveway C) on Bristol Parkway would provide full access to the Project Site. A total of 1,220 parking spaces would be provided on-site within 10 levels of parking garage and accessed via three Project driveways. Pedestrian access to the Project Site would be provided via separate entrances along Green Valley Circle and Bristol Parkway.

The conceptual Project site plan is illustrated in Figure 1.

PROJECT LOCATION

As shown in Figure 2, the Project Site is bounded by Green Valley Circle to the north, Bristol Parkway to the east, and hotels to the south and west. The surrounding area is urbanized with commercial uses.

The Project is located approximately 0.2 miles east of the San Diego Freeway (I-405), which provides regional transportation from Irvine to the San Fernando Valley, and 0.3 miles south of the Marina Freeway (SR 90), which provides regional transportation from Marina del Rey to Culver City. Local access to the Project Site from I-405 is primarily served by Sepulveda Boulevard and local access from SR 90 is primarily served by Slauson Avenue.

Nearby transit service is provided along Slauson Avenue, Bristol Parkway, and Centinela Avenue. The Project is within 0.5 miles of the major transit stop at Sepulveda Boulevard & Slauson Avenue and, therefore, is within a Transit Priority Area (TPA).

STUDY SCOPE

The scope of analysis for this study was developed in consultation with the City and is consistent with *Culver City Transportation Study Criteria and Guidelines* (CCPWD, July 2020) (Guidelines) and in compliance with the California Environmental Quality Act (CEQA) Guidelines (California Code of Regulations, Title 14, Section 15000 and following). The base assumptions and technical methodologies (i.e., trip generation, study locations, analysis methodology, etc.) were identified as part of the study approach and were outlined in a Memorandum of Understanding (MOU) reviewed and approved by CCPWD in May 2025, provided in Appendix A.

ORGANIZATION OF REPORT

This report is divided into six chapters, including this introduction. Chapter 2 describes the transportation network including the existing and future circulation system, traffic volumes, and traffic conditions in the Project area. Chapter 3 provides the Project traffic and trip distribution. Chapter 4 presents the CEQA analysis of transportation impacts. Chapter 5 details the non-CEQA

transportation analyses. Chapter 6 summarizes the analyses and study conclusions. The appendices contain supporting documentation, including the signed MOU that outlines the study scope and assumptions and additional details supporting the technical analyses.

FIGURE 2

Chapter 2
Transportation Network Review

A comprehensive data collection effort was undertaken to develop a detailed description of existing and future conditions in the Project area.

The Existing Conditions analysis includes an assessment of the existing transportation infrastructure and conditions including freeway and street systems, and transit service, as well as pedestrian and bicycle circulation, at the time the MOU was approved in May 2025. Fieldwork (lane configurations, signal phasing, parking restrictions, etc.) for the analyzed intersections was collected in Year 2025.

In addition, this Chapter contains a discussion of the Future Conditions assumptions used to develop the Future without Project Conditions in Year 2030, which corresponds to projected occupancy of the Project, and Cumulative without Project Conditions in Year 2045, which corresponds to the horizon year of *Culver City General Plan 2045* (effective October 9, 2024) (General Plan).

STUDY AREA

The Project's transportation analysis Study Area, shown in Figure 3, includes intersections along Slauson Avenue, Hannum Avenue, Sepulveda Boulevard, and Centinela Avenue. This Study Area was established in consultation with CCPWD.

A total of 13 intersections, listed in Table 1, were identified for detailed analysis during the MOU process. The existing lane configurations at the analyzed intersections are provided in Figure 4.

The list of study intersections was reviewed and approved by the City.

EXISTING TRANSPORTATION CONDITIONS

Existing Street System

The existing street system in the Study Area consists of a regional roadway system including arterials and local streets that provide regional, sub-regional, or local access and circulation within the Study Area. These transportation facilities generally provide two to four travel lanes and usually allow parking on one or both sides of the street. Typically, the speed limits range between 25 and 35 miles per hour (mph) on the streets and 55 mph on the freeways.

Street classifications for City roadways are designated in the City's *Culver City General Plan Mobility Element* (effective October 9, 2024) (Mobility Element). The Mobility Element defines specific street standards in an effort to effectively link and serve local and regional transportation systems. Per the Mobility Element, street classifications are defined as follows:

- Freeways are designed to maximize the mobility of vehicles and do not directly serve adjacent land uses. Their primary function is to carry large volumes of traffic at high speed throughout the region.
- Primary Arterials are major cross-town thoroughfares with desired right-of-way (ROW) widths of 95 feet or more. They are highly signalized with green time priority to minimize delay. They include major cross-town thoroughfares serving major activity centers and are corridors with the highest traffic volume and longest trip demands.
- Secondary Arterials provide links between Collectors and Primary Arterials with desired ROW widths of 80 to 94 feet. They serve trips of moderate lengths and smaller geographic areas and provide intra-community continuity. They may carry local bus routes.
- Major Collectors provide a means for the movement of traffic from Local Streets to larger streets with desired ROW widths between 60 to 79 feet. They distribute and channel trips between Local Streets and Arterials, usually over a distance greater than 0.75 miles.
- Minor Collectors traverse residential neighborhoods for a short distance and have higher connecting driveway densities, lower speed limits and fewer signalized intersections. They distribute and channel trips between Local Streets and Arterials, usually over distance less than 0.75 miles, with desired ROW widths less than 60 feet.
- Local Streets provide access for vehicles to travel between private parking and driveways to larger, non-Local Streets. Generally, Local Streets do not exceed ROW widths of 60 feet and are mostly in residential neighborhoods.

The Mobility Element defines design characteristics, functional uses, and implementation for roadway segments and/or corridors that support the City's goals and objectives. Special Designation functional classifications for City roadways are also designated in the Mobility Element are defined as follows:

- Truck Routes support the movement of goods and freight on commercial vehicles (over 6,000 pounds - unladen) considered too heavy for many City streets.

- Active Transportation Corridors reallocate ROW, including converting or reconfiguring parking or travel lanes, to support safe, active transportation trips. Corridor improvements may include curb management solutions, passenger wayfinding and intelligent transportation systems (ITS) signalization, traffic calming, and pedestrian and bicycle facilities.

- Transit Priority Corridors reallocate ROW for specific transit and/or alternative modes. Corridor improvements may include transit priority lanes/signals, passenger wayfinding and ITS, and enhanced transit stops or mobility hubs.

- Car-Free Zones (Vacated Streets) are assigned to roadways (or roadway segments) and reallocate and/or repurpose ROW both inside and outside of the curb, for improvements that could include creation of public spaces, economic development initiatives, complete streets implementation, and pedestrian and bicycle safety measures.

Primary regional access to the Project Site is provided by I-405. In proximity to the Project Site, the Study Area is served by arterial streets such as Slauson Avenue, Hannum Avenue, and Sepulveda Boulevard. The following is a brief description of the roadways in the Study Area, including their classifications under the Mobility Element:

Freeways

- I-405 – I-405 generally runs in the northwest-southeast direction and is located 0.10 miles west of the Project Site. In the vicinity of the Project Site, I-405 provides six travel lanes in each direction. Access to and from I-405 is available via interchanges at Sepulveda Boulevard.

- SR 90 – SR 90 generally runs in the east-west direction and is located 0.20 miles north of the Project Site. In the vicinity of the Project Site, SR 90 provides four travel lanes in each direction. Access to and from SR 90 is available via interchanges at Slauson Avenue and Centinela Avenue.

Roadways

- Sepulveda Boulevard – Sepulveda Boulevard is a designated Primary Arterial, Truck Route, and Transit Priority Corridor that runs in the north-south direction and is located west of the Project Site. It provides six travel lanes, three in each direction, with a variable center median. Travel lanes are typically 10 feet wide, and the total paved width is generally 100 feet.

- Slauson Avenue – Slauson Avenue is designated Primary Arterial and Truck Route that runs in the east-west direction and is located north of the Project Site. It provides six travel lanes, three on each side, with a variable center median. Travel lanes are typically 11 feet wide, and the total paved width is generally 100 feet.

- Centinela Avenue – Centinela Avenue is a designated Primary Arterial and Truck Route that runs in the northwest to southeast direction and is located south of the Project Site. It provides five lanes of travel, three traveling in the northwest direction and two traveling southeast, with a two-way left-turn lane. Non-metered street parking is provided on the south side of the street and Class IV bike lanes are proposed along the street. Travel lanes are typically 11 feet wide, and the total paved width is generally 90 feet.

- Hannum Avenue – Hannum Avenue is a designated Primary Arterial that runs in the east-west direction and is located north of the Project Site. It provides four travel lanes, two in each direction, with a median crossover. Class II bike lanes are generally provided on both sides of the street. Travel lanes are typically 11 feet wide, and the total paved width is generally 100 feet.

- Bristol Parkway – Bristol Parkway is a designated Major Collector that runs in the north-south direction and is located adjacent to the west boundary of the Project Site. It provides four travel lanes, two in each direction, with a two-way left-turn lane median. Class II bike lanes are proposed along the street. Travel lanes are typically 11 feet wide, and the total paved width is generally 80 feet.

- Buckingham Parkway – Buckingham Parkway is a designated Major Collector that runs in the north-south direction and is located east of the Project Site. It provides two travel lanes, one in each direction, with a two-way left-turn lane median. Non-metered on-street parking is provided on both sides of the street south of Hannum Avenue with restrictions, and Class IV bike lanes are proposed on the street. Travel lanes are typically 12 feet wide, and the total paved width is generally 85 feet.

- Fox Hills Drive – Fox Hills Drive is a designated Local Street that runs in the north-south direction and is located north of the Project Site. It provides two travel lanes, one in each direction as well as left-turn lanes at intersection. Travel lanes are typically 13 feet wide, and the total paved width is generally 40 feet.

- Green Valley Circle – Green Valley Circle is a designated Secondary Arterial that runs in the northwest to southeast direction and is located adjacent to the Project Site to the north. It provides four travel lanes, two in each direction, with a two-way left-turn lane. Class II bike lanes are proposed along the street. Travel lanes are typically 12 feet wide, and the total paved width is generally 85 feet.

The existing intersection mobility facilities at the study intersections are shown in Figure 5.

Existing Transit System

Figure 6 illustrates the existing public transit service in the Study Area, which is served by bus lines operated by Culver CityBus, Santa Monica Big Blue Bus (Big Blue Bus), and Los Angeles County Metropolitan Transportation Authority (Metro).

Table 2 summarizes the existing transit service operating in the Study Area for each of the service providers in the region, the type of service (peak vs. off-peak, express vs. local), and frequency of service. The average headways during the peak hour were estimated using detailed trip data from Year 2025 provided by Culver CityBus, Big Blue Bus, and Metro. The Project is located approximately 1,800 feet from a major transit stop at Sepulveda Boulevard & Slauson Avenue.

Existing Bicycle System

As shown in *Culver City Bicycle & Pedestrian Action Plan* (CCPWD, June 2020), the existing bicycle system in the Study Area consists of a variety of bicycle facilities.

Culver City Bicycle & Pedestrian Action Plan is comprised of a network of streets that prioritize bicyclists and provide Class I Shared-Use Paths, Class II Bicycle Lanes, Class III Bicycle Routes and Bike Boulevards, which provide sharrows and signage, and Class IV Separated Bikeways.

Within the Study Area, there are Class II bicycle lanes on Hannum Avenue between Bristol Parkway and Slauson Avenue, and on Centinela Avenue west of Green Valley Circle. Bicycle facilities at the study intersections are shown in Figure 5.

Existing Pedestrian Facilities

Per *Culver City Bicycle & Pedestrian Action Plan*, most streets in the City have existing sidewalks in good condition. Marked crosswalks, including transverse lines and continental striping, are provided at most major intersections throughout the City.

The walkability of existing facilities is based on the availability of pedestrian routes necessary to accomplish daily tasks without the use of an automobile. These attributes are quantified by Walk Score and assigned a score out of 100 points. With access to numerous commercial businesses, residences, and cultural centers, the walkability of the Project Site is approximately 80 points[1]. The sidewalks that serve as routes to the Project Site provide proper connectivity and adequate widths for a comfortable and safe pedestrian environment. Adjacent to the Project site there is an existing network where complete sidewalks are provided with trees and intermittent landscaping. Pedestrian crossings at signalized intersections within the Study Area are provided. Pedestrian facilities, such as pedestrian phasing, curb ramps, and crosswalk striping, at the study intersections are shown in Figure 5.

Vision Zero

The City adopted the Vision Zero initiative in 2016. Vision Zero is a traffic safety policy that promotes strategies, including modifying the design of streets, to eliminate collisions that result in severe injury or death and increase safety for the most vulnerable road users. Vision Zero has identified the High Injury Network (HIN), a network of streets based on the collision data from *Culver City Bicycle & Pedestrian Action Plan* between Years 2014-2019, where strategic investments would have the biggest impact in reducing death and severe injury. Within the Study Area, Sepulveda Boulevard, Slauson Avenue, Bristol Parkway, Green Valley Circle, and Centinela Avenue are identified as part of the HIN.

[1] Walk Score (www.walkscore.com) rates the Project Site (6201 Bristol Parkway) with a score of 80 of 100 possible points (scores assessed on February 19, 2025). Walk Score calculates the walkability of specific addresses by taking into account the ease of living in the neighborhood with a reduced reliance on automobile travel.

Safe Routes to School

The City identifies Safe Routes to School (SRTS) Improvement Zones where, in addition to prioritizing traffic calming and other active transportation-focused projects, the City recommends improved pedestrian network connections to local schools. The SRTS Improvement Zones have intersection and corridor safety projects within a 0.25-mile radius of several K-12 schools. Safety projects consist of new or improved crosswalks, traffic signal improvements, traffic calming elements such as speed humps and roundabouts, curb ramps and extensions, updated signage and pavement markings, and sidewalk improvements. Within the Study Area, the Project Site, as well as Green Valley Circle, Bristol Parkway, Fox Hills Drive, Slauson Avenue, Hannum Avenue, Buckingham Parkway, and Centinela Avenue are within SRTS Improvement Zones.

Existing Traffic Volumes

Intersection turning movement counts for typical weekday morning (7:00 AM to 9:00 AM) and afternoon (4:00 PM to 6:00 PM) peak periods were collected in February 2025 while schools were in session and weather conditions were clear. The Existing Conditions (Year 2025) intersection peak hour traffic volumes are illustrated in Figure 7. Traffic count worksheets are provided in Appendix B.

FUTURE AND CUMULATIVE TRANSPORTATION CONDITIONS

The forecast for Future without Project Conditions (Year 2030) and Cumulative without Project Conditions (Year 2045) was prepared in accordance with procedures outlined in the Guidelines. Specifically, there are two requirements for developing the future traffic volume forecast: (1) projected future volumes, and (2) ongoing or entitled development projects near or within the Study Area (Related Projects).

The ambient growth factor discussed below likely includes some traffic increases resulting from the Related Projects. Therefore, through some inherent double-counting of vehicles, the traffic analysis provides a conservative estimate of Future without Project Conditions traffic volumes.

The forecast base year traffic volumes, therefore, include ambient growth, which reflects increases in traffic due to regional growth and development outside the Study Area as well as the Related Projects.

Ambient Traffic Growth

Existing traffic levels have historically been projected to increase as a result of regional growth and development. To provide a conservative estimate of future background conditions, this analysis used the 1% annual growth precedent as approved in the MOU to simulate anticipated buildout for both Year 2030 and Year 2045 traffic volumes. The total adjustment applied over the five-year and 20-year periods was 5% and 20%, respectively. These growth factors account for increases in traffic due to potential projects not yet proposed and projects located outside the Study Area.

Related Projects

In accordance with the Guidelines, this study also considered the effects of the Project in relation to the Related Projects. Including this analysis step, the potential impact of the Project was evaluated within the context of past, present, and probable future developments capable of producing cumulative impacts. The list of Related Projects is based on information provided by both the City and the City of Los Angeles in February 2025, as well as recent studies of development projects in the area. Related Projects within 0.50 miles of the Project Site were considered in the analysis and represent development projects most likely to add traffic to the study intersections. The Related Projects are detailed in Table 3 and their approximate locations are shown in Figure 8.

Though the buildout years of many of these Related Projects are uncertain and may be well beyond the buildout year of the Project, and notwithstanding that some may never be approved or developed, they were all considered as part of this transportation assessment and conservatively assumed to be completed by the Project buildout year of 2030 and General Plan horizon year of 2045. The traffic growth due to the development of Related Projects considered in this analysis is highly conservative and, by itself, substantially overestimates the actual traffic volume growth in the

area that would likely occur prior to Project buildout years. With the addition of the 1% per year ambient growth factor previously discussed, the Future without Project Year 2030 and Cumulative without Project Year 2045 Conditions are even more conservative.

Using these conservative assumptions, the potential traffic operations of the Project were evaluated. The development of estimated traffic volumes added to the Study Intersections as a result of Related Projects involves the use of a three-step process: trip generation, trip distribution, and trip assignment.

Trip Generation. Trip generation estimates for the Related Projects were calculated using a combination of previous study findings and the trip generation rates contained in *Trip Generation Manual, 11th Edition* (Institute of Transportation Engineers, 2021), or as provided by the respective jurisdiction. The Related Projects trip generation estimates summarized in Table 3 are conservative in that they do not in every case account for either the trips generated by the existing uses to be removed or the likely use of other travel modes (e.g., transit, bus, bicycling, walking, carpool). Further, they do not account for the internal capture trips within a multi-use development or for the interaction of trips between multiple Related Projects, in which one Related Project serves as the origin for a trip destined for another Related Project.

Trip Distribution. The geographic distribution of the traffic generated by the Related Projects is dependent on several factors. These factors include the type and density of the proposed land uses, the geographic distribution of population from which the employees / residents and potential patrons of the proposed developments are drawn, and the location of these projects in relation to the surrounding street system. These factors were considered along with logical travel routes through the street system to develop a reasonable pattern of trip distribution.

Traffic Assignment. The trip generation estimates for the Related Projects were assigned to the local street system using the trip distribution pattern described above. Figure 9 shows the peak hour traffic volumes associated with these Related Projects at the Study Intersections.

Future without Project Traffic Volumes

The Related Projects volumes were then added to the existing traffic volumes after adjustment for ambient growth through the projected Project completion year of 2030. As discussed above, this is a conservative approach as many of the Related Projects may be reflected in the ambient growth rate. These volumes represent the Future without Project Conditions (i.e., ambient traffic growth and Related Project traffic added to existing traffic volumes) for Year 2030 at the study intersections and are shown in Figure 10.

Cumulative without Project Traffic Volumes

Similar to the Future without Project Conditions traffic volumes, the Related Projects volumes were added to the existing traffic volumes after adjustment for ambient growth through the projected General Plan horizon year of 2045. These volumes represent the Cumulative without Project Conditions (Year 2045) at the study intersections and are shown in Figure 11.

Future Improvements

The analysis of Future Conditions considered transportation improvements that are funded and expected to be implemented prior to the buildout of the Project. These improvements could result in changes to the physical configuration at the study intersections. Other proposed improvement projects that are not funded and traffic / trip reduction strategies such as Transportation Demand Management (TDM) programs for individual buildings and developments were conservatively omitted from the Future and Cumulative Conditions analyses. The future improvements proposed as part of the Mobility Element are illustrated in Figure 12. A summary of additional future improvements is provided below.

Bicycle and Pedestrian Action Plan. *Culver City Bicycle & Pedestrian Action Plan* identifies key recommended improvements for corridors throughout the City. The goal of this plan is to improve active forms of transportation by providing accessible, safe, and comfortable environments for all road users. The following summarizes the recommended network upgrades, depicted in Figure 12, planned on corridors within 0.25 miles of the Project Site:

- Recommended Bicycle Facilities: New Class II bikeways on Green Valley Circle and Bristol Parkway, as well as new Class IV bikeways on Sepulveda Boulevard and Centinela Avenue, have been recommended for installation.

- Recommended Pedestrian Facilities: A new beacon/signal has been recommended for installation at Sepulveda Boulevard &Green Valley Circle. New or improved crossings have been recommended at Fox Hills Drive & Green Valley Circle.

- Opportunity Corridors: Three Opportunity Corridors consisting of "planning-level projects" for additional improvements for bicycling and walking included the Downtown Core, Overland Avenue, and Farragut Drive. None of these Opportunity Corridors are located within 0.25 miles of the Project Site.

The specific timeline for implementation of these recommendations has not been identified; therefore, no changes to intersection lane configurations were made as a result of *Culver City Bicycle & Pedestrian Action Plan*.

Mobility Hubs. The City identifies key intersections where mobility hubs could be implemented into the broader transportation system to maximize the benefits and mitigate negative externalities of new transit services. Per the Mobility Element, "mobility hubs are places designed to connect people with multiple modes of transportation and maximize first- and last-mile connections to high-quality transit service. Mobility hubs integrate different modes and can include a variety of features, like bus layover zones, shelters, real time information, bikeshare stations, carshare facilities, wayfinding, taxi stands, public Wi-Fi service, bicycle parking and lockers, micromobility services, retail, and open space." The study intersection of Bristol Parkway & Green Valley has been identified for implementation of a mobility hub. The specific timeline for implementation of mobility hubs has not been identified; nevertheless, the Project would not preclude future implementation at this intersection.

Notes:

[a] Related Project information provided by the City of Culver City and City of Los Angeles in January 2025. Related Projects include developments within approximately 0.5 miles of the Project Site. Trip Generation estimates developed internally using *Trip Generation Manual, 11th Edition* (Institute of Transportation Engineers, 2021).

Chapter 3
Project Traffic

Trip generation estimates, trip distribution patterns, and trip assignments were prepared for the Project. These components form the basis of the Project's non-CEQA traffic analysis.

PROJECT TRIP GENERATION

The number of vehicle trips expected to be generated by the Project was estimated using rates published in *Trip Generation Manual, 11th Edition*. These rates are based on surveys of similar land uses at sites around the country and are utilized to calculate the number of vehicle trips traveling to and from the Project Site during the morning and afternoon peak hours relative to the size of development.

Appropriate trip reductions were applied in consultation with CCPWD to account for public transit usage, internal capture, and pass-by trips. The Project is located near various bicycle facilities and within 0.50 miles walking distance of several bus stops, including 0.10 miles walking distance of the Bristol Parkway / Green Valley Circle and Green Valley Circle / Sepulveda transit stops. Therefore, in consultation with CCPWD, a 10% transit / walk-in reduction was applied to the trip generation estimates to account for transit usage and walking arrivals from the surrounding neighborhoods and adjacent commercial developments.

The number of trips currently generated by the existing retail uses to be removed with development of the Project was also estimated using the rates published in *Trip Generation Manual, 11th Edition*. The existing use trip estimates also account for trip reductions consistent with the Project.

As shown in Table 4, after accounting for the adjustments above and the removal of existing uses, the Project is expected to generate 934 daily trips, including 233 net new morning peak hour trips (28 inbound trips, 205 outbound trips) and 50 net new afternoon peak hour trips (72 inbound trips, -22 outbound trips).

PROJECT TRIP DISTRIBUTION

The geographic distribution of trips generated by the Project is dependent on the location of employment, residential, and commercial centers to and from which residents, employees, and visitors of the Project would be drawn, characteristics of the street system serving the Project Site, the location of the Project driveways, and existing traffic patterns, as well as input from CCPWD staff. As detailed in Figure 13A and 13B, Driveway A would provide right-turn ingress and egress to the Project Site, while Driveway B and Driveway C on Bristol Parkway would provide full access to the Project Site.

The intersection-level trip distribution pattern for the residential and commercial traffic at the study intersections is shown in Figures 13A and 13B, respectively. Generally, the regional pattern is as follows:

Residential

- 15% to/from the north
- 35% to/from the east
- 15% to/from the south
- 35% to/from the west

Commercial

- 15% to/from the north
- 35% to/from the east
- 30% to/from the south
- 20% to/from the west

PROJECT TRIP ASSIGNMENT

The Project trip generation estimates summarized in Table 4 and the trip distribution pattern shown in Figures 13A and 13B were used to assign the Project-generated traffic through the study intersections. Figure 14 illustrates the Project-only traffic volumes for the Project at the study intersections during typical weekday morning and afternoon peak hours.

Notes:
ksf: 1,000 square feet, du: dwelling unit
[a] Source: AM and PM Peak Hour Rates: *Trip Generation, 11th Edition* , Institute of Transportation Engineers, 2021.
[b] The Project site is located within 0.25 miles of bus stops for several Culver CityBus lines. Therefore, a 10% transit reduction was applied to account for transit usage and walking visitor arrivals.
[c] Internal capture reductions account for person trips made between distinct land uses within a mixed-use development (i.e., between residential and retail).
[d] Pass-by reductions account for Project trips made as an intermediate stop on the way from an origin to a primary trip destination without route diversion.

Chapter 4
CEQA Analysis of Transportation Impacts

This chapter presents an analysis of potential CEQA-related transportation impacts. The analysis also discusses the consistency of the Project with adopted City plans and policies and the improvements, if necessary, associated with the results of a vehicle miles traveled (VMT) analysis compliant with State requirements under *State of California Senate Bill 743* (Steinberg, 2013) (SB 743).

METHODOLOGY

SB 743 required the Governor's Office of Planning and Research to change the CEQA Guidelines regarding the analysis of transportation impacts. Under SB 743, the focus of transportation analysis shifted from vehicular delay (level of service [LOS]) to VMT, with the intent of reducing greenhouse gas emissions, creating multimodal networks, and promoting mixed-use developments.

Section 4 of the Guidelines defines the required CEQA methodology of analyzing a project's transportation impacts in accordance with SB 743. Per the Guidelines, the CEQA transportation analysis contains the following thresholds for identifying significant impacts:

- Threshold A: Programs, Plans, Ordinances, and Policies
- Threshold B: VMT – Land Use Projects
- Threshold C: VMT – Transportation Projects
- Threshold D: Geometric Design Hazards

These thresholds were reviewed and analyzed, as detailed in the following Sections 4A-4D.

Section 4A:
Programs, Plans, Ordinances, and Policies

Threshold A states that a project would result in an impact if it conflicts with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle, and pedestrian facilities.

PROJECT CONSISTENCY WITH PLANS, PROGRAMS, ORDINANCES, AND POLICIES

Table 1 of the Guidelines identifies the City programs, plans, ordinances, and policies relevant in determining project consistency. As discussed below, the Project is consistent and does not conflict with the City's adopted programs, plans, ordinances, and policies listed in Table 1 of the Guidelines; therefore, the Project would not result in a significant impact under Threshold A. A detailed discussion of the plans, programs, ordinances, or policies related is provided below.

Traffic Code, Chapter 7.05: Motor Vehicle Air Quality Management

Culver City Municipal Code (CCMC) Chapter 7.05 establishes transportation demand and trip reduction measures to reduce vehicular emissions of new commercial developments in excess of 25,000 sf.

While the overall Project is greater than 25,000 sf, it is primarily a residential development with a 11,406 sf commercial component and not subject to the requirements of CCMC 7.05. However, the Project is anticipated to implement features with TDM elements to reduce single occupancy vehicle trips and promote alternative modes of travel.

Mobility Element

The purpose of the Mobility Element is to establish a policy framework that envisions a 2045 citywide network for all transportation modes by encouraging use of active and shared modes getting to, from, and within Culver City by providing more reliable, safe, affordable, convenient, clean, and connected mobility options for people of all ages and abilities. By enhancing safe and reliable access to schools, parks, community services, neighborhood serving retail, and jobs, the Mobility Element aids in creating a community that is more equitable, inclusive, innovative, and sustainable. As specified in Chapter 2, the Mobility Element identifies existing community mobility-related concerns and opportunities, and establishes goals, policies, and guidance to address these concerns for the future improvement of the transportation network. The Project does not propose to modify or make any modifications to the street classifications or Special Designations, nor would it preclude the City from making improvements to the transportation network.

General Plan 2045 Land Use and Community Design Element

The purpose of the City's *Culver City General Plan Land Use and Community Design Element* (effective October 9, 2024) (Land Use Element) is to define the pattern, scale, organization, and character of development for the city's various land uses, including residential, mixed use, office, retail, light industrial, and civic and public spaces. The Project is located within a Transit-Oriented Community because it is located within 0.5 miles of the Westfield Culver City Transit Center. According to the Land Use Element, the Project is also located in a Mixed-Use High zone, defined as an area with large-scale mixed use, residential, and commercial uses. The Project proposes a new mixed-use residential and commercial development that will replace existing vacant buildings and reactivate the street frontage along Bristol Parkway and Green Valley Circle. Thus, the mixed-use residential and commercial uses of the Project would be compatible with the goals for development in the Mixed-Use High zone designated by the Land Use Element.

General Plan Special Study Areas

The General Plan identifies Special Study Areas of the City that have unique opportunities or constraints and will benefit from a closer analysis and specific policies and programs. The Fox

Hills neighborhood, a Special Study Area due to the higher densities and mix of businesses allowed under the mixed-use designations, has potential for new business campuses, high and medium density housing, mixed-use developments, and community amenities. Developments in the Fox Hills area can provide opportunities for improved mobility, connectivity, streetscapes, and parks. As noted above, the Project's residential and commercial uses align with future vision for Fox Hills, and the Project will contribute to the improved mobility and connectivity of this neighborhood by activating the street frontages and providing transportation alternatives for residents, employees, and visitors to the Project Site.

Better Overland & Safer Fox Hills Project (BOSFHP)

The BOSFHP intends to promote the safe and orderly movement for all modes of transportation. Within the Fox Hills neighborhood, the BOSFHP would install a variety of traffic calming measures to improve safety for all users, enhance the sidewalk experience, and discourage cut-through traffic. Most of the improvement measures would neither affect any of the Study Intersections nor modify lane configurations that would alter the traffic analysis in Chapter 5A.

As illustrated in Appendix C, the Project will construct a raised concrete curb extension at the northeast corner of Bristol Parkway & Doverwood Drive, install continental crosswalks across Bristol Parkway and Doverwood Drive, and install appropriate traffic control devices (to be determined later) for the crosswalks. This improvement is consistent with the BOSFHP and will enhance the safety of pedestrian and bicycle movement in the Study Area.

Neighborhood Traffic Management Program (NTMP)

The City adopted a series of procedures for the implementation of NTMPs, as defined in the City's *Neighborhood Traffic Management Program (NTMP) Procedures Manual* (November 22, 2004). The Project is not projected to lead to trip diversion along residential Local Streets, nor is the Project projected to add a substantial amount of automobile traffic to congested Arterial Streets that could potentially cause a shift to residential Local Streets. Therefore, the Project would not be required to propose an NTMP for the surrounding residential neighborhoods. In addition, the

Project would not conflict with the BOSFHP or preclude any measures identified therein from being installed.

Residential Parkway Guidelines

The City's *Culver City Residential Parkway Guidelines* (2016) inform the general public about parkway regulations and provides guidance on planning, creating, and maintaining a parkway landscape specifically for residential areas. Property owners are expected to maintain the parkway space adjacent to their properties, with the exception of street trees, which are maintained by the City. Sidewalk access and step-out strips are to be installed and maintained along all residential parkways in the City. The Project is a residential project; however, it is along a commercial parkway. Therefore, *Culver City Residential Parkway Guidelines* would not apply to the Project. Nevertheless, the Project will maintain the surrounding landscaping and sidewalks adjacent to the Project Site.

Short-Range Mobility Plan

Short-Range Mobility Plan (Culver CityBus, FY 2022-2026) provides a strategic blueprint designed to maintain a forward-thinking focus on improved mobility services with a continued dedication to customer service and fiscal responsibility. The plan provides an overview of the City's existing mobility services and policies that further improve mobility in the City, such as transit-oriented development and complete streets projects. Further, the plan proposes a variety of measures to improve mobility services, implement physical changes to transit facilities and roadways, and upgrade existing buses with fully electric vehicles. The Project would not conflict with any of the proposed changes in *Short-Range Mobility Plan*, and improvements made in the plan would likely enhance transit alternatives for residents, employees, and visitors to the site.

Bicycle and Pedestrian Action Plan

Culver City Bicycle & Pedestrian Action Plan seeks to promote a long-term vision for the City that would "ensure comfortable, safe, and attractive places to bike and walk so that these forms of active transportation become first choices for travelling around our city." Adjacent to the Project Site, Bristol Parkway and Green Valley Circle have been identified for Class II bicycle lane improvements. However, the Project would not interfere with any improvements proposed as part of *Culver City Bicycle & Pedestrian Action Plan*. Further, the Project would support active modes of transportation by providing bicycle parking and improving the pedestrian facilities adjacent to the Project frontage.

Complete Streets Policy

The City's *City of Culver City Complete Streets Policy* (Adopted January 13, 2020) intends to "promote healthy and sustainable mobility for Culver City residents and visitors by providing safe, convenient, and comfortable access to destinations throughout the City by walking, bicycling, transit, and autos." The policy sets a variety of goals and standards in the application of complete streets principles including improving mobility for all road users, enhancing safety, and creating a standard set of criteria applicable to all city departments and private developers who construct within the public ROW. The Project would incorporate the complete streets principles into the Project design to encourage multi-modal transportation options within the community.

Local Road Safety Plan

The City's *Local Roadway Safety Plan* (November 2021) (LRSP) is a document that enables the City to determine potential traffic safety projects on roadways and intersections within the City. In an effort to eliminate fatal and severe injury collisions, the document provides a comprehensive collisions analysis through the LRSP to identify high-risk corridors and intersections with the highest collision frequency and severity. Of the several high-risk intersections and street segments identified in the plan, Bristol Parkway and Green Valley Circle are located adjacent to the Project Site. However, the Project's three driveways would meet the street at a 90-degree

angle and have no obstructed sightlines. Thus, the Project would not preclude the City from implementing improvements to eliminate fatal and severe injury collisions as part of the LRSP.

Vision Zero

The City adopted the Vision Zero initiative in 2016 and has incorporated policies and infrastructure improvements into *Culver City Bicycle & Pedestrian Action Plan*. The Project Site is located adjacent to Bristol Parkway, which is identified in the City's HIN. Nevertheless, the Project would not preclude any Vision Zero improvements on this corridor as it is not proposed to be modified by the Project. Thus, the Project does not conflict with Vision Zero.

Section 4B:
VMT Analysis – Land Use Projects

Threshold B of the Guidelines analyzes whether a project causes substantial VMT and is generally applied to land use projects. Specifically, Threshold B inquires whether a project would conflict with or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)(1), which states that (for land use projects) "vehicle miles travelled exceeding an applicable threshold of significance may indicate a significant impact." This subdivision also states that a lead agency has discretion to choose the most appropriate method to evaluate a project's VMT.

Per the Guidelines, a "no impact" determination can be made for a project if any of the following screening criteria are met:

1. It is a small project that results in fewer than 250 daily or 25 peak hour trips
2. The project is within 0.50 miles of the key TPAs of: Metro E Line Culver City Station, Metro E Line La Cienega Station, Westfield Culver City Transit Center, or the Sepulveda Boulevard & Venice Boulevard intersection
3. The project is located within any TPA where at least 15% of the on-site residential units are affordable
4. The project is an affordable housing project where 100% of the dwelling units are affordable
5. The project is a local serving retail project with less than 50,000 sf in size at a single store

If none of the above screening criteria are met, the Guidelines provide guidance for the further analysis of VMT, as discussed in the following section.

PROJECT VMT ANALYSIS

The City's *Culver City VMT Tool* (October 2021) (VMT Calculator) was used to conduct the VMT screening evaluation. Based on guidance from the City, the VMT Calculator was modeled for the Project's land uses and density as the primary input.

The detailed screening output from the VMT Calculator is provided in Appendix D.

The Project is located within 0.5 miles of the Westfield Culver City Transit Center, a designated TPA, and the retail component of the project is less than 50,000 sf. Thus, , the Project is presumed to result in a less than significant VMT impact, no mitigation measures are required to address VMT. and no further analysis is required.

Nonetheless, as previously detailed, the Project is anticipated to implement features with TDM elements to reduce single occupancy vehicle trips while promoting the use of alternative transportation modes, thereby supporting further reductions to Project VMT.

Section 4C:
VMT Analysis – Transportation Projects

The intent of Threshold C is to assess whether a transportation project would induce substantial VMT by increasing vehicular capacity on the roadway network, such as the addition of through traffic lanes on existing or new highways, including general purpose lanes, high-occupancy vehicle lanes, peak period lanes, auxiliary lanes, and lanes through grade-separated interchanges.

The Project is not a transportation project that would induce automobile travel. Therefore, the Project would not result in a significant impact under Threshold C, and further evaluation is not required.

Section 4D:
Geometric Design Hazards Analysis

Threshold D of the Guidelines requires that potential on-street hazards be reviewed for all projects. This analysis focuses on the off-site conditions affected by the Project.

The analysis involved the review of existing vehicle-vehicle, vehicle-bicycle, and vehicle-pedestrian interactions on transportation infrastructure adjacent to the Project Site and the potential impacts and hazards of the Project on those interactions based on the following factors in Threshold D:

- Bicycle, pedestrian, auto and public transit network and facilities surrounding the Project Site and crossing project driveways
- Relative bicycle, pedestrian, auto, and public transit activity levels
- Existing environment and roadway conditions, such as slopes, curves, connectivity, proximity to intersections, and barriers, and how the Project would change or interact with these conditions.
- Safety of vehicles accessing the Project driveways
- Sight-lines at the driveways and surrounding the site
- Safety of pedestrians and bicyclists when crossing Project driveways
- Proximity of incompatible uses that could cause a transportation hazard

DRIVEWAY DESIGN FEATURES

Vehicular access to the Project Site would be provided by two separate driveways on Green Valley Circle and a third driveway on Bristol Parkway. The first driveway (Driveway A) on Green Valley Circle west of Fox Hills Drive would provide right-turn-only ingress and egress access to the Project Site. The second driveway (Driveway B) on Green Valley Circle east of Fox Hills Drive and third driveway (Driveway C) on Bristol Parkway would provide full access to the Project Site.

The parking garage will serve residents and retail visitors. Driveway A will serve residents with gate-controlled access to Level 1 of the parking garage. Residential and commercial parking access is provided by Driveway B, with access to Level 3, and Driveway C, with access to Level 2. Residential parking on Levels 4-10 is accessed via internal ramps.

Residential move-in loading will be accommodated at three locations: at the southerly edge of the property, as accessed through the Fire Lane from Driveway A; in a designated on-site loading zone on Driveway B; and at a dedicated residential loading area on Bristol Parkway, southerly from Driveway C. A residential delivery zone is also located on site on Driveway B. A retail loading dock is located on-site, east of Driveway B and accessed off Green Valley Circle.

Pedestrian access to the Project Site would be provided via separate entrances along Green Valley Circle and Bristol Parkway.

The sections of Green Valley Circle and Bristol Parkway along which the Project driveways are situated provide four travel lanes, two in each direction, with two-way left-turn medians and designated turn pockets at the adjacent signalized intersection. No on-street parking is provided along either Project frontage. Sidewalks are provided on both streets adjacent to the Project Site. No existing bicycle facilities are provided adjacent to the Project Site; however, the City has proposed Class II bike lanes along Green Valley Circle and Bristol Parkway in or *Culver City Bicycle & Pedestrian Action Plan*. To ensure maximum visibility, the Driveway and Fire Lane intersections would meet all of the City's requirements and would provide adequate sight distance for drivers of vehicles entering and leaving the Project Site, as well as for bicyclists and pedestrians wishing to cross the Driveway. No exceptional horizontal or vertical curvatures exist along this section of roadway that would create sight distance issues for Project traffic utilizing the proposed driveways.

No unusual or new obstacles are presented in the Project's driveway design that would be considered hazardous to pedestrians, bicyclists, or motorists. All driveways will be subject to review by the City.

Pedestrian, Bicycle, and Transit Activity

Adequate sight distance would be provided at the Project driveways to ensure safety for all road users, including pedestrians, bicyclists, and motorists. The Project driveways would be designed to remain clear of hardscapes, vegetation, or signage that would impede sight lines.

Minimal pedestrian and bicycle traffic was observed to travel on Green Valley Circle and Bristol Parkway adjacent to the Project Site. Based on the trip generation estimates detailed in Table 4, the Project would generate fewer than six vehicles per minute across the three driveways during the peak hours. Thus, pedestrians and bicyclists would have adequate gaps in vehicular traffic at the driveways to safely cross, and the Project is not anticipated to result in an increase in vehicle-pedestrian or vehicle-bicycle conflicts. The Bristol Parkway / Green Valley Circle bus stop adjacent to the Project Site is on the opposite side of Green Valley Circle from the Project, so the sidewalk and bus stop would not be affected by construction. Therefore, the Project would not affect transit activity or access.

Physical Terrain

The Project Site is located on a parcel with a change in vertical elevation on-site; however, no line-of-sight issues would be caused by changes in elevation at street level, and drivers would be able to safely identify approaching vehicles, pedestrians, and bicycles at the Project driveways. The driveways are designed to intersect the public ROW at 90-degree angles to the extent possible, with adequate building setback to allow pedestrians and bicyclists to observe vehicles within the driveway.

Incompatible Uses

The Project would be compatible with the surrounding residential and commercial uses. Furthermore, no elements of the Project's uses or design would be considered incompatible.

Summary

Based on the site plan review and design, the Project does not present any geometric design features that would substantially increase hazards related to traffic movement, mobility, or pedestrian accessibility and, thus, Project impacts are considered less than significant.

Chapter 5

Supplemental Transportation Analysis

This chapter summarizes the supplemental transportation analysis of the Project, including Project traffic, access, safety, and circulation, as well as the Project's effect on nearby pedestrian, bicycle, and transit facilities. This chapter also summarizes the evaluation of the Project's operational conditions, parking supply and requirements, and potential effects due to Project construction.

Section 5 of the Guidelines identifies the following supplemental transportation analyses for reviewing potential transportation deficiencies that may result from a development project:

- Traffic Operations
- Transit Operations
- Driveways
- Parking
- Curb Space Allocation
- Safety Analysis

The supplemental transportation analyses were reviewed in detail in Sections 5A-5F. In addition, a review of the construction activities of the Project is provided in Section 5G.

Section 5A
Traffic Operations

This section assesses the ability of the circulation system to accommodate the addition of vehicular traffic generated by the Project and Related Projects.

OPERATIONAL ANALYSIS METHODOLOGY

Intersection peak hour operations were evaluated for typical weekday morning (7:00 AM to 9:00 AM) and afternoon (4:00 PM to 6:00 PM) periods. A total of four intersections in the vicinity of the Project Site were selected for detailed transportation analysis and are shown in Figure 3.

The following traffic conditions were developed and analyzed as part of this study:

- Existing with Project Conditions (Year 2025): This analysis condition projects the potential intersection operating conditions that could be expected if the Project were built under Existing Conditions.
- Future with Project Conditions (Year 2030): This analysis condition projects the potential intersection operating conditions that could be expected if the Project were occupied in the projected buildout year. In this analysis, the Project-generated traffic is added to Future without Project Conditions in Year 2030.
- Cumulative with Project Conditions (Year 2045): This analysis condition projects the potential intersection operating conditions that could be expected if the Project were occupied in the horizon year of the General Plan. In this analysis, the Project-generated traffic is added to Cumulative without Project Conditions in Year 2045.

Operational Evaluation

In accordance with the Guidelines, the intersection delay and queue analyses for the operational evaluation were conducted using the *Highway Capacity Manual, 7th Edition* (Transportation Research Board, 2022) (HCM) methodology, which was implemented using Synchro software and signal timing worksheets from the agency of jurisdiction to analyze intersection operating

conditions. The HCM signalized methodology calculates the average delay, in seconds, for each vehicle passing through the intersections, while the HCM unsignalized two-way stop-control methodology calculates the control delay, in seconds, for individual approaches of an intersection. Table 5 presents a description of the LOS categories, which range from excellent, nearly free-flow traffic at LOS A, to stop-and-go conditions at LOS F, for signalized intersections. The queue lengths were estimated using Synchro, which reports the 95th percentile queue length, in vehicles for each approach lane, which can be converted to linear feet by multiplying by 25 feet per vehicle. The reported queues are calculated using the HCM signalized and unsignalized intersection methodology.

LOS ANALYSIS

The intersection analysis was conducted based on the HCM methodologies to identify delay and LOS at each of the study intersections with development of the Project. Detailed LOS calculation worksheets are provided in Appendix E.

Existing with Project Conditions

Traffic Volumes. The Project-only morning and afternoon peak hour traffic volumes, described in Chapter 3 and shown in Figure 14, were added to the existing morning and afternoon peak hour traffic volumes shown in Figure 7. The resulting volumes are illustrated in Figure 15 and represent Existing with Project Conditions, assuming Project operation under Existing Conditions.

Intersection LOS. Table 6 summarizes the weekday morning and afternoon peak hour LOS results for each of the study intersections under Existing and Existing with Project Conditions. As shown in Table 6, nine out of 13 study intersections would operate at LOS D or better during both the morning and afternoon peak hours under Existing and Existing with Project Conditions. The remaining study intersections would operate at LOS E or F in the morning and/or afternoon peak hours under Existing Conditions and Existing with Project Conditions.

Future with Project Conditions

All future cumulative traffic growth (i.e., ambient and Related Project traffic growth) and transportation infrastructure improvements through Year 2030 described in Chapter 2 were incorporated into this analysis.

Traffic Volumes. The Project-only morning and afternoon peak hour traffic volumes, described in Chapter 3 and shown in Figure 14, were added to the Future without Project (Year 2030) morning and afternoon peak hour traffic volumes shown in Figure 10. The resulting volumes are illustrated in Figure 16 and represent Future with Project Conditions after development of the Project in Year 2030.

Intersection LOS. Table 7 summarizes the results of the Future without Project (Year 2030) and Future with Project Conditions during the weekday morning and afternoon peak hours for the study intersections. As shown in Table 7, nine out of 13 study intersections would operate at LOS D or better during both the morning and afternoon peak hours under Future without Project and Future with Project Conditions. The remaining study intersections would operate at LOS E or F in the morning and/or afternoon peak hours under Future without Project and Future with Project Conditions.

Cumulative with Project Conditions

All future cumulative traffic growth (i.e., ambient and Related Project traffic growth) and transportation infrastructure improvements through the General Plan horizon year of 2045 were incorporated into this analysis.

Traffic Volumes. The Project-only morning and afternoon peak hour traffic volumes, described in Chapter 3 and shown in Figure 14, were added to the Cumulative without Project (Year 2045) morning and afternoon peak hour traffic volumes shown in Figure 11. The resulting volumes are illustrated in Figure 17 and represent Cumulative with Project Conditions after development of the Project in Year 2045.

Intersection LOS. Table 8 summarizes the results of the Cumulative without Project (Year 2045) and Cumulative with Project Conditions during the weekday morning and afternoon peak hours for the study intersections. As shown in Table 8, six out of 13 study intersections would operate at LOS D or better during both the morning and afternoon peak hours under Cumulative without Project and Cumulative with Project Conditions. The remaining study intersections would operate at LOS E or F in the morning and/or afternoon peak hours under Cumulative without Project and Cumulative with Project Conditions.

INTERSECTION QUEUING ANALYSIS

The study intersections were also analyzed to determine whether the lengths of intersection turning lanes could accommodate vehicle queue lengths. The queue lengths were estimated using Synchro software, which reports the 95th percentile queue length, in feet, for each approach lane. The reported queues are calculated using the HCM signalized and unsignalized intersection methodology.

Detailed queuing analysis worksheets are provided in Appendix E.

DRIVEWAY ANALYSIS

Utilizing the same methodology for the intersection analyses, a driveway queuing analysis was conducted to determine whether the driveway and adjacent streets could accommodate vehicle queue lengths. The queue lengths were estimated using Synchro software, which reports the 95th percentile queue length, in feet, for each approach lane. The reported driveway queues are calculated using the HCM unsignalized intersection methodology.

The HCM Two-Way Stop Control Unsignalized methodology calculates the control delay, in seconds, for each individual approach of an intersection. The reported control delay represents the worst-case approach, typically on the lower volume minor street, and does not account for traffic gaps created by adjacent traffic signals that allow turn movements to proceed from the minor street.

Detailed driveway queuing analysis worksheets are provided in Appendix E.

SIGNAL WARRANT ANALYSIS

The BOSFHP contemplates the installation of a traffic control device at the intersection of Green Valley Circle & Fox Hills Drive, and the City has requested the inclusion of a signal warrant analysis to identify the potential technical justification for installing a new traffic control device at this location. This technical analysis follows the *California Manual on Uniform Traffic Control Devices* (California Department of Transportation, updated 2021) (CA MUTCD) and is presented for informational purposes only.

Methodology

CA MUTCD Warrant 3 (Peak Hour) was utilized for this analysis; the methodology of this warrant is described below.

Warrant 3, Peak Hour Vehicular Volume Warrant

Signal Warrant 3 conditions are intended for use at locations where traffic conditions are such that for a minimum of one hour of an average day, the minor-street traffic suffers undue delay when entering or crossing the major street. The need for a traffic control signal shall be considered if an engineering study finds that criteria in either of the following two categories are met:

A. If all three conditions exist for the same one hour (any four consecutive 15-minute periods) of an average day:
   1. *The total stopped time delay experienced by traffic on one minor-street approach (one direction only) controlled by a STOP sign equals or exceeds: four vehicle hours for a one-lane approach or 5 vehicle hours for a two-lane approach; and*
   2. *The volume of the same minor-street approach (one direction only) equals or exceeds 100 vehicles per hour for one moving lane of traffic or 150 vehicles per hour for two moving lanes; and*
   3. *The total entering volume serviced during the hour equals or exceeds 650 vehicles per hour for intersection with three approaches or 800 vehicles per hour for intersections with four or more approaches.*

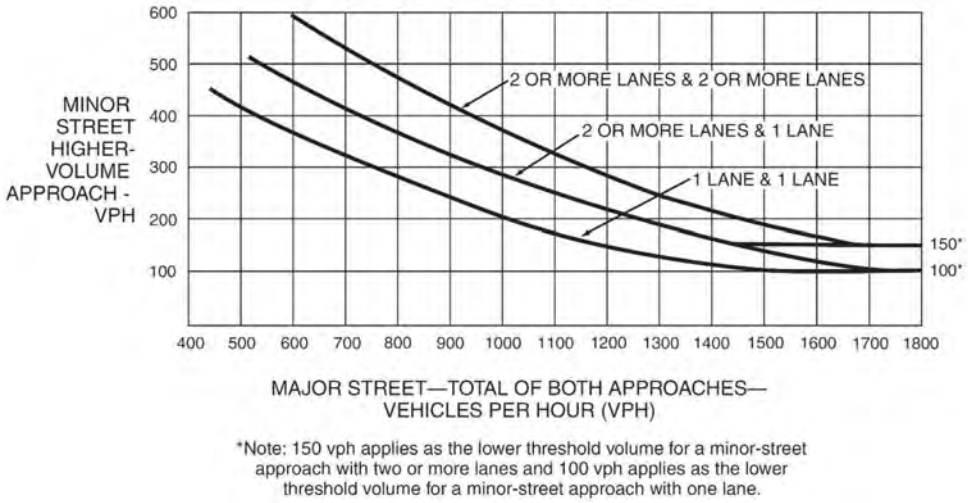
B. The plotted point representing the vehicles per hour on the major street (total of both approaches) and the corresponding vehicles per hour on the higher volume minor-street approach (one direction only) for one hour (any four consecutive 15-minute

periods) of an average day falls above the applicable curve in Figure 4C-3 for the existing combination of approaches.

If the posted or statutory speed limit or the 85th percentile speed on the major street exceeds 40 mph, or if the intersection lies within the built-up area of an isolated community having a population of less than 10,000, Figure 4C-4 may be used in place of Figure 4C-3 to evaluate the criteria in the second category of the Standard.

If this warrant is the only warrant met and a traffic control signal is justified by an engineering study, the traffic control signal may be operated in the flashing mode during the hours that the volume criteria of this warrant are not met.

Figure 4C-3. Warrant 3, Peak Hour



*Note: 150 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 100 vph applies as the lower threshold volume for a minor-street approach with one lane.

CA MUTCD Figure 4C-3 above illustrates that the minimum minor street volume required to meet the peak hour signal warrant is based on a scale:

- Where the minor street approach volume is 100 vehicles per hour (vph) for a single lane approach OR 150 vph for an approach with two or more lanes, the total of the major street volume approaches must be 1,800 vph.
- A reduced major street approach volume (less than 1,800 vph) is acceptable with an increased minor street approach volume (more than 100/150 vph).

The peak hour signal warrant if either of the conditions above are satisfied. The results of the signal warrant analysis are summarized below.

Analysis Results

The signal warrants were tested using the Future without Project (Year 2030) conditions traffic volumes in this study. Fox Hills Drive (the minor street) provides two lanes on the intersection approach; Green Valley Circle (the major street) provides two lanes on each approach to the intersection.

The afternoon peak hour volumes are projected to be 889 vehicles on the major street approach (534 vehicles eastbound and 355 vehicles westbound) and 340 vehicles on the minor street approach. Based on CA MUTCD Figure 4C-3, the combination of the major street and minor street volumes is projected to plot above the curve. For the purposes of this analysis, the Future without Project (Year 2030) traffic volumes are anticipated to satisfy the requirements of Warrant 3. The CA MUTCD notes that while a signal warrant may be satisfied, further study of the intersection may be necessary prior to the installation of any traffic control device.

RESIDENTIAL STREET CUT-THROUGH ANALYSIS

A residential street cut-through analysis was conducted to determine potential increases in average daily traffic volumes on designated Local Streets, as classified in the Circulation Element, that can be identified as cut-through trips generated by the Project and that can adversely affect the character and function of those streets.

As identified in the Circulation Element, the street network in the Study Area is primarily comprised of Arterial and Collector streets. One designated Local Street, Doverwood Street, is located between Bristol Parkway and Green Valley Circle, adjacent to residential uses. While cut-through traffic could still occur on Doverwood Street if the Arterial Streets become temporarily congested and Doverwood Street presents as an attractive alternative route, trip diversion along Doverwood Street is not anticipated due to the location of Project driveways along Arterial Streets (Green Valley Circle and Bristol Parkway), the configuration of the street network, the distribution pattern of Project traffic, and the projected LOS at nearby intersections. In addition, the Project's proximity to regional access routes, provided by SR 90 and I-405, favors vehicle travel along the Arterial Streets. Therefore, no improvement measures to address residential neighborhood traffic are required.

TABLE 5
LEVEL OF SERVICE DEFINITIONS FOR INTERSECTIONS

Level of Service	Definition	Delay [a]	
		Signalized Intersections	Unsignalized Intersections
A	EXCELLENT. No vehicle waits longer than one red light and no approach phase is fully used.	0.0 - 10.0	0.0 - 10.0
B	VERY GOOD. An occasional approach phase is fully utilized; many drivers begin to feel somewhat restricted within groups of vehicles.	10.1 - 20.0	10.1 - 15.0
C	GOOD. Occasionally drivers may have to wait through more than one red light; backups may develop behind turning vehicles.	20.1 - 35.0	15.1 - 25.0
D	FAIR. Delays may be substantial during portions of the rush hours, but enough lower volume periods occur to permit clearing of developing lines, preventing excessive backups.	35.1 - 55.0	25.1 - 35.0
E	POOR. Represents the most vehicles intersection approaches can accommodate; may be long lines of waiting vehicles through several signal cycles.	55.1 - 80.0	35.1 - 50.0
F	FAILURE. Backups from nearby locations or on cross streets may restrict or prevent movement of vehicles out of the intersection approaches. Tremendous delays with continuously increasing queue lengths.	> 80.0	> 50.0

Notes:

Delay is measured in seconds per vehicle

LOS = Level of service

[a] Results per Synchro 12 (HCM 7th Edition Methodology).

[b] Worst-case approach delay is reported for two-way stop-controlled intersections.

[c] Results per Synchro 12 (HCM 2000 Methodology).

[d] The report control delay of the worst-case approach exceeds 240 seconds.

Section 5B
Transit Operations

This section reviews the Project's potential effect on existing transit capacity of transit routes and stops that serve the Project area.

TRAVEL DEMAND ANALYSIS

Although the Project (and other Related Projects) will cumulatively add transit ridership, the Project Site and the Study Area are served by multiple bus lines, as detailed in Table 2. As illustrated in Figure 6, the nearest stops to the Project Site are located at Bristol Parkway & Green Valley Circle, serving Culver CityBus Lines 3 and 5C2, along with Metro Bus Lines 108 and 110.

Based on the assumptions in the trip generation estimates shown in Table 4, a transit/walk-in reduction of up to 10% was applied to account for the use of non-auto travel modes (e.g., transit). The Project trips expected to use transit during both the morning and afternoon peak hour trips are projected at 41 and 43 vehicle-transit trips, respectively. Based on the average vehicle occupancy factor of 1.55 for all trip purposes in Los Angeles County as identified in *SCAG Regional Travel Demand Model and 2012 Model Validation* (Southern California Association of Governments, March 2016), the peak hour vehicle-transit trips correspond to an estimated equivalent of 64 and 67 person-transit trips in each of the morning and afternoon peak hours, respectively.

The Project is located within a TPA with access to frequent transit service (average headways of 20 minutes or less) including Culver CityBus Lines 6/6R, Big Blue Bus Line 14 and Metro Bus Lines 108 and 110; this conservatively represents 24 buses during either peak hour[2]. Based on the estimated person-transit trips, this is an average of fewer than three person-transit trips added

[2] Assumes the four listed transit lines operating a minimum of three buses per peak hour (average 20 minute headway = three buses/hour) in each direction (e.g., east/west or north/south) OR 4 transit lines x 3 buses/hour/line x 2 directions = 24 buses.

per bus during either peak hour. The adjacent transit capacity within the Study Area is reasonably anticipated to accommodate the intensification of transit usage attributable to the Project without significantly absorbing excess capacity.

Section 5C
Driveways

This section provides a qualitative evaluation of the Project vehicle, pedestrian, and bicycle access per Chapter 5, Section C of the Guidelines.

VEHICLES

As noted, vehicular access to the Project Site would be provided by two separate driveways on Green Valley Circle and a third driveway on Bristol Parkway. The first driveway (Driveway A) on Green Valley Circle west of Fox Hills Drive would provide right-turn ingress and egress access to the Project Site. The second driveway (Driveway B) on Green Valley Circle east of Fox Hills Drive and third driveway (Driveway C) on Bristol Parkway would provide full access to the Project Site.

The driveways would be designed in accordance with City requirements to safely accommodate all anticipated vehicle types generated by the Project. Adequate internal circulation and queuing area would be provided on-site to limit spillover into the public ROW. All parking on-site would be self-parking. The commercial, rubbish, delivery, and residential move-in loading zones would utilize both fire roads adjacent to the Project.

PEDESTRIANS AND BICYCLES

Pedestrian and bicycle access to the Project Site would be provided via separate entrances along Green Valley Circle and Bristol Parkway to reduce potential vehicle-pedestrian and vehicle-bicycle conflicts. Furthermore, the Project would include landscaping and curb cut and drive aisle improvements to ensure maximum visibility and meet City design guidelines.

Section 5D
Parking

This section provides an analysis of the proposed parking and the potential parking impacts of the Project.

PARKING SUPPLY

The Project would provide on-site vehicle and bicycle parking accessed from two driveways on Green Valley Circle and a third driveway on Bristol Parkway.

In October 2022, the City Council passed a motion that eliminated Citywide minimum parking requirements. As a result, no minimum parking is required to be constructed. However, the Project would provide a supply of 1,220 vehicle parking spaces, including 1,127 for residents, 35 for residential guests, and 58 for commercial users.

The Driveway A parking entrance provides access to above-grade and subterranean parking levels for residents. Residential and commercial parking access is provided by Driveway B, with access to Level 3, and Driveway C, with access to Level 2. Residential parking on Levels 4-10 is accessed via internal ramps.

BICYCLE PARKING CODE REQUIREMENTS

CCMC Section 17.345 details the bicycle parking requirements for new developments.

As shown in Table 9, the Project would be required to provide 34 short-term and 215 long-term bicycle parking spaces, representing a combined total of 249 parking spaces for residents and commercial users. The Project proposes to provide 249 bicycle parking spaces, which meets the CCMC requirement.

TABLE 9
BICYCLE CODE PARKING REQUIREMENTS

Land Use	Size	Short-Term		Long-Term	
		Rate [a]	Requirement	Rate [a]	Requirement
Residential					
201+ dwelling units	846 du	1.0 sp / 30 du	28 sp	1.0 sp / 4.0 du	212 sp
Commercial	11,406 sf	1.0 sp / 2,000 sf	6 sp	1.0 sp / 5,000 sf	3 sp
		Total Short-Term	**34 sp**	**Total Long-Term**	**215 sp**
				Total Bicycle Code Parking Requirement	**249 sp**
				Total Bicycle Parking Provided	**249 sp**

Notes:

[a] Bicycle parking requirements per City of Culver City Municipal Code Section 17.320.

Section 5E
Curb Space Allocation

This section details our review of the management of curb space adjacent to the Project Site between passenger and commercial loading and parking areas, bus stop facilities, and bicycle and other alternative transportation mode parking, while maintaining visibility at driveways.

ON-STREET PARKING

As previously detailed, there is no on-street parking available along the Project frontages on Green Valley Circle or Bristol Parkway.

PASSENGER AND COMMERCIAL LOADING

All passenger and commercial loading would be provided on-site and is not anticipated to affect the curb space adjacent to the Project Site.

TRANSIT FACILITIES

The Bristol Parkway / Green Valley Circle bus stop adjacent to the Project Site is on the opposite side of Green Valley Circle from the Project. Therefore, transit stops would not affect visibility at the Project driveway.

BICYCLE PARKING FACILITIES

There are currently no existing or proposed public bicycle parking facilities adjacent to the Project Site along Green Valley Circle or Bristol Parkway. In addition, the Project does not propose the installation of bicycle parking within the public ROW. Therefore, no bicycle parking facilities are anticipated to affect visibility at the Project driveway.

Section 5F
Safety Analysis

This section details the Project's potential effects on corridors within the HIN identified in *Culver City Bicycle & Pedestrian Action Plan*, as well as the Project's proximity to high-risk corridors and intersections where pedestrian and bicycle involved collisions have been recorded by the City as part of the LRSP.

VEHICULAR SAFETY

The Project Site is located adjacent to Green Valley Circle and Bristol Parkway, both of which are identified as part of the HIN in *Culver City Bicycle & Pedestrian Action Plan*. However, as previously discussed, the Project would ensure that the three driveways are designed in accordance with City standards to maximize sight lines and limit potential vehicle-vehicle, vehicle-pedestrian, and vehicle-bicycle conflicts. Adequate distance between the two driveways on Green Valley Circle would be provided to allow visibility between drivers exiting either driveway. Similarly adequate distance would be provided between Driveways B and C and the intersection of Bristol Parkway & Green Valley Circle adjacent to the Project Site.

PEDESTRIAN AND BICYCLE SAFETY

As previously detailed, Green Valley Circle and Bristol Parkway are identified as part of the HIN and are identified in the LRSP as an area with high levels of collisions involving pedestrians and bicyclists. Therefore, the Project would improve the curb cuts for the Project driveways to meet Americans with Disabilities Act standards and improve existing sidewalks with landscaping adjacent to the Project frontage.

Section 5G
Construction Impact Analysis

This section summarizes the construction schedule and construction activities associated with the Project. The quantities for trucks and worker activity are preliminary estimates and these values may change once the construction program is finalized.

PROPOSED CONSTRUCTION SCHEDULE

The Project is anticipated to be constructed over an approximately 47-month period, with completion anticipated in Year 2030. Peak haul truck activity occurs during the grading / excavation phase and peak worker activity occurs during the building finishing Phase 1 and Phase 2. These three phases of construction were studied in greater detail.

GRADING / EXCAVATION PHASE

With the implementation of the Construction Management Plan, which is described in more detail below, it is anticipated that almost all haul truck activity to and from the Project Site would occur outside of the morning and afternoon peak hours. In addition, as discussed in more detail in the following section, worker trips to and from the Project Site would also occur outside of the peak hours. Therefore, no peak hour construction traffic constraints are expected during the grading / excavation.

Haul trucks would travel on approved truck routes designated within the City and take the most direct route to the appropriate freeway ramps. The haul route will be reviewed and approved by the City.

Grading / Excavation Trip Generation

Based on projections compiled for the Project, approximately 113,281 cubic yards (CY) of material would be excavated and removed from the Project Site. It is anticipated that a maximum of 76 haul truckloads per workday, based on an anticipated haul truck capacity of 11 CY, would be required during this phase. Thus, up to 152 daily truck trips (76 inbound, 76 outbound) are forecasted to occur during the grading and excavation period.

In addition, a maximum of 12 daily construction worker trips are anticipated during the grading and excavation phase. Therefore, 24 construction worker trips (12 inbound, 12 outbound) to and from the Project Site are forecasted on a daily basis. It is anticipated that the majority of workers would arrive on-site prior to the weekday morning commuter peak hour and leave prior to or after the afternoon commuter peak hour. Construction-related peak hour trip generation from trucks and workers would be substantially less than the Project trip generation estimates in Table 4. Therefore, no peak hour construction traffic constraints are expected during the demolition phase of construction.

BUILDING FINISHING PHASE 1 AND PHASE 2

During the building finishing Phase 1 and Phase 2, parking for construction workers would generally be provided on-site or in local public parking facilities. Restrictions against workers parking in the public ROW in the vicinity of (or adjacent to) the Project Site would be identified as part of the Construction Management Plan. Construction materials storage and truck staging would generally be contained on-site; however, some work may necessitate temporary closures along the public ROW along Green Valley Circle and Bristol Parkway, subject to City approval.

The traffic constraints associated with construction workers depend on the number of construction workers employed during various phases of construction, as well as the travel mode and travel time of the workers. In general, the hours of construction typically require workers to be on-site before the weekday morning commuter peak period and allow them to leave before or after the afternoon commuter peak period (i.e., arrive at the site prior to 7:00 AM and depart before 4:00 or after 7:00 PM). Therefore, most, if not all, construction worker trips would occur outside of the typical weekday commuter peak periods.

According to construction projections prepared for the Project, the building finishing Phase 1 and Phase 2 would employ the most construction workers, with a maximum of 140 workers per day. The estimated number of daily vehicle trips associated with the construction workers is approximately 280 workers trips (140 inbound, 140 outbound), but nearly all those trips would occur outside of the peak hours, as described above. As such, the building construction phase of Project construction is not expected to cause traffic constraints at any of the study intersections.

POTENTIAL CONSTRAINTS ON ACCESS, TRANSIT, AND PARKING

Project construction is not expected to create hazards for roadway travelers, bus riders, or parkers, so long as commonly practiced safety procedures for construction are followed. Such procedures and other measures (e.g., to address temporary traffic control, lane closures, sidewalk closures) have been incorporated into the Construction Management Plan.

Access

Construction activities are expected to be primarily contained within the Project Site boundaries. While construction may temporarily encroach into the public ROW (e.g., sidewalks and roadways) adjacent to the Project Site, suitable pedestrian and bicyclist travels paths will be maintained in accordance with City requirements. Temporary traffic controls would be provided to direct traffic around any closures as required in the Construction Management Plan, and emergency access would not be impeded.

The use of the public ROW would require temporary re-routing of pedestrian and bicycle traffic. The Construction Management Plan would include measures to ensure pedestrian and bicycle safety along the affected sidewalks, bicycle facilities, and temporary walkways (e.g., use of light-duty barriers and cones, use of directional signage, maintaining continuous and unobstructed pedestrian paths, and/or providing overhead covering).

Transit

The Bristol Parkway / Green Valley Circle bus stop adjacent to the Project Site is on the opposite side of Green Valley Circle from the Project Site. Thus, no temporary bus stop relocation is anticipated due to the construction of the Project.

Parking

There is no on-street parking available along the Project frontages.

CONSTRUCTION MANAGEMENT PLAN

A detailed Construction Management Plan, including street closure information, a detour plan, haul routes, and a staging plan would be prepared and submitted to the City for review and approval prior to commencing construction. The Construction Management Plan would formalize how construction would be carried out and identify specific actions that would be required to reduce effects on the surrounding community. The Construction Management Plan shall be based on the nature and timing of the specific construction activities and other projects in the vicinity of the Project Site, and shall include, but not be limited to, the following elements, as appropriate:

- Advance bilingual notification of adjacent property owners and occupants of upcoming construction activities, including durations and daily hours of operation.
- Temporary pedestrian, bicycle, and vehicular traffic controls during all construction activities on Bristol Parkway and Green Valley Circle to ensure traffic safety on the public ROW. These controls shall include, but not be limited to, flag people trained in pedestrian and bicycle safety.
- Scheduling of construction activities to reduce the effect on traffic flow on surrounding arterial streets.
- Spacing of trucks to discourage a convoy effect.
- Containment of construction activity within the Project Site boundaries to the extent feasible.
- Safety precautions for pedestrians and bicyclists through such measures as alternate routing and protection barriers shall be implemented as appropriate.

- Scheduling of construction-related deliveries, haul trips, etc., to occur outside the commuter peak hours to the extent feasible.

- Maintenance of a log, available on the job site at all times, documenting the dates of hauling and the number of trips (i.e., trucks) per day.

- Identification of a construction manager and provision of a telephone number for any inquiries or complaints from residents regarding construction activities. The telephone number shall be posted at the site readily visible to any interested party during site preparation, grading, and construction.

The Project is requesting extended construction hours, which will reduce the Project's construction traffic impacts on peak hour periods, as work will begin before the morning peak traffic period and end after the afternoon peak traffic period. Further details would be provided in the final Construction Management Plan.

It is likely that construction management plans would also be submitted for approval to the City by the Related Projects prior to the start of construction activities. As part of the City's established review process of construction management plans, potential overlapping construction activities and proposed haul routes would be reviewed to minimize the impacts of cumulative construction activities on any particular roadway.

Chapter 6

Summary and Conclusions

This study was undertaken to analyze the potential transportation impacts of the mixed-use office development Project on regional VMT as well as the local street system. The following summarizes the results of this analysis:

- The Project is located at 6201 Bristol Parkway.
- The Project proposes the demolition of retail uses and the construction of a new, mixed-use residential and commercial project. The redevelopment would include a total of 846 housing units, including 36 units of affordable housing, and 11,406 sf of ground-floor, neighborhood-serving commercial space, replacing the existing 65,149 sf of retail. The Project is anticipated to be completed in Year 2030.
- The Project is estimated to generate 934 net new daily trips, including 233 net new morning peak hour trips (28 inbound trips, 205 outbound trips) and 50 net new afternoon peak hour trips (72 more inbound trips, 22fewer outbound trips).
- The Project is consistent with the City plans, programs, ordinances, and policies and would not result in geometric design hazard impacts.
- The Project was not required to perform a VMT analysis because it is located within 0.5 miles of a designated TPA, and the retail component of the Project is fewer than 50,000 sf. Thus, no mitigation measures are required to address VMT, and the Project is presumed to result in a less than significant VMT impact.
- The Project provides adequate internal circulation to accommodate vehicular, pedestrian, and bicycle traffic without impeding traffic movements on City streets.
- The design of Project driveways does not introduce safety hazards for pedestrians, bicyclists, or motorists.
- The Project will incorporate pedestrian and bicycle-friendly designs, such as bicycle parking and improved sidewalks with landscaping adjacent to the Project Site.
- All construction activities would occur outside of the commuter morning and afternoon peak hours to the extent feasible and will not result in significant traffic impacts. A Construction Management Plan will ensure that construction impacts are less than significant.
- The Project's proposed bicycle parking supply would satisfy the CCMC bicycle requirements.

Appendix A

Memorandum of Understanding

Memorandum of Understanding for Transportation Study

This Memorandum of Understanding (MOU) acknowledges and agrees to all the City of Culver City requirements and fees for the review of a transportation study for the following project.

Date Submitted: 4/30/2025 **MOU Version #** 1

Project Name: 6201 Bristol Parkway

Project Address: 6201-6299 Bristol Parkway

Project Description: 846 du (including 36 affordable du) and 11,406 sf high-turnover (sit down) restaurant replacing 65,149 sf retail

Land Use	Gross Floor Area (sq. ft.) *Defined per latest ITE publication*	Residential Units (#)
Multifamily Housing		810
Affordable Housing		36
Restaurant		11,406

Project Horizon Year: 2030 **Ambient Growth Rate (% per year):** 1%

Directional Distribution (%): N: 25 S: 25 E: 25 W: 25

Trip Generation Rates: Show AM, PM and daily trip generation rates for each land use and attach total daily trips generation calculations. Indicate ITE Latest Edition/Other ITE 11th Ed

Land Use	ITE Code#	AM Trips		PM Trips		Daily Totals	
		In	Out	In	Out	In	Out
See Table 2							

Study Intersections: Show all study intersections, intersections subject to capacity analysis credit for advanced traffic signal control synchronization, whether intersections are signalized or non-signalized, and use the same numbering system for all lists of intersections and figures in the study.

No.	Intersection	Signalized/Non-Signalized	Jurisdiction
	See Table 3		

Residential Streets: Show all residential streets to be studied.

No.	Street Name	Limits	Jurisdiction
	N/A		

Trip Credits: Indicate trip credits to be requested (subject to City approval)

	Trip Credits	Yes/No
Existing Uses	65,149 sf Retail Center	Yes
Pass-By Trips	See Table 2	Yes
Internal Trip Capture	See Table 2	Yes
Transit-Oriented Development (TOD)		
Transportation Demand Management (TDM)	See Table 2 (Mode Adjustment)	Yes

Related Projects: Before the start of any proposed project analysis, consultants shall:

1. Obtain a list of related projects from the Culver City Current Planning Division and other affected jurisdictions.
2. Prepare a draft list of "related projects specific to the proposed project."
3. Obtain written approval from the City of the "related projects specific to the proposed project."

Maps: The following maps shall be attached to the MOU:

1. A map showing the study intersections and street segments to be analyzed, including City limit lines where applicable.
2. A map showing the project's trip distribution percentages for each land use (inbound and outbound) on the area's road network.
3. A map showing the project's trip assignments at the study intersections and project driveways, as well as road segments when applicable.
4. A site plan of the project showing property lines, alleys, project's driveways and nearby driveways and intersections on both sides of the street including dimensions.

Proposed Mitigation and Transportation Improvements: Any proposed transportation improvement(s) or mitigation measure(s) shall be listed and accompanied by plans of the existing and proposed improvements, including city limit lines and existing and proposed property lines. The City may initially accept conceptual plans to be included in the Transportation Study. Detailed design of such improvements will be part of the project's plans submittals.

Post-Occupancy Traffic Counts: By signing below, the Property Owner/ Developer/Applicant hereby agrees to pay for and submit to the City a post-occupancy traffic count analysis of the development to the satisfaction of the City. The analysis shall determine the amount of actual traffic (motor vehicle, bicycle, and pedestrian) generated by the development compared to the ITE trip generation rates. The analysis shall include a traffic count of all onsite driveways taken upon reaching eighty-five percent (85%) occupancy of the total building gross floor area or within one (1) year of the issuance of the first Temporary Certificate of Occupancy (TCO), as determined by the City. The data shall be used to confirm the findings in the approved study and not result in any additional traffic mitigation measures and/or conditions of approval on the subject project.

Fees: Payment of a fee to the City's PWD for the City's processing of the MOU shall be required before the City approves the MOU. Payment for review of the Transportation Study shall be paid before the City's PWD completes its review of the Transportation Study. Said fees shall be per the most recent Fee Schedule as approved by the City Council.

TABLE 1
CULVER CITY TRANSPORTATION STUDY SCREENING REVIEW

Analysis [a]	Required?	Analysis to be Provided in Transportation Study
Transportation Study Contents		
Site Plan Review	Yes	A site plan will be provided which provides existing and proposed on-site and off-site Project details and improvements as specified in the Transportation Study Guidelines.
Existing Transportation Network Review	Yes	The existing transportation network review will establish the bicycle, pedestrian, transit, and auto traffic conditions in which the project is proposed, which shall be illustrated in the following maps: ▪ Study Area Circulation Map ▪ Traffic Routes Map ▪ Base Year Traffic Volumes Map ▪ Project Trip Generation and Future Traffic Volumes Map ▪ Site Vicinity Map ▪ Lane Configurations Map
Existing Transit Network Review	Yes	For transit analysis, the study will provide an analysis of weekday transit service and stops/stations within a quarter mile of the project site, including: ▪ Confirmation of transit features listed in the Project Description and Existing Transportation Network Review ▪ Any existing operational conflicts or hazards to transit operations in the study area, especially along travel lanes where transit vehicles operate and at transit stop/station locations
CEQA Transportation Analysis and Mitigations		
Programs, Plans, Ordinances, and Policies	Yes	The study will review the City's programs, plans, ordinances and policies addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities, as specified in Table 1 of the *Culver City Transportation Study Criteria and Guidelines* .
VMT - Land Use Projects	No	The proposed development project does not meet the screening thresholds for a VMT analysis. The Project is located within 0.5 miles of the Westfueld-Culver City Transit Center identified as a key Transit Priority Area. Additionally, the Project proposes local serving retail uses of less than 50,000 sf. The study will discuss the VMT screening thresholds and the Project's consistency with the guidelines.
VMT - Transportation Projects	No	The proposed development is not considered a "Transportation Project" and therefore, it is not conflicting or inconsistent with CEQA Guideline Section 15064.3(b)(2).
Geometric Design Hazards	Yes	The study will provide a review of potentially hazardous conditions due to geometric design features (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., oversized vehicles).

Notes:
[a] Based on *Culver City Transportation Study Criteria and Guidelines* , City of Culver City, July 2020.

TABLE 1 (CONTINUED)
CULVER CITY TRANSPORTATION STUDY SCREENING REVIEW

Analysis [a]	Required?	Analysis to be Provided in Transportation Study
Supplemental Transportation Analysis Requirements		
Traffic Operations	Yes	The study will assess the ability of the circulation system to accommodate the addition of vehicular traffic generated by the related projects and the subject project, including: ▪ Intersection LOS and queuing including trip generation, distribution under Existing, Existing with Project, Future without Project, Future with Project, Cumulative without Project, and Cumulative with Project Conditions ▪ Driveway LOS and queuing including potential vehicular conflicts, motorists' visibility at project driveways, and potential conflicts with pedestrians and bicyclists, ▪ Ability to conduct loading operations on the site and maneuver into parking stalls ▪ The potential increase in average daily traffic on the adjacent street segments
Transit Operations	Yes	The study will identify regional and local fixed-route transit operators providing service to the project and obtain relevant ridership data. The study will document potential project trip impact on transit demand and capacity for routes servicing the project.
Driveways	Yes	The study will provide a review of the Project driveways and consult with the City Mobility & Traffic Engineering and Current Planning Divisions to determine if vehicle access is limited on certain streets where the City is focusing on efforts to enhance the pedestrian-oriented environment. A pedestrian and bicyclist access assessment would also be included to ensure the project avoids unsafe conflicts between pedestrians, cyclists, and autos.
Parking	Yes	The study will review the Project's effect on the on-street parking conditions adjacent to the Project Site and ensure compliance with PWD's guidelines.
Curb Space Allocation	Yes	The study will review the proposed curb space allocation to ensure that the curb space is managed appropriately between passenger and commercial loading and parking, bus stop facilities, and bike and other alternative transportation mode parking while maintaining visibility at driveways.
Safety Analysis	Yes	The Project is not located on a high injury network (HIN) street, as identified in the Local Road Safety Plan (LRSP) or other analysis. The study will evaluate the adverse effect of the project and associated measures to enhance safety conditions. If it is determined that the project would have an adverse effect on a HIN corridor including intersections and road segments, the applicant shall work with the City's PWD to improve roadway safety at impacted locations for all users, including the design and construction of engineering measures and possibly safety education measures. The applicant shall also work with the City to confirm that the project does not inhibit future implementation of projects identified by the City in the LRSP. The LRSP will also be reviewed to determine if the project is located near a hot spot of collisions that involve people walking and bicycling. If this is the case, the applicant shall demonstrate how project features will not worsen the issue per the LRSP.

Notes:
[a] Based on *Culver City Transportation Study Criteria and Guidelines* , City of Culver City, July 2020.

TABLE 2
PROJECT TRIP GENERATION ESTIMATES

Notes:
ksf: 1,000 square feet, du: dwelling unit
[a] Source: AM and PM Peak Hour Rates: *Trip Generation, 11th Edition* , Institute of Transportation Engineers, 2021.
[b] The Project site is located within 0.25 miles of bus stops for several Culver CityBus lines. Therefore, a 10% transit reduction was applied to account for transit usage and walking visitor arrivals.
[c] Internal capture reductions account for person trips made between distinct land uses within a mixed-use development (i.e., between residential and retail).
[d] Pass-by reductions account for Project trips made as an intermediate stop on the way from an origin to a primary trip destination without route diversion.

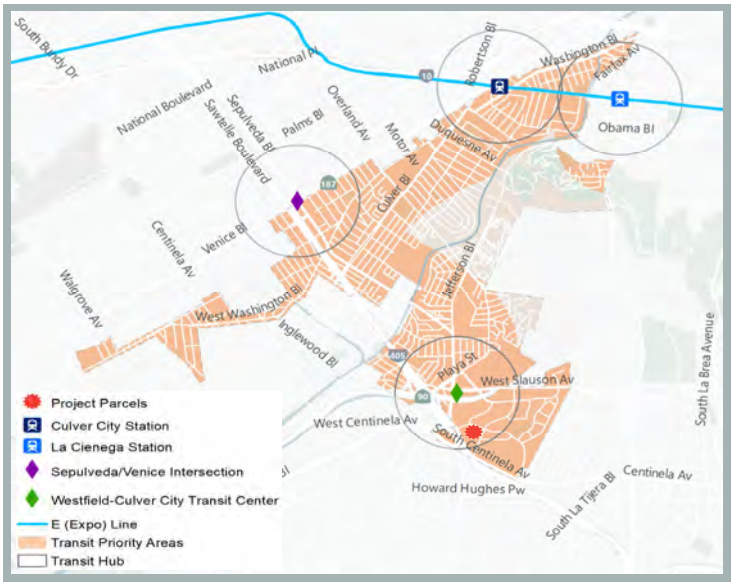
Project Screening

Apply to Full Project

Is this project within ½ mile of one of the following transit hubs? - Culver City Expo Station - La Cienega/Jefferson Expo Station - Westfield-Culver City Transit Center - Sepulveda/Venice intersection	Yes
Is the project located within any TPA and are at least 15% of the on-site residential units are affordable?	No
Does this project generate fewer than 250 daily trips?	N/A

Apply to Specific Land Uses

Is the retail component of project fewer than 50,000 square feet in size at every store?	Yes
Is this residential component of the project 100% affordable housing?	N/A



Project Daily Trips	N/A

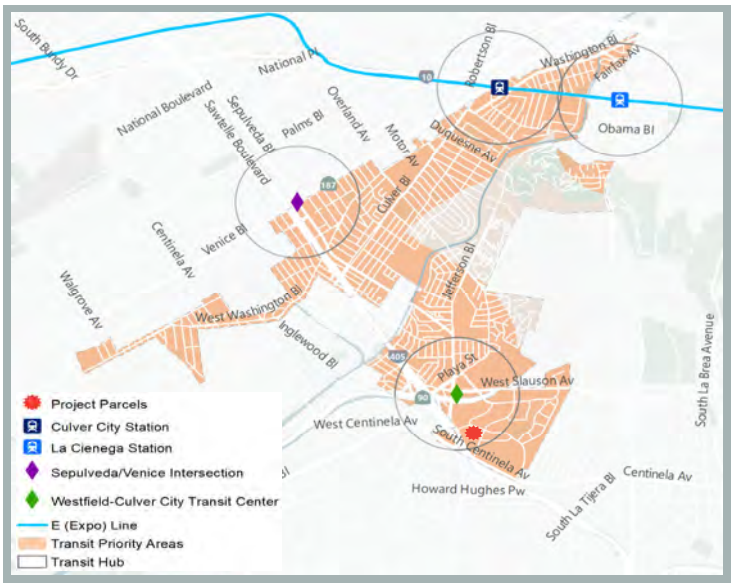
Project Screening

Apply to Full Project

Is this project within ½ mile of one of the following transit hubs? - Culver City Expo Station - La Cienega/Jefferson Expo Station - Westfield-Culver City Transit Center - Sepulveda/Venice intersection	Yes
Is the project located within any TPA and are at least 15% of the on-site residential units are affordable?	No
Does this project generate fewer than 250 daily trips?	N/A

Apply to Specific Land Uses

Is the retail component of project fewer than 50,000 square feet in size at every store?	Yes
Is this residential component of the project 100% affordable housing?	N/A



Project Daily Trips: N/A

Project Land Use

Residential	Value (du)
Single Family	
Multi-Family	810
Affordable Housing	
Family	36
Senior	
Special Needs	
Permanent Supportive	

Office	Value (ksf)
Standard	

Medical	Value (ksf)
Medical Office	
Hospital	

Industrial	Value (ksf)
Light Industrial	
Manufacturing	
Warehousing / Self-Storage	

Movie Studio	Value (ksf)
Office	
Post Production	
Stage	
Support	

The following land uses will require separate impact analysis (outside of this tool) if not screened out. Please leave the land uses in the table below if they are part of a mixed use project.

Retail	Value (ksf)
General	
Supermarket	
Bank	
Health Club	
Gas Station	
Auto Repair	
Home Improvement Superstore

V&A	V&A Consulting Engineers, Inc.

1 Introduction

V&A Consulting Engineers, Inc. (V&A) was retained by Reda Residential, LLC (RR) on behalf of the 6201 Residences development to perform sanitary sewer flow monitoring and capacity analysis within Culver City, California (City). Open-channel flow monitoring was conducted at three (3) manholes (MH) for four (4) weeks from April 8, 2025, through May 14, 2025. This study aimed to identify the average and peak flows and determine the available capacity of the subject pipes for the future development of 6201 Residences at 6201 Bristol Parkway in Culver City, California, per the City's design standards.

Flow monitoring sites are identified as the manholes where the flow monitors are secured and the pipelines where the flow sensors are placed. The flow monitoring sites were selected and approved by RR and the City. Information regarding the flow monitoring location is listed in Table 1-1.

Figure 1-1 illustrates the location of the project site and its proximity to the flow monitoring sites. Detailed descriptions of the flow monitoring site, including photographs, are included in Appendix A.

Table 1-1 Flow Monitoring Location

Site	Manhole ID	Location	Pipe Diameter	Estimated Pipe Material	Pipes Monitored
FM-1	G6-01	At the intersection of Bristol Pkwy and W Centinela Ave (33.980516°N, -118.392381° W)	12"	Vitrified Clay	Northwest Influent
FM-2	G6-12	At the intersection of Bristol Pkwy and Doverwood Dr (33.982298°N, 118.39149°W)	12"	Vitrified Clay	South Effluent
FM-3	G5-31	At the intersection of Green Valley Cir and Fox Hills Dr (33.984173°N, 118.392777°W)	8"	Vitrified Clay	East Influent

Note: Flows at MH G6-01 were derived using City-provided data. To calculate the flows entering the northwest influent, V&A subtracted recorded flows from the effluent of FM-02 (MH G6-12) from the City flow data on the effluent of MH G6-01 into Bristol Pump Station.

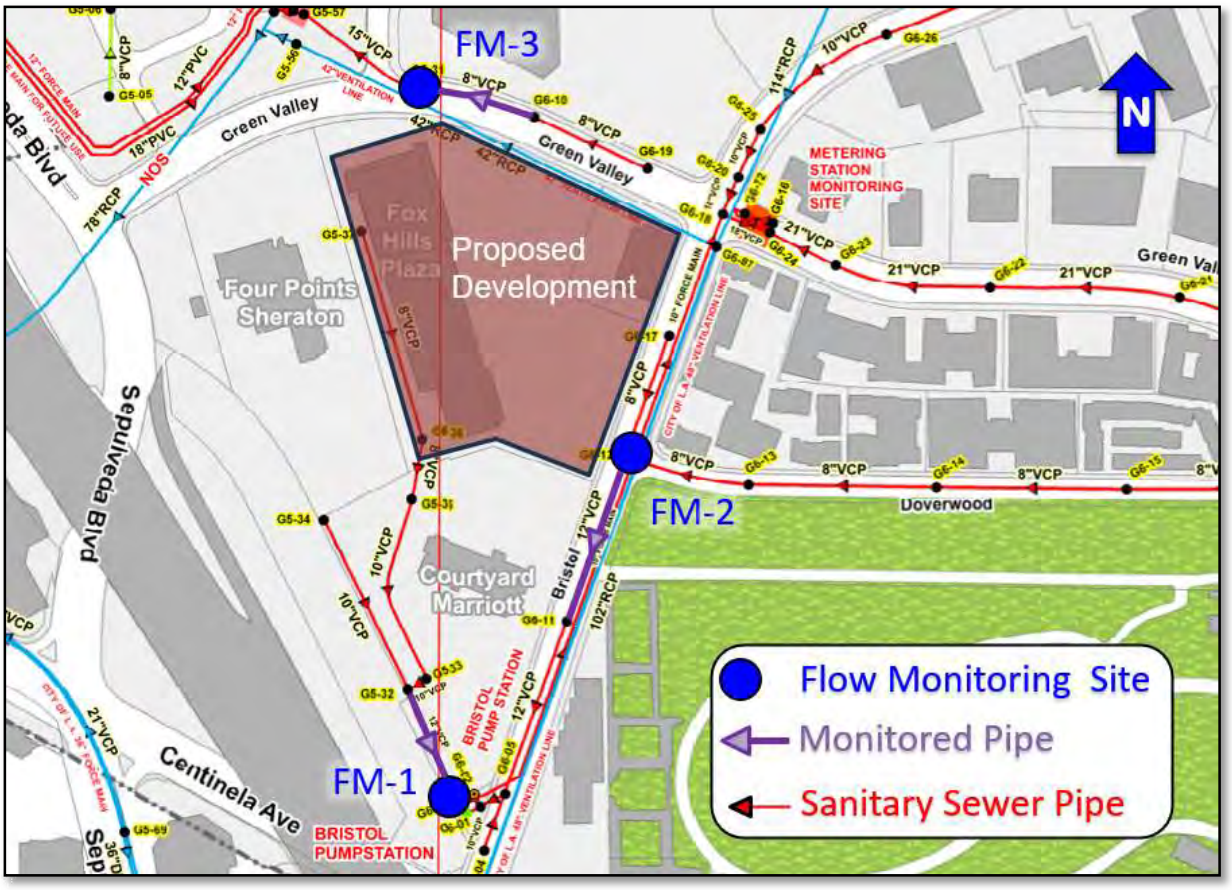

Figure 1-1 Location of Development and Flow Monitoring Sites

2 Approach

2.1 Confined Space Entry

A confined space (Photo 2-1) is defined as any significant enough space so configured that a person can bodily enter and perform assigned work, has limited or restricted means for entry or exit, and is not designed for continuous employee occupancy. In general, the atmosphere must be constantly monitored for sufficient levels of oxygen (19.5% to 23.5%) and the presence of hydrogen sulfide (H_2S) gas, carbon monoxide (CO) gas, and lower explosive limit (LEL) levels. A typical confined space entry crew has members with OSHA-defined responsibilities of Entrant, Attendant, and Supervisor. The Entrant is the individual performing the work. They have the necessary personal protective equipment to complete the job safely, including a four-gas monitor (Photo 2-2). If it is impossible to maintain line-of-sight with the Entrant, then more Entrants are required until line-of-sight can be maintained. The Attendant is responsible for maintaining contact with the Entrants to monitor the atmosphere using another four-gas monitor and maintaining records of all Entrants if there is more than one. The Supervisor is responsible for developing the safe work plan for the job at hand before entering.

Photo 2-1. Confined Space Entry

Photo 2-2. Typical Personal Four-Gas Monitor

2.2 Flow Meter Installation

V&A installed Hach FL900 area-velocity flow meters for temporary metering within the collection system. Hach FL900 meters use submerged sensors with a pressure transducer to collect depth readings and an ultrasonic Doppler sensor to determine the average fluid velocity. The ultrasonic sensor emits high-frequency (500 kHz) sound waves reflected by air bubbles and suspended particles in the flow. The sensor receives the reflected signal and determines the Doppler frequency shift, which indicates the estimated average flow velocity. The sensor is typically mounted at a maintenance hole inlet to take advantage of smoother upstream flow conditions. The sensor may be offset to one side to lessen the chances of fouling and sedimentation where these problems are expected to occur. Manual level and velocity measurements were taken during the installation of the flow meters, and again, when they were removed, they were compared to simultaneous level and velocity readings from the flow meters to ensure proper calibration and accuracy. Figure 2-1 shows a typical installation for a flow meter with a submerged sensor.

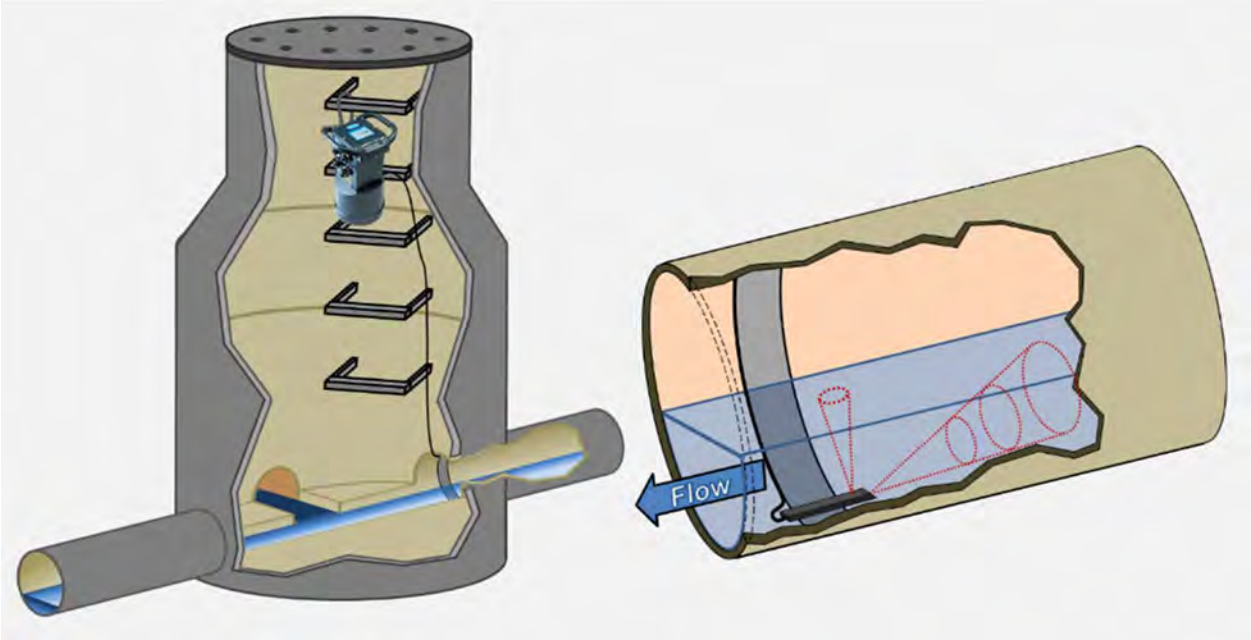

Figure 2-1. Typical Installation for Flow Meter with Submerged Sensor

2.3 Flow Calculation

Data retrieved from the flow meter was placed into a spreadsheet program for analysis. Data analysis includes data comparison to field calibration measurements and necessary geometric adjustments as required for sediment (sediment reduces the pipe's wetted cross-sectional area available to carry flow). Area-velocity flow metering uses the continuity equation,

$$Q = v \cdot A = v \cdot (A_T - A_S)$$

where Q: volume flow rate
v: average velocity as determined by the ultrasonic sensor
A: cross-sectional area available to carry flow
A_T: total cross-sectional area with both wastewater and sediment
A_S: cross-sectional area of sediment.

For circular pipe,

$$A_T = \left[\frac{D^2}{4}\cos^{-1}\left(1-\frac{2d_W}{D}\right)\right] - \left[\left(\frac{D}{2}-d_W\right)\left(\frac{D}{2}\right)\sin\left(\cos^{-1}\left(1-\frac{2d_W}{D}\right)\right)\right]$$

$$A_S = \left[\frac{D^2}{4}\cos^{-1}\left(1-\frac{2d_S}{D}\right)\right] - \left[\left(\frac{D}{2}-d_S\right)\left(\frac{D}{2}\right)\sin\left(\cos^{-1}\left(1-\frac{2d_S}{D}\right)\right)\right]$$

where d_W: distance between wastewater level and pipe invert
d_S: depth of sediment
D: pipe diameter

Flow patterns differ depending on the day of the week, and so are separated when determining average dry weather flows (ADWF). The Overall ADWF was selected from:

$$ADWF = \left(ADWF_{Mon-Thu} \times \frac{4}{7}\right) + \left(ADWF_{Fri} \times \frac{1}{7}\right) + \left(ADWF_{Sat} \times \frac{1}{7}\right) + \left(ADWF_{Sun} \times \frac{1}{7}\right)$$

3 Findings

3.1 Flow Monitoring Results

Table 3-1. Flow Monitoring Summary lists the average dry weather flow (ADWF), peak measured flow, and other calculated factors to determine the pipeline capacity. Detailed graphs of the flow monitoring data are included in Appendix A.

Table 3-1. Flow Monitoring Summary

Item	Site FM-1 Northwest Influent	Site FM-2 South Effluent	Site FM-3 East Influent
Pipe Diameter (in):	12	12	8
Weekday (Monday-Thursday) ADWF (gpm):	37.351	13.922	5.149
Weekday (Friday) ADWF (gpm):	36.203	13.438	4.556
Weekend (Saturday) ADWF (gpm):	39.891	14.220	3.550
Weekend (Sunday) ADWF (gpm):	39.925	13.113	3.655
Overall ADWF (gpm):	37.918	13.780	4.622
Peak Measured Flow (gpm):	78.759	38.646	14.344
Peak Level (in):	2.79	1.73	0.84
d/D Ratio:	2.79/12 = 0.19	1.73/12 = 0.14	0.84/8 = 0.11
Peaking Factor:	78.759/37.918 = 2.1	38.646/13.780 = 2.8	14.344/4.622 = 3.1

Flow Direction

Per discussions between RR and V&A, V&A was to monitor flows entering Bristol PS from the northwest (MH G6-01), the south effluent of Site FM-2 (MH G6-12), and the east influent of Site FM-3 (MH G5-31). Figure 1-1 shows the flow direction per the Culver City Sewer Index Map. Assuming the sewer information is accurate, the three monitored locations will represent all of the existing flows that would be impacted by the proposed development.

The combined average dry weather flow is therefore 37.918 + 13.780 + 4.622 = **56.32 gpm,** with about 67% of the flow accounted for at Site FM-1, 25% accounted for at Site FM-2, and 8% accounted for at Site FM-3.

Rain

Approximately 0.4 inches of rain fell during the flow monitoring period per four publicly available personal weather stations on Weather Underground.[1]

[1] Weather Underground (wunderground.com) collects data from 180,000+ weather stations across the country, including Automated Surface Observation System (ASOS) at airports, personal weather stations (PWS), and Meteorological Assimilation

3.2 Pipeline Capacity

The pipeline capacity was estimated by using the Manning equation:

$$Q = \frac{669 \times R^{2/3} \times S^{1/2} \times A}{n}$$

where

A: Cross-sectional area of flow (ft^2)
R: hydraulic radius (ft), calculated from flow level *d* and pipe diameter *D*
S: Pipeline slope (ft/ft)
n: Roughness coefficient (unitless)
Q: Flow rate (ft^3/s)

The following factors were selected to determine the pipeline capacity.

- **Roughness coefficients:** 0.013 for clay and concrete pipes is widely accepted numbers for sanitary sewer design.
- **Pipeline Slopes:** The pipeline slopes were provided by RR.
- **Design Flow Depth**: Common practice requires that sewers be designed for peak flow rates not to exceed 1/2 full pipes.

The pipeline capacity of the monitored pipes is shown in Table 1-1.

Table 3-2. Pipeline Capacity

Site	Site FM-1 MH G6-01 Northwest Influent	Site FM-2 MH G6-12 South Effluent	Site FM-3 MH G5-31 East Influent
Pipe Diameter (in):	12	12	8
Slope (ft/ft):	0.00505	0.0156	0.0232
Roughness Coefficient:	0.013	0.013	0.013
Full-Pipe Capacity (gpm):	1,136.22	1,197.01	826.01
Allowable Peak Flow at 1/2-full pipe (gpm):	568.11	998.50	413.00

Capacity analysis data is presented on a site-by-site basis and represents the hydraulic conditions only at the site location; hydraulic conditions in other areas of the collection system will differ. The City is encouraged to consult the hydraulic model and model assumptions.

Data Ingest System (MADIS) managed by the National Oceanic and Atmospheric Administration (NOAA).

3.3 Pipeline Capacity Analysis

The sanitary sewer design criteria shall include the following requirements to estimate sanitary sewer design flows as accurately as possible:

- Tributary Areas
- Estimate of Population
- Land Use
- Use-specific flow rates for
  - Residential
  - Commercial
  - Industrial
- Major point source discharge
- Ground Water
- Infiltration and Inflow

The analyses utilizes the following equation to calculate the design flow rate:

$$Design\ Flow\ Rate\ (Q) = [gAD] + [IA]_{infiltration}$$

Where: Q = total flow

A = tributary area, in acres

D = future population density, persons per acre

g = average flow rate (ADWF)

I = infiltration rate = 1,000 gallons/day/acre

3.3.1 Average Flow Generated from Development

The pre-development average flow rate was determined to be 56.32 gpm per the results presented in Section 3.1.

Pre-development Average Flow, gAD_1 = 56.32 gpm

Table 3-3 shows the projected average sanitary sewer flow generation from the proposed 6201 Residences development.

Table 3-3. Flow Generation from Proposed Development

Use/Type	Unit of Measure	Units	Average Sewage Generation Rate[2] (gallons/day/unit)	Flow (gallons/day)
Residential – Condominium	Dwelling Unit	846	195	164,970
Commercial – Restaurant	1,000 sqft	11.406	1,000	176,376
Proposed Development Average Flow, gAD_2 (Total)				**176,376 gpd = 122.5 gpm**

gAD_2 = 122.5 gpm

The existing average flow and the proposed development average flow combined gives the projected average flow, gAD, to the monitored pipe.

$gAD = gAD_1 + gAD_2 = 56.32 + 122.5 = 178.8$ gpm

THEREFORE,

gAD = 179 gpm

[2] The Sewage Generation Rate is taken from Section 1.0 – User Categories and Mean Loadings of An Ordinance Prescribing the Connection Fee Rate and Mean Loadings per Unit of Usage for County Sanitary District No. 22 of Los Angeles County.

3.3.2 Development Infiltration Rate (IA)

The 6201 Residences development will be approximately 5.8 acres in area. The tributary area for the monitored site is shown below.

The total tributary area to the monitored pipes is approximately 5.8 acres.

I=Infiltration rate=1,000 gallons/day/acre

IA = I*A = 1,000 gallons/day/acre * 5.8 acres = 5,800 gallons/day = 4.0 gpm

THEREFORE, **IA = 4.0 gpm**

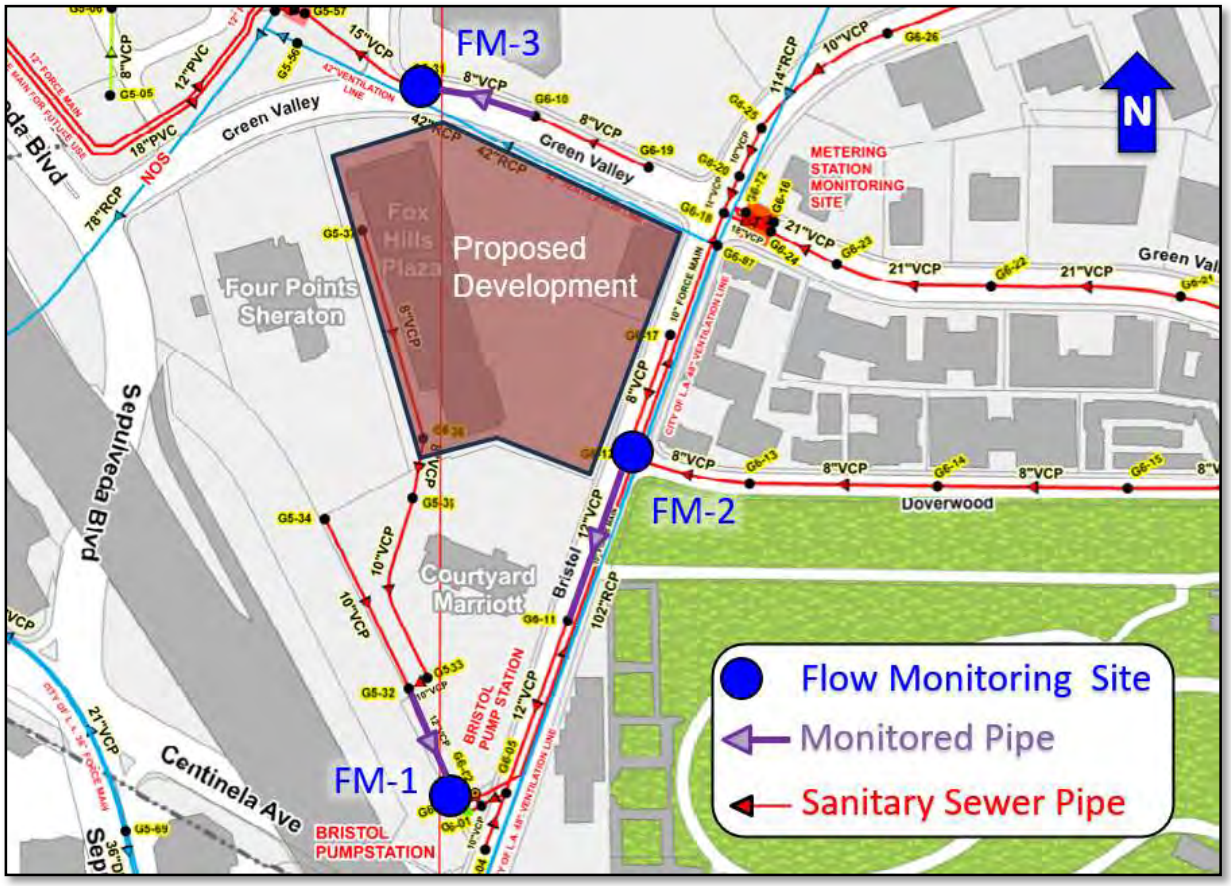

Figure 3-1. Google Earth image of the Tributary Area of the Proposed Development

3.3.3 Design Flow Rate (Q)

$$Design\ Flow\ Rate\ (Q) = [gAD] + [IA]_{infiltration}$$

THEREFORE, Q = gAD + IA
= 179 + 4.0
= 183 gpm

3.3.4 Estimated Pipe Capacity

Table 3-4 summarizes the capacity analysis of the sanitary sewer flow from the proposed 6201 Residences development. The available capacity values presented in row D assume that 100% of the flows generated from the proposed development will enter the respective pipelines that were monitored in addition to the existing flows that were measured in those pipelines during the capacity study.

Table 3-4. Pipeline Capacity Summary

Item	Site	Site FM-1 Northwest Influent	Site FM-2 South Effluent	Site FM-3 East Influent
A	Allowable Flow at 1/2-pipe full d/D (gpm)	568.11	998.50	413.00
B	Design Flow Rate (Q) (gpm)	183	183	183
C	Available capacity (gpm) (Item A – Item B)	385.11	815.50	230.00
D	Has Capacity for Development? (Item C ÷ Item A)	Yes (67% available capacity)	Yes (82% available capacity)	Yes (55% available capacity)

1 INTRODUCTION

Included herein is a Senate Bill (SB) 610-compliant water supply assessment (WSA) in support of the 6201 Residences Project (Proposed Project; **Figure 1**). The Proposed Project site is comprised of approximately 7.1 acres located in the City of Culver City, California. The Proposed Project includes the demolition of the existing office building on the project site and the construction of three new, eight-story mixed use buildings totaling approximately 1,568,516 square feet (sq ft), including 846 new dwelling units (including 36 Very-Low-Income units), 11,406 sq ft of restaurant space, 10,322 sq ft of leasing/lobby space, 14,086 sq ft of other amenity space, 937 sq ft of theatre use, 578 sq ft of indoor dog wash use, and 1,956 sq ft of co-working space use (TA Group, Inc., 2025a; 2025c; 2025d; 2025f). Additionally, the Proposed Project would include 534,095 sq ft of covered parking, 3,315 surface sq ft of community pools, and 73,834 sq ft of irrigated landscaping (TA Group, Inc., 2025f). A detailed site plan for the Proposed Project is included in **Appendix A**. The Proposed Project is located within the Golden State Water Company (GSWC) Culver City service area, and GSWC will be the water service provider for the Proposed Project (**Figure 2**).

The information provided in this WSA is consistent with California Water Code (CWC) §10910-10912 requirements and the California Department of Water Resources' (DWR's) *Guidebook for Implementation of Senate Bill 610 and Senate Bill 221 of 2001: To Assist Water Suppliers, Cities, and Counties in Integrating Water and Land Use Planning*, dated 8 October 2003. The text of specific sub-sections of the CWC is included within gray text boxes with italicized font at the beginning of specific sections of this WSA. The information presented in those respective sections, and the associated tables and figures, respond directly to CWC requirements.

The purpose of this WSA is to evaluate whether GSWC has sufficient water supply to meet the current and planned water demands within the GSWC Culver City service area, including the demands associated with the Proposed Project, during normal, single, and multiple dry hydrologic years over a 20-year time horizon. More specifically, this WSA includes:

- A summary of the WSA requirements articulated in CWC §10910-10912 and a description of how they apply to the Proposed Project;
- A description and analysis of the current and projected future water demands of the Proposed Project through the year 2045;
- A description and analysis of the historical, current, and projected future water demands for the GSWC Culver City service area through the year 2045;
- A description and analysis of the current and projected future water supplies for the GSWC Culver City service area through the year 2045; and
- A comparison of the water supplies and demands for the GSWC Culver City service area, including the projected water demands associated with the Proposed Project.

The information contained in this WSA is based primarily on the 2020 Urban Water Management Plan (UWMP) prepared for the GSWC Culver City service area, except where updated with relevant water demand and supply reliability and other information from sources including GSWC, the Santa Monica Basin Groundwater Sustainability Plan (GSP), and others, as noted.

This WSA concludes that sufficient water supply is available to GSWC to meet all future demands within the GSWC Culver City service area, including those associated with the Proposed Project.

2 GENERAL REQUIREMENTS FOR THE PREPARATION OF A WATER SUPPLY ASSESSMENT

The purpose of this section is to outline what types of projects require the preparation of a WSA, who is responsible for its preparation, and the necessary components of a WSA.

2.1 Applicability of SB Bill 610 to the Proposed Project

☑ ***CWC § 10910***

(a) Any city or county that determines that a project, as defined in Section 10912, is subject to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) under Section 21080 of the Public Resources Code shall comply with this part.

☑ ***CWC § 10912***

For the purposes of this part, the following terms have the following meanings:

(a) "Project" means any of the following:

(1) A proposed residential development of more than 500 dwelling units.

(2) A proposed shopping center or business establishment employing more than 1,000 persons or having more than 500,000 square feet of floor space.

(3) A proposed commercial office building employing more than 1,000 persons or having more than 250,000 square feet of floor space.

(4) A proposed hotel or motel, or both, having more than 500 rooms.

(5) A proposed industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or having more than 650,000 square feet of floor area.

(6) A mixed-use project that includes one or more of the projects specified in this subdivision.

(7) A project that would demand an amount of water equivalent to, or greater than, the amount of water required by a 500 dwelling unit project.

(b) If a public water system has fewer than 5,000 service connections, then "project" means any proposed residential, business, commercial, hotel or motel, or industrial development that would account for an increase of 10 percent or more in the number of the public water system's existing service connections, or a mixed-use project that would demand an amount of water equivalent to, or greater than, the amount of water required by residential development that would represent an increase of 10 percent or more in the number of the public water system's existing service connections.

The Proposed Project would include a residential development of more than 500 dwelling units and therefore satisfies the definition of a "project" requiring a WSA pursuant to SB 610 (CWC §10910(a) and 10912(a)(1)). It should be noted that per SB 221, over 500 dwelling units may also trigger the need for a Water Supply Verification.

2.2 Responsibility for Preparation of the Water Supply Assessment

☑ ***CWC § 10910***

(b) The city or county, at the time that it determines whether an environmental impact report, a negative declaration, or a mitigated negative declaration is required for any project subject to the California Environmental Quality Act pursuant to Section 21080.1 of the Public Resources Code, shall identify any water system that is, or may become as a result of supplying water to the project identified pursuant to this subdivision, a public water system, as defined in Section 10912, that may supply water for the project. If the city or county is not able to identify any public water system that may supply water for the project, the city or county shall prepare the water assessment required by this part after consulting with any entity serving domestic water supplies whose service area includes the project site, the local agency formation commission, and any public water system adjacent to the project site.

The Proposed Project is located within the GSWC Culver City service area, and potable water for the Proposed Project will be supplied by GSWC. Therefore, in accordance with CWC §10910(b), GSWC is the entity responsible for adopting the WSA for the Proposed Project.

2.3 Components of a Water Supply Assessment

☑ ***CWC § 10910***

(c)(4) If the city or county is required to comply with this part pursuant to subdivision (b), the water supply assessment for the project shall include a discussion with regard to whether the total projected water supplies, determined to be available by the city or county for the project during normal, single dry, and multiple dry water years during a 20-year projection, will meet the projected water demand associated with the proposed project, in addition to existing and planned future uses, including agricultural and manufacturing uses.

☑ ***CWC § 10911***

(b) The city or county shall include the water supply assessment provided pursuant to Section 10910, and any information provided pursuant to subdivision (a), in any environmental document prepared for the project pursuant to Division 13 (commencing with Section 21000) of the Public Resources Code.

(c) The city or county may include in any environmental document an evaluation of any information included in that environmental document provided pursuant to subdivision (b). The city or county shall determine, based on the entire record, whether projected water supplies will be sufficient to satisfy the demands of the project, in addition to existing and planned future uses. If the city or county determines that water supplies will not be sufficient, the city or county shall include that determination in its findings for the project.

As listed above in CWC §10910(c)(4), the primary purpose of a WSA is to evaluate whether sufficient water supply is available to meet all future demands within the water supplier's service area, including those associated with the Proposed Project, during normal and dry hydrologic years for a 20-year time horizon. Therefore, the following information is included in this WSA:

- A description and analysis of the current and projected future water demands of the Proposed Project through the year 2045;

- A description and analysis of the historical, current, and projected future water demands for the GSWC Culver City service area through the year 2045;
- A description and analysis of the current and projected future water supplies for the GSWC Culver City service area through the year 2045; and
- A comparison of the water supplies and demands for the GSWC Culver City service area, including the projected water demands associated with the Proposed Project.

3 PROJECT DESCRIPTION

The Proposed Project site is comprised of approximately 7.1 acres located in the City of Culver City, California on Assessor Parcel Numbers (APNs) 4134-018-004, 4134-018-005, and 4134-018-006 (TA Group, Inc., 2025a). The Proposed Project site is bordered by Green Valley Circle to the north, two hotels to the west and south, and Bristol Parkway to the east.

The Proposed Project will involve the demolition of existing office buildings and a former bakery on the project site and the construction of an eight-story mixed-use residential development, which will include approximately:

- 846 multi-family residential dwelling units (dus);
- 11,406 sq ft of restaurant use;
- 10,322 sq ft of leasing/lobby space;
- 14,086 sq ft of amenity use;
- 937 sq ft of theatre use;
- 578 sq ft of indoor dog wash use;
- 1,956 sq ft of co-working space;
- 3,315 sq ft of water features;
- 73,834 sq ft of irrigated landscape area; and
- 534,095 sq ft of covered parking (TA Group, Inc., 2025a; 2025c; 2025d; 2025e; 2025f).

The Proposed Project will be implemented in a phased approach, with construction estimated to begin in Quarter (Q) 1 2026 and reach stabilization (and full buildout) in 2030 (TA Group, Inc., 2025a).

4 PROJECT WATER DEMAND

The City of Culver City has adopted green building standards and water efficient landscaping ordinances consistent with previous versions of the CalGreen building standards and the California Model Water Efficient Landscape Ordinance (MWELO). Landscaping will also be consistent with Assembly Bill (AB) 1572. As part of State requirements, all new developments must comply with these efficiency standards. As such, the Proposed Project development is expected to include a number of water-efficient features, including, but not limited to:

- Use of low-flow lavatory faucets, kitchen faucets, toilets, and urinals in accordance with California Green Building Standards Code; and
- Inclusion of high-efficiency irrigation systems to minimize outdoor water use in accordance with MWELO and AB 1572.

As described below, the average annual water demand for the Proposed Project was estimated based on: (1) literature values for commercial water use (LACSD, 2024; City of Los Angeles Bureau of Engineering, 2012) and (2) information about the Proposed Project provided by TA Group, Inc. (TA Group Inc., 2025a; 2025c).

Table 1 includes a summary of the water demand projections associated with the proposed land uses at the Proposed Project completion. The Proposed Project will be implemented in a phased approach, with construction estimated to begin in Q3 2026 and reach completion by Q4 2028. Proposed Project stabilization (full buildout) is anticipated by Q2 2030 (TA Group, Inc., 2025a).

4.1 Indoor Water Use

Table 1 provides a summary of the land uses, unit demand factors, and respective water demands associated with each land use anticipated in the Proposed Project. Below is a summary of the calculations and assumptions for each indoor land use category.

4.1.1 Residential Use

Based on current development plans, the Proposed Project is expected to include 846 multi-family residential dus (TA Group Inc., 2025a). The water demands for the residential uses are estimated based on the wastewater generation factor of 156 gallons per day per dwelling unit (gpd/du) for the multi-family residential units. This wastewater generation factor is based on the average wastewater generation factors used by the Los Angeles County Sanitation District (LACSD) for purposes of assessing average wastewater flow (LACSD, 2024). For the purpose of this analysis, wastewater flows are assumed to be 90% of the total water demand, consistent with the methodology used in the Paramount Pictures Master Plan which was approved by the City of Los Angeles in April 2016 (Incledon Consulting Group, 2015; City of Los Angeles Department of City Planning, 2016). Therefore, wastewater flow factors provided by LACSD were divided by 0.9 to determine the water demand factors for residential uses and other relevant factors mentioned in the following sections.

Based on the residential water demand factor (173 gpd/du), calculated from the identified wastewater generation factor above, the total residential use for the Proposed Project at full buildout is estimated to be 164 acre-feet per year (AFY).

4.1.2 Restaurant Use

The Proposed Project includes 11,406 sq ft of a high turnover restaurant (TA Group Inc., 2025f); The wastewater generation factor per LACSD for restaurant use is 1.0 gpd/sq ft (LACSD, 2024). Based on the methodology discussed above in Section 4.1.1, the estimated water use factor for restaurant use is 1.1 gpd/sq ft. The resultant water demand associated with the restaurant portion of the Proposed Project at full buildout is estimated to be 14 AFY.

4.1.3 Leasing and Lobby Use

The Proposed Project includes approximately 10,322 sq ft of leasing and lobby related uses (TA Group Inc., 2025d; 2025f). The wastewater generation factor for leasing use is estimated at 0.30 gpd/sq ft, based on the LACSD factor for professional building (LACSD, 2024). Based on the methodology discussed above in Section 4.1.1, the estimated water use factor for leasing use is 0.33 gpd/sq ft. The resultant water demand associated with the leasing portion of the Proposed Project at full buildout is estimated to be 3.9 AFY.

4.1.4 Other Amenity Space Use

The Proposed Project includes approximately 14,086 sq ft of other amenity uses including podcast room(s), clubrooms, and a wellness center, as well as other indoor amenities that are not specified at the time of preparing this WSA (TA Group Inc., 2025d; 2025f). For the wellness center portion of the amenity space, the wastewater generation factor is estimated at 0.30 gpd/sq ft, based on the LACSD factor for health spa without showers. For the remaining amenity uses (podcast rooms, clubrooms, and other unspecified indoor amenities), the wastewater generation factor is estimated at 0.30 gpd/sq ft, based on the LACSD factor for professional building (LACSD, 2024). Based on the methodology discussed above in Section 4.1.1, the estimated water use factor for other amenity space use is 0.33 gpd/sq ft. The resultant water demand associated with the other amenity uses portion of the Proposed Project at full buildout is estimated to be 5.3 AFY.

4.1.5 Theatre Space Use

The Proposed Project includes a 937 sq ft theatre (TA Group Inc., 2025d; 2025f). The wastewater generation factor per LACSD for theatre use is 0.125 gpd/sq ft (LACSD, 2024). Based on the methodology discussed above in Section 4.1.1, the estimated water use factor for theatre use is 0.14 gpd/sq ft. The resultant water demand associated with the theatre portion of the Proposed Project at full buildout is estimated to be 0.15 AFY.

4.1.6 Dog Wash Space Use

The Proposed Project includes a 578 sq ft dog wash station (TA Group Inc., 2025d; 2025e). The wastewater generation factor per LACSD for animal kennel use is 0.10 gpd/sq ft (LACSD, 2024). Based on the methodology discussed above in Section 4.1.1, the estimated water use factor for the dog wash space is 0.11 gpd/sq ft. The resultant water demand associated with the dog wash space portion of the Proposed Project at full buildout is estimated to be 0.072 AFY.

4.1.7 Co-Working Space Use

The Proposed Project includes 1,956 sq ft of co-working space (TA Group Inc., 2025d; 2025e). The wastewater generation factor per LACSD for office use is 0.20 gpd/sq ft (LACSD, 2024). Based on the methodology discussed above in Section 4.1.1, the estimated water use factor for co-working space use is 0.22 gpd/sq ft. The resultant water demand associated with the co-working portion of the Proposed Project at full buildout is estimated to be 0.49 AFY.

4.1.8 Total Indoor Water Use

Based on the above calculations and assumptions, total indoor water use for the Proposed Project is estimated to be 188 AFY at full buildout.

4.2 Covered Parking Water Use

The Proposed Project includes a nine-story parking structure, totaling approximately 534,095 sq ft of covered parking facilities (TA Group Inc., 2025d; 2025e). Water use associated with this space is anticipated to be minimal, limited to cleaning of the facility approximately 12 times per year (LADWP, 2022). It is assumed that 0.020 gallons per sq ft will be used per cleaning event (City of Los Angeles Bureau of Engineering, 2012). Thus, it is estimated that 0.39 AFY will be used for the purpose of cleaning the parking facility.

4.3 Community Landscaping and Water Feature Water Use

The Proposed Project includes general landscaping along with a pool and jacuzzi area and a water feature as a part of the residential community (collectively referred to as “water features”). The projected water demands for the community landscaping and water features were estimated based on the Maximum Applied Water Allowance (MAWA) per MWELO (DWR, 2025a). The MWELO requires that the annual estimated total water use for landscape irrigation and water features does not exceed the MAWA (DWR, 2025a). As shown below, the MAWA is calculated based on the regional reference evapotranspiration rate, an evaporation adjustment factor, the total landscaped area, and the area of “special landscaped area.”[1] Water use for the Proposed

[1] Special Landscaped Area includes landscaping dedicated solely to edible plants, recreational areas, areas irrigated with recycled water, or water features using recycled water.

Project landscaping irrigation has been conservatively assumed to be equal to the MAWA, which is the upper limit of annual applied water for established landscaped areas and water features.

The MAWA is calculated using the following equation:

$$MAWA = ETo \times [(ETAF \times LA) + (1\text{-}ETAF) \times SLA]$$

where:

ETo	=	The regional reference evapotranspiration rate
ETAF	=	Evapotranspiration Adjustment Factor For residential landscaping = 0.55 For water features = 1
LA	=	Total landscape area (including SLA)
SLA	=	Special Landscape Area

Based on the above methodology, and shown in **Table 2**, the total annual water demands for the Proposed Project's landscaping and water features are estimated to be 2.8 AFY and 0.28 AFY, respectively, at full buildout (excluding the distribution system losses discussed in Section 4.4).

AB 1572 was signed into law in October 2023 and took effect in January 2024. This regulation prohibits the use of potable water for the irrigation of nonfunctional turf[2] located on commercial, industrial, and institutional (CII) properties, other than a cemetery, and on properties of homeowners' associations, common interest developments,[3] and community service organizations or similar entities. AB 1572, however, does not prohibit the use of potable water for irrigation of other types of landscaping, such drought-tolerant landscaping. It is important to note that MAWA already incorporates conservative measures that limit the total water use for landscape irrigation. Therefore, this WSA assumes that landscaping for the Proposed Project will be equal to the MAWA and comply with AB 1572.

4.4 Distribution System Losses

Water distribution systems experience a degree of water loss over the course of transmission from the source to the customer. Although distribution system losses from the newly constructed portion of the system's infrastructure associated with the Proposed Project would initially be expected to be minimal, it is conservatively assumed that distribution system losses associated with delivering water for the Proposed Project will ultimately be consistent with the proportion of real and apparent water loss per the most recent (2023) validated water loss audit submitted to DWR for the GSWC Culver City service area (i.e., 6.8%; DWR, 2024b). It should be noted that while these real losses represent a demand on the system, water lost through the distribution

[2] Nonfunctional turf is defined as any turf that is not functional turf, and includes turf located within street rights-of-way and parking lots. Nonfunctional turf excludes recreational areas, or areas designated by a property owner or a governmental agency to accommodate human foot traffic for recreation, including, but not limited to, sports fields, golf courses, playgrounds, picnic grounds, or pet exercise areas.

[3] A common interest development is defined as a community apartment project, a condominium project, a planned development, or a stock cooperative.

system returns to the underlying groundwater basin and thus is not a true demand on the groundwater supply. However, for purposes of this WSA, all water loss is conservatively considered a demand. **Table 1** shows the distribution system losses for the Proposed Project, estimated at a total of 14 AFY at full buildout.

4.5 Existing Current Water Demand on the Proposed Project Site

The Proposed Project site has been mostly vacant in recent years, with existing office buildings and a former bakery on-site (TA Group, 2025a). At the time of preparing this WSA, historical water usage data was unavailable for the majority of the past five years (2020-2024). The site has only been owned for ten months, and utility records are limited to December 2024 and January 2025. During this time period, water use at the Proposed Project site averaged 0.21 AF/month, which equates to 2.5 AFY (TA Group Inc., 2025b). Since there is limited historical water use data available for the Proposed Project site, as shown in **Table 1**, the total Proposed Project demands conservatively do not subtract the existing site demands.

4.6 Total Proposed Project Water Demand

Based on the above methodologies and assumptions, the total annual water demand associated with the Proposed Project at full buildout and occupancy is conservatively estimated to be 206 AFY, as shown in **Table 1**. Demands are assumed to come online consistent with the phased development schedule for the Proposed Project. Full buildout of the Proposed Project is expected to be completed by Q4 of 2028, with stabilization anticipated by Q2 of 2030.

Table 1

Summary of Estimated Incremental Annual Project Water Demand

6201 Residences, Culver City, California

Land Use	Land Use at Full Buildout (a)	Land Use Units	Water Demand Factor (b)	Water Demand Factor Units	Total Water Demand (AFY) (c)				
					2025	2030	2035	2040	2045
Multi-Family Residential Units	846	du	173	gpd/du	0	164	164	164	164
Restaurant	11,406	sq ft	1.1	gpd/sq ft	0	14	14	14	14
Leasing/Lobby	10,322		0.33		0	3.9	3.9	3.9	3.9
Other Amenity (d)	14,086		0.33		0	5.3	5.3	5.3	5.3
Theatre	937		0.14		0	0.15	0.15	0.15	0.15
Dog Wash	578		0.11		0	0.072	0.072	0.072	0.072
Co-Working Space	1,956		0.22		0	0.49	0.49	0.49	0.49
Covered Parking (e)	534,095		0.020	gal/sq ft/cleaning	0	0.39	0.39	0.39	0.39
Water Features (f)	3,315		(h)		0	0.28	0.28	0.28	0.28
Irrigated Landscaping (g)	73,834				0	2.8	2.8	2.8	2.8
Distribution System Losses (i)	--	--	6.8%		0	14	14	14	14
Existing Site Demand	--	--	(j)						
Net Annual Water Demand (k)					**0**	**206**	**206**	**206**	**206**

Abbreviations:

"AFY" = acre-feet per year
"du" = dwelling unit
"gal" = gallons
"gpd" = gallons per day
"MAWA" = Maximum Applied Water Allowance
"MWELO" = Model Water Efficient Landscape Ordinance
"Proposed Project" = 6201 Residences
"sq ft" = square feet
"WSA" = Water Supply Assessment

Notes:

(a) Estimated residential units per Reference 1. Land use square footages for the water features per Reference 2. Land use square footage for the restaurant, leasing space, other amentities, co-working space, covered parking, and irrigated landscaping per Reference 3.

(b) Water demand factors for covered parking per Reference 4. Water demand factors for the residential units, commercial, leasing/lobby space, other amenity, theatre, dog wash, and co-working space were calculated based on wastewater generation factors per Reference 5. Wastewater generation factors per Reference 5 were provided by the Los Angeles County Sanitation Districts and represent the average wastewater flow factor for each land use. For the purpose of this analysis, wastewater flows are assumed to be 90% of the total water demand for each land use, consistent with the methodology used in the Paramount Pictures Master Plan which was approved by the City of Los Angeles in April 2016 per Reference 6 and 7. Therefore, flow factors provided in Reference 5 were divided by 0.9 to determine the water demand factors for residential unit and food service uses.

(c) The Proposed Project will be implemented in a phased approach, with an estimated construction start in Quarter 3 2026, construction completion in Quarter 4 2028, and stabilization in Quarter 2 2030, per Reference 1.

Table 1

Summary of Estimated Incremental Annual Project Water Demand

6201 Residences, Culver City, California

Notes Continued:

(d) The Proposed Project's other amenity use includes podcast room(s), clubrooms, and a wellness center, as well as other indoor amenities that are not specified at the time of preparing this WSA.

(e) Water use associated with the covered parking is anticipated to be minimal, limited to cleaning of the facility. For purposes of this WSA, it is assumed that the covered parking will be cleaned twelve times per year and that 0.02 gal/sq ft will be used per each cleaning event, per Reference 4.

(f) The Proposed Project includes water features, spas, and a pool per Reference 2.

(g) The total landscaped area includes ground and roof level landscaped area per Reference 2.

(h) Estimates of the landscaping and water feature demands are based on MWELO calculations per MAWA per Reference 8. See Table 2 for the MWELO calculations.

(i) Estimated distribution system water loss associated with delivery of water to the Proposed Project is based on a rate of 6.8% per Reference 9 and includes both real and apparent losses.

(j) At the time of preparing this WSA, historical water usage data was unavailable for the majority of the past five years (2020-2024). The site has only been owned for ten months, and utility records are limited to December 2024 and January 2025. The site has been mostly vacant in recent years, with existing office buildings and a former bakery on-site, of which the majority of the water use was for irrigation. Since there is limited historical water use available data for the Proposed Project site, the total Proposed Project demands conservatively do not subtract out the existing site demands.

(k) Totals may not sum due to rounding.

5 GSWC CULVER CITY SERVICE AREA WATER DEMAND

☑ ***CWC § 10910***

(c)(1) The city or county, at the time it makes the determination required under Section 21080.1 of the Public Resources Code, shall request each public water system identified pursuant to subdivision (b) to determine whether the projected water demand associated with a proposed project was included as part of the most recently adopted urban water management plan adopted pursuant to Part 2.6 (commencing with Section 10610).

(2) If the projected water demand associated with the proposed project was accounted for in the most recently adopted urban water management plan, the public water system may incorporate the requested information from the urban water management plan in preparing the elements of the assessment required to comply with subdivisions (d), (e), (f), and (g).

(3) If the projected water demand associated with the proposed project was not accounted for in the most recently adopted urban water management plan, or the public water system has no urban water management plan, the water supply assessment for the project shall include a discussion with regard to whether the public water system's total projected water supplies available during normal, single dry, and multiple dry water years during a 20-year projection will meet the projected water demand associated with the proposed project, in addition to the public water system's existing and planned future uses, including agricultural and manufacturing uses.

Consistent with the UWMP Act (CWC §10610-10656), the 2020 UWMP presents estimates of projected future water demand for the GSWC Culver City service area in five-year increments, between the years 2025 and 2045 (GSWC, 2021). Projected water demand is subdivided between the following seven customer sectors or use types: (1) single family, (2) multi-family, (3) commercial/institutional, (4) industrial, (5) landscape, (6) other, and (7) water loss. As discussed further below, the 2020 UWMP demand projections account for: (1) demands for the existing service area and accounts, (2) projected growth based on historical growth in accounts, and (3) all anticipated new development based on information then available to GSWC.

5.1 Current and Historical Water Demand Within the GSWC Culver City Service Area

Historical water demand within the GSWC Culver City service area from 2016 through 2024 is shown in **Table 3**. Based on 2020 water use, the single-family residential and commercial/institutional sectors use the most water, at 34% and 33%, respectively, followed by multi-family residential at 23%. Industrial and "other" uses represent just 2.4% and 2.9% of water use, and distribution system losses represent 5.3% of the service area's water demand (GSWC, 2021). Between 2016 and 2024, water demands remained fairly stable, averaging 4,712 AFY (DWR, 2024b; GSWC, 2021).

5.2 GSWC Culver City Service Area Demand Projections

The 2020 UWMP water demand projections account for growth within the GSWC Culver City service area through 2045. The 2020 UWMP includes population growth estimates based on Southern California Association of Governments (SCAG) projections. Based on a review of historical growth in accounts and the SCAG projected population and employment, GSWC

projected the growth in accounts by sector within the Culver City service area and applied unit demand factors for each customer category to estimate future demands.

As shown in **Appendix B,** based on a review of the GSWC Culver City service area growth projections, GSWC has confirmed that the water demands associated with the Proposed Project's commercial uses, landscape uses, and the corresponding water distribution losses are within the anticipated growth for the GSWC Culver City service area. Thus, this WSA can assume that the demands for these project elements (approximately 30 AFY) were included in the 2020 UWMP for the GSWC Culver City service area, consistent with CWC §10910(c)(1) (GSWC, 2025).

However, per **Appendix B**, GSWC has confirmed the water demands associated with the Proposed Project's multi-family residential use and the corresponding water distribution losses are not included in the growth anticipated within the GSWC Culver City service area. Thus, this WSA assumes that the demands for these project elements (approximately 176 AFY) are additive to 2020 UWMP demands (GSWC, 2025).

The demand projections for the GSWC Culver City service area, including the additive demands of the Proposed Project and those of other known developments, are presented in **Table 4** by water use sector in five-year increments through 2045. It is estimated that, inclusive of the Proposed Project, the total annual water demand for the GSWC Culver City service area will be approximately 5,856 AFY in 2045.

5.3 Planned Development Projects Within the GSWC Culver City Service Area

As discussed above, the 2020 UWMP demand projections include projections of growth within the existing service area based on historical account growth and SCAG population and employment forecasts, which included the demand associated with the Crossings Campus Building 1 Project (Crossings Project), a planned development for which a WSA was completed in 2022. The Crossings Project includes a 167,000 sq ft four-story office building with associated landscaping and covered parking. The demands associated with the Crossings Project are estimated to be 24 AFY by full buildout in 2025. The Crossings Project is considered to be included within GSWC Culver City service area's growth projections and the 2020 UWMP demand projections (EKI, 2022).

Additionally, the 10950 Washington Boulevard mixed-use residential development is a known project within the GSWC Culver City service area for which a WSA was completed in August 2024 (EKI, 2024a). The 5.5 acre-site includes the construction of 508 multi-family units and approximately 14,087 sq ft of commercial use (EKI, 2024a). The WSA determined that the demands associated with the commercial and landscape uses, approximately 4.1 AFY by full buildout, are included in the 2020 UWMP demand projections. However, the estimated demands associated with the multi-family residential uses are considered not included in the 2020 UWMP demand projections for GSWC Culver City (100 AFY). Therefore, the projected multi-family residential demands that are considered additive to GSWC Culver City's projected demands are shown in **Table 4**.

Similarly, the 5757 Uplander Way mixed-use residential development is a known project within the GSWC Culver City service area for which a WSA was completed in December 2024. The 8.3 acre-site includes the construction of 1,077 multi-family units, just under 9,000 sq ft of lobby space, approximately 6,070 sq ft of fitness center space, and an approximately 5,772 sq ft restaurant (EKI, 2024b). The WSA determined that the demands associated with the commercial and landscaping uses, approximately 26 AFY by full buildout, are included in the 2020 UWMP demand projections. However, the estimated demands associated with the multi-family residential uses are considered not included in the 2020 UWMP demand projections for GSWC Culver City (210 AFY). Therefore, the projected multi-family residential demands that are considered additive to GSWC Culver City's projected demands are shown in **Table 4**.

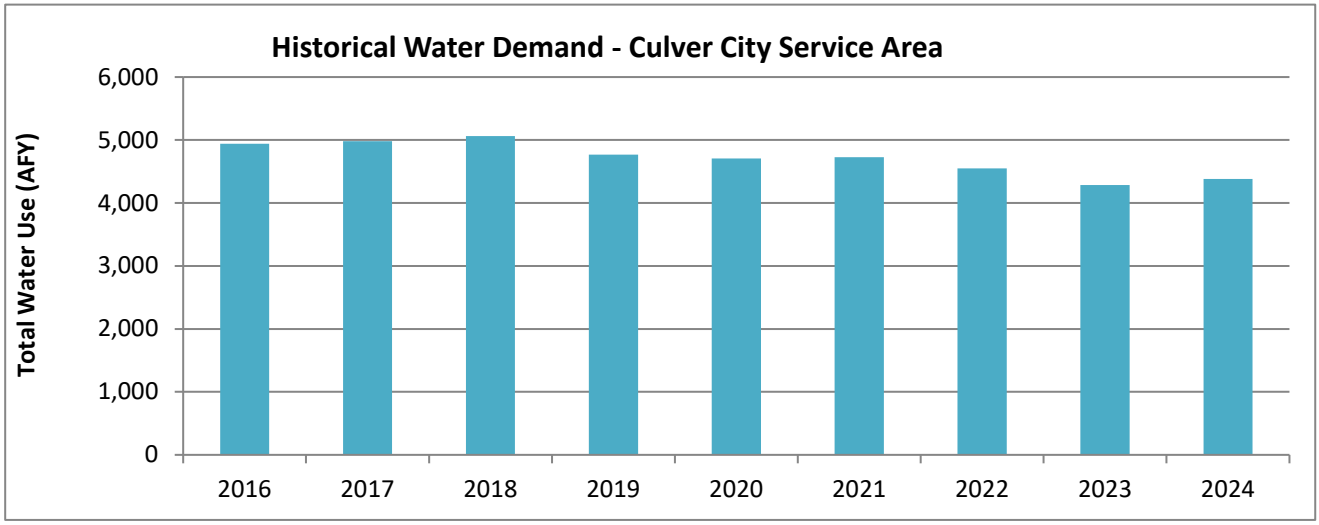
This WSA understands that GSWC tracks future planned water uses through service applications that it receives for new developments and has determined that all currently planned water uses, except for the multi-family residential demands and corresponding water losses associated with the 10950 Washington Boulevard development, the 5757 Uplander Way development and the Proposed Project, are accounted for in its 2020 UWMP.

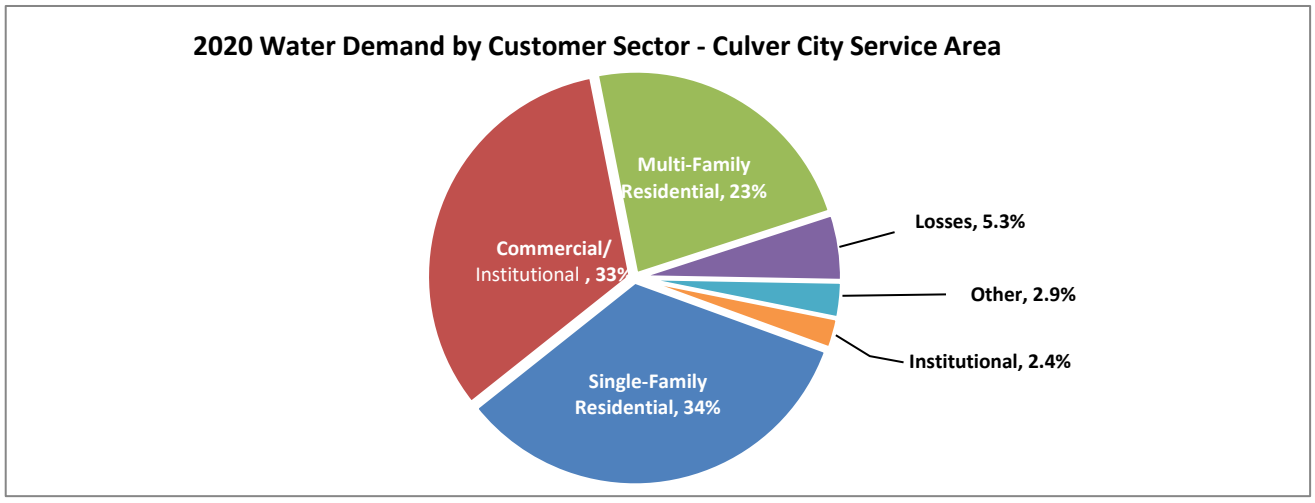
Table 3

Historical Water Demand for GSWC Culver City Service Area

6201 Residences, Culver City, California

	Historical Water Demand (AFY) (a)								
	2016	**2017**	**2018**	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**
Water Demand	4,942	4,982	5,061	4,767	4,707	4,726	4,551	4,285	4,383





Abbreviations:

"AFY" = acre-feet per year "GSWC" = Golden State Water Company

Notes:

(a) Historical water demands from 2016-2020 per Reference 1, and for 2021, 2022, 2023, and 2024 per Reference 2. The 2020 water use by customer sector is provided in Reference 1.

Total GSWC Culver City Service Area Water Demand Inclusive of the Proposed Project (b)	***5,002***	***5,430***	***5,661***	***5,755***	***5,856***

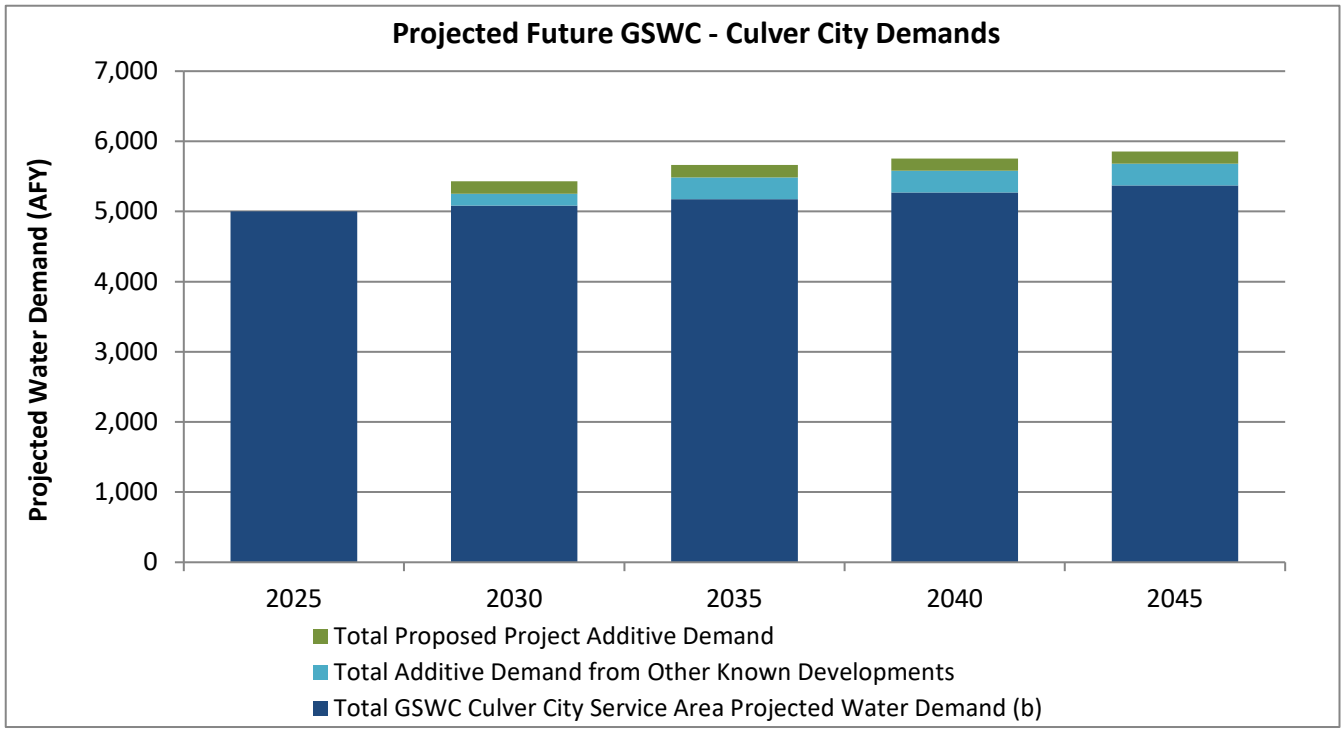

Table 4

Projected Future Water Demand for GSWC Culver City Service Area

6201 Residences, Culver City, California

Abbreviations:

"AFY" = acre-feet per year

"GSWC" = Golden State Water Company

"Proposed Project" = 6201 Residences

"UWMP" = Urban Water Management Plan

Notes:

(a) The projected water demands by sector for the GSWC Culver City Service Area are provided in the 2020 UWMP per Reference 1.

(b) Total may not sum due to rounding.

(c) Other known developments include the 10950 Washington Boulevard and 5757 Uplander Way mixed-use development projects. The demands associated with 10950 Washington Boulevard and 5757 Uplander Way are per Reference 2 and 3, respectively. A portion of the total projects' projected demands (shown in the table above) are considered additive to GSWC's growth.

(d) Commercial and landscape demands for the Proposed Project, as well as the corresponding water losses, are within the growth anticipated by GSWC and therefore, are included in the GSWC Culver City Service Area 2020 UWMP. However, the Proposed Project's multi-family residential demands and the corresponding water losses were not included within the projected growth in the 2020 UWMP. Therefore, these demands are additive to those in the 2020 UWMP, as confirmed through correspondence with GSWC per Reference 4.

(e) Distribution losses associated with the Proposed Project's multi-family residential demands are proportional to the Proposed Project's total distribution system losses in Table 1.

3. EKI, 2024b. Water Supply Assessment for the 5757 Uplander Way Project, prepared by EKI, dated December 2024.
4. GSWC, 2025. Information provided by Golden State Water Company on 10 March 2025.

6 GSWC CULVER CITY SERVICE AREA WATER SUPPLY

This section identifies the water supplies for the GSWC Culver City service area and discusses the variability of the different supplies based on drought and other factors affecting water supply reliability. The Proposed Project will be served with potable water by GSWC, which primarily relies on imported water purchased from the West Basin Municipal Water District (WBMWD), although GSWC has previously extracted a minimal amount of groundwater from the Santa Monica Subbasin (GSWC, 2021).

6.1 Identification of Water Supply Rights

☑ ***CWC § 10910***

(d)(1) The assessment required by this section shall include an identification of any existing water supply entitlements, water rights, or water service contracts relevant to the identified water supply for the proposed project, and a description of the quantities of water received in prior years by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), under the existing water supply entitlements, water rights, or water service contracts.

Pursuant to CWC §10910(d)(1), a WSA is required to include identification of all water supply entitlements, water rights, and water service contracts relevant to the identified water supply for the Proposed Project. In accordance with these requirements, this WSA includes a summary of GSWC's water supply sources for the GSWC Culver City service area.

6.2 Purchased Water

GSWC purchases water for the GSWC Culver City service area from WBMWD. The water purchased from WBMWD may be managed and moved between the GSWC Culver City service area and GSWC Southwest service area, depending upon the circumstances for supply availability in each particular service area (GSWC, 2021).

GSWC entered into a five-year purchase order agreement between GSWC and WBMWD, effective 1 January 2008 through 31 December 2012. The agreement was extended an additional two years to 31 December 2014. This agreement provided GSWC with an annual maximum allocation of 30,651 AFY with a total purchase commitment of 91,953 acre-feet (AF) over the five-year term of the agreement, shared by all of GSWC's systems served by WBMWD. At this time, this agreement has not been extended (WBMWD, 2025).

WBMWD is a member agency of the Metropolitan Water District of Southern California (MWD). WBMWD acts as secondary wholesale water agency, purchasing water from MWD and reselling it to GSWC. WBMWD entered into a new ten-year term purchased order with MWD effective 1 January 2015 through 31 December 2024 (WBMWD, 2021). No allocation for GSWC was established with WBMWD under this new purchase order, and no new purchase order agreement has been made between WBMWD and MWD beyond December 2024, per email correspondence with WBMWD (WBMWD, 2025).

MWD supplies imported water sourced from the State Water Project (SWP) and the Colorado River via a series of pipelines and aqueducts. The Colorado River was MWD's original source of water following its establishment in 1928. MWD has a legal entitlement to receive water from the Colorado River under a permanent service contract with the United States Secretary of the Interior. The Colorado River Aqueduct, which has a capacity of 1.25 million AFY, is owned and operated by MWD. It transports water from Lake Havasu, at the border of California and Arizona, approximately 242 miles west to its terminus at Lake Mathews in Riverside County and MWD's service area (WBMWD, 2021).

MWD also imports water from the SWP, which is owned by the State of California and operated by DWR. The SWP transports Feather River water stored in and released from Oroville Dam and conveyed through the San Francisco Bay and Sacramento-San Joaquin River Delta (Bay-Delta), as well as unregulated flows diverted directly from the Bay-Delta, south via the California Aqueduct to four delivery points: one from the California Aqueduct's West Branch at Castaic Lake and three from the East Branch along the northeastern portion of MWD's service area between Devil's Canyon Power Plant and Lake Perris (WBMWD, 2021).

MWD continuously engages in planning for various aspects of its water management, including operations, long-term reliability, and emergency response. These planning efforts include: (1) the 1996 Integrated Water Resources Plan (IRP) and its three updates in 2004, 2010, and 2015; (2) the 2020 IRP (currently in development in coordination with the Climate Adaption Master Plan for Water); (3) the Water Shortage Contingency Plan (WSCP); (4) the Water Surplus and Drought Management (WSDM) Plan; (5) the Water Supply Allocation Plan (WSAP); (6) the Emergency Storage Objective; and (7) the Seismic Risk Assessment and Mitigation Plan. Collectively, they provide a policy framework, operating guidelines, and resource targets for MWD to ensure regional water supply reliability (MWD, 2022; WBMWD, 2021).

The IRP is MWD's evolving long-term plan to assure adequate water supplies for Southern California. The first IRP was adopted in 1996 to address the complexity of developing, maintaining, and delivering water to meet changing demands in the face of growing challenges. This version of the IRP was last updated in 2015 and detailed a series of reliability goals, approaches, and targets for each of their water resource areas, with some focus on maintaining existing capabilities and increasing net quantities over the 25-year planning horizon (MWD, 2016). The 2015 IRP identified the following goals:

- Maintain Colorado River Aqueduct supplies;
- Stabilize State Water Project supplies;
- Achieve additional conservation savings; and
- Develop and protect local water supplies.

MWD published annual implementation reports on its progress towards the 2015 IRP goals. The most recent Implementation Report (2019) highlighted the progress on achieving the resource and reliability goals established in the 2015 IRP as follows:

- MWD worked closely with other agencies to improve the reliability of its imported water supplies. MWD led efforts in crafting the Lower Colorado River Basin Drought Contingency Plan and supported efforts to make the Delta more resilient and support Governor Newsom's direction to advance a single tunnel solution in the Delta;
- MWD continued to support and encourage local supply development through the Local Resources Program. MWD's board approved three projects with a total contract yield of 3,660 AFY from January 2019 to October 2019. As of October 2019, seven additional applications for a total of 116,580 AFY were under consideration. MWD was also assessing the water supply benefits from stormwater through pilot programs; and
- MWD continued to inform residents of water use efficiency through its ongoing advertising campaigns and education. In addition to rebates for water efficient fixtures, MWD also implemented programs targeting outdoor conservation with its landscape education and turf replacement programs. In 2019, MWD's Board of Directors (Board) approved a conservation initiative that focuses on reaching disadvantaged communities (MWD, 2019).

In February 2023, MWD transitioned from its traditional IRP approach to a more adaptive and climate-resilient framework. While the 2020 IRP assessed multiple scenarios that could play out in the future and how MWD could respond to maintain water reliability for the region, MWD is now advancing its long-term strategy through the Climate Adaptation Master Plan for Water (CAMP4W). As identified in the May 2024 CAMP4W Year One Progress Report, the goals of CAMP4W are to increase MWD's understanding of the climate risks to water supplies, infrastructure, operations, workforce, and financial sustainability, and to develop decision-making tools and long-term planning guidance for adapting to climate change (MWD, 2024). The preliminary objectives for CAMP4W (that will be refined through the process) include:

- Increase the resilience and reliability of Southern California's water supplies;
- Build greater equity into the regional water storage and delivery systems, so that all 26 MWD member agencies have access to reliable supplies, even in severe drought periods;
- Pursue collaborative cost-sharing partnerships and promote affordability initiatives as MWD makes the necessary investments to adapt South California's water infrastructure to the demands of the 21st century;
- Clearly understand the MWD and member agency network of water resource supplies and infrastructure to determine opportunities to provide additional connectivity;
- Understand the climate risks and vulnerabilities the network is facing;

- Identify adaptation strategies that strengthen the network and reduce vulnerabilities;
- Identify opportunities to expand water resources;
- Identify opportunities for strategic sharing of resources and infrastructure across MWD's member agencies to maximize all potential local supply options;
- Develop a financial strategy to fund capital investments and equitable share both water supplies and costs amount MWD's member agencies;
- Develop a business model that supports MWD's role into the future; and
- Explore partnerships with outside agencies and stakeholders to work towards common goals.

As part of the CAMP4W process, the Draft Implementation Strategy was developed in February 2025 to support near-term climate adaptation decision-making and implementation. The Draft Implementation Strategy includes a defined set of new and ongoing tasks with an achievable timeline, and both culminates the initial planning phase and sets forth a critical path towards implementing and institutionalizing climate adaptation at MWD over the next five years. The Draft Implementation Strategy is expected to be brought to MWD Board for approval in April 2025 (MWD, 2025).

Both the Year One Progress Report and Draft Implementation Strategy incorporate the 2020 IRP Regional Needs Assessment, which was completed and adopted by the MWD Board in April 2022. The Regional Needs Assessment provides an analysis of regional needs under a range of scenarios: (1) Scenario A, low demand and stable imports; (2) Scenario B, high demand and stable imports; (3) Scenario C, low demand and reduced imports; and (4) Scenario D, high demand and reduced imports (MWD, 2022).

The Regional Needs Assessment found plausible reliability outcomes by the year 2045, with potential shortages ranging from no net shortage at all under Scenario A to as high as 1.2 million AF under Scenario D, and identifies needs and opportunities related to five focus areas: (1) SWP dependent areas; (2) storage; (3) retail demand/demand management; (4) MWD imported supplies; and (5) local supply. The Regional Needs Assessment concludes that:

> *Collectively, these findings instill a sense of optimism about Southern California's water future. Metropolitan has identified the tools necessary to adapt to a variety of plausible futures successfully. It is also well within Southern California's control to avoid a fate with increased per-capita water use and higher demands that would prove unsustainable.*

To address the reliability gaps identified in the Regional Needs Assessment, MWD has begun the multi-phased, multi-year Long-Range Financial Plan (LRFP) development process. The initial LRFP Needs Assessment (LRFP-NA) builds upon the Regional Needs Assessment and it consistent with

the goals and objectives of the CAMP4W process pertaining to resilience, reliability, financial sustainability, affordability, and equity (MWD, 2024).

While MWD coordinates regional supply planning through its inclusive IRP and CAMP4W process, MWD's member agencies also conduct their own planning analyses, including their own urban water management plans, and may develop projects independently of MWD (MWD, 2022; WBMWD, 2021).

6.3 Groundwater Supply

☑ ***CWC § 10910***

(f) If a water supply for a proposed project includes groundwater, the following additional information shall be included in the water supply assessment:

(1) A review of any information contained in the urban water management plan relevant to the identified water supply for the proposed project.

(2)(A) A description of any groundwater basin or basins from which the proposed project will be supplied.

(B) For those basins for which a court or the board has adjudicated the rights to pump groundwater, a copy of the order or decree adopted by the court or the board and a description of the amount of groundwater the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), has the legal right to pump under the order or decree.

(C) For a basin that has not been adjudicated that is a basin designated as high- or medium-priority pursuant to Section 10722.4, information regarding the following:

(i) Whether the department has identified the basin as being subject to critical conditions of overdraft pursuant to Section 12924.

(ii) If a groundwater sustainability agency has adopted a groundwater sustainability plan or has an approved alternative, a copy of that alternative or plan.

(D) For a basin that has not been adjudicated that is a basin designated as low- or very low priority pursuant to Section 10722.4, information as to whether the department has identified the basin or basins as overdrafted or has projected that the basin will become overdrafted if present management conditions continue, in the most current bulletin of the department that characterizes the condition of the groundwater basin, and a detailed description by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), of the efforts being undertaken in the basin or basins to eliminate the long-term overdraft condition.

(3) A detailed description and analysis of the amount and location of groundwater pumped by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), for the past five years from any groundwater basin from which the proposed project will be supplied. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historic use records.

(4) A detailed description and analysis of the amount and location of groundwater that is projected to be pumped by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), from any basin from which the proposed project will be supplied. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historic use records.

(5) An analysis of the sufficiency of the groundwater from the basin or basins from which the proposed project will be supplied to meet the projected water demand associated with the proposed project. A water supply assessment shall not be required to include the information required by this paragraph if the public water system determines, as part of the review required by paragraph (1), that the sufficiency of groundwater necessary to meet the initial and projected water demand associated with the project was addressed in the description and analysis required by paragraph (4) of subdivision (b) of Section 10631.

As shown in **Figure 3**, the majority of the GSWC Culver City service area overlies the Santa Monica Subbasin of the Los Angeles Basin (DWR Basin No. 4-011.01; referred to as "Santa Monica Subbasin" or "Subbasin"). Small portions of the GWSC Culver City service area also overly the Central and West Coast Subbasins (DWR 4-011.04 and DWR 4-011.03, respectively). However, GSWC's Culver City service area well is located within the Santa Monica Subbasin and GSWC's Culver City system does not pump from the Central and West Coast Subbasins. Therefore, the following discussion on groundwater supply focuses on pumping from the Santa Monica Subbasin.

In 2020, 0.1 AF of groundwater pumped from the Santa Monica Subbasin was used by the GSWC Culver City service area (**Table 5**). However, GSWC does not anticipate using groundwater to meet demands for the Proposed Project or the rest of its GSWC Culver City service area within the 2045 planning horizon (GSWC, 2021; GSWC, 2022a). Per the 2020 UWMP, while the GSWC Culver City service area has not relied upon groundwater to serve its customers over the last few years, GSWC maintains a well and may institute potential service from the Subbasin in the future upon completion of the Santa Monica Groundwater Subbasin GSP and implementing actions. Although groundwater is not currently anticipated to supply the Proposed Project, details regarding the Subbasin pursuant to CWC §10910(f) are provided below given the possibility that groundwater could be utilized in the future.

6.3.1 Basin Description

The following is a description of the groundwater basin from which the Proposed Project could be supplied, if GSWC uses its well in the future. The discussion is based on review of relevant information contained within the GSWC Culver City service area 2020 UWMP and the Santa Monica Groundwater Subbasin GSP (GSWC, 2021; SMBGSA, 2022).

The Santa Monica Subbasin comprises the northwestern part of the Coastal Plain of Los Angeles Groundwater Basin. It is bounded by impermeable rocks of the Santa Monica Mountains on the north and by the Ballona escarpment on the south. The Subbasin extends from the Pacific Ocean on the west to the Inglewood fault on the east. Ballona Creek is the dominant hydrologic feature and drains surface waters to the Pacific Ocean. The Subbasin is bounded to the south by the West Coast Subbasin and to the east by the Hollywood and Central Subbasins.

Holocene age alluvium forms much of the surficial deposits for the central part of the Subbasin and fills the Ballona gap, an erosional channel cutting into and across the Inglewood fault. These deposits include the clay-rich Bellflower aquiclude and underlying gravels of the Ballona aquifer. Late Pleistocene alluvial sediments form much of the elevated plateau areas in the Subbasin and include older dune sands and the Lakewood Formation. The Lakewood Formation includes thin coarse-grained laterally discontinuous units in the Subbasin, not contiguous with the named aquifers of the Lakewood Formation elsewhere in the Los Angeles Basin. In general, groundwater supply wells are not screened within the Lakewood Formation. The Silverado aquifer within the early Pleistocene age San Pedro Formation is the main productive unit in the Subbasin in which the majority of the groundwater production wells in the basin are screened. Water bearing units

below the San Pedro Formation include the Pliocene marine sediments of the Pico Formation, which are not widely produced.

The primary source of recharge to the Silverado aquifer (the primary productive unit within the Subbasin) is mountain front recharge from the Santa Monica Mountains to the north of the Subbasin. The Subbasin is highly urbanized and little recharge occurs via direct infiltration of precipitation in the Subbasin boundaries.

Primary sources of groundwater discharge from the Santa Monica Subbasin include groundwater production wells. Groundwater in the Santa Monica Subbasin moves mainly southward toward the Ballona gap, then flows toward to the ocean. Under normal water level conditions, underflows are expected from the Santa Monica Subbasin to the West Coast Subbasin in the south. Relatively minor amounts of underflows are expected across the eastern boundary with the Hollywood and Central Subbasins or the western boundary with the ocean.

6.3.2 Basin Status

Pursuant to CWC §10910f(2)(C), the Santa Monica Subbasin is not adjudicated and, in its recent evaluation of California groundwater basins, DWR determined that the Santa Monica Subbasin was not in a condition of critical overdraft (DWR, 2022).

The Santa Monica Subbasin is, however, designated as a medium priority basin under DWR's 2019 Phase 2 Basin Prioritization (DWR, 2019). The main factors driving this designation include Population (5 out of 5 possible points), Population Growth (3 out of 5 possible points), and Total Wells (3 out of 5 possible points). Additional factors include Groundwater Reliance (2.5 out of 5 possible points), Public Supply Wells (2 out of 5 possible points), and Impacts (2 out of 5 possible points) (DWR, 2022).

As discussed in the Santa Monica Groundwater Subbasin GSP, a very small portion on the southern coastal edge of the Santa Monica Subbasin overlaps the adjudicated area of the West Coast Subbasin (DWR 4-011.03). GSWC's groundwater well is located outside of this area, and thus the adjudication does not impact potential groundwater use by the GSWC Culver City service area. Additional information on this adjudicated area is provided in the Santa Monica Groundwater Subbasin GSP (SMBGSA, 2022).

6.3.3 SGMA Groundwater Management

In 2014, the California State Legislature enacted the Sustainable Groundwater Management Act (SGMA) with subsequent amendments in 2015. SGMA requires the formation of Groundwater Sustainability Agencies (GSAs) and the development and implementation of GSPs for groundwater basins that are designated by DWR as medium or high priority. As a medium priority, non-critically overdrafted and non-adjudicated basin (see previous discussion), the Subbasin is subject to the requirements of SGMA, including the requirement to be covered by one or more GSAs and to prepare and submit to DWR one or more GSPs by 31 January 2022.

Per the Santa Monica Groundwater Subbasin GSP, the Santa Monica Basin Groundwater Sustainability Agency (SMBGSA) was formed in 2017. The five member agencies of the SMBGSA include the City of Santa Monica, the City of Beverly Hills, the City of Los Angeles (by and through its Department of Water and Power), the City of Culver City, and the County of Los Angeles. The five member agencies signed a Memorandum of Understanding for the formation of the SMBGSA in May 2017.

The Santa Monica Groundwater Subbasin GSP was submitted to DWR in 2022 and approved on 26 October 2023. DWR has recommended Corrective Actions to be addressed in the 2027 five-year GSP update. The GSP and DWR's Determination Letter can be found on the DWR SGMA Portal: https://sgma.water.ca.gov/portal/gsp/preview/129. This GSP and subsequent updates will govern groundwater use within the Subbasin going forward.

6.4 Recycled Water

Recycled water is not currently served to customers within the GSWC Culver City service area and is not expected to supply the Proposed Project. It is noted, however, that wastewater generated within the service area is treated by the City of Los Angeles, and a portion of that treated wastewater is sold to WBMWD for further treatment for recycled water uses throughout the WBMWD service area (GSWC, 2021). Although the GSWC Culver City service area does not directly utilize recycled water, its customers contribute to the regional water supply reliability benefit achieved through WBMWD's distribution of recycled water.

6.5 Total Projected Potable Supply in Normal, Single Dry, and Multiple Dry Years

As discussed above, water purchased from WBMWD constitutes the primary source of supply for the GSWC Culver City service area historically and is expected to be the sole source of supply within the 2045 planning horizon (GSWC, 2021). The WBMWD 2020 UWMP states that it will be able to serve 100% of projected demands in normal, single-dry and multiple-dry years (WBMWD, 2021). Because of this, GSWC expects that under all hydrologic conditions purchased water supplies will fully meet future purchased water demands included in the GSWC 2020 UWMP. Additionally, GSWC has confirmed that it has the ability to purchase additional water from WBMWD to meet the additive demands of the other known developments and the Proposed Project (GSWC, 2025).

Therefore, the available supplies to the GSWC Culver City service area are considered to be equal to GSWC 2020 UWMP demands plus the additive demands of other known developments and the Proposed Project under all conditions (i.e., current and projected, and for normal, single dry, and multiple dry years including a five-year drought period).

The total projected potable supplies for the GSWC Culver City service area for normal, single dry, and multiple dry years are presented in **Table 6**, **Table 7**, and **Table 8**.

Table 6

Projected Normal Year Water Supply and Demand for GSWC Culver City Service Area

6201 Residences, Culver City, California

Water Demand and Supply	Projected Normal Year Supply and Demand (AFY)				
	2025	2030	2035	2040	2045
Water Demand Inclusive of the Proposed Project	5,002	5,430	5,661	5,755	5,856
GSWC Culver City Service Area Normal Year Demand (a)	5,002	5,086	5,175	5,269	5,370
Other Known Developments' Additive Demand (b)	0	167	310	310	310

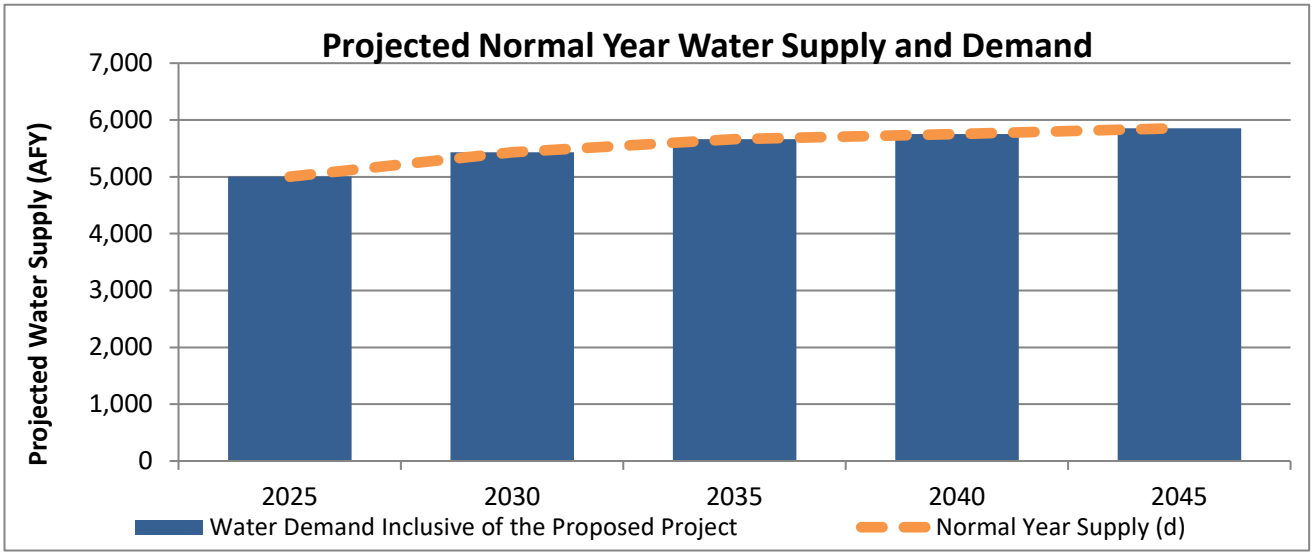
Normal Year Supply (d)	5,002	5,430	5,661	5,755	5,856
Supply Shortfall (% demand)	***None***	***None***	***None***	***None***	***None***



Abbreviations:

"AFY" = acre-feet per year

"GSWC" = Golden State Water Company

"Proposed Project" = 6201 Residences

"UWMP" = Urban Water Management Plan

"WBMWD" = West Basin Municipal Water District

"WSA" = Water Supply Assessment

Notes:

(a) The projected normal year water demands for the GSWC Culver City Service Area are provided per Reference 1.

(b) Additive demands associated with other known developments in the GSWC Culver City Service Area include the demands associated with the 10950 Washington Boulevard Project per Reference 2 and the demands associated with the 5757 Uplander Way Project per Reference 3.

(c) As discussed in Section 5 of this WSA, the demands associated with the Proposed Project's multi-family residential use and corresponding distributional losses are not included within the GSWC Culver City Service Area's 2020 UWMP projections.

(d) Per References 1 and 4, GSWC confirmed ability to purchase water from WBMWD as needed to meet demands. As such, the normal year supplies available to GSWC are equal to the projected demands in the 2020 UWMP plus the additive demands from the Proposed Project, the 5757 Uplander Way Project, and the 10950 Washington Boulevard Project.

Abbreviations:

"AFY" = acre-feet per year

"GSWC" = Golden State Water Company

"Proposed Project" = 6201 Residences

"UWMP" = Urban Water Management Plan

"WBMWD" = West Basin Municipal Water District

"WSA" = Water Supply Assessment

Notes:

(a) While WSA regulations only require an analysis of a three-year drought scenario, UWMP regulations were updated in 2018 to include a five-year drought scenario (California Water Code §10635), Therefore, a five-year drought scenario is presented here.

(b) The projected multiple dry year water demands for the GSWC Culver City Service Area are provided per Reference 1.

(c) Additive demands associated with other known developments in the GSWC Culver City Service Area include the demands associated with the 10950 Washington Boulevard Project per Reference 2 and the demands associated with the 5757 Uplander Way Project per Reference 3.

(d) As discussed in Section 5 of this WSA, the demands associated with the Proposed Project's multi-family residential use and corresponding distributional losses are not included within the GSWC Culver City Service Area's 2020 UWMP projections.

(e) Per References 1 and 4, GSWC confirmed ability to purchase water from WBMWD as needed to meet demands. As such, the normal year supplies available to GSWC are equal to the projected demands in the 2020 UWMP plus the additive demands from the Proposed Project, the 5757 Uplander Way Project, and the 10950 Washington Boulevard Project.

7 COMPARISON OF SUPPLY AND DEMAND

☑ ***CWC § 10910***

(c)(3) If the projected water demand associated with the proposed project was not accounted for in the most recently adopted urban water management plan, or the public water system has no urban water management plan, the water supply assessment for the project shall include a discussion with regard to whether the public water system's total projected water supplies available during normal, single dry, and multiple dry water years during a 20-year projection will meet the projected water demand associated with the proposed project, in addition to the public water system's existing and planned future uses, including agricultural and manufacturing uses.

☑ ***CWC § 10911***

(a) If, as a result of its assessment, the public water system concludes that its water supplies are, or will be, insufficient, the public water system shall provide to the city or county its plans for acquiring additional water supplies, setting forth the measures that are being undertaken to acquire and develop those water supplies. If the city or county, if either is required to comply with this part pursuant to subdivision (b), concludes as a result of its assessment, that water supplies are, or will be, insufficient, the city or county shall include in its water supply assessment its plans for acquiring additional water supplies, setting forth the measures that are being undertaken to acquire and develop those water supplies. Those plans may include, but are not limited to, information concerning all of the following:

(1) The estimated total costs, and the proposed method of financing the costs, associated with acquiring the additional water supplies.

(2) All federal, state, and local permits, approvals, or entitlements that are anticipated to be required in order to acquire and develop the additional water supplies.

(3) Based on the considerations set forth in paragraphs (1) and (2), the estimated timeframes within which the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), expects to be able to acquire additional water supplies.

(c) The city or county may include in any environmental document an evaluation of any information included in that environmental document provided pursuant to subdivision (b). The city or county shall determine, based on the entire record, whether projected water supplies will be sufficient to satisfy the demands of the project, in addition to existing and planned future uses. If the city or county determines that water supplies will not be sufficient, the city or county shall include that determination in its findings for the project.

Pursuant to CWC §10910(c)(3), this WSA includes an estimate of the projected water supplies available to GSWC Culver City service area under normal, single dry, and multiple dry years, based on the 2020 UWMP, and a discussion of whether those supplies will meet the projected demand associated with the Proposed Project as well as the water system's existing and planned future uses. This assessment is parallel to the multiple-dry year supply reliability analysis required for UWMPs under CWC §10635. In 2018, CWC §10635 was revised to require UWMPs to extend this analysis to consider "a drought lasting five consecutive water years." Although the parallel WSA requirement (i.e., CWC §10910(c)(3)) has not been updated to require this for WSAs, a five-year drought scenario is also evaluated herein.

Table 6, **Table 7**, and **Table 8** provide a comparison of the demands and supplies, inclusive of the Proposed Project and other known developments, in normal year, single-dry year, and

multiple-dry year hydrologic scenarios for the GSWC Culver City service area. As discussed above, the available supplies to the GSWC Culver City service area are considered to be equal to GSWC Culver City service area 2020 UWMP demands plus the additive demands of other known developments and the Proposed Project under all conditions (i.e., current and projected, and for normal, single dry, and multiple dry years).

While supply shortfalls are not projected, any shortfalls that could occur in the future would be managed through the implementation of GSWC Culver City service area's WSCP. The overall reduction goals in the WSCP are established for six drought stages ranging from 10% to greater than 50% shortfalls.

During the historic 2013-2017 drought, the GSWC Culver City service area was subject to the State Water Resources Control Board's (SWRCB's) mandatory water reduction target of 16% between June 2015 and May 2016,[4] and met its target through implementation of its WSCP and reducing its water demand 17% relative to its water use in 2013 (SWRCB, 2016). On 8 July 2021, in response to the recent drought conditions, Governor Newsom signed Executive Order (EO) N-10-21 calling Californians to voluntarily reduce water use by 15% compared to 2020 levels. On 28 March 2022, following the driest first three months of a year in the State's recorded history, Governor Newsom signed EO N-7-22 calling on local water suppliers to move to Stage 2 of their WSCP. GSWC enacted Stage 2 of its WSCP for the GSWC Culver City service area on 27 June 2022 and implemented numerous drought response actions, including, but not limited to, outdoor watering day restrictions and drought emergency surcharges for usage in excess of the customer baseline (GSWC, 2021; GSWC, 2022b). As a result of dramatic rainfall in 2023, GSWC moved the GSWC Culver City service area from Stage 2 to Stage 1 effective 14 May 2023 (GSWC, 2023). As a customer within the GSWC Culver City service area, the Proposed Project would be obligated to comply with any demand reduction efforts imposed by GSWC through implementation of the WSCP in any future water shortage conditions. Therefore, the Proposed Project would contribute a proportionate share of the reduction in water demands during dry years or other water shortage conditions.

In 2016, Governor Brown signed EO B-37-16 *Making Water Conservation a California Way of Life* and subsequently SB 606 and AB 1668 were passed. SB 606/AB 1688 set new requirements for urban water agencies to continue to increase water efficiency beyond the 2020 water use targets developed under the Water Conservation Act of 2009 (SB X7-7). Agencies are required to report on their Urban Water Use Objective (UWUO; discussed in more detail below). In addition, SB 606/AB 1668 added new requirements related to drought planning and WSCPs, including requirements for agencies to: (1) conduct a drought risk assessments portion of their future

[4] On 5 May 2015, the SWRCB adopted Resolution 2015-0032 that mandates minimum actions by water suppliers and their customers to conserve water supplies into 2016 and assigned a mandatory water conservation goal to each water supplier based on their residential gallons per capita per day (R-GPCD). The Resolution was adopted pursuant to Executive Order B-29-15 that directed SWRCB to impose mandatory restrictions on urban water suppliers to achieve a statewide 25% reduction in potable urban water usage to address California's severe drought conditions.

UWMPs to assess water supply reliability (or vulnerability) for a period of drought lasting five consecutive water years (CWC §10635(b)), and (2) conduct annual water supply and demand assessments to determine its water supply reliability for the current year and one dry year (CWC §10632(a)). These elements are included in the GSWC Culver City service area 2020 WSCP (i.e., Chapter 6 of the 2020 UWMP).

In July 2024, SWRCB officially adopted the *Making Water Conservation a California Way of Life* regulation to implement SB 606/AB 1668 annual water use objective requirements. As mentioned above, as part of this regulation urban water suppliers are required to calculate and report their UWUO beginning in January 2025 and every year thereafter. The UWUO is an estimate of efficient urban water use based on the adopted urban water use efficiency standards and local service area characteristics. By January 2027, compliance with the UWUO will be enforced. Based on GSWC's most recent UWUO Report submitted to DWR in 2024, GSWC Culver City's actual water use was approximately 28% below GSWC Culver City's estimated UWUO in fiscal year 2024 (DWR 2024a). While GSWC Culver City is currently meeting its UWUO, UWUOs will become incrementally more stringent over time, and achieving UWUOs in the future could potentially require an increase in GSWC Culver City's conservation programming.

Given that: (1) the projections inclusive of the Proposed Project do not identify supply shortfalls under any hydrologic conditions evaluated; (2) GSWC has the ability to implement the WSCP in the case of supply shortages, and demonstrated its effectiveness during recent droughts; and (3) there are many new increased efficiency and drought planning requirements from the State that will drive reduced water use in the City; therefore, sufficient water supply is estimated to be available to GSWC to meet all future demands within the GSWC Culver City service area including those associated with the Proposed Project.

8 CONCLUSIONS

As listed in CWC §10910(c)(4), the primary purpose of this WSA is to evaluate whether sufficient water supply is available to meet all future water demands within the water supplier's service area, including those associated with the Proposed Project, during normal, single, and multiple dry hydrologic years for a 20-year time horizon.

As described in Section 4, the water demand of the Proposed Project (i.e., estimated at 206 AFY at buildout) has been conservatively estimated. As discussed in Section 5, the Proposed Project's commercial and landscaping demands, and associated water distribution losses, are within the projected water demand growth that form the basis of GSWC's demand projections in the adopted GSWC Culver City 2020 UWMP, while the multi-family residential and corresponding distributional loss demands are additive to the 2020 UWMP projections. GSWC has confirmed that it is able to purchase 100% reliable water supply from WBMWD to meet these additive demands of the Proposed Project. In addition, GSWC, due to new requirements by the State, is currently required to continue to increase water efficiency in its service area into the future. GSWC has demonstrated effectiveness in reducing demand during recent water shortage conditions through implementation of its WSCP and would be expected to rely on its WSCP to meet any potential water shortages or regulatory-required cutbacks.

Therefore, this WSA concludes that sufficient water supply is available to GSWC to meet all future demands within the GSWC Culver City service area, including those associated with the Proposed Project.

5757 Uplander Way	--	0	1.5	2.3	2.3	2.3
Proposed Project	--	0	3.0	3.0	3.0	3.0

Abbreviations:

"AFY" = acre-feet per year

"GSWC" = Golden State Water Company

"Proposed Project" = 6201 Residences

"UWMP" = Urban Water Management Plan

Notes:

(a) Values in black indicate cumulative anticipated sector growth (i.e., number of service connections) included in the GSWC - Culver City 2020 UWMP (Reference 1). Values in blue indicate the anticipated incremental growth in service connections between each five-year period included in the 2020 UWMP for each sector. Values in purple and green indicate the number of service connections associated with other known developments in the GSWC Culver City service area from available WSAs (in this case, the Culver Crossings Campus Building 1 Project, 10950 Washington Boulevard Project, and the 5757 Uplander Way Project respectively). Values in orange indicate the incremental growth in service connections associated with the Proposed Project. It should be noted that Proposed Project demands, along with the demands of the other known developments, were converted from acre-feet per year (AFY) to number of service connections for comparison purposes using the conversion factors provided in the 2020 UWMP.

(b) The 10950 Washington Boulevard Project demands are provided per Reference 2.

(c) The number of service connections for the Proposed Project associated with the multi-family residential use (orange) is greater than the anticipated growth indicated in the 2020 UWMP for the multi-family residential sector (blue). Because of this, it can be assumed that these demands are not included in the 2020 UWMP and are, therefore, additive to the demands of the 2020 UWMP.

(d) The Culver Crossings Campus Building 1 Project demands are provided per Reference 3.

(e) The 5757 Uplander Way Project demands are provided per Reference 4.

(f) The number of service connections for the Proposed Project associated with the commercial use (orange) and landscaping use (orange) is less than the anticipated growth indicated in the 2020 UWMP for the commercial and landscaping sector (blue). Because of this, it can be assumed that these demands are included in the 2020 UWMP.
