The California Antidegradation Policy, otherwise known as the *Statement of Policy with Respect to Maintaining High Quality Water in California* was adopted by the SWRCB (State Board Resolution No. 68-16) in 1968. Unlike the Federal Antidegradation Policy, the California Antidegradation Policy applies to all waters of the State, not just surface waters. The policy states that whenever the existing quality of a water body is better than the quality established in individual Basin Plans, such high quality shall be maintained and discharges to that water body shall not unreasonably affect present or anticipated beneficial use of such water resource.

California Toxic Rule

In 2000, the EPA promulgated the California Toxic Rule, which establishes water quality criteria for certain toxic substances to be applied to waters in the State. The EPA promulgated this rule based on the EPA's determination that the numeric criteria are necessary in the State to protect human health and the environment. The California Toxic Rule establishes acute (i.e., short-term) and chronic (i.e., long-term) standards for bodies of water such as inland surface waters and enclosed bays and estuaries that are designated by the LARWQCB as having beneficial uses protective of aquatic life or human health.

Board Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties

As required by the California Water Code, the LARWQCB has adopted a plan entitled "Water Quality Control Plan, Los Angeles Region: Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties" (Basin Plan). Specifically, the Basin Plan designates beneficial uses for surface and groundwaters, sets narrative and numerical objectives that must be attained or maintained to protect the designated beneficial uses and conform to the State's antidegradation policy, and describes implementation programs to protect all waters in the Los Angeles Region. In addition, the Basin Plan incorporates (by reference) all applicable State and Regional Board plans and policies and other pertinent water quality policies and regulations. Those of other agencies are referenced in appropriate sections throughout the Basin Plan.

The Basin Plan is a resource for the RWQCB and others who use water and/or discharge wastewater in the Los Angeles Region. Other agencies and organizations involved in environmental permitting and resource management activities also use the Basin Plan. Finally, the Basin Plan provides valuable information to the public about local water quality issues.

NPDES Permit Program

The NPDES permit program was first established under authority of the CWA to control the discharge of pollutants from any point source into the waters of the United States. As indicated above, in California, the NPDES stormwater permitting program is administered by the SWRCB through its nine RWQCBs.

The General Permit

SWRCB Order No. 2009-0009-DWQ known as "The General Permit" was adopted on September 2, 2009. This NPDES permit establishes a risk-based approach to stormwater control requirements for construction projects by identifying three project risk levels. The main objectives of the General Permit are to:

1. Reduce erosion
2. Minimize or eliminate sediment in stormwater discharges
3. Prevent materials used at a construction site from contacting stormwater
4. Implement a sampling and analysis program
5. Eliminate unauthorized non-stormwater- discharges from construction sites
6. Implement appropriate measures to reduce potential impacts on waterways both during and after construction of projects
7. Establish maintenance commitments on post-construction pollution control measures

California mandates requirements for all construction activities disturbing more than one acre of land to develop and implement Stormwater Pollution Prevention Plans (SWPPP). The SWPPP documents the selection and implementation of Best Management Practices for a specific construction project, charging Owners with stormwater quality management responsibilities. A construction site subject to the General Permit must prepare and implement a SWPPP that meets the requirements of the General Permit.

Los Angeles County Municipal Separate Storm Sewer System (MS4) Permit

As described above, USEPA regulations require that MS4 permittee's implement a program to monitor and control pollutants being discharged to the municipal system from both industrial and commercial projects that contribute a substantial pollutant load to the MS4.

On December 13, 2001, the LARWQCD amended Order No. 01-182 under the CWA and the Porter-Cologne Act. This Order is the NPDES Permit or MS4 permit for municipal stormwater and urban runoff discharges within Los Angeles County. The permit includes Total Maximum Daily Load (TMDL) provisions designed to ensure that permittees achieve waste load allocations (WLAs) and meet other requirements of TMDLs covering receiving waters impacted by the permittees' MS4 discharges. The requirements of this Order (the "Permit") cover 84 cities and most of the unincorporated areas of Los Angeles County. Under the Permit, the Los Angeles County Flood Control District (LACFCD) is designated as the Principal Permittee. The Permittees are the 84 Los Angeles County cities (including the City of Los Angeles) and Los Angeles County. Collectively, these are the "Co-Permittees". The Principal Permittee helps to facilitate activities necessary to comply with the requirements outlined in the Permit but is not responsible for ensuring compliance of any of the Permittees. The MS4 Permit was amended on September 8, 2016, which is now known as Order No. R4-2012-0175-A01. The purpose of this amendment to the LA County MS4 Permit is to revise select permit provisions consistent with the revised Los Angeles River Watershed Trash TMDL and the revised Ballona Creek Watershed Trash TMDL.

These revisions generally include: (a) alternative methods for permittees subject to the revised trash TMDLs to demonstrate full compliance with final trash effluent limitations, (b) revised provisions identifying the permittees subject to the revised trash TMDLs (i.e., removal of the City of Santa Clarita as a responsible permittee and addition of the Los Angeles County Flood Control District as a responsible permittee); (c) plastic pellet monitoring and spill response requirements for the Los Angeles River watershed, consistent with existing provisions for the Ballona Creek watershed; and (d) requirements for receiving water monitoring for trash in the Los Angeles River and Ballona Creek watersheds. This amendment does not modify existing water quality-based effluent limitations for trash or any compliance deadlines for responsible permittees.

Stormwater Quality Management Program (SQMP)

In compliance with the Los Angeles County MS4 Permit, the Co-Permittees are required to implement a stormwater quality management program (SQMP) with the goal of accomplishing the requirements of the Permit and reducing the amount of pollutants in stormwater runoff. The SQMP requires the County of Los Angeles and the 84 incorporated cities to:

- Implement a public information and participation program to conduct outreach on storm water pollution;
- Control discharges at commercial/industrial facilities through tracking, inspecting, and ensuring compliance at facilities that are critical sources of pollutants;
- Implement a development planning program for specified development projects;
- Implement a program to control construction runoff from construction activity at all construction sites within the relevant jurisdictions;
- Implement a public agency activities program to minimize storm water pollution impacts from public agency activities; and
- Implement a program to document, track, and report illicit connections and discharges to the storm drain system.

The MS4 Permit contains the following provisions for implementation of the SQMP by the Co-Permittees:

1. General Requirements:
    - Each permittee is required to implement the SQMP in order to comply with applicable stormwater program requirements.
    - The SQMP shall be implemented and each permittee shall implement additional controls so that discharge of pollutants is reduced.

2. Best Management Practice Implementation:
    - Permittees are required to implement the most effective combination of BMPs for stormwater/urban runoff pollution control. This should result in the reduction of storm water runoff.

3. Revision of the SQMP:
    - Permittees are required to revise the SQMP in order to comply with requirements of the RWQCB while complying with regional watershed requirements and/or waste load allocations for implementation of TMDLs for impaired waterbodies.
4. Designation and Responsibilities of the Principal Permittee:

The Los Angeles County Flood Control District is designated as the Principal Permittee who is responsible for:

- Coordinating activities that comply with requirements outlined in the NPDES Permit;
- Coordinating activities among Permittees;
- Providing personnel and fiscal resources for necessary updates to the SQMP;
- Providing technical support for committees required to implement the SQMP; and
- Implementing the Countywide Monitoring Program required under this Order and assessing the results of the monitoring program.

5. Responsibilities of Co-Permittees:

   Each co-permittee is required to comply with the requirements of the SQMP as applicable to the discharges within its geographical boundaries. These requirements include:

   - Coordinating among internal departments to facilitate the implementation of the SQMP requirements in an efficient way;
   - Participating in coordination with other internal agencies as necessary to successfully implement the requirements of the SQMP; and
   - Preparing an annual Budget Summary of expenditures for the storm water management program by providing an estimated breakdown of expenditures for different areas of concern, including budget projections foil the following year.

6. Watershed Management Committees (WMCs):
   - Each WMC shall be comprised of a voting representative from each Permittee in the Watershed Management Area (WMA).
   - Each WMCs is required to facilitate exchange of information between co-Permittees, establish goals and deadlines for WMAs, prioritize pollution control measures, develop and update adequate information, and recommend appropriate revisions to the SQMP.

7. Legal Authority:
   - Co-permittess are granted the legal authority to prohibit non-storm water discharges to the storm drain system including discharge to the MS4 from various development types.

Standard Urban Stormwater Mitigation Plan (SUSMP)

Under the Los Angeles County Municipal NPDES Permit, permittees are required to implement a development planning program to address storm water pollution. These programs require project applicants for certain types of projects to implement Standard Urban Stormwater Mitigation Plans (SUSMP) throughout the operational life of their projects. The purpose of SUSMP is to reduce the discharge of pollutants in storm water by outlining BMPs which must be incorporated into the design plans of new development and redevelopment. A project is subject to SUSMP if it falls under one of the categories listed below:

1. Single-family hillside homes
2. Ten or more unit homes (including single family homes, multifamily homes,

condominiums, and apartments).
3. Automotive service facilities
4. Restaurants
5. 100,000 or more square-feet of impervious surface in industrial/commercial development.
6. Retail gasoline outlet
7. Parking lots with 5,000 square feet or more of surface area or with 25 or more parking spaces
8. Redevelopment projects in subject categories that meet redevelopment thresholds
9. Location within or directly adjacent to or discharging directly to an environmentally sensitive area if the discharge is likely to impact a sensitive biological species or habitat and the development creates 2,500 square feet or more of impervious surface.

Permittees are required to adopt the requirements set herein in their own SUSMP. Additional BMPs may be required by ordinance or code adopted by the Permittee and applied in a general way to all projects, or on a case-by-case basis.

Low Impact Development (LID)

The County of Los Angeles (County) has prepared the 2014 Low Impact Development Standards Manual (LID Standards Manual) to comply with the requirements of the National Pollutant Discharge Elimination System (NPDES) Municipal Separate Storm Sewer System (MS4) Permit for stormwater and non-stormwater discharges from the MS4 within the coastal watersheds of Los Angeles County (CAS004001, Order No. R4- 2012-0175), henceforth referred to in this document as the 2012 MS4 Permit. The LID Standards Manual provides guidance for the implementation of stormwater quality control measures in new development and redevelopment projects in unincorporated areas of the County with the intention of improving water quality and mitigating potential water quality impacts from stormwater and non-stormwater discharges.

The LID Standards Manual addresses the following objectives and goals:

- Lessen the adverse impacts of stormwater runoff from development and urban runoff on natural drainage systems, receiving waters, and other water bodies;
- Minimize pollutant loadings from impervious surfaces by requiring development projects to incorporate properly-designed, technically-appropriate Best Management Practices (BMPs) and other Low Impact Development (LID) strategies; and
- Minimize erosion and other hydrologic impacts on natural drainage systems by requiring development projects to incorporate properly-designed, technically appropriate hydromodification control development principles and technologies

2.3. Groundwater

Board Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties

As required by the California Water Code, the LARWQCB has adopted a plan entitled “Water Quality Control Plan, Los Angeles Region: Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties” (Basin Plan). Specifically, the Basin Plan designates beneficial uses for surface and groundwaters, sets narrative and numerical objectives that must be attained or maintained to protect the designated beneficial uses and conform to the State's antidegradation policy, and describes implementation programs to protect all waters in the Los Angeles Region. In addition, the Basin Plan incorporates (by reference) all applicable State and Regional Board plans and policies and other pertinent water quality policies and regulations. Those of other agencies are referenced in appropriate sections throughout the Basin Plan.

The Basin Plan is a resource for the Regional Board and others who use water and/or discharge wastewater in the Los Angeles Region. Other agencies and organizations involved in environmental permitting and resource management activities also use the Basin Plan. Finally, the Basin Plan provides valuable information to the public about local water quality issues.

Safe Drinking Water Act (SDWA)

The Federal Safe Drinking Act, established in 1974, sets drinking water standards throughout the country and is administered by the USEPA. The drinking water standards established in the SDWA, as set forth in the Code of Federal Regulations (CFR), are referred to as the National Primary Drinking Water Regulations (Primary Standards, Title 40, CFR Part 141) and the National Secondary Drinking Water Regulations (Second Standards, 40 CFR Part 143). California passed its own Safe Drinking Water Act in 1986 that authorizes the State's Department of Health Services (DHS) to protect the public from contaminants in drinking water by establishing maximum contaminants levels (MCLs), as set forth in the CCR, Title 22, Division 4, Chapter 15, that are at least as stringent as those developed by the USEPA, as required by the federal Safe Drinking Water Act.

California WaterPlan

The California Water Plan (The Plan) provides a framework for water managers, legislators, and the public to consider options and make decisions regarding California's water future. The Plan, which is updated every five years, presents basic data and information on California's water resources including water supply evaluations and assessments of agricultural, urban, and environmental water uses to quantify the gap between water supplies and uses. The Plan also identifies and evaluates existing and proposed statewide demand management and water supply augmentation programs and projects to address the State's water needs.
The goal for the California Water Plan Update is to meet Water Code requirements, receive broad support among those participating in California's water planning, and be a useful document for the public, water planners throughout the state, legislators and other decision-makers.

3.0 Surface Water Hydrology

3.1 General Approach

California Environmental Quality Act (CEQA) thresholds state that surface water impacts may occur when a project results in either increased on- or off-site storm water flows, changes in absorption rates, alterations to existing surface water flow patterns or directions (including the intake and use of water from a surface water body), or other factors which result in a changed rate of flow. Surface waters include lakes, rivers, streams, reservoirs, the ocean, and similar water bodies. Flood hazard is defined as flooding which occurs during a storm event, particularly the 50-year developed storm event.

The Project site is located within Los Angeles County Flood Control District (LACFD) jurisdiction. Therefore, Culver City has adopted the County Department of Public Works (LACDPW) Hydrology Manual as its basis of design for storm drainage facilities. The LACDPW Hydrology Manual requires projects to have drainage facilities that meet the Urban Flood level of protection. The Urban Flood is runoff from a 25-year frequency design storm falling on a saturated watershed. A 25-year frequency design storm has a probability of 1/25 of being equaled or exceeded in any year. The County's CEQA Threshold Guide, however, establishes the 50-year frequency design storm event as the threshold to analyze potential impacts on surface water hydrology as a result of development. To provide a more conservative analysis, this report analyzed the larger storm event threshold, the 50-year frequency design storm event.

The Modified Rational Method was used to calculate storm water runoff. The "peak" (maximum value) runoff for a drainage area is calculated using the formula, **Q=CIA**

Where,

Q = Volumetric flow rate (cfs)

C = Runoff coefficient (dimensionless)

I = Rainfall Intensity at a given point in time (in/hr)

A = Basin area (acres)

The Modified Rational Method assumes that a steady, uniform rainfall rate will produce maximum runoff when all parts of the basin area are contributing to outflow. This occurs when the storm event lasts longer than the time of concentration. The time of concentration (Tc) is the time it takes for rain in the most hydrologically remote part of the basin area to reach the outlet.

The method assumes that the runoff coefficient (C) remains constant during a storm. The runoff coefficient is a function of both the soil characteristics and the percentage of impervious surfaces in the drainage area.

LACDPW developed a time of concentration calculator, Tc Calculator (TC_calc_depth.xls, July 2006), to automate time of concentration calculations as well as the peak runoff rates and volumes using the Modified Rational Method design criteria as outlined in the Hydrology Manual. In subsequent years the County developed a new program called Hydrocalc which performs the same functions as the Tc Calculator and is used to meet the needs of modern computer systems. The data input requirements include: sub-area size, soil type, land use, flow path length, flow path slope and rainfall isohyet. The LACDPW has produced Isohyetal maps that provide the Project Site's soil type and the rainfall isohyet value based on the location of the project. Once all values were known, Hydrocalc was used to calculate the storm water peak runoff flow rate for the Existing and Proposed Project conditions by evaluating an individual sub-area independent of all adjacent subareas. See Table 1 for the Hydrocalc Peak Runoff Flow results. Results for the 10-, 25-, and 50-year events were all included for information.

3.2 Data Sources

The primary sources of data are the *LACDPW Hydrology / Sedimentation Manual and Appendices* (LACDPW 2006), and the Los Angeles County *Standard Urban Stormwater Mitigation Plan* (September 2002).

Rainfall and soil characteristics for the Project Site are given in Isohyet Map Figure LACDPW 1-HI.18 (Section 4). A copy of the map is provided in Section 7.0. The 50-year (24-hour) rainfall isohyet nearest the Project area is approximately 5.25-inches. The isohyets for all the storm events, based on factors from the LA County Hydrology Manual in Table 5.3.1, are as listed:

- 85th Percentile Storm: 1.12-inches
- 5-Year 24-Hour: 3.07-inches
- 10-Year 24-Hour: 3.75-inches
- 25-Year 24-Hour: 4.61-inches
- 50-Year 24-Hour: 5.25-inches

As shown on the Isohyet Map, the soil classification of the Project Site falls predominantly into Soil Type 013. From County of Los Angeles isohyet mapping, the 85th percentile storm for the project site is at 1.12-inch, which is larger than the ¾” rain event of 0.75-inches. Therefore, the 85th percentile storm will be used throughout the report as it relates to reviewing the project’s Low Impact Development rain event to be mitigated. The Project Site area to be disturbed in connection with construction of the Project is approximately 4.49 acres in total.

3.3 Existing Site Conditions

The existing Project Site is currently improved with an office building, at grade parking lot and a parking structure. The Project Site totals approximately 4.49 acres and an imperviousness of 68%.

Based on an analysis of the site survey, in the existing condition there are 3 drainage areas. First, “Area 1A”, roughly 1 acre or 22% of the site, surface drains to the northwest corner of the site where it is collected in storm drain inlets. From there, the stormwater is conveyed to a Culver City owned, 24” public storm drain line that runs east to west within an easement on the north end of the project site.

Second, the stormwater from “Area 1B”, roughly 2.5 acres or 57% of the site, is collected via an onsite storm drain system, which conveys the water south before presumably connecting to the back of an existing side opening catch basin in Buckingham Parkway. From there, the water is conveyed to the Culver City owned 48” public storm drain line running northeast to southwest.

Lastly, the stormwater from “Area 2B”, roughly 0.9 acres or 21% of the site, surface flows directly to Buckingham Parkway and makes it way to the side opening catch basin mentioned above for Area 1B. Note a small sliver along the east side of the project enters the adjacent property’s storm drainage system.

3.4 Proposed Project Site Conditions

The proposed Project will consist of a mixed-use building including 4,742 square feet of commercial space, 351 rental units and 524 parking spaces on a 4.49-acre site. The average imperviousness of the Project Site will increase slightly to approximately 77% once all Project improvements, landscaping, and amenities are installed. However, any increase in runoff will be mitigated by the proposed on-site storm drain system.

As of the date of this report, on-site infiltration via drywells has been selected as the LID treatment system for the site. Feasibility of infiltration largely depends on whether the on-site soils have an adequate infiltration rate as determined by a percolation test performed by a licensed

Geotechnical engineer. If infiltration is determined to be infeasible, the project will consider biofiltration such as a Modular Wetland system as an alternative method of LID treatment.

Storm water from a portion of the north side of the project site ("Proposed Area 1A" – 0.73 acres) will be collected via roof drains and inlets and be routed to the proposed LID treatment system. Excess, overflow water will continue to drain to the 24" Culver City owned storm drain running east to west in an easement just south of the Slauson Avenue Right of Way.

The rest of the site ("proposed Area 1B" – 3.70 acres) will be collected via roof drains and inlets and conveyed to the southeast corner of the site as in the existing condition. This stormwater will be routed through the proposed LID treatment system consisting of storage tanks and drywells. Excess, overflow water will be routed to the existing Culver City owned public storm drain system in Buckingham Parkway through a connection to the back of the existing side opening catch basin.

Therefore, the proposed site will maintain the existing drainage patterns for the site and as described below, the Project's compliance with regional Low Impact Development (LID) requirements will create reductions in the stormwater flows to the public stormwater system.

3.5 Hydrology Results

Tables 1 below summarizes the hydrology results demonstrating the peak stormwater runoff flows for the 85th, 10-yr, 25-yr, and 50-yr storm events under existing conditions and following construction of the Project:

Table 1: Existing and Proposed Peak Runoff Flows By Individual SubArea

Sub-Area ID	Area [Ac]	% Impervious	Flowpatth Length [ft]	Flowpath Slope		Q_{50yr} [cfs]	Q_{25yr} [cfs]	Q_{10yr} [cfs]		Q_{85th} [cfs]	V_{85th} [ft^3]
1A Existing	0.98	86%	270	1%		2.76	2.22	1.79			
1B Existing	2.53	76%	750	3%		5.71	4.67	3.51			
2B Existing	0.92	24%	200	10%		2.59	2.28	1.78			
				Total	=	**11.06**	**9.17**	**7.08**			
1A Proposed	0.73	60%	400	2%		1.89	1.65	1.2		0.14	1,707
1B Proposed	3.70	80%	750	4%		8.35	7.26	5.17		0.86	11,040
				Total	=	**10.24**	**8.91**	**6.37**	=	**1.00**	**12,747**

Table 1 above demonstrates that for all storm events, the peak stormwater runoff for the site overall will be reduced after construction. Additionally, the proposed LID treatment system, which at a minimum will retain the required stormwater quality design volume (SWQDv) onsite, will further reduce the peak stormwater runoff.

4.0 Surface Water Quality

4.1 General Approach

Construction Best Management Practices (BMP's) will be designed and maintained as part of the implementation of the SWPPP in compliance with the General Permit. The SWPPP shall begin when construction commences, before any site clearing and grubbing of demolition activity. During construction, the SWPPP will be referred to regulatory standards, and amended as changes occur throughout the construction process. The Notice of Intent (NOI), Amendments to the SWPPP, Annual Reports, Rain Event Action Plans (REAPs), and Non-Compliance Reporting will be posted to the State's SMARTS website in compliance with the requirements of the General Permit.

The Project falls under the jurisdiction of the Los Angeles County Department of Public Works, which follows the 2009 Low Impact Development (LID) Manual design guidelines. The purpose of this surface water quality report is:

- To document that the Los Angeles County LID requirements will be met.
- To determine the proposed development's impact on existing hydrologic conditions.
- To identify the pollutants of concern and provide BMPs that will mitigate those pollutants of concern.
- To provide sufficient detailed information to support detailed hydraulic design of stormwater treatment systems.

The LID requirements, approved by the Regional Water Quality Control Board, call for the treatment of the peak mitigation flow rate or volume of runoff produced either by a 0.75" 24-hr rainfall event or the 85^{th} percentile rainfall event, whichever is greater. Under section 3.1.2 of the LID Manual, this post-construction stormwater runoff from the new development shall be infiltrated, evapotranspirated, captured and used, and/or treated through high efficiency BMP's onsite. The rainfall intensity of the 85^{th} percentile rainfall for the Project Site's location is 1.12 inches; therefore, the 85^{th} percentile rainfall event governs.

4.2 Site Characterization for Water Quality Review

Current Property Use: 3-story office building, surface level parking lot, and a parking garage.

Proposed Property Use: 5-to-7 story mixed-use building including 4,742 square feet of commercial space, 351 rental units and a 524-space parking garage.

Soils: The soil of this Project Site is classified as predominantly Type 013 as shown in the Hydrology Map from the Los Angeles County Department of Public Works (LACDPW) website as well as the LACDPW Isohyet Map 1-H1.17 (see appendix).

Receiving Waters: The Project Site is tributary to Ballona Creek.

Ballona Creek is listed on the 2012 CWA Section 303(d) list (approved by SWRCB June 30, 2015) as impaired due to the prevalence of the pollutants shown in Table 2, which is excerpted from the State Water Resources Control Board, "Quality Limited Segments" article dated June 9, 2016. Currently, this waterway's existing beneficial uses include ground water recharge, warm freshwater habitat, water contact recreation, and non-contact water recreation; potential uses include municipal and domestic supply, industrial service supply, and wildlife habitat.

Table 2: Receiving Waters for Urban Runoff from Site[1]

Receiving Waters	303(d) List Impairments[2]	Designated Beneficial Uses	Proximity to RARE Uses
Ballona Creek	Copper, Cyanide, Indicator Bacteria, Lead, Toxicity, Trash, Viruses, Zinc	Existing/Intermittent: WILD, REC2 Potential: MUN, WARM, REC1	No

4.3 Pollutants of Concern

Table 3 lists the pollutants anticipated to be generated by the Project's proposed land uses. The Project falls under the category residential and commercial development. Therefore, the following pollutants could potentially be generated: sediment/turbidity, nutrients, organic compounds, trash and debris, oxygen demanding substances, bacteria and viruses, oil and grease, and pesticides.

Table 3: Potential Pollutants Generated by Land Use Type[3]

Type of Development (Land Use)	Sediment /Turbidity	Nutrients	Organic Compounds	Trash & Debris	Oxygen Demanding Substances	Bacteria & Viruses	Oil & Grease	Pesticides	Metals
Commercial Development	P(1)	P(1)	P(4)	P	P(4)	P(3)	P	P(1)	N
Residential	P	P	N	P	P(1)	P	P(2)	P	N

Abbreviations: P=Potential N=Not expected

Notes:

(1) A potential pollutant if landscaping or open area exists on the Project site
(2) A potential pollutant if land use involves animal waste
(3) Specifically, petroleum hydrocarbons
(4) Specifically, solvents
(5) Bacterial indicators are routinely detected in pavement runoff.

A comparison of the pollutants existing in Ballona Creek based on the State 303(d) list and pollutants associated with the planned land use activities on the Project Site show an overlap of **trash & debris and bacteria & viruses** as pollutants. These common pollutants are considered the pollutants of concern. Stormwater best management practices (BMP) implemented for the Project in conformance with applicable regulatory requirements will be designed to address these pollutants of concern. Table 4 summarizes the efficiency of general categories of BMPs in treating different types of pollutants.

The Los Angeles County Department of Public Works requires LID compliance for all new development projects. The current LID mitigation concept for this Project is infiltration along with

3 Riverside County Flood Control and Conservation District, Riverside County Water Quality Management Plan for Urban Runoff, July 24, 2006. Note: This source is utilized because the Los Angeles County Flood Control District has not established a table that outlines pollutants of concern; however, the Riverside County plan accurately represents pollutant types typically occurring in Los Angeles County.

water quality inlets throughout the site. If infiltration is not deemed feasible, biofiltration will be selected as the LID treatment system such as a Modular Wetland device and will also incorporate water quality inlets.

Table 4 summarizes treatment control levels for each Low Impact Development strategy selected. Items highlighted with grey coloring indicate the previously mentioned pollutants of concern for the Los Angeles River. This indicates that infiltration provides high to medium levels of efficiency to remove sediments and turbidity, an unknown level of treatment for trash, and high to medium levels of efficiency for bacteria and viruses. Because infiltration provides a low level of treatment for trash removal, an additional level of stormwater management will be required for this project in the application of upstream water quality inlets. As per Table 4, water quality inlets provide a medium level of efficiency for trash removal.

Table 4: Treatment Control BMP Selection Matrix[4]

Note: This table is utilized because the Los Angeles County Flood Control District has not established a table that summarizes each BMP's efficiency for treating pollutants of concern.

Abbreviations:	
L: Low removal efficiency	H/M: High or medium removal efficiency U: Unknown removal efficiency

4.4 Best Management Practices

Source and Treatment Control Best Management Practices (BMPs) are required for this Project under the LA County Standard Urban Stormwater Mitigation Plan (SUSMP) and Los Angeles County Department of Public Works Low Impact Development (LID) Standards Manual.

4.4.1 Site Design BMPs

4.4.1.1 Minimize Stormwater Pollutants of Concern

The Project will minimize pollutants of concern from impacting surface water quality by maximizing the reduction of pollutant loadings to the Maximum Extent Practicable.

4.4.1.2 Conserve Natural Areas

The existing Project Site consists of a 3-story office building, surface level parking lot, and a parking garage. Following development of the Project, the Project Site will include landscaped open areas, and as discussed above, will provide water quality treatment to meet the LID requirements of the Los Angeles County Department of Public Works.

4.4.2 Source Control BMPs

4.4.2.1 Protect Slopes and Channels

There are no unprotected slopes or unlined channels onsite. The entire area to be developed will be either vegetated or hardscaped.

4.4.2.2 Provide Storm Drain System Stenciling and Signage

Stenciling will be provided for public storm drains near the vicinity of the Project.

4.4.3 Treatment Control BMPs

4.4.3.1 Mitigation Design (Volumetric or Flow based)

The LID calculation methodology was used to calculate the required treatment volumes for each of the discharge points from the Project Site. Volume-based criteria are used in the sizing of the cisterns and drywells. Table 5 below summarizes the required treatment and treatment provided for the proposed project site with the use of Infiltration via drywells. If infiltration is deemed infeasible, flow-based criteria will be used in sizing of the biofiltration system.

Table 5: Summary SUSMP / LID Mitigation BMPs

Area	Area [ac]	% Impervious	Required Storage Volume SWQDv [ft^3]	BMP Type	Provided Treatment SWQDv [ft^3]	% Treated	Impervious Area Untreated [ac]
1A	0.73	60%	1,707	Infiltration via Drywell	1,750	100%	0
1B	3.70	80%	11,040	Infiltration via Drywell	12,800	100%	0
Total Percent Treatment						**100%**	

Full treatment of the 85th percentile storm event will be provided by the proposed BMPs.

4.4.4 Conclusions

The proposed BMPs located in the design phase will provide full treatment of the 85th percentile storm event as described above. Therefore, the Project poses no significant impact to the region's stormwater quality. Additionally, Table 1 demonstrates that the peak flow leaving the site will be decreased in the proposed conditions for all storm events (with additional decreases from the onsite LID storage). Therefore, this demonstrates that the Project poses no significant impact to the region's existing stormwater conveyance system.

5.0 Significance Thresholds

The County of Los Angeles uses Appendix G of the CEQA Guidelines to determine the significance of a project's impact on hydrology and water quality. These are defined in Section 13050 of the California Water Code (CWC). Pollution, contamination, or nuisance may occur if regulatory standards are violated, as defined in the applicable NPDES stormwater permit or Water Quality Control Plan for the receiving water body. The CWC includes the following definitions:

"Pollution" means an alteration of the quality of waters of the state to a degree which unreasonably affects either the following: 1) the waters for beneficial uses or 2) facilities which serve these beneficial uses. "Pollution" may include "Contamination".

"Contamination" means an impairment of the quality of the waters of the state by waste to a degree, which creates a hazard to the public health through poisoning or through the spread of disease. "Contamination" includes any equivalent effect resulting from the disposal of waste, whether or not waters of the state are affected.

"Nuisance" means anything which meets all of the following requirements: 1) is injurious to health, or is indecent or offensive to the senses, or an obstruction to the free use of property, so as to interfere with the comfortable enjoyment of life or property; 2) affects at the same time an entire community or neighborhood, or any considerable number of persons, although the extend of the annoyance or damage inflicted upon individuals may be unequal; and 3) occurs during, or as a result of the treatment or disposal of wastes.

5.1 Surface Water Hydrology

With respect to hydrology, the CEQA Guidelines (Appendix G) inquire whether the Project would:

a) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?
b) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

    i) result in substantial erosion or siltation on- or off-site?
    ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?
    iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?
    iv) impede or redirect flood flows?

5.2 Surface Water Quality

With respect to water quality, the CEQA Guidelines (Appendix G) inquire whether the Project would:

a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

b) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

c) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

6.0 Project Impact Analysis

6.1 Hydrology Impact Analysis

Would the project:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	☐	☐	☒	☐
b. Substantially alter the existing drainage pattern of the site or area including through the alteration of the course of a stream or river, in a manner which would:	☐	☐	☒	☐
i. Result in substantial erosion or siltation on or off-site.	☐	☐	☒	☐
ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on or off-site.	☐	☐	☒	☐
iii. Create or combine runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted.	☐	☐	☒	☐
iv. Impede or redirect flood flows.	☐	☐	☒	☐

a. Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Less Than Significant Impact. As discussed above, the Project involves the development of a mixed-use building including 4,742 square feet of commercial space, 351 rental units and 524 parking spaces. If groundwater is encountered during construction, temporary pumps and filtration would be utilized in compliance with all applicable regulations and requirements, including all relevant NPDES requirements related to construction and discharges from dewatering operations. NPDES requires dischargers must demonstrate that discharges do not violate any water quality objective/criteria for the receiving waters, demonstrate that discharge shall not exceed effluent limitations, perform an analysis using a sample of groundwater or wastewater to be discharged, show discharge shall not cause acute nor chronic toxicity in receiving waters, that discharge shall pass through a treatment system if necessary, and must comply with the provisions of the NPDES permit. Therefore, through compliance with regulatory requirements, potential impacts would be less than significant.

Regarding groundwater recharge, the Project Site is currently mostly impervious with approximately 68-percent impervious surfaces, the average imperviousness of the Project Site will increase slightly to approximately 77-percent once all Project improvements, landscaping, and amenities are installed. As such, the Project would not interfere substantially with groundwater recharge such that the Project may impede sustainable groundwater management of the basin.

Therefore, the Project's potential impact on groundwater supplies and groundwater recharge would be less than significant, and no mitigation measures are required.

b. Would the project substantially alter the existing drainage pattern of the site or area including through the alteration of the course of a stream or river, in a manner which would:

i. result in substantial erosion or siltation on or off-site.

Less Than Significant Impact. Construction activities have the potential to temporarily alter existing drainage patterns and flows on the Project Site by exposing the underlying soils, modifying flow direction, and making the Project Site temporarily more permeable. Also, exposed and stockpiled soils could be subject to erosion and conveyance into nearby storm drains during storm events. In addition, on-site watering activities to reduce airborne dust could contribute to pollutant loading in runoff. However, as discussed above, the Project construction activities would occur in accordance with City grading permit regulations, such as the preparation of an erosion control plan. Therefore, construction activities for the Project would not substantially alter the Project Site drainage patterns in a manner that would result in substantial erosion or siltation on- or off-site. As such, construction-related impacts to hydrology would be less than significant, and no mitigation measures are required.

The Project Site is comprised of approximately 68-percent impervious surfaces under existing conditions. With the implementation of the Project, there will be a minimal increase in the amount of impervious area. As such, there would be a limited potential for erosion or siltation to occur from exposed soils or large expanses of pervious areas. Therefore, the Project would not substantially alter the existing drainage pattern of the Project Site or surrounding area such that substantial erosion or siltation on-site or off-site would occur. Operational impacts to hydrology would be less than significant, and no mitigation measures are required. Impacts are not likely to occur, because as the Regional Water Quality Control Board (RWQCB) dictates, the Project must provide a Low Impact Development (LID) system which will capture and use all the rainwater from the 85th percentile storm. As Table 1 demonstrates, a decrease in runoff is expected due to the development. Therefore, no impact is expected.

ii. substantially increase the rate or amount of surface runoff in a manner which would result in flooding on or off-site.

Less Than Significant Impact. There are no streams or rivers within or immediately surrounding the Project Site. Construction activities for the Project would involve removal of the existing structures and associated hardscape as well as the excavation and removal of soil. These activities have the potential to temporarily alter existing drainage patterns on the Project Site by exposing the underlying soils, modifying flow direction, and making the Project Site temporarily more permeable. Project Construction activities would occur in accordance with City grading permit regulations, such as the preparation of an erosion control plan, to reduce the effects of sedimentation and erosion. Thus, through compliance with applicable City grading permit regulations, construction activities for the Project would not substantially alter the Project Site drainage patterns in a manner that would result in flooding on- or off-site. As such, construction-related impacts to hydrology would be less than significant, and no mitigation measures are required.

As previously discussed, under the county's LID Ordinance, post-construction stormwater runoff from new projects must be infiltrated, evapotranspirated, captured and used, and/or treated through high efficiency BMPs on-site for the volume of water produced by the greater of the 85th percentile storm event or the 0.75-inch storm event (i.e., "first flush"). Consistent with LID requirements to reduce the quantity and improve the quality of rainfall runoff that leaves the Project Site, the Project would include the installation of BMP systems that would be designed with an internal bypass overflow system to prevent upstream flooding during major storm events. Therefore, while the Project would minimally increase impervious surfaces compared to existing conditions, with the implementation of BMPs, the Project would not increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site. Additionally, as Table 1 demonstrates, a decrease in runoff is expected due to the development. Operational impacts to hydrology would be less than significant, and no mitigation measures are required.

iii. create or combine runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted.

Less Than Significant Impact. The Project site currently consists of a 3-story office building, surface level parking lot, and a parking garage. The Project Site is 68-percent impervious and is not crossed by any water courses or rivers. Furthermore, based on the volumetric flow rate analysis, a comparison of the pre- and post-Project peak flow rate indicated that there would be a decrease in stormwater runoff. In addition, the implementation of BMPs required by the City's LID Ordinance would target runoff pollutants that could potentially be carried in stormwater runoff due to the collection of water to meet the regional LID guidelines. Therefore, the Project would not create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff. Impacts would be less than significant, and no mitigation measures are required.

iv. impede or redirect flood flows?

Less Than Significant Impact. The Project Site Is located entirely inside the 500 Yr. Flood Zone, otherwise known as Zone X, in the Flood Insurance Rate Maps from the Federal Emergency Management Agency (FEMA). The 500 Yr. Flood Zone refers to an area with a 0.2% (or 1 in 500 chance) annual chance of flooding. This zone is also used to designate base floodplains of lesser hazards, such as areas protected by levees from 100-year flood, or shallow flooding areas with average depths of less than one foot or drainage areas less than 1 square mile. In addition to the low risk of flooding, the Project would implement a stormwater detention pipe and dry well infiltration BMP system. Thus, the Project would not alter the existing drainage pattern of the Project Site in a manner that would impede or redirect flood flows. Additionally, as Table 1 demonstrates, a decrease in runoff is expected due to the development. As such, no impacts would occur.

Surface Water Hydrology During Construction

During construction of the project, a SWPPP written by a Qualified SWPPP Developer will be prepared to implement temporary control measures throughout the construction phase. The SWPPP is designed to comply with California's General Permit for Stormwater Discharges Associated with Construction and Land Disturbance Activities (General Permit) Order No. 2009-0009-DWQ as amended in 2010 and 2012 (NPDES No. CAS000002) issued by the State Water Resources Control Board (State Water Board). In accordance with the General Permit, Section XIV, the SWPPP is designed to address the following:

- Sources of sediment associated with construction, construction site erosion and other activities associated with construction activity are controlled.
- Where not otherwise required to be under a Regional Water Quality Control Board (Regional Water Board) permit, all non-stormwater discharges are identified and either eliminated, controlled, or treated.

Surface Water Hydrology During Operation

Per Los Angeles Guidelines, required Permit Registration Documents (PRDs) shall be submitted to the State Water Board via the Stormwater Multi Application and Report Tracking System (SMARTS) by the Legally Responsible Person (LRP), or authorized personnel (i.e., Approved Signatory) under the direction of the LRP. The project-specific PRDs include:

1. Notice of Intent (NOI);
2. Risk Assessment (Construction Site Sediment and Receiving Water Risk Determination);
3. Site Map;
4. Annual Fee;
5. Signed Certification Statement (LRP Certification is provided electronically with SMARTS PRD submittal); and
6. SWPPP.
    a. Post-construction water balance calculation;
    b. Active Treatment System (ATS) plan; and
    c. Dischargers proposing an alternate soil erodibility factor must submit justification (documentation of methods used [e.g. soil particle size analysis].

With compliance with the above regulatory requirements, the Project will have less than significant impact on the surface water hydrology. Specifically, based on the above, the Project would not result in an incremental impact for flooding on either on-site or off-site areas during a 50-year storm event, it would not substantially increase the amount of surface water in a water body, and it will not result in a permanent adverse change to the movement of surface water that would result in an incremental effect on the capacity of the existing storm drain system. As demonstrated in Section 3.5, the Project would also not require significant new stormwater infrastructure since there will be a reduction in stormwater flows due to the Project's required LID reductions. Therefore, the development of the Project would result in less than significant impact on surface water hydrology.

6.2 Water Quality Impact Analysis

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
c. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	☐	☐	☒	☐
d. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	☐	☐	☒	☐
e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	☐	☐	☒	☐

c. Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Less Than Significant Impact. As discussed in the following analysis found within section 6.2e., the Project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface of groundwater quality.

d. In flood hazard, tsunami, or seiche zones, would the project risk release of pollutants due to project inundation?

Less Than Significant Impact. The Project is located too far away from the ocean and is at too high of an elevation for it to be affected by a tsunami. Seiches, which is a temporary disturbance in the water levels of lakes or partially enclosed bodies of water, will not affect the Project as it is not close enough to a large body of water to be affected.

As previously described, the Project Site is located inside Zone X in the Flood Insurance Rate Maps from the Federal Emergency Management Agency (FEMA). In addition to the low risk of flooding, the Project includes a infiltration drywell system and a stormwater conveyance system, which would improve upon the existing site devoid of treatment and on-site detention. Therefore, the Project would not risk release of pollutants due to inundation by flood hazards.

For the reasons addressed above, the Project Site would have a less than significant impact on the potential release of pollutants due to potential inundation. And the Project Site would not have a risk of release of pollutants as a result of tsunami or seiche.

e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Less Than Significant Impact. Under Section 303(d) of the Clean Water Act, states are required to identify water bodies that do not meet their water quality standards. Biennially, the Los Angeles Regional Water Quality Control Board (LARWQCB) prepares a list of impaired waterbodies in the region, referred to as the 3030(d) list. The 303(d) list are subject to the development of a Total Maximum Daily Load (TMDL). As discussed in this report, the Project Site is located within the Ballona Creek watershed. Constituents of concern listed for Ballona Creek under California's Clean Water Act Section 303(d) List include Copper, Trash, Cyanide (Toxic Organics), Zinc, Lead, Viruses (enteric), Toxicity, and Indicator Bacteria.

As described above, based on observation of existing conditions, stormwater currently discharges from the Project Site without treatment or on-site detention. Thus, the Project's implementation of stormwater dry well infiltration BMP system would minimize the release of anticipated and potential pollutants generated by the Project. As the project would increase the amount of impervious area minimally, implementation of the LID BMP measures on the Project Site would result in an improvement in surface water quality runoff when compared to existing conditions. In addition, during construction operations, the project site is required by the State Water Resources Control Board (SWRCB) to implement stormwater management Best Management Practices (BMPs) as required in the project's Stormwater Pollution Prevention Program (SWPPP) following the latest guidelines of the California Stormwater Quality Association (CASQA) handbook. These BMPs will ensure that stormwater runoff quality during construction is maintained.

As such, the Project would not conflict with or obstruct any water quality control plans. With compliance with existing regulatory requirements and implementation of LID BMPs, the Project would not conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. Impacts would be less than significant.

Surface Water Quality During Construction

During Project construction, particularly during the grading phase, stormwater runoff from precipitation events could cause exposed and stockpiled soils to be subject to erosion and convey sediments into municipal storm drain systems. In addition, on-site watering activities to reduce airborne dust could contribute to pollutant loading in runoff. Pollutant discharges relating to the storage, handling, use and disposal of chemicals, adhesives, coatings, lubricants, and fuel could also occur. As Project construction would disturb more than one acre of soil, the Project would be required to obtain coverage under the National Pollutant Discharge Elimination System (NPDES) Construction General Permit. The Project would be required to implement Best Management Practices (BMPs) and develop a SWPPP as part of the City's grading permit requirements. BMPs would include, but would not necessarily be limited to, erosion control, sediment control, non-stormwater management, and materials management BMPs (e.g., sandbags, storm drain inlets protection, stabilized construction entrance/exit, wind erosion control, and stockpile management) to minimize the discharge of pollutants in stormwater runoff during construction. In addition, Project construction activities would occur in accordance with City grading permit regulations such as the preparation of an Erosion Control Plan, to reduce the effects of sediment and erosion.

As discussed above, construction activities for the Project involves the development of a new 5- to 7-story mixed-use building and parking garage. If groundwater is encountered during construction, temporary pumps and filtration would be utilized in compliance with all applicable regulations and requirements, including all relevant NPDES requirements related to construction and discharges from dewatering operations. NPDES requires dischargers must demonstrate that discharges do not violate any water quality objective/criteria for the receiving waters, demonstrate that discharge shall not exceed effluent limitations, perform an analysis using a sample of groundwater or wastewater to be discharged, show discharge shall not cause acute nor chronic toxicity in receiving waters, that discharge shall pass through a treatment system if necessary, and must comply with the provisions of the NPDES permit. Therefore, through compliance with regulatory requirements, potential impacts would be less than significant.

Dewatering operations are practices that discharge non-stormwater, such as groundwater, that must be removed from a work location and discharged into the storm drain system to proceed with construction. Discharges from dewatering operations can contain high levels of fine sediments, which, if not properly treated, could lead to exceedance of the NPDES requirements. If groundwater is encountered during construction, temporary pumps and filtration would be utilized in compliance with all relevant NPDES requirements related to construction and discharges from dewatering operations. Furthermore, if dewatering is required, the treatment and disposal of the dewatered water would occur in accordance with the Los Angeles Regional Water Quality Control Board (LARWQCB) Waste Discharge Requirements for Discharges of Groundwater from Construction and Project Dewatering to Surface Waters.

With the implementation of site-specific BMPs included as part of the Erosion Control Plan required to comply with the City grading permit regulations, the Project would significantly reduce or eliminate the discharge of potential pollutants from the stormwater runoff. Therefore, with compliance with NPDES requirements and City grading regulations, construction of the Project would not violate any water quality standard or waste discharge requirements or otherwise substantially degrade surface water quality. Furthermore, construction of the Project would not result in discharges that would cause regulatory standards to be violated. Thus, temporary construction-related impacts on surface water quality would be less than significant, and no mitigation measures are required.

Surface Water Quality During Operation

Under the City's Low Impact Development (LID) Ordinance, post-construction stormwater runoff from new projects must be infiltrated, evapotranspirated, captured and used, and/or treated through high efficiency BMPs on-site for the volume of water produced by the greater of the 85th percentile storm event or the 0.75-inch storm event (i.e., "first flush"). Consistent with LID requirements to reduce the quantity and improve the quality of rainfall runoff that leaves the Project Site, the Project would include the installation of infiltration system BMPs as established by the LID Manual. The installed BMP systems would be designed with an internal bypass overflow system to prevent upstream flooding during major storm events. As most potential contaminants are anticipated to be contained within the “first flush” storm event, major storms are not anticipated to cause an exceedance of regulatory standards.

Due to the nature of the proposed development to change the land use from an existing commercial to a residential/commercial development, the Project will result in a reduction of potential types of pollutants. As detailed in Section 4.0, a comparison between the potential pollutant based on land use and the 303(d) list for Ballona Creek indicates that the pollutants of concern are **organic compounds, trash and debris, bacteria & viruses, and metals.** These four pollutants of concern will be addressed through the proposed stormwater BMPs in order to comply with Los Angeles County’s Standard Urban Stormwater Mitigation Plan (SUSMP) and Low Impact Development (LID) Ordinance. BMPs include, but are not limited to, detention pipes and dry wells. Based on the analysis contained in this report, there are no significant impacts for surface water quality as a result of the Project.

With compliance under the SWPPP, SUSMP, and the County’s LID Ordinance, construction and operational water quality impacts would be less than significant.

Groundwater Quality During Construction

As discussed above, construction activities for the Project involve the development of a new 5-story mixed-use building. If groundwater is encountered during construction, temporary pumps and filtration would be utilized in compliance with all applicable regulations and requirements, including all relevant NPDES requirements related to construction and discharges from dewatering operations. NPDES requires dischargers must demonstrate that discharges do not violate any water quality objective/criteria for the receiving waters, demonstrate that discharge shall not exceed effluent limitations, perform an analysis using a sample of groundwater or wastewater to be discharged, show discharge shall not cause acute nor chronic toxicity in receiving waters, that discharge shall pass through a treatment system if necessary, and must comply with the provisions of the NPDES permit. Therefore, through compliance with regulatory requirements, potential impacts would be less than significant.

If dewatering is required, the treatment and disposal of the dewatered water would occur in accordance with the Los Angeles Regional Water Quality Control Board (LARWQCB) Waste Discharge Requirements for Discharges of Groundwater from Construction and Project Dewatering to Surface Waters in Coastal Watersheds of Los Angeles and Ventura Counties. Therefore, Project construction could potentially improve the existing condition by removing impacted groundwater. In addition, the proposed construction activities would be typical of a residential project and would not involve activities that could further impact the underlying groundwater quality.

Other potential effects to groundwater quality could result from the presence of an underground storage tank (UST) or during the removal of an UST. As previously described, however, no existing UST’s are anticipated to be found beneath the Project Site. Therefore, the removal of UST’s would not pose a significant hazard on groundwater.

Based on the above, construction of the Project would not result in discharges that would violate any groundwater quality standard or waste discharge requirements. Therefore, construction-related impacts on groundwater quality would be less than significant, and no mitigation measures are required.

Groundwater Quality During Operation

Operational activities which could affect groundwater quality include spills of hazardous materials and leaking UST's. Surface spills from the handling of hazardous materials most often involve small quantities and are cleaned up in a timely manner, thereby resulting in little threat to groundwater. Other types of risks such as leaking underground storage have a greater potential to affect groundwater. However, as discussed above, the Project would not include any new UST's that would have the potential to expose groundwater to contaminants. In addition, while the Project would introduce more density and an additional land use (residential) to the project site which would slightly increase the use of potentially hazardous materials as described above, the Project would comply with all applicable existing regulations that would prevent the Project from affecting or expanding any potential areas of contamination, increasing the level of contamination, or causing regulatory water quality standards at an existing production well to be violated, as defined in the California Code of Regulations, Title 22, Division 4, Chapter 15 and the Safe Drinking Water Act. The Project also does not include the installation or operation of water wells, or any extraction or recharge system near the coast, an area of known groundwater contamination or seawater intrusion, a municipal supply well, or a spreading ground facility.

In addition, the Project includes the installation of a stormwater dry well infiltration system as a means of treatment and disposal of the volume of water produced by the greater of the 85th percentile storm or the 0.75-inch storm event, which would allow for treatment of the on-site stormwater. Therefore, the Project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade ground water quality. The Project's potential impact on groundwater quality during operation would be less than significant, and no mitigation measures are required.

6.3 Cumulative Impact Analysis

The geographic context for the cumulative impact analysis on surface water hydrology is the Ballona Creek Watershed. The Project in conjunction with forecasted growth in the Ballona Creek Watershed could cumulatively increase stormwater runoff flows. However, as noted above, the Project would have no net impact on stormwater flows. Also, in accordance with City requirements, related projects and other future development projects would be required to implement BMPs to manage stormwater in accordance with LID guidelines. Furthermore, the County of Los Angeles Department of Public Works would review each future development project on a case-by-case basis to ensure enough local and regional infrastructure is available to accommodate stormwater runoff. Therefore, potential cumulative impacts associated with the Project on surface water hydrology would be less than significant.

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 12/19/2024 at 1:18 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Geotechnical Investigation

GEOTECHNICAL INVESTIGATION

PROPOSED MULTI-FAMILY
RESIDENTIAL DEVELOPMENT
100 CORPORATE POINTE
CULVER CITY, CALIFORNIA

REVISED MAY 8, 2025
PROJECT NO. W1965-06-01

PREPARED FOR:
Slauson Investors LLC
Denver, Colorado

Project No. W1965-06-01
Revised May 8, 2024

Mr. Eric Spector
Slauson Investors LLC
1099 18th Street, Suite 2900
Denver, CO 80202

Subject: GEOTECHNICAL INVESTIGATION
PROPOSED MULTI-FAMILY RESIDENTIAL DEVELOPMENT
100 CORPORATE POINTE
CULVER CITY, CALIFORNIA

Dear Mr. Spector:

In accordance with your authorization of our proposal dated June 14, 2024, we have performed a preliminary geotechnical investigation for the proposed multi-family residential development located at 100 Corporate Pointe in Culver City, California. The accompanying report presents the findings of our study, and our conclusions and recommendations pertaining to the geotechnical aspects of proposed design and construction. Based on the results of our investigation, it is our opinion that the site can be developed as proposed, provided the recommendations of this report are followed and implemented during design and construction.

If you have any questions regarding this report, or if we may be of further service, please contact the undersigned.

Very truly yours,

GEOCON WEST, INC.

TABLE OF CONTENTS

TABLE OF CONTENTS (Continued)

GEOTECHNICAL INVESTIGATION

1. PURPOSE AND SCOPE

This report presents the results of a preliminary geotechnical investigation for the proposed multi-family residential development located at 100 Corporate Pointe in Culver City, California (see Vicinity Map, Figure 1). The purpose of the investigation was to evaluate subsurface soil and geologic conditions underlying the site and, based on conditions encountered, to provide conclusions and recommendations pertaining to the geotechnical aspects of proposed design and construction.

The scope of this investigation included a site reconnaissance, field exploration, laboratory testing, engineering analysis, and the preparation of this report. The site was explored on August 1, 2024, by excavating four 7-inch diameter borings to depths between approximately 36½ and 41½ feet below existing ground surface using a truck-mounted, hollow-stem auger drilling machine. On August 2, 2024, percolation testing was performed at the site. The approximate locations of the exploratory borings are depicted on the Site Plan (see Figure 2). A detailed discussion of the field investigation, including boring logs, is presented in Appendix A.

Laboratory tests were performed on selected soil samples obtained during the investigation to determine pertinent physical and chemical soil properties. Appendix B presents a summary of the laboratory test results.

The recommendations presented herein are based on analysis of the data obtained during the investigation and our experience with similar soil and geologic conditions. References reviewed to prepare this report are provided in the *List of References* section.

If project details vary significantly from those described herein, Geocon should be contacted to determine the necessity for review and possible revision of this report.

2. SITE AND PROJECT DESCRIPTION

The subject site is located at 100 Corporate Pointe in Culver City, California. The property is currently occupied with a 3-story office building, a three-story parking garage, asphalt parking lots and drive aisles, and landscaped areas. The project is bounded by Slauson Avenue to the north, by Buckingham Parkway to the east and south, and by office structures to the west. Local topography slopes to the southwest with approximately 21 feet of vertical relief across the site. Surface water drainage at the site is by sheet flow to the public streets. Vegetation on-site is limited and consists of grass, ornamental plants, and trees within landscaped areas.

Based on the information provided by the Client, it is our understanding that the proposed development will consist of demolition of the existing structures for the construction an approximately 351-unit, five to seven-story multi-family residential structure wrapped around a six-story parking structure (see Site Plan, Figure 2). Most of the proposed structure is anticipated to be constructed at or near present grade, with portions of the structure partially tucked into the existing grade. Excavations for the tuck under portion of the structure are anticipated to extend to a maximum depth of 20 feet below the existing grade.

Based on the preliminary nature of the design at this time, wall and column loads were not available. It is anticipated that wall and column loads will be as follows:

	Anticipated Column Load	Anticipated Wall Load
Apartment Buildings	700 kips	7.5 klf
Parking Structure	900 kips	9.5 klf

Once the design phase and foundation loading configuration proceeds to a more finalized plan, the recommendations within this report should be reviewed and revised, if necessary. Any changes in the design, location or elevation of any structure, as outlined in this report, should be reviewed by this office. Geocon should be contacted to determine the necessity for review and possible revision of this report.

3. GEOLOGIC SETTING

The site is located on an elevated terrace in the northwestern portion of the Los Angeles Basin, a coastal plain bounded by the Santa Monica Mountains on the north, the Elysian Hills and Repetto Hills on the northeast, the Puente Hills and Whittier Fault on the east, the Palos Verdes Peninsula and Pacific Ocean on the west and south, and the Santa Ana Mountains and San Joaquin Hills on the east and southeast. This terrace is characterized by Pleistocene-age alluvial deposits and, locally, with a veneer of Pleistocene age dune sand. Regionally, the site is located within the northern portion of the Peninsular Ranges geomorphic province. This geomorphic province is characterized by northwest trending physiographic and geologic features such as the nearby Newport-Inglewood Fault Zone located approximately 0.9 miles to the east.

4. SOIL AND GEOLOGIC CONDITIONS

Based on our field investigation and published geologic maps of the area, the site is underlain by artificial fill and old alluvium (CGS, 2003). Detailed stratigraphic profiles are provided on the boring logs in Appendix A.

4.1 Artificial Fill

Artificial fill was encountered in our field explorations to a maximum depth of 13 feet below the existing ground surface. It generally consists of reddish brown, grayish brown, and dark brown silty sand. The artificial fill is characterized as slightly moist to moist and loose to dense. The fill is likely the result of past grading or construction activities at the site. Based on our review of historic topographic maps, a minor tributary drainage channel traversed through the Fox Hills area in a general northeast-southeast direction which was filled as the Fox Hills was developed in the 1970s and 1980s. The location of this drainage channel is coincident with the eastern portion of the property and Buckingham Parkway and may be the rationale for the deep fill in boring B4. Deeper fill may exist between excavations and in other portions of the site that were not directly explored.

4.2 Older Alluvium

Pleistocene age older alluvium was encountered beneath the fill within all borings to the maximum depth explored of approximately 41½ feet below existing ground surface. The soil consists of light brown to dark reddish brown or blueish gray, silt, silty sand, and poorly graded sand. The soils can be characterized as slightly moist to moist and medium dense to very dense or stiff to hard. These deposits are generally fine- to medium-grained and contain variable amounts of gravel.

5. GROUNDWATER

Review of the Seismic Hazard Evaluation Report for the Venice 7.5-Minute Quadrangle (California Division of Mines and Geology [CDMG], 1998) indicates that the historically highest groundwater level in the area is greater than 40 feet beneath the ground surface. Groundwater information presented in this document is generated from data collected in the early 1900’s to the late 1990s. Based on current groundwater basin management practices, it is unlikely that groundwater levels will ever exceed the historic high levels.

Groundwater was not encountered in our borings, drilled to a maximum depth of 41½ feet below the existing ground surface. Based on the reported historic high groundwater levels in the site vicinity (CDMG, 1998), the lack of groundwater encountered in our borings, and the depth of proposed construction, static groundwater is neither expected to be encountered during construction, nor have a detrimental effect on the project. However, groundwater seepage may be encountered during construction. It is not uncommon for groundwater levels to vary seasonally or for groundwater seepage conditions to develop where none previously existed, especially in impermeable fine-grained soils which are heavily irrigated or after seasonal rainfall. In addition, recent requirements for stormwater infiltration could result in shallower seepage conditions in the immediate site vicinity. Proper surface drainage of irrigation and precipitation will be critical for future performance of the project. Recommendations for drainage are provided in the S*urface Drainage* section of this report (see Section 7.21).

6. GEOLOGIC HAZARDS

6.1 Surface Fault Rupture

The numerous faults in Southern California include Holocene-active, pre-Holocene, and inactive faults. The criteria for these major groups are based on criteria developed by the California Geological Survey (CGS, formerly known as CDMG) for the Alquist-Priolo Earthquake Fault Zone Program (CGS, 2018). By definition, a Holocene-active fault is one that has had surface displacement within Holocene time (about the last 11,700 years). A pre-Holocene fault has demonstrated surface displacement during Quaternary time (approximately the last 1.6 million years), but has had no known Holocene movement. Faults that have not moved in the last 1.6 million years are considered inactive.

The site is not located within a state-designated Alquist-Priolo Earthquake Fault Zone (CGS, 2024a; 2024b; 2017) for surface fault rupture hazards. No Holocene-active or pre-Holocene faults with the potential for surface fault rupture are known to pass directly beneath the site. Therefore, the potential for surface rupture due to faulting occurring beneath the site during the design life of the proposed development is considered low. However, the site is located in the seismically active Southern California region and could be subjected to moderate to strong ground shaking in the event of an earthquake on one of the many active Southern California faults. The faults in the vicinity of the site are shown in Figure 3, Regional Fault Map.

The closest surface trace of an active fault to the site is the Newport-Inglewood Fault Zone located approximately 0.9 mile to the east (USGS, 2006). Other nearby active faults include the Santa Monica Fault, the Hollywood Fault, and the Redondo Canyon Fault located approximately 5.5 miles northwest, 7.5 miles northeast, and 13 miles south-southwest of the site, respectively (USGS, 2006; Ziony and Jones, 1989). The active San Andreas Fault Zone is located approximately 41 miles northeast of the site (USGS, 2006).

Several buried thrust faults, commonly referred to as blind thrusts, underlie the Los Angeles Basin at depth. These faults are not exposed at the ground surface and are typically identified at depths greater than 3.0 kilometers. The October 1, 1987, M_w 5.9 Whittier Narrows earthquake and the January 17, 1994, M_w 6.7 Northridge earthquake were a result of movement on the Puente Hills Blind Thrust and the Northridge Thrust, respectively. These thrust faults and others in the Los Angeles area are not exposed at the surface and do not present a potential surface fault rupture hazard at the site; however, these deep thrust faults are considered active features capable of generating future earthquakes that could result in moderate to significant ground shaking at the site. The site is underlain at depth by the Los Angeles Segment of the Puente Hills Blind Thrust and the Upper Elysian Park Blind Thrust.

6.2 Seismicity

As with all of Southern California, the site has experienced historic earthquakes from various regional faults. The seismicity of the region surrounding the site was formulated based on research of an electronic database of earthquake data. The epicenters of recorded earthquakes with magnitudes equal to or greater than 5.0 in the site vicinity are depicted on Figure 4, Regional Seismicity Map. A partial list of moderate to major magnitude earthquakes that have occurred in the Southern California area within the last 100 years is included in the table below.

LIST OF HISTORIC EARTHQUAKES

Earthquake (Oldest to Youngest)	Date of Earthquake	Magnitude	Distance to Epicenter (Miles)	Direction to Epicenter
Long Beach	March 10, 1933	6.4	35	SE
Tehachapi	July 21, 1952	7.5	79	NW
San Fernando	February 9, 1971	6.6	29	N
Whittier Narrows	October 1, 1987	5.9	18	ENE
Sierra Madre	June 28, 1991	5.8	29	NE
Landers	June 28, 1992	7.3	112	E
Big Bear	June 28, 1992	6.4	90	E
Northridge	January 17, 1994	6.7	18	NW
Hector Mine	October 16, 1999	7.1	128	ENE
Ridgecrest / China Lake	July 5, 2019	7.1	130	NNE

The site could be subjected to strong ground shaking in the event of an earthquake. However, this hazard is common in Southern California and the effects of ground shaking can be minimized if the proposed structures are designed and constructed in conformance with current building codes and engineering practices.

6.3 Seismic Design Criteria

The following table summarizes the site-specific design criteria obtained from the 2022 California Building Code (CBC; Based on the 2021 International Building Code [IBC] and ASCE 7-16), Chapter 16 Structural Design, Section 1613 Earthquake Loads. The data was calculated using the online application U.S. Seismic Design Maps, provided by the Structural Engineers Association of California (SEAOC). The short spectral response uses a period of 0.2 second. We evaluated the Site Class based on the discussion in Section 1613.2.2 of the 2022 CBC and Table 20.3-1 of ASCE 7-16. The values presented on the following page are for the risk-targeted maximum considered earthquake (MCE_R).

2022 CBC SEISMIC DESIGN PARAMETERS

Parameter	Value	2022 CBC Reference
Site Class	D	Section 1613.2.2
MCE_R Ground Motion Spectral Response Acceleration – Class B (short), S_S	1.914g	Figure 1613.2.1(1)
MCE_R Ground Motion Spectral Response Acceleration – Class B (1 sec), S_1	0.674g	Figure 1613.2.1(3)
Site Coefficient, F_A	1	Table 1613.2.3(1)
Site Coefficient, F_V	1.7	Table 1613.2.3(2)
Site Class Modified MCE_R Spectral Response Acceleration (short), S_{MS}	1.914g	Section 1613.2.3 (Eqn 16-20)
Site Class Modified MCE_R Spectral Response Acceleration – (1 sec), S_{M1}	1.146g*	Section 1613.2.3 (Eqn 16-21)
5% Damped Design Spectral Response Acceleration (short), S_{DS}	1.276g	Section 1613.2.4 (Eqn 16-22)
5% Damped Design Spectral Response Acceleration (1 sec), S_{D1}	0.764*	Section 1613.2.4 (Eqn 16-23)
*Per Supplement 3 of ASCE 7-16, a ground motion hazard analysis (GMHA) shall be performed for projects on Site Class "D" sites with 1-second spectral acceleration (S_1) greater than or equal to 0.2g, which is true for this site. However, Supplement 3 of ASCE 7-16 provides an exception stating that that the GMHA may be waived provided that the parameter S_{M1} is increased by 50% for all applications of S_{M1}. The values for parameters S_{M1} and S_{D1} presented above have ***not*** been increased in accordance with Supplement 3 of ASCE 7-16.		

The table below presents the mapped maximum considered geometric mean (MCE_G) seismic design parameters for projects located in Seismic Design Categories of D through F in accordance with ASCE 7-16.

ASCE 7-16 PEAK GROUND ACCELERATION

Parameter	Value	ASCE 7-16 Reference
Mapped MCE_G Peak Ground Acceleration, PGA	0.82g	Figure 22-9
Site Coefficient, F_{PGA}	1.1	Table 11.8-1
Site Class Modified MCE_G Peak Ground Acceleration, PGA_M	0.902g	Section 11.8.3 (Eqn 11.8-1)

Deaggregation of the MCE peak ground acceleration was performed using the USGS online Unified Hazard Tool, 2014 Conterminous U.S. Dynamic edition (v4.2.0). The result of the deaggregation analysis indicates that the predominant earthquake contributing to the MCE peak ground acceleration is characterized as a 6.66 magnitude event occurring at a hypocentral distance of 8.01 kilometers from the site.

Deaggregation was also performed for the Design Earthquake (DE) peak ground acceleration, and the result of the analysis indicates that the predominant earthquake contributing to the DE peak ground acceleration is characterized as a 6.59 magnitude occurring at a hypocentral distance of 11.97 kilometers from the site.

Conformance to the criteria in the above tables for seismic design does not constitute any kind of guarantee or assurance that significant structural damage or ground failure will not occur if a large earthquake occurs. The primary goal of seismic design is to protect life, not to avoid all damage, since such design may be economically prohibitive.

6.4 Liquefaction Potential

Liquefaction is a phenomenon in which loose, saturated, relatively cohesionless soil deposits lose shear strength during strong ground motions. Primary factors controlling liquefaction include intensity and duration of ground motion, gradation characteristics of the subsurface soils, in-situ stress conditions, and the depth to groundwater. Liquefaction is typified by a loss of shear strength in the liquefied layers due to rapid increases in pore water pressure generated by earthquake accelerations.

The current standard of practice, as outlined in the "Recommended Procedures for Implementation of DMG Special Publication 117, Guidelines for Analyzing and Mitigating Liquefaction in California" and "Special Publication 117A, Guidelines for Evaluating and Mitigating Seismic Hazards in California" requires liquefaction analysis to a depth of 50 feet below the lowest portion of the proposed structure. Liquefaction typically occurs in areas where the soils below the water table are composed of poorly consolidated, fine- to medium-grained, primarily sandy soil. In addition to the requisite soil conditions, the ground acceleration and duration of the earthquake must also be of a sufficient level to induce liquefaction.

Both the State of California Seismic Hazards Program (CGS, 2024b) and the Culver City General Plan (Culver City, 2007) indicate that the site is not located in an area designated as having a potential for liquefaction. As previously indicated, the historic high ground level in the site vicinity is reported to be greater than 40 feet beneath the existing ground surface (CDMG, 1998). Based on these considerations, it is our opinion that the potential for liquefaction and associated ground deformations to occur at the site is very low.

6.5 Slope Stability

The site is slopes to the southwest, with approximately 21 feet of elevation change. The site is not within an area identified as having a potential for seismic slope instability (CDMG, 1998; CGS, 2024b). There are no known landslides near the site, nor is the site in the path of any known or potential landslides. Therefore, the potential for slope stability hazards to adversely affect the proposed development is considered low.

6.6 Earthquake-Induced Flooding

Earthquake-induced flooding is inundation caused by failure of dams or other water-retaining structures due to earthquakes. Based on a review of the Culver City General Plan (Culver City, 2024), the site is not located within the inundation boundaries of upgradient dams or reservoirs. Therefore, the potential for inundation at the site as a result of an earthquake-induced dam failure is considered low.

6.7 Tsunamis, Seiches, and Flooding

The site is not located within a coastal area and at greater than 150 feet above mean sea level. Therefore, tsunamis are not considered a significant hazard at the site.

Seiches are large waves generated in enclosed bodies of water in response to ground shaking. No major water-retaining structures are located immediately up-gradient from the project site. Therefore, flooding resulting from a seismically induced seiche is considered unlikely.

The site is located within Flood Zone X, designated as an area of minimal flooding (FEMA, 2024).

6.8 Oil Fields & Methane Potential

Based on a review of the California Geologic Energy Management Division (CalGEM) Well Finder Website, the site is not located within the limits of an oilfield and there are no active or inactive oil or gas wells documented within the immediate site vicinity (CalGEM, 2024). However, due to the voluntary nature of record reporting by the oil well drilling companies, wells may be improperly located or not shown on the location map and undocumented wells could be encountered during construction. Any wells encountered will need to be properly abandoned in accordance with the current requirements of the CalGEM.

Since the site is not located within the boundaries of a known oil field, the potential for the presence of methane or other volatile gases at the site is considered low. However, should it be determined that a methane study is required for the proposed development it is recommended that a qualified methane consultant be retained to perform the study and provide mitigation measures as necessary.

6.9 Subsidence

Subsidence occurs when a large portion of land is displaced vertically, usually due to the withdrawal of groundwater, oil, or natural gas. Soils that are particularly subject to subsidence include those with high silt or clay content. The site is not located within an area of known ground subsidence (Culver City, 2007). No large-scale extraction of groundwater, gas, oil, or geothermal energy is occurring or planned at the site or in the general site vicinity. There appears to be little or no potential for ground subsidence due to withdrawal of fluids or gases at the site.

7. CONCLUSIONS AND RECOMMENDATIONS

7.1 General

7.1.1 It is our opinion that neither soil nor geologic conditions were encountered during the investigation that would preclude the construction of the proposed development provided the recommendations presented herein are followed and implemented during design and construction.

7.1.2 Up to 13 feet of existing artificial fill was encountered during the site investigation. The existing fill encountered is believed to be the result of past grading and construction activities at the site. Future demolition of the existing structures which occupy the site will likely disturb the upper few feet of existing site soils. Deeper fill may exist in other areas of the site that were not directly explored. It is our opinion that the existing fill, in its present condition, is not suitable for direct support of proposed foundations or slabs. The existing fill and site soils are suitable for re-use as engineered fill provided the recommendations in the *Grading* section of this report are followed (see Section 7.4).

7.1.3 For the proposed multi-family residential structures, as a minimum it is recommended that the upper 5 feet of existing earth materials within the building footprint areas be excavated and properly compacted for foundation and slab support. Deeper excavations should be conducted as necessary to remove all encountered fill or soft soils as necessary at the direction of the Geotechnical Engineer (a representative of Geocon). The limits of existing fill and/or soft soil removal will be verified by the Geocon representative during site grading activities. Proposed foundations should be underlain by a minimum of 3 feet of newly placed engineered fill. The excavation should extend laterally a minimum distance of three feet beyond the building footprint areas, including building appurtenances, or a distance equal to the depth of fill below the foundation, whichever is greater. Recommendations for earthwork are provided in the *Grading* section of this report (see Section 7.4).

7.1.4 For the proposed parking structure, as a minimum it is recommended that the upper 10 feet of existing earth materials within the building footprint area be excavated and properly compacted for foundation and slab support. Deeper excavations should be conducted as necessary to remove any encountered fill or soft soils as necessary at the direction of the Geotechnical Engineer (a representative of Geocon). The limits of existing fill and/or soft soil removal will be verified by the Geocon representative during site grading activities. Proposed foundations should be underlain by a minimum of 4 feet of newly placed engineered fill. The excavation should extend laterally a minimum distance of four feet beyond the building footprint areas, including building appurtenances, or a distance equal to the depth of fill below the foundation, whichever is greater. Recommendations for earthwork are provided in the *Grading* section of this report (see Section 7.4).

7.1.5 Once proposed building configurations and elevations proceed to a more finalized plan and existing onsite structures have been demolished, it is recommended that supplemental site exploration be performed to verify the limits and depth of the existing artificial fill throughout the site. This can be performed efficiently utilizing a backhoe or excavator immediately subsequent to demolition.

7.1.6 Additional grading should be conducted as necessary to maintain the required thickness of newly placed engineered fill below foundations. The grading contractor should verify all bottom of footing elevations prior to commencement of grading activities to ensure that grading is conducted deep enough to provide the required engineered fill blanket below foundations.

7.1.7 Subsequent to the recommended grading, the proposed structures may be supported on a conventional shallow spread foundation system deriving support in newly placed engineered fill. Recommendations for the design of a conventional foundation system are provided in Sections 7.6 and 7.7.

7.1.8 Where proposed foundations will be situated immediately adjacent to existing foundations, it is recommended that foundations be deepened as necessary to bear at or below the level of the existing adjacent foundation. Where proposed foundations will be deeper than existing adjacent foundations, the proposed foundation should be designed to resist the surcharge imposed by the existing foundation.

7.1.9 Concrete slabs-on-grade may derive support on newly placed engineered fill and/or undisturbed alluvial soils. Any soils that are disturbed should be properly compacted for slab support. Where necessary, the existing artificial fill and alluvial soils are suitable for re-use as an engineered fill provided the procedures outlined in the Grading section of this report are followed (see Section 7.4).

7.1.10 All excavations must be observed and approved in writing by the Geotechnical Engineer (a representative of Geocon). Prior to placing any fill or foundation construction, the upper 12 inches of the excavation bottom must be scarified, moistened as necessary, and proof-rolled with heavy equipment in the presence of the Geotechnical Engineer (a representative of Geocon West, Inc.).

7.1.11 Stable excavations for the recommended grading associated with the proposed structures can be achieved with sloping measures. However, if excavations in close proximity to an adjacent property line and/or structure are required, special excavation measures, such as slot cutting, may be necessary in order to maintain lateral support of offsite improvements. Excavation recommendations are provided in the *Temporary Excavations* section of this report (Section 7.18). Excavations up to 13 feet in depth will be required in the vicinity of boring B4, as well as in other places should deep artificial fill be encountered.

7.1.12 Foundations for small outlying structures, such as block walls up to 6 feet in height, planter walls or trash enclosures, which will not be tied to the proposed structure, may be supported on conventional foundations deriving support on a minimum of 12 inches of newly placed engineered fill which extends laterally at least 12 inches beyond the foundation area. Where excavation and compaction cannot be performed, foundations may derive support directly in the undisturbed alluvial soils at and below a depth of 24 inches below the existing grade and should be deepened as necessary to maintain a minimum 12 inch embedment into the recommended bearing materials. If the soils exposed in the excavation bottom are soft or loose, compaction of the soils will be required prior to placing steel or concrete. Compaction of the foundation excavation bottom is typically accomplished with a compaction wheel or mechanical whacker and must be observed and approved by a Geocon representative.

7.1.13 Where new paving is to be placed, it is recommended that all existing fill and soft alluvial soils be excavated and properly compacted for paving support. The client should be aware that excavation and compaction of all existing fill and soft alluvial soils in the area of new paving is not required; however, paving constructed over existing uncertified fill or unsuitable alluvial soil may experience increased settlement and/or cracking, and may therefore have a shorter design life and increased maintenance costs. As a minimum, the upper 12 inches of subgrade soil should be scarified and properly compacted for paving support. Paving recommendations are provided in the *Preliminary Pavement Recommendations* section of this report (see Section 7.10).

7.1.14 Based on the results of percolation testing performed at the site, a stormwater infiltration system is not considered feasible for this project. It is suggested that stormwater be retained, filtered and discharged in accordance with the requirements of the local governing agency. Recommendations for infiltration are provided in the *Stormwater Infiltration* section of this report (see Section 7.20).

7.1.15 Once the design and foundation loading configuration for the proposed structures proceeds to a more finalized plan, the recommendations within this report should be reviewed and revised, if necessary. Based on the final foundation loading configurations, the potential for settlement should be reevaluated by this office.

7.1.16 Any changes in the design, location or elevation, as outlined in this report, should be reviewed by this office. Geocon should be contacted to determine the necessity for review and possible revision of this report.

7.2 Excavation and Soil Characteristics

7.2.1 The in-situ soils can be excavated with moderate effort using conventional excavation equipment. Some caving should be anticipated in unshored excavations, especially where granular soils are encountered.

7.2.2 It is the responsibility of the contractor to ensure that all excavations and trenches are properly shored and maintained in accordance with applicable OSHA rules and regulations to maintain safety and maintain the stability of adjacent existing improvements.

7.2.3 All onsite excavations must be conducted in such a manner that potential surcharges from existing structures, construction equipment, and vehicle loads are resisted. The surcharge area may be defined by a 1:1 projection down and away from the bottom of an existing foundation or vehicle load. Penetrations below this 1:1 projection will require special excavation measures. Excavation recommendations are provided in the *Temporary Excavations* section of this report (see Section 7.18).

7.2.4 The upper 5 feet of existing site soils encountered during the investigation are considered to have a “low” expansive potential (EI = 37) and are classified as “expansive” in accordance with the 2022 California Building Code (CBC) Section 1803.5.3 (see Figures B25). The recommendations presented herein assume that the proposed building foundations and slabs will derive support in these materials.

7.3 Minimum Resistivity, pH, and Water-Soluble Sulfate

7.3.1 Potential of Hydrogen (pH) and resistivity testing as well as chloride content testing were performed on representative samples of soil to generally evaluate the corrosion potential to surface utilities. The tests were performed in accordance with California Test Method Nos. 643 and 422 and indicate that the soils are considered “severely corrosive” with respect to corrosion of buried ferrous metals on site. The results are presented in Appendix B (Figure B26) and should be considered for design of underground structures. Due to the corrosive potential of the soils, it is recommended that PVC, ABS or other approved plastic piping be utilized in lieu of cast-iron when in direct contact with the site soils.

7.3.2 Laboratory tests were performed on representative samples of the site materials to measure the percentage of water-soluble sulfate content. Results from the laboratory water-soluble sulfate tests are presented in Appendix B (Figure B26) and indicate that the on-site materials possess a sulfate exposure class of “S0” to concrete structures as defined by 2022 CBC Section 1904 and ACI 318-19 Chapter 19.

7.3.3 Geocon West, Inc. does not practice in the field of corrosion engineering and mitigation. If corrosion sensitive improvements are planned, it is recommended that a corrosion engineer be retained to evaluate corrosion test results and incorporate the necessary precautions to avoid premature corrosion of buried metal pipes and concrete structures in direct contact with the soils.

7.4 Grading

7.4.1 Once proposed building configurations and elevations proceed to a more finalized state and the existing onsite structures removed, it is recommended supplemental site exploration be performed to determine the extent and depth of artificial fill throughout the site.

7.4.2 Grading is anticipated to include preparation of the building pads; excavation of site soils for proposed foundations, slabs, walls and utility trenches; and placement of backfill for utility trenches and walls.

7.4.3 A preconstruction conference should be held at the site prior to the beginning of grading operations with the owner, contractor, civil engineer, geotechnical engineer, and, if applicable, building official in attendance. Special soil handling requirements can be discussed at that time.

7.4.4 Earthwork should be observed, and compacted fill tested by representatives of Geocon West, Inc. The existing fill and older alluvial soils encountered during exploration is suitable for re-use as an engineered fill, provided any encountered oversize material (greater than 6 inches) and any encountered deleterious debris is removed.

7.4.5 Grading should commence with the removal of existing vegetation and existing improvements from the area to be graded. Deleterious debris such as wood and root structures should be exported from the site and should not be mixed with the fill soils. Asphalt and concrete should not be mixed with the fill soils unless approved by the Geotechnical Engineer. Existing underground improvements planned for removal should be completely excavated and the resulting depressions properly backfilled in accordance with the procedures described herein. Once a clean excavation bottom has been established it must be approved in writing by the Geotechnical Engineer (a representative of Geocon West, Inc.) and the Building Inspector.

7.4.6 For the proposed multi-family residential structures, as a minimum it is recommended that the upper 5 feet of existing earth materials within the building footprint areas be excavated and properly compacted for foundation and slab support. Deeper excavations should be conducted as necessary to remove all encountered fill or soft soils as necessary at the direction of the Geotechnical Engineer (a representative of Geocon). The limits of existing fill and/or soft soil removal will be verified by the Geocon representative during site grading activities. Proposed foundations should be underlain by a minimum of 3 feet of newly placed engineered fill. The excavation should extend laterally a minimum distance of three feet beyond the building footprint areas, including building appurtenances, or a distance equal to the depth of fill below the foundation, whichever is greater.

7.4.7 For the proposed parking structure, as a minimum it is recommended that the upper 10 feet of existing earth materials within the building footprint area be excavated and properly compacted for foundation and slab support. Deeper excavations should be conducted as necessary to remove any encountered fill or soft soils as necessary at the direction of the Geotechnical Engineer (a representative of Geocon). The limits of existing fill and/or soft soil removal will be verified by the Geocon representative during site grading activities. Proposed foundations should be underlain by a minimum of 4 feet of newly placed engineered fill. The excavation should extend laterally a minimum distance of four feet beyond the building footprint areas, including building appurtenances, or a distance equal to the depth of fill below the foundation, whichever is greater.

7.4.8 Additional grading should be conducted as necessary to maintain the required thickness of newly placed engineered fill below foundations. The grading contractor should verify all bottom of footing elevations prior to commencement of grading activities to ensure that grading is conducted deep enough to provide the required engineered fill blanket below foundations.

7.4.9 All excavations must be observed and approved in writing by the Geotechnical Engineer (a representative of Geocon). Prior to placing any fill or foundation construction, the upper 12 inches of the excavation bottom must be scarified, moistened as necessary, and proof-rolled with heavy equipment in the presence of the Geotechnical Engineer (a representative of Geocon West, Inc.).

7.4.10 Subsequent to the recommended grading, the proposed structures may be supported on a conventional shallow spread foundation system deriving support in newly placed engineered fill.

7.4.11 All fill and backfill soils should be placed in horizontal loose layers approximately 6 to 8 inches thick, moisture conditioned to near optimum moisture content, and properly compacted to a minimum of 90 percent relative compaction in accordance with ASTM D 1557 (latest edition).

7.4.12 Foundations for small outlying structures, such as block walls up to 6 feet in height, planter walls or trash enclosures, which will not be tied to the proposed structure, may be supported on conventional foundations deriving support on a minimum of 12 inches of newly placed engineered fill which extends laterally at least 12 inches beyond the foundation area. Where excavation and compaction cannot be performed, foundations may derive support directly in the undisturbed alluvial soils at and below a depth of 24 inches below the existing grade and should be deepened as necessary to maintain a minimum 12 inch embedment into the recommended bearing materials. If the soils exposed in the excavation bottom are soft or loose, compaction of the soils will be required prior to placing steel or concrete. Compaction of the foundation excavation bottom is typically accomplished with a compaction wheel or mechanical whacker and must be observed and approved by a Geocon representative.

7.4.13. Where new paving is to be placed, it is recommended that all existing fill and soft alluvial soils be excavated and properly compacted for paving support. As a minimum, the upper 12 inches of soil should be scarified, moisture conditioned to near optimum moisture content, and compacted to at least 95 percent relative compaction, as determined by ASTM Test Method D 1557 (latest edition). Paving recommendations are provided in the *Preliminary Pavement Recommendations* section of this report (see Section 7.11).

7.4.14 Stable excavations for the recommended grading can be achieved with sloping measures. However, if excavations in close proximity to an adjacent property line and/or structure are required, special excavation measures, such as slot cutting, may be necessary in order to maintain lateral support of the existing offsite improvements. Excavation recommendations are provided in the *Temporary Excavations* section of this report (Section 7.18).

7.4.15 All imported fill shall be observed, tested, and approved by Geocon West, Inc. prior to bringing soil to the site. Import fill should consist of the characteristics presented in the table below. Import soils placed in the building area should be placed uniformly across the building pad or in a manner that is approved by the Geotechnical Engineer (a representative of Geocon).

SUMMARY OF IMPORT FILL RECOMMENDATIONS

Soil Characteristic	Values
Expansion Potential	"Low" (Expansion Index of 40 or less)
Particle Size	Maximum Dimension Less Than 6 Inches Free of Debris
Corrosivity	Equal or Less Detrimental Than Existing Onsite Soils

7.4.16 Utility trenches should be properly in accordance with the following requirements. The pipe should be bedded with clean sands (Sand Equivalent greater than 30) to a depth of at least 1 foot over the pipe, and the bedding material must be inspected and approved in writing by the Geotechnical Engineer (a representative of Geocon). The use of gravel is not acceptable unless used in conjunction with filter fabric to prevent the gravel from having direct contact with soil. The remainder of the trench backfill may be derived from onsite soil or approved import soil, compacted as necessary, until the required compaction is obtained. The use of minimum 2-sack slurry as backfill is also acceptable. Prior to placing any bedding materials or pipes, the excavation bottom must be observed and approved in writing by the Geotechnical Engineer (a representative of Geocon).

7.4.17 All trench and foundation excavation bottoms must be observed and approved in writing by the Geotechnical Engineer (a representative of Geocon), prior to placing bedding materials, fill, steel, gravel, or concrete.

7.5 Shrinkage

7.5.1 Shrinkage results when a volume of material removed at one density is compacted to a higher density. A shrinkage factor of up to 12 percent should be anticipated when excavating and compacting the upper 5 feet of existing earth materials on the site to an average relative compaction of 92 percent.

7.5.2 If import soils will be utilized in the building pad, the soils must be placed uniformly and at equal thickness at the direction of the Geotechnical Engineer (a representative of Geocon West, Inc.). In order to maintain uniformity in the building pad, soils can be borrowed from non-building pad areas and later replaced with imported soils.

7.6 Conventional Foundation Design – Multi-Family Residential Structures

7.6.1 Subsequent to the recommended grading, the proposed structures may be supported on conventional shallow spread foundations deriving support in newly placed engineered fill. Proposed apartment and commercial building foundations should be underlain by a minimum of 3 feet of newly placed engineered fill.

7.6.2 Foundation excavations should be observed and approved in writing by the Geotechnical Engineer (a representative of Geocon West, Inc.), prior to the placement of reinforcing steel and concrete to verify that the excavations and exposed soil conditions are consistent with those anticipated. If unanticipated soil conditions are encountered, foundation modifications may be required.

7.6.3 Conventional shallow spread foundations for the proposed structures should consist of continuous strip footings and/or isolated spread footings and should be designed using the parameters in the table shown below.

SUMMARY OF FOUNDATION RECOMMENDATIONS

Parameter	Value
Minimum Continuous Foundation Width	12 Inches
Minimum Isolated Foundation Width	24 Inches
Minimum Foundation Depth	18 Inches Below Lowest Adjacent Grade And 12 inches into Recommended Bearing Material
Minimum Steel Reinforcement	4 No. 4 Bars, 2 Top and 2 Bottom
Allowable Bearing Pressure – Continuous Foundation	2,250 psf
Allowable Bearing Pressure – Isolated Foundation	2,750 psf
Bearing Pressure Increase	250 psf per Foot of Width
	500 psf per Foot of Depth
Maximum Allowable Bearing Pressure	3,750 psf
Estimated Total Settlement	1½ Inches
Estimated Differential Settlement	¾ Inch over 20 Feet

7.6.4 The allowable bearing pressures may be increased by one-third for transient loads due to wind or seismic forces.

7.6.5 If side by side construction is planned for the residential structures and parking structure, it is recommended that the parking structure be constructed prior to the adjacent residential structures in order to allow the majority of the static settlement to occur in the parking structure. This will help to minimize differential settlements between the two structures. It is recommended that either a seismic separation or flexible connection be utilized where the apartment structures and parking structure may be attached. The design of the connection is at the discretion of the project structural engineer. Additional settlement analyses should be performed once the foundation loading configuration for the proposed structures is established to further evaluate the potential for differential settlement between the residential structure and parking structure. The utilization of a lesser bearing value, or increasing the thickness of engineered fill below the foundations, would further reduce the anticipated settlements and could be evaluated once the design becomes more finalized.

7.6.6 Once the design and foundation loading configurations for the proposed structures proceeds to a more finalized plan, the estimated settlements presented in this report should be reviewed and revised, if necessary. If the final foundation loading configurations are greater than the assumed loading conditions, the potential for settlement should be reevaluated by this office.

7.6.7 Continuous footings should be reinforced with four No. 4 steel reinforcing bars, two placed near the top of the footing and two near the bottom. Reinforcement for spread footings should be designed by the project structural engineer.

7.6.8 The above foundation dimensions and minimum reinforcement recommendations are based on soil conditions and building code requirements only and are not intended to be used in lieu of those required for structural purposes.

7.6.9 Where proposed foundations will be situated immediately adjacent to existing foundations, it is recommended that foundations be deepened as necessary to bear at or below the level of the existing adjacent foundation. Where proposed foundations will be deeper than existing adjacent foundations, the proposed foundation should be designed to resist the surcharge imposed by the existing foundation.

7.6.10 No special subgrade presaturation is required prior to placement of concrete. However, the moisture in the foundation subgrade should be sprinkled as necessary to maintain a moist condition at the time of concrete placement.

7.6.11 Foundation excavations should be observed and approved in writing by the Geotechnical Engineer (a representative of Geocon West, Inc.), prior to the placement of reinforcing steel and concrete to verify that the excavations and exposed soil conditions are consistent with those anticipated. If unanticipated soil conditions are encountered, foundation modifications may be required.

7.6.12 If depth increases are utilized for the exterior wall footings, this office should be provided a copy of the final construction plans so that the excavation recommendations presented herein could be properly reviewed and revised if necessary.

7.6.13 This office should be provided a copy of the final construction plans so that the excavation recommendations presented herein could be properly reviewed and revised if necessary.

7.7 Conventional Foundation Design – Parking Structure

7.7.1 Subsequent to the recommended grading, the proposed structures may be supported on conventional shallow spread foundations deriving support in newly placed engineered fill. Proposed apartment and commercial building foundations should be underlain by a minimum of 4 feet of newly placed engineered fill.

7.7.2 Foundation excavations should be observed and approved in writing by the Geotechnical Engineer (a representative of Geocon West, Inc.), prior to the placement of reinforcing steel and concrete to verify that the excavations and exposed soil conditions are consistent with those anticipated. If unanticipated soil conditions are encountered, foundation modifications may be required.

7.7.3 Conventional shallow spread foundations for the proposed structure should consist of continuous strip footings and/or isolated spread footings and should be designed using the parameters in the table shown on the following page.

SUMMARY OF FOUNDATION RECOMMENDATIONS

Parameter	Value
Minimum Continuous Foundation Width	12 Inches
Minimum Isolated Foundation Width	24 Inches
Minimum Foundation Depth	18 Inches Below Lowest Adjacent Grade And 12 inches into Recommended Bearing Material
Minimum Steel Reinforcement	4 No. 4 Bars, 2 Top and 2 Bottom
Allowable Bearing Pressure – Continuous Foundation	2,500 psf
Allowable Bearing Pressure – Isolated Foundation	3,000 psf
Bearing Pressure Increase	250 psf per Foot of Width
	500 psf per Foot of Depth
Maximum Allowable Bearing Pressure	4,250 psf
Estimated Total Settlement	1½ Inches
Estimated Differential Settlement	¾ Inch over 20 Feet

7.7.4 The allowable bearing pressures may be increased by one-third for transient loads due to wind or seismic forces.

7.7.5 If side by side construction is planned for the residential structures and parking structure, it is recommended that the parking structure be constructed prior to the adjacent residential structures in order to allow the majority of the static settlement to occur in the parking structure. This will help to minimize differential settlements between the two structures. It is recommended that either a seismic separation or flexible connection be utilized where the apartment structures and parking structure may be attached. The design of the connection is at the discretion of the project structural engineer. Additional settlement analyses should be performed once the foundation loading configuration for the proposed structures is established to further evaluate the potential for differential settlement between the residential structure and parking structure. The utilization of a lesser bearing value, or increasing the thickness of engineered fill below the foundations, would further reduce the anticipated settlements and could be evaluated once the design becomes more finalized.

7.7.6 Once the design and foundation loading configurations for the proposed structures proceeds to a more finalized plan, the estimated settlements presented in this report should be reviewed and revised, if necessary. If the final foundation loading configurations are greater than the assumed loading conditions, the potential for settlement should be reevaluated by this office.

7.7.7 Continuous footings should be reinforced with four No. 4 steel reinforcing bars, two placed near the top of the footing and two near the bottom. Reinforcement for spread footings should be designed by the project structural engineer.

7.7.8 The above foundation dimensions and minimum reinforcement recommendations are based on soil conditions and building code requirements only and are not intended to be used in lieu of those required for structural purposes.

7.7.9 Where proposed foundations will be situated immediately adjacent to existing foundations, it is recommended that foundations be deepened as necessary to bear at or below the level of the existing adjacent foundation. Where proposed foundations will be deeper than existing adjacent foundations, the proposed foundation should be designed to resist the surcharge imposed by the existing foundation.

7.7.10 No special subgrade presaturation is required prior to placement of concrete. However, the moisture in the foundation subgrade should be sprinkled as necessary to maintain a moist condition at the time of concrete placement.

7.7.11 Foundation excavations should be observed and approved in writing by the Geotechnical Engineer (a representative of Geocon West, Inc.), prior to the placement of reinforcing steel and concrete to verify that the excavations and exposed soil conditions are consistent with those anticipated. If unanticipated soil conditions are encountered, foundation modifications may be required.

7.7.12 If depth increases are utilized for the exterior wall footings, this office should be provided a copy of the final construction plans so that the excavation recommendations presented herein could be properly reviewed and revised if necessary.

7.7.13 This office should be provided a copy of the final construction plans so that the excavation recommendations presented herein could be properly reviewed and revised if necessary.

7.8 Miscellaneous Foundations

7.8.1 Foundations for small outlying structures, such as block walls up to 6 feet in height, planter walls or trash enclosures, which will not be tied to the proposed structure, may be supported on conventional foundations deriving support on a minimum of 12 inches of newly placed engineered fill which extends laterally at least 12 inches beyond the foundation area. Where excavation and compaction cannot be performed, foundations may derive support directly in the undisturbed alluvial soils at and below a depth of 24 inches below the existing grade, and should be deepened as necessary to maintain a minimum 12-inch embedment into the recommended bearing materials.

7.8.2 If the soils exposed in the excavation bottom are soft, compaction of the soft soils will be required prior to placing steel or concrete. Compaction of the foundation excavation bottom is typically accomplished with a compaction wheel or mechanical whacker and must be observed and approved by a Geocon representative. Miscellaneous foundations may be designed for a bearing value of 1,500 psf and should be a minimum of 12 inches in width, 18 inches in depth below the lowest adjacent grade, and 12 inches into the recommended bearing material. The allowable bearing pressure may be increased by up to one-third for transient loads due to wind or seismic forces.

7.8.3 Foundation excavations should be observed and approved in writing by the Geotechnical Engineer (a representative of Geocon West, Inc.), prior to the placement of reinforcing steel and concrete to verify that the excavations and exposed soil conditions are consistent with those anticipated.

7.9 Lateral Design

7.9.1 Resistance to lateral loading may be provided by friction acting at the base of foundations, slabs and by passive earth pressure. An allowable coefficient of friction of 0.38 may be used with the dead load forces in the undisturbed alluvial soils or newly placed engineered fill.

7.9.2 Passive earth pressure for the sides of foundations and slabs poured against the undisturbed alluvial soils or properly compacted engineered fill may be computed as an equivalent fluid having a density of 240 pcf with a maximum earth pressure of 2,400 pcf. When combining passive and friction for lateral resistance, the passive component should be reduced by one-third.

7.10 Concrete Slabs-on-Grade

7.10.1 Unless specifically evaluated and designed by a qualified structural engineer, interior slab-on-grade subject to vehicle loading should be a minimum of 5 inches of concrete reinforced with No. 3 steel reinforcing bars placed 18 inches on center in both horizontal directions and positioned vertically near the slab midpoint. The concrete slab-on-grade and ramp may derive support directly on newly placed engineered fill and/or undisturbed alluvial soils, if necessary. Any disturbed soils should be properly compacted for slab support. Soil placed and compacted for ramp and slab support should be moisture conditioned to optimum moisture content and properly compacted to at least 95 percent relative compaction, as determined by ASTM Test Method D 1557 (latest edition).

7.10.2 Concrete slabs-on-grade for structures, not subject to vehicle loading, should be a minimum of 4 inches thick and minimum slab reinforcement should consist of No. 3 steel reinforcing bars placed 18 inches on center in both horizontal directions. The slab-on-grade subject to vehicle loading should be a minimum of 6 inches of concrete reinforced with No. 3 steel reinforcing bars placed 18 inches on center in both horizontal directions and positioned vertically near the slab midpoint. Steel reinforcing should be positioned vertically near the slab midpoint. The finished subgrade must observed and be approved in writing prior to placement of a vapor retarder, reinforcing steel, or concrete.

7.10.3 Slabs-on-grade at the ground surface that may receive moisture-sensitive floor coverings or may be used to store moisture-sensitive materials should be underlain by a vapor retarder placed directly beneath the slab. The vapor retarder and acceptable permeance should be specified by the project architect or developer based on the type of floor covering that will be installed. The vapor retarder design should be consistent with the guidelines presented in Section 9.3 of the American Concrete Institute's (ACI) Guide for Concrete Slabs that Receive Moisture-Sensitive Flooring Materials (ACI 302.2R-06) as well as ASTM E1745 and should be installed in general conformance with ASTM E 1643 (latest edition) and the manufacturer's recommendations. A minimum thickness of 15 mils extruded polyolefin plastic is recommended; vapor retarders which contain recycled content or woven materials are not recommended. The vapor retarder should have a permeance of less than 0.01 perms demonstrated by testing before and after mandatory conditioning. The vapor retarder should be installed in direct contact with the concrete slab with proper perimeter seal. If the California Green Building Code requirements apply to this project, the vapor retarder should be underlain by 4 inches of clean aggregate. It is important that the vapor retarder be puncture resistant since it will be in direct contact with angular gravel. As an alternative to the clean aggregate suggested in the California Green Building Code, it is our opinion that the concrete slab-on-grade may be underlain by a vapor retarder over 4 inches of clean sand (sand equivalent greater than 30), since the sand will serve a capillary break and will minimize the potential for punctures and damage to the vapor barrier.

7.10.4 For seismic design purposes, a coefficient of friction of 0.38 may be utilized between concrete slabs and subgrade soils without a moisture barrier, and 0.15 for slabs underlain by a moisture barrier.

7.10.5 Exterior slabs for walkways or flatwork, not subject to traffic loads, should be at least 4 inches thick and reinforced with No. 3 steel reinforcing bars placed 18 inches on center in both horizontal directions, positioned near the slab midpoint. Prior to construction of slabs, the upper 12 inches of subgrade should be moistened to near optimum moisture content and properly compacted to at least 95 percent relative compaction, as determined by ASTM Test Method D 1557 (latest edition). Crack control joints should be spaced at intervals not greater than 10 feet and should be constructed using saw-cuts or other methods as soon as practical following concrete placement. Crack control joints should extend a minimum depth of one-fourth the slab thickness. The project structural engineer should design construction joints as necessary.

7.10.6 The recommendations of this report are intended to reduce the potential for cracking of slabs due to settlement. However, even with the incorporation of the recommendations presented herein, foundations, stucco walls, and slabs-on-grade may exhibit some cracking due to minor soil movement and/or concrete shrinkage. The occurrence of concrete shrinkage cracks is independent of the supporting soil characteristics. Their occurrence may be reduced and/or controlled by limiting the slump of the concrete, proper concrete placement and curing, and by the placement of crack control joints at periodic intervals, in particular, where re-entrant slab corners occur.

7.11 Preliminary Pavement Recommendations

7.11.1 Where new paving is to be placed, it is recommended that all existing fill and soft alluvial soils be excavated and properly compacted for paving support. The client should be aware that excavation and compaction of all existing artificial fill and soft alluvial soils in the area of new paving is not required; however, paving constructed over existing uncertified fill or unsuitable alluvial soils material may experience increased settlement and/or cracking, and may therefore have a shorter design life and increased maintenance costs. As a minimum, the upper 12 inches of paving subgrade should be scarified, moisture conditioned to near optimum moisture content, and properly compacted to at least 95 percent relative compaction, as determined by ASTM Test Method D 1557 (latest edition).

7.11.2 The following pavement sections are based on an assumed R-Value of 20. Once site grading activities are complete an R-Value should be obtained by laboratory testing to confirm the properties of the soils serving as paving subgrade, prior to placing pavement.

7.11.3 The Traffic Indices listed below are estimates. Geocon does not practice in the field of traffic engineering. The actual Traffic Index for each area should be determined by the project civil engineer. If pavement sections for Traffic Indices other than those listed below are required, Geocon should be contacted to provide additional recommendations. Pavement thicknesses were determined following procedures outlined in the *California Highway Design Manual* (Caltrans). It is anticipated that the majority of traffic will consist of automobile and large truck traffic.

PRELIMINARY PAVEMENT DESIGN SECTIONS

Location	Estimated Traffic Index (TI)	Asphalt Concrete (inches)	Class 2 Aggregate Base (inches)
Automobile Parking and Driveways	4.0	3.0	4.0
Trash Truck & Fire Lanes	7.0	4.0	12.0

7.11.4 Asphalt concrete should conform to Section 203-6 of the "*Standard Specifications for Public Works Construction"* (Green Book). Class 2 aggregate base materials should conform to Section 26-1.02A of the "*Standard Specifications of the State of California, Department of Transportation"* (Caltrans). The use of Crushed Miscellaneous Base (CMB) in lieu of Class 2 aggregate base is acceptable. Crushed Miscellaneous Base should conform to Section 200-2.4 of the "*Standard Specifications for Public Works Construction"* (Green Book).

7.11.5 Unless specifically designed and evaluated by the project structural engineer, where exterior concrete paving will be utilized for support of vehicles, it is recommended that the concrete be a minimum of 6 inches of concrete reinforced with No. 3 steel reinforcing bars placed 18 inches on center in both horizontal directions. Concrete paving supporting vehicular traffic should be underlain by a minimum of 4 inches of aggregate base and a properly compacted subgrade. As a minimum, the upper 12 inches of paving subgrade should be scarified, moisture conditioned to near optimum moisture content, and properly compacted to at least 95 percent relative compaction, as determined by ASTM Test Method D 1557 (latest edition). The base material should be moisture conditioned to near optimum moisture content and compacted to 95 percent relative compaction, as determined by ASTM Test Method D 1557 (latest edition).

7.11.6 The performance of pavements is highly dependent upon providing positive surface drainage away from the edge of pavements. Ponding of water on or adjacent to the pavement will likely result in saturation of the subgrade materials and subsequent cracking, subsidence and pavement distress. If planters are planned adjacent to paving, it is recommended that the perimeter curb be extended at least 12 inches below the bottom of the aggregate base to minimize the introduction of water beneath the paving.

7.12 Retaining Wall Design

7.12.1 The recommendations presented below are generally applicable to the design of rigid concrete or masonry retaining walls having a maximum height of 12 feet. In the event that walls significantly higher than 12 feet are planned, Geocon should be contacted for additional recommendations.

7.12.2 Retaining wall foundations should be designed in accordance with the recommendations provided in the *Conventional Foundation Design* section of this report (see Sections 7.6 and 7.7).

7.12.3 Retaining walls with a level backfill surface that are not restrained at the top should be designed utilizing a triangular distribution of pressure (active pressure). Restrained walls are those that are not allowed to rotate more than 0.001H (where H equals the height of the retaining portion of the wall in feet) at the top of the wall. Where walls are restrained from movement at the top, walls may be designed utilizing a triangular distribution of pressure (at-rest pressure). The table below presents recommended pressures to be used in retaining wall design assuming that proper drainage will be maintained.

RETAINING WALL WITH LEVEL BACKFILL SURFACE

HEIGHT OF RETAINING WALL (Feet)	ACTIVE PRESSURE EQUIVALENT FLUID PRESSURE (Pounds Per Cubic Foot)	AT-REST PRESSURE EQUIVALENT FLUID PRESSURE (Pounds Per Cubic Foot)
Up to 12	40	63

7.12.4 The wall pressures provided above assume that the proposed retaining walls will support relatively undisturbed alluvium or engineered fill derived from onsite soils. If import soil will be used to backfill proposed retaining walls, revised earth pressures may be required to account for the geotechnical properties of the import soil used as engineered fill. This should be evaluated once the use of import soil is established. All imported fill shall be observed, tested, and approved by Geocon West, Inc. prior to bringing soil to the site.

7.12.5 The wall pressures provided above assume that the retaining wall will be properly drained preventing the buildup of hydrostatic pressure. If retaining wall drainage is not implemented, an at-rest equivalent fluid pressure of 92 pcf should be used in design for the full height of the wall. The value includes hydrostatic pressures plus buoyant lateral earth pressures. If a partially drained wall is proposed, Geocon should be contacted to provide additional recommendations.

7.12.6 Additional pressure should be added for a surcharge condition due to sloping ground, vehicular traffic or adjacent structures and should be designed for each condition as the project progresses. Surcharges may be evaluated using Section 7.19 of this report. Once the design becomes more finalized, an addendum letter can be prepared revising recommendations and addressing specific surcharge conditions throughout the project, if necessary.

7.12.7 In addition to the recommended earth pressure, the upper 10 feet of the retaining wall adjacent to the street or driveway areas should be designed to resist a uniform lateral pressure of 100 psf, acting as a result of an assumed 300 psf surcharge behind the wall due to normal street traffic. If the traffic is kept back at least 10 feet from the wall, the traffic surcharge may be neglected.

7.12.8 Seismic lateral forces will be required for any retaining walls in excess of 6 feet. Recommendations for seismic lateral forces are provided in the following section of this report.

7.13 Dynamic (Seismic) Lateral Forces

7.16.1 The structural engineer should determine the seismic design category for the project in accordance with Section 1613 of the CBC. If the project possesses a seismic design category of D, E, or F, proposed retaining walls in excess of 6 feet in height should be designed with seismic lateral pressure (Section 1803.5.12 of the 2022 CBC).

7.16.2 A seismic load of 10 pounds per cubic foot (pcf) should be used for design of walls that support more than 6 feet of backfill in accordance with Section 1803.5.12 of the 2022 CBC. The seismic load is applied as an equivalent fluid pressure along the height of the wall and the calculated loads result in a maximum load exerted at the base of the wall and zero at the top of the wall. This seismic load should be applied in addition to the active earth pressure. The earth pressure is based on half of two thirds of PGAM calculated from ASCE 7-16 Section 11.8.3.

7.14 Retaining Wall Drainage

7.14.1 Unless designed for hydrostatic pressures, retaining walls should be provided with a drainage system. At the base of the drain system, a subdrain covered with a minimum of 12 inches of gravel should be installed, and a compacted fill blanket or other seal placed at the surface (see Figure 6). The clean bottom and subdrain pipe, behind a retaining wall, should be observed by the Geotechnical Engineer (a representative of Geocon), prior to placement of gravel or compacting backfill.

7.14.2 As an alternative, a plastic drainage composite such as Miradrain or equivalent may be installed in continuous, 4-foot-wide columns along the entire back face of the wall, at 8 feet on center. The top of these drainage composite columns should terminate approximately 18 inches below the ground surface, where either hardscape or a minimum of 18 inches of relatively cohesive material should be placed as a cap (see Figure 7). These vertical columns of drainage material would then be connected at the bottom of the wall to a collection panel or a 1-cubic-foot rock pocket drained by a 4-inch subdrain pipe.

7.14.3 Subdrainage pipes at the base of the retaining wall drainage system should outlet to an acceptable location via controlled drainage structures. Drainage should not be allowed to flow uncontrolled over descending slopes.

7.14.4 Moisture affecting below grade walls is one of the most common post-construction complaints. Poorly applied or omitted waterproofing can lead to efflorescence or standing water. Particular care should be taken in the design and installation of waterproofing to avoid moisture problems, or actual water seepage into the structure through any normal shrinkage cracks which may develop in the concrete walls, floor slab, foundations and/or construction joints. The design and inspection of the waterproofing is not the responsibility of the geotechnical engineer. A waterproofing consultant should be retained in order to recommend a product or method, which would provide protection to subterranean walls, floor slabs and foundations.

7.15 Swimming Pool

7.15.1 The proposed swimming pool should be designed as free-standing structures deriving support in newly placed engineered fill.

7.15.2 Swimming pool foundations and walls may be designed in accordance with the foundation design recommendations below and *Retaining Wall Design* section of this report (see Section 7.12). The proposed pool should be constructed utilizing an expansive soils design, and a hydrostatic relief valve should be considered as part of the swimming pool design unless a gravity drain system can be placed beneath the pool shell.

7.15.3 If a spa is proposed it should be constructed independent of the swimming pool and must not be cantilevered from the swimming pool shell.

7.15.4 A reinforced concrete mat foundation may be utilized for support of the proposed swimming pool. The mat foundation for the pool may derive support in the newly placed engineered fill. The proposed swimming pool mat foundation should be underlined by at 3 feet of newly placed engineered fill that extends laterally at least three beyond the swimming pool footprint area or a distance equal to the depth of fill below the foundation, whichever is greater.

7.15.5 It is anticipated that the proposed mat foundation will impart an average pressure of less than 1,500 psf. The recommended maximum allowable bearing value is 1,500 psf. The allowable bearing pressure may be increased by up to one-third for transient loads due to wind or seismic forces.

7.15.6 It is recommended that a modulus of subgrade reaction of 120 pounds per cubic inch be utilized for the design of the mat foundation bearing on competent alluvial soils and/or newly placed engineered fill. This value is a unit value for use with a one-foot square footing. The modulus should be reduced in accordance with the following equation when used with larger foundations:

$$K_R = K\left[\frac{B+1}{2B}\right]^2$$

where: K_R = reduced subgrade modulus
K = unit subgrade modulus
B = foundation width (in feet)

7.15.7 The thickness of and reinforcement for the mat foundation should be designed by the project structural engineer.

7.15.8 Based on the soil overburden load that will be removed during excavation of the swimming pool, anticipated settlements are expected to be small. We estimate the total settlements for a mat foundation to be less than ½ inch, with differential settlements on the order of ¼ inch over a horizontal distance of 20 feet.

7.15.9 Foundation excavations should be observed by Geocon, prior to the placement of reinforcing steel and concrete to verify that the exposed soil conditions are consistent with those anticipated. If unanticipated soil conditions are encountered, foundation modifications may be required.

7.16 Elevator Pit Design

7.16.1 The elevator pit slab and retaining wall should be designed by the project structural engineer. Elevator pits may be designed in accordance with the recommendations in the *Conventional Foundation Design* and *Retaining Wall Design* sections of this report (see Sections 7.6, 7.7, and 7.12).

7.16.2 Additional pressure should be added for a surcharge condition due to sloping ground, vehicular traffic, or adjacent foundations and should be designed for each condition as the project progresses.

7.16.3 If retaining wall drainage is to be provided, the drainage system should be designed in accordance with the *Retaining Wall Drainage* section of this report (see Section 7.14).

7.16.4 It is suggested that the exterior walls and slab be waterproofed to prevent excessive moisture inside of the elevator pit. Waterproofing design and installation is not the responsibility of the geotechnical engineer.

7.17 Elevator Piston

7.17.1 If a plunger-type elevator piston is installed for this project, a deep drilled excavation will be required. It is important to verify that the drilled excavation is not situated immediately adjacent to a foundation or the drilled excavation could compromise the existing foundation support, especially if the drilling is performed subsequent to the foundation construction.

7.17.2 Caving may occur especially where granular soils are encountered. The contractor should be prepared to use casing and should have it readily available at the commencement of drilling activities. Continuous observation of the drilling and installation of the elevator piston by the Geotechnical Engineer (a representative of Geocon West, Inc.) is required.

7.17.3 The annular space between the piston casing and drilled excavation wall should be filled with a minimum of 1½-sack slurry pumped from the bottom up. As an alternative, pea gravel may be utilized. The use of soil to backfill the annular space is not acceptable.

7.18 Temporary Excavations

7.18.1 Excavations of up to 20 feet in height may be required during construction, including foundation depths. The excavations are expected to expose artificial fill and alluvial soils, which are suitable for vertical excavations up to 5 feet in height where loose soils or caving sands are not present, and where not surcharged by adjacent traffic or structures.

7.18.2 Vertical excavations greater than 5 feet or where surcharged by existing structures will require sloping or shoring measures to provide a stable excavation. It is anticipated that stable excavations for construction of the proposed improvements can be achieved and maintained with sloping measures. Where sufficient space is available, temporary unsurcharged embankments could be sloped back at a uniform 1:1 (H:V) slope gradient or flatter, up to a maximum of 15 feet in height; or sloped at a uniform 1½:1 (H:V) gradient or flatter, up to a maximum height of 20 feet. A uniform slope does not have a vertical portion.

7.18.3 Performing continuous vertical excavations along property lines or adjacent to an existing structure could remove support from the property and/or structure which is not acceptable. If excavations in close proximity to an adjacent property line and/or structure are required, special excavation measures such as slot-cutting or shoring may be necessary in order to maintain lateral support of offsite improvements. Recommendations for special temporary excavation measures can be provided under separate cover if necessary.

7.18.4 Where temporary construction slopes are utilized, the top of the slope should be barricaded to prevent vehicles and storage loads at the top of the slope within a horizontal distance equal to the height of the slope. If the temporary construction slopes are to be maintained during the rainy season, berms are suggested along the tops of the slopes where necessary to prevent runoff water from entering the excavation and eroding the slope faces. The soils exposed in the cut slopes should be inspected during excavation by our personnel and the contractor’s competent person so that modifications of the slopes can be made if variations in the soil conditions occur. All excavations should be stabilized within 30 days of initial excavation.

7.19 Surcharge from Adjacent Structures and Improvements

7.19.1 Additional pressure should be added for a surcharge condition due to sloping ground, vehicular traffic or adjacent structures and should be designed for each condition as the project progresses.

7.19.2 It is recommended that line-load surcharges from adjacent wall footings, use horizontal pressures generated from NAV-FAC DM 7.2. The governing equations are:

$$For\ {}^{x}/_{H} \leq 0.4$$

$$\sigma_H(z) = \frac{0.20 \times \left(\frac{z}{H}\right)}{\left[0.16 + \left(\frac{z}{H}\right)^2\right]^2} \times \frac{Q_L}{H}$$

and

$$For\ {}^{x}/_{H} > 0.4$$

$$\sigma_H(z) = \frac{1.28 \times \left(\frac{x}{H}\right)^2 \times \left(\frac{z}{H}\right)}{\left[\left(\frac{x}{H}\right)^2 + \left(\frac{z}{H}\right)^2\right]^2} \times \frac{Q_L}{H}$$

where *x* is the distance from the face of the excavation or wall to the vertical line-load, *H* is the distance from the bottom of the footing to the bottom of excavation or wall, *z* is the depth at which the horizontal pressure is desired, Q_L is the vertical line-load and $\sigma_H(z)$ is the horizontal pressure at depth *z*.

7.19.3 It is recommended that vertical point-loads, from construction equipment outriggers or adjacent building columns use horizontal pressures generated from NAV-FAC DM 7.2. The governing equations are:

$$For\ {}^{x}/_{H} \leq 0.4$$

$$\sigma_H(z) = \frac{0.28 \times \left(\frac{z}{H}\right)^2}{\left[0.16 + \left(\frac{z}{H}\right)^2\right]^3} \times \frac{Q_P}{H^2}$$

and

$$For\ {}^{x}/_{H} > 0.4$$

$$\sigma_H(z) = \frac{1.77 \times \left(\frac{x}{H}\right)^2 \times \left(\frac{z}{H}\right)^2}{\left[\left(\frac{x}{H}\right)^2 + \left(\frac{z}{H}\right)^2\right]^3} \times \frac{Q_P}{H^2}$$

then

$$\sigma'_H\,(z) = \sigma_H(z)cos^2(1.1\theta)$$

where *x* is the distance from the face of the excavation/wall to the vertical point-load, *H* is distance from the outrigger/bottom of column footing to the bottom of excavation, *z* is the depth at which the horizontal pressure is desired, *Qp* is the vertical point-load, $\sigma_H(z)$ is the horizontal pressure at depth *z*, *Θ* is the angle between a line perpendicular to the excavation/wall and a line from the point-load to location on the excavation/wall where the surcharge is being evaluated, and $\sigma_H(z)$ is the horizontal pressure at depth *z*.

7.20 Stormwater Infiltration

7.20.1 During the site exploration on August 2, 2024, boring B4 was utilized to perform percolation testing. The boring was excavated to the depth indicated on the table shown on the following page. Slotted casing was placed in the boring, and the annular space between the casing and excavation was filled with gravel. The borings were then filled with water to pre-saturate the soils. The casing was refilled with water and percolation test readings were performed after repeated flooding of the cased excavation.

7.20.2 Based on the test results, the field-measured percolation rate and the design infiltration rate are provided in the following table. This value has been calculated in accordance with the Small Diameter Boring Infiltration Test Procedure in the County of Los Angeles Department of Public Works GMED *Guidelines for Design, Investigation, and Reporting Low Impact Development Stormwater Infiltration* (June 2021). Calculations of the percolation rate, reduction factor, and infiltration rate are provided on Figure 8.

BORING	INFILTRATION DEPTH (FT)	MEASURED PERCOLATION RATE (INCH/HOUR)	DESIGN INFILTRATION RATE (INCH/HOUR)
B4	29.5-40	0.16	0.05

7.20.3 Based on the test method utilized (Small Diameter Boring), the reduction factor RF_t may be taken as 1.0 in the infiltration system design. Based on the number of tests performed and consistency of the soils throughout the site, it is suggested that the reduction factor RF_v be taken as 1.0. In addition, provided proper maintenance is performed to minimize long-term siltation and plugging, the reduction factor RF_s may be taken as 1.0. Additional reduction factors may be required and should be applied by the engineer in responsible charge of the design of the stormwater infiltration system and based on applicable guidelines.

7.20.4 The results of the percolation testing indicated that the infiltration rate within the alluvium is less than the generally accepted minimally required infiltration rate of 0.3 inches per hour. Therefore, based on these considerations, a stormwater infiltration system is not recommended for this development. It is suggested that stormwater be retained, filtered and discharged in accordance with the requirements of the local governing agency.

7.21 Surface Drainage

7.21.1 Proper surface drainage is critical to the future performance of the project. Uncontrolled infiltration of irrigation excess and storm runoff into the soils can adversely affect the performance of the planned improvements. Saturation of a soil can cause it to lose internal shear strength and increase its compressibility, resulting in a change in the original designed engineering properties. Proper drainage should be maintained at all times.

7.21.2 All site drainage should be collected and controlled in non-erosive drainage devices. Drainage should not be allowed to pond anywhere on the site, and especially not against any foundation or retaining wall. The site should be graded and maintained such that surface drainage is directed away from structures in accordance with 2022 CBC 1804.4 or other applicable standards. In addition, drainage should not be allowed to flow uncontrolled over any descending slope. Discharge from downspouts, roof drains and scuppers are not recommended onto unprotected soils within 5 feet of the building perimeter. Planters which are located adjacent to foundations should be sealed to prevent moisture intrusion into the soils providing foundation support. Landscape irrigation is not recommended within 5 feet of the building perimeter footings except when enclosed in protected planters.

7.21.3 Positive site drainage should be provided away from structures, pavement, and the tops of slopes to swales or other controlled drainage structures. The building pad and pavement areas should be fine graded such that water is not allowed to pond.

7.21.4 Landscaping planters immediately adjacent to paved areas are not recommended due to the potential for surface or irrigation water to infiltrate the pavement's subgrade and base course. Either a subdrain, which collects excess irrigation water and transmits it to drainage structures, or impervious above-grade planter boxes should be used. In addition, where landscaping is planned adjacent to the pavement, it is recommended that consideration be given to providing a cutoff wall along the edge of the pavement that extends at least 12 inches below the base material.

7.22 Plan Review

7.22.1 Grading, foundation, and, if necessary, shoring plans should be reviewed by the Geotechnical Engineer (a representative of Geocon West, Inc.), prior to finalization to verify that the plans have been prepared in substantial conformance with the recommendations of this report and to provide additional analyses or recommendations.

LIMITATIONS AND UNIFORMITY OF CONDITIONS

1. The recommendations of this report pertain only to the site investigated and are based upon the assumption that the soil conditions do not deviate from those disclosed in the investigation. If any variations or undesirable conditions are encountered during construction, or if the proposed construction will differ from that anticipated herein, Geocon West, Inc. should be notified so that supplemental recommendations can be given. The evaluation or identification of the potential presence of hazardous or corrosive materials was not part of the scope of services provided by Geocon West, Inc.

2. This report is issued with the understanding that it is the responsibility of the owner, or of his representative, to ensure that the information and recommendations contained herein are brought to the attention of the architect and engineer for the project and incorporated into the plans, and the necessary steps are taken to see that the contractor and subcontractors carry out such recommendations in the field.

3. The findings of this report are valid as of the date of this report. However, changes in the conditions of a property can occur with the passage of time, whether they are due to natural processes or the works of man on this or adjacent properties. In addition, changes in applicable or appropriate standards may occur, whether they result from legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated wholly or partially by changes outside our control. Therefore, this report is subject to review and should not be relied upon after a period of three years.

4. The firm that performed the geotechnical investigation for the project should be retained to provide testing and observation services during construction to provide continuity of geotechnical interpretation and to check that the recommendations presented for geotechnical aspects of site development are incorporated during site grading, construction of improvements, and excavation of foundations. If another geotechnical firm is selected to perform the testing and observation services during construction operations, that firm should prepare a letter indicating their intent to assume the responsibilities of project geotechnical engineer of record. A copy of the letter should be provided to the regulatory agency for their records. In addition, that firm should provide revised recommendations concerning the geotechnical aspects of the proposed development, or a written acknowledgement of their concurrence with the recommendations presented in our report. They should also perform additional analyses deemed necessary to assume the role of Geotechnical Engineer of Record.

APPENDIX A

APPENDIX A

FIELD INVESTIGATION

The site was explored on August 1, 2024, by excavating four 7-inch diameter borings to depths between approximately 36½ and 41½ feet below existing ground surface using a truck-mounted, hollow-stem auger drilling machine and performing percolation testing. Representative and relatively undisturbed samples were obtained by driving a 3-inch O. D. California Modified Sampler into the "undisturbed" soil mass with blows from a 180-pound auto-hammer falling 30 inches. The California Modified Sampler was equipped with 1-inch high by 2$^3/_8$-inch diameter brass sampler rings to facilitate soil removal and testing. Bulk samples were also obtained.

The soil conditions encountered in the borings were visually examined, classified and logged in general accordance with the Unified Soil Classification System (USCS). The logs of the borings are presented in Appendix A. The logs depict the soil and geologic conditions encountered and the depth at which samples were obtained. The logs also include our interpretation of the conditions between sampling intervals. Therefore, the logs contain both observed and interpreted data. We determined the lines designating the interface between soil materials on the logs using visual observations, penetration rates, excavation characteristics and other factors. The transition between materials may be abrupt or gradual. Where applicable, the logs were revised based on subsequent laboratory testing. The approximate locations of the borings are shown on Figure 2.

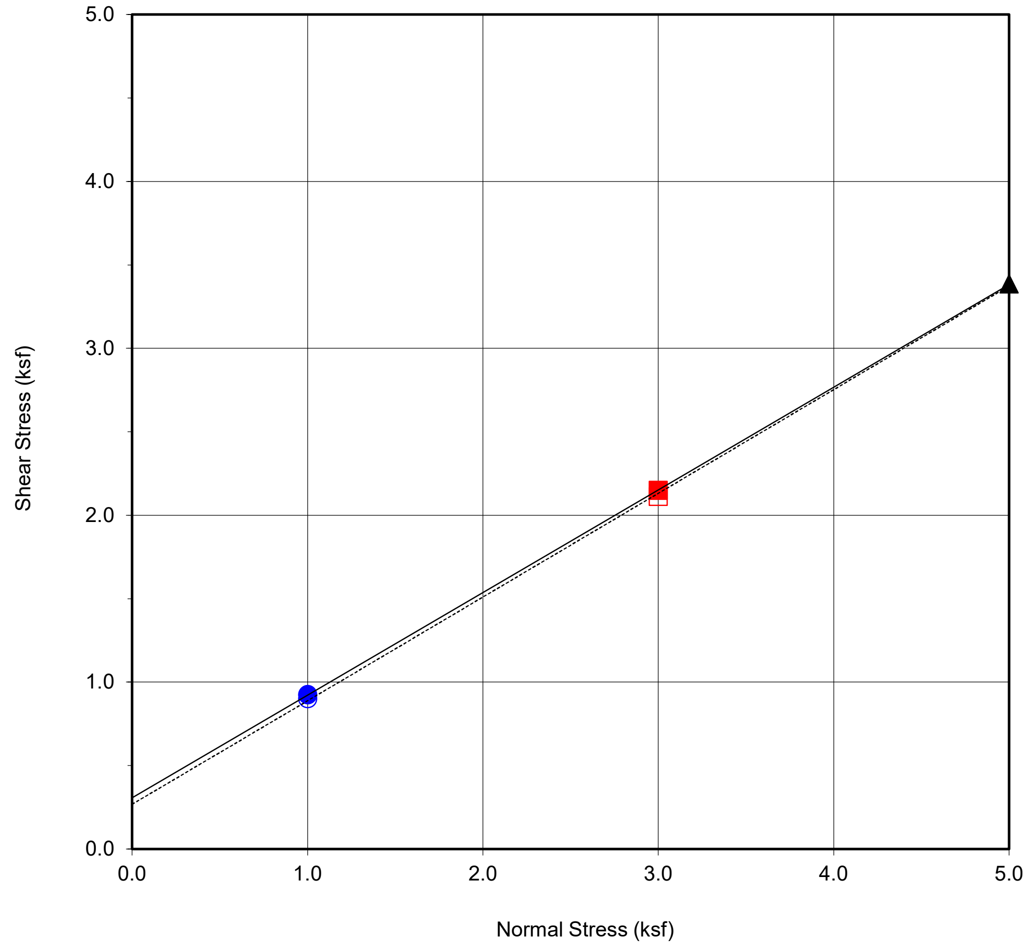
APPENDIX B

APPENDIX B

LABORATORY TESTING

Laboratory tests were performed in accordance with generally accepted test methods of the "American Society for Testing and Materials (ASTM)", or other suggested procedures. Selected samples were tested for direct shear strength, consolidation and expansion characteristics, maximum dry density and optimum moisture content relationship, corrosivity, and in-place dry density and moisture content. The results of the laboratory tests are summarized in Figures B1 through B26.



Boring No.	**B1**
Sample No.	**B1@0-5**

Prepared for:

Slauson Investors, LLC

TABLE OF CONTENTS

1.0 OVERVIEW

The proposed development site is located at 100 Corporate Pointe in the City of Culver City (Project Site) and contains approximately 4.49-acre of land. The Project Site is bounded by Slauson Avenue to the North, and Buckingham Parkway to the South and East.

1.1 Existing Conditions

The existing Project Site is composed of two parcels containing the following improvements:

- Three-story, 112,276 sf office building
- Three-level parking garage.
- Open surface parking lot.

1.2 Proposed Conditions

All improvements are proposed to be removed, and a new 635,286 square foot, five- to seven-story mixed-use building, reaching up to 67 feet in height, is proposed to be developed (Project), that contains the following uses:

- 430,971 square feet of residential space comprised of 351 units including; 73 studio units, 116 one-bedroom units, 23 one-bedroom plus den units, 120 two-bedroom units, and 19 three-bedroom units (30 of the 351 units will be restricted affordable units for Low Income Households).
- 7,071 square feet of first- and second-floor commercial spaces including retail/cafe uses along Buckingham Parkway.
- 195,856 square feet of parking garage space totaling 524 vehicle parking spaces on the second- through seventh-floors.

2.0 SCOPE OF ANALYSIS

This analysis provides supporting information for the Project's environmental review pursuant to the California Environmental Quality Act (CEQA), and documents the results of Psomas' research regarding existing nearby utility infrastructure for the Project.

3.0 EXISTING UTILITIES AND REGULATORY FRAMEWORK

3.1 Existing Utility Providers

The following is a list of existing utilities and their service providers that are within the proximity of the Project Site determined from a DigAlert request:

- Storm Drain – City of Culver City and County of Los Angeles Flood Control District
- Sanitary Sewer – City of Culver City
- Water – Golden State Water Company via Metropolitan Water District
- Electricity – Southern California Edison and Los Angeles Department of Water and Power
- Natural Gas – Southern California Gas Company
- Telecommunications -
    - Spectrum/Charter
    - Ting Fiber
    - AT&T Distribution
    - Crown Castle
    - Lumen Technologies
    - Verizon Business

Note that existing storm drain infrastructure, as well as the Project's potential impacts on this infrastructure, is discussed in the Water Resources Technical Memo prepared for the Project by Psomas on February 27, 2025.

3.2 Regulatory Framework

3.2.1 Water

Golden State Water Company and Metropolitan Water District are responsible for providing water supply to the City while complying with Local and State regulations.
Below are the State and Regional water supply regulations:

- California Code of Regulations (CCR), Title 20, Chapter 4, Article 4, Section 1605 establishes water efficiency standards for all new plumbing fixtures and Section 1608 prohibits the sale of fixtures that do not comply with the regulations.

- 2022 California Green Building Standards Code, CCR, Title 24, Part 11 (CALGreen), effective on January 1, 2023, requires a water use reduction of 20 percent below the baseline cited in the CALGreen code book.
- The California Urban Water Management Planning Act requires every urban water supplier, which provides water directly or indirectly to more than 3,000 customers or supplying more than 3,000 acre-feet of water annually, to prepare and adopt an Urban Water Management Plan (UWMP) and Water Shortage Contingency Plan (WSCP) to the California Department of Water Resources (DWR) every five years. Golden State Water Company adopted the 2020 Urban Water Management Plan and 2020 Water Shortage Contingency Plan for the Culver City System on July 19, 2021.
- Metropolitan Water District (MWD) official reports and policies as outlined in its Regional UWMP, Water Surplus and Drought Management Plan, Water Supply Allocation Plan, and Integrated Resources Plan.
- Senate Bill 610, approved on October 9, 2001, requires land use agencies to perform a detailed analysis of available water supply when approving large developments. Historically, public water suppliers (PWS) simply provided a "will - serve" letter to developers. For certain projects subject to CEQA review, SB 610 requires that urban water suppliers prepare a WSA to determine whether the project water demand is included as part of the most recently adopted UWMP. All projects that meet any of the following criteria require a WSA:

    - A proposed residential development of more than 500 dwelling units.
    - A proposed shopping center or business establishment of more than 500,000 square feet of floor space or employing more than 1,000 persons
    - A proposed commercial office building of more than 250,000 square feet of floor space or employing more than 1,000 persons
    - A proposed hotel or motel of more than 500 rooms
    - A proposed industrial, manufacturing, or processing plant or industrial park of more than 40 acres of land, more than 650,000 square feet of floor area, or employing more than 1,000 persons
    - A mixed-use project that falls in one or more of the above-identified categories

- o A project not falling in one of the above-identified categories but that would demand water equal or greater than the amount required by a 500-dwelling unit project.

If a proposed project's estimated total water demand exceeds 84 acre-feet per year (AFY) or 75,000 gallons per day (GPD), which is the water demand associated with 500 two-bedroom multi-family residential dwelling units, a WSA would generally be required. As described below, the currently proposed project would not exceed this threshold, and therefore, a WSA will not be required.

3.2.2 Sewer

Culver City's wastewater infrastructure relies on the City of Los Angeles Hyperion Wastewater Treatment Reclamation Plant located in Playa del Rey, which is projected to have adequate capacity to continue to serve the city. Sewage is conveyed through a series of gravity mains and lift stations, and ultimately through trunk sewers to the centralized process site. All the wastewater collected at the site is either recycled or discharged into the Pacific Ocean via a 5-mile submerged outfall pipe in Santa Monica Bay.

On January 25, 2019, the Los Angeles Bureau of Sanitation completed its SSMP 3.0 which described the Hyperion Sanitary Sewer System in accordance with WDRs adopted by the State Water Resources Control Board (SWRCB) on May 2, 2006. Section 8 – System Evaluation and Capacity Assurance Plan states that the City's collection system has enough capacity to handle peak dry-weather flows. This SSMP also states that there have been significant reductions in wastewater flows conveyed by the City's collection system over the past 10 years. This report cites that Hyperion treatment facility has gone from treating 350 million gallons of water per day (MGD) to 260 MGD within this 10-year period due to water conservation measures in conjunction with an ongoing drought condition in the State. The Hyperion facility's total treatment design capacity is 450 MGD, well in excess of current flows.

The Culver City Municipal Code (CCMC) includes regulations that allow the City to assure available sewer capacity for new projects and collect fees for needed improvements to the infrastructure system. During environmental and entitlement phases the City has determined that a Sewer Line Analysis can be performed which verifies the sewer capacity of the adjacent sewer mains. This preliminary evaluation reviews potential impacts to the wastewater system for the Project. It will also determine cumulative impacts and guide the planning process for any future sewer improvement projects needed to provide future capacity as the City grows and develops. For the purpose of this Utilities Technical Memorandum, a Sewer Line Analysis will be used for evaluating sewer impacts.

CCMC Section 5.02.035 requires the payment of fees for new connections to the sewer system to assure the sufficiency of sewer infrastructure. CCMC Section 5.02.215 states that a fee, which shall be determined by the Director of Public Works based upon rates established in § 5.02.220 hereafter referred to as the sewerage facilities charge, shall be paid by the owner thereof to the City. Fees paid to the Sewerage Facilities Charge are deposited in the City's Sewerage Facilities Fund for financing the construction of outlet sewers for which the City is obligated by accepting charges in accordance with § 5.02.220, subject to Council approval. Fees paid to the Sewerage Facilities Charge are also deposited into City's Sewer Construction and Maintenance Fund, which shall be expended for the purpose of financing the cost of acquisition, construction, reconstruction, operation, maintenance, alteration, replacement and repair of property and facilities for the collection, treatment and disposal of sewage for the City of Culver City.

3.2.3 Electricity

Every three years, the State of California adopts new building code standards that are codified in Title 24 of the California Code of Regulations, also known as the California Building Standards Code. The current (2022) standards effective date is January 1, 2023, and it applies for new construction of both residential and non-residential buildings.

While the State sets the minimum building standards, local jurisdictions can adopt more stringent local building standards (Reach Codes) based on unique local climatic, geologic, and topographic conditions. In January 2020, the City of Culver City kicked off the policy development process to explore local building energy efficiency and electrification reach codes. The proposed regulations will aim to reduce carbon emissions associated with building construction, lower operating costs, as well as improve indoor air quality and safety of the City's building stock through electrification. Title 24 is implemented through the local plancheck and permit process.

According to recent filings with the California Public Utilities Commission (CPUC), Southern California Edison (SCE) forecasts a 23% increase in electricity demand for 2025, requesting a base revenue requirement of $10.27 billion, representing a $1.90 billion increase compared to 2024. The proposed 23% increase is a substantial jump compared to previous years. This forecast is part of SCE's General Rate Case (GRC) application filed with the CPUC, which also includes projected increases for 2026, 2027, and 2028. The increase in demand is likely driven by factors like increasing electrification of transportation, growing data center usage, and potential industrial sector expansion.

3.2.4 Natural Gas

As a public utility, the Southern California Gas Company (the Gas Co.) is under jurisdiction of the California Public Utilities Commission. As mentioned in section 3.2.3, Title 24 of the CCR regulates energy consumption in new construction projects. The standards regulate energy consumed in buildings for heating, cooling, ventilation, and lighting. Title 24 is implemented through the local plancheck and permit process.

The Gas Co.'s 2024 Gas Report indicates that under the Average Demand case, gas demand for the entire state is projected to average 4,931 million cubic feet of gas per day (MMcf/d) in 2024 decreasing to 3,593 MMcf/d by 2040, a decline of 2.0 percent per year, whereas the commercial demand is expected to decrease at an annual average rate of 1.6 percent and the industrial demand is expected to decrease at an annual average rate of 0.4 percent. This is mainly due to increased efficiency of power plants and the statewide efforts to use renewable sources of energy for electricity generation.

3.2.5 All Electric Building Ordinance

In January 2020, the City of Culver City kicked off the policy development process to explore local building energy efficiency and electrification reach codes. The proposed regulations aim to reduce carbon emissions associated with building construction, lower operating costs, as well as improve indoor air quality and safety of the City's building stock through electrification. An all-electric building typically contains no combustion equipment, plumbing for combustion equipment, gas piping, or fuel gas serving any use. The city has developed a Building Initiative for Low-Emissions Development (BUILD) Program that encourages all-electric new homes. The program offers incentives and technical assistance for advanced building design, including helping low-income homeowners adopt all-electric technologies. It supports the decarbonization of residential buildings.

3.2.6 Telecommunications

As a private utility, telecommunications service providers operate under the jurisdiction of the California Public Utilities Commission. Any upgrades, additions, and connections needed to existing infrastructure will be made by these providers in compliance with all appropriate regulatory requirements.

4.0 WATER

4.1 Existing Condition

The water infrastructure in the vicinity of the Project Site includes an existing 12-inch water main in Slauson Avenue to the north, an existing 14-inch water main in Buckingham Parkway to the east, and an existing 12-inch water main in Buckingham Parkway to the south. These Golden State Water Company (GSWC) distribution lines are all supplied by a 48-inch Metropolitan Water District transmission line located in Slauson Avenue via a connection vault located near the northeast corner of the Project Site. There are two existing fire hydrants on the south side of Slauson Avenue, two existing fire hydrants on the west side Buckingham Parkway and one existing fire hydrant on the north side of Buckingham Parkway adjacent to the Project Site.

4.2 Proposed Condition

A water will serve letter was issued by GSWC on January 29, 2025, confirming the project can be supplied with water. The Project's anticipated water demand was calculated using the city-approved City of Los Angeles sewer generation rates. The Project is expected to generate the following water demands:

Table 1: Existing and Proposed Water Demand Estimation

Existing Office Building:				
Description	**Quantity**	**Units**	**Average Daily Demand Rate (GPD)[(a)]**	**Total Average Daily Demand (GPD)**
Office Building	112,276	S.F.	120/1000 GSF	13,473
Parking Garage	80,256	S.F.	20/1000 GSF	1,605
			Total:	**15,078**

Proposed Mixed Use Development				
Description	**Quantity**	**Units**	**Daily Average Demand Rate (GPD)[(a)]**	**Total Average Daily Demand (GPD)**
Res.: Apt. /Studio	73	D.U.	75 / D.U.	5,475
Res.: Apt. /1-BD	116	D.U.	110 / D.U.	12,760
Res.: Apt. /1-BD+Den	23	D.U.	110 / D.U.	2,530
Res.: Apt. /2-BD	120	D.U.	150 / D.U.	18,000
Res.: Apt. /3-BD	19	D.U.	190 / D.U.	3,610
	351			
Retail	7,071	S.F.	25 /1000 GSF	177
Lobby/Lounge	3,264	S.F.	50 /1000 GSF	163
Amenity[(b)]	6,537	S.F.	50 /1000 GSF	327
Parking Garage	195,856	S.F.	20 /1000 GSF	3,917
			Total:	**46,959**
			Net Total:[(c)]	**31,881**

Assumptions:
(a) Average Daily Flow Demands are based on sewage generation rates from the City of Los Angeles SFC Sewer Generation Factor Table dated April 6, 2012.
(b) The required generation factor for the Amenity areas is unclear from the city generation factor table. 50gpd/1000gsf is assumed.
(c) The net total is the difference between the summation of the Proposed usage and the Existing usage average daily flow.

Using the City's sewer generation rates, the Project's total expected water demand is 46,959 GPD, and its net expected water demand is 31,881 GPD. Domestic water is expected to be the main contributor of water consumption for the Project; however, fire water demand will create a much greater immediate impact on the water network, and therefore is the primary means for analyzing infrastructure capacity. Per e-mail correspondence with GSWC, the Project will be served by the existing 14-inch main line in Buckingham Parkway to the east. This main has a pressure zone break at a PRV station north of Canterbury Drive. The existing 4-inch domestic water service currently serving

100 Corporate Pointe is connected to the Culver City main pressure zone on this 14-inch main south of Canterbury Drive, and has a static system pressure of approximately 50 psi (+/-10 psi) at the service connection location. The existing 12-inch main in Buckingham Parkway south of the Project connects to the 14-inch main south of Canterbury Drive, and has the same static system pressure of approximately 50 psi (+/-10 psi). The 12-inch main in Slausen Avenue is in a higher pressure zone, and has a static system pressure of approximately 70 psi (+/-10 psi) in the section adjacent to the Project.

4.3 Significant Thresholds – Water

In accordance with the CEQA Guidelines Appendix G (Appendix G), the Project would have a significant impact related to water supply and infrastructure if it would:

- Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which would cause significant environmental effects; or
- [NOT] Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry, and multiple dry years.

4.4 Project Impacts

4.4.1 Construction

Water demand for construction of the Project would be required for dust control, cleaning of equipment, excavation/export, removal, and recompaction, etc. The contractor will bring their own portable bathroom and wash stations which will have their own self-contained water source and wastewater storage. They will not connect to the adjacent sewer or water infrastructure for those uses. Based on a review of construction projects of similar size and duration, a conservative estimate of construction water use would be around 1,000 gallons per day (GPD). Considering that the Project's expected operational water demands are 46,959 GPD, which can be met by existing GSWC water infrastructure and supplies, the temporary water usage is far less than the existing water demand and the proposed water demand and therefore poses no significant impacts.

The Project will require construction of new, on-site water laterals to serve the new building and facilities of the proposed Project. Construction impacts associated with the installation of water lateral lines would primarily involve trenching to place the water laterals and meters below ground and would be limited to on-site water distribution, and minor off-site work associated with possible connections to the public main (in the event that the existing public meters and laterals are not adequate to serve the Project). Prior to ground disturbance, Project contractors would coordinate with GSWC to identify the locations and depth of all lines. During such construction activities, emergency access to the Project Site, as well as existing vehicular and non-vehicular traffic flow, would be preserved by the construction management plan approved by the City for the Project. Further, GSWC would be notified in advance of proposed ground disturbance activities to avoid water lines and disruption of water service. Therefore, Project impacts on water infrastructure associated with construction activities would be less than significant.

4.4.2 Operation

The Community Risk Reduction Division interprets, applies and enforces the Culver City Municipal Code, California Fire Code, and National Fire Protection Association (NFPA) Codes and Standards.

Pursuant to California Fire Code Section 501.3, construction documents for proposed fire apparatus access, location of fire lanes, security gates across fire apparatus access roads and construction documents and hydraulic calculations for fire hydrant systems shall be submitted to the fire department for review and approval prior to construction. In addition, Section 507.3 refers to Appendix B regarding Fire Flow requirements according to building construction type and square footage. Table B105.1(2) indicates a required fire flow requirement for the Project of 1,500 gallons per minute for a 4-hour duration at 20 psi minimum pressure based on 425,433 square feet of Group R-2, Type IIIA construction (including a 75% reduction allowance for automatic sprinklers).

There are two existing fire hydrants on the south side of Slauson Avenue on the north side of the Project site, two existing fire hydrants on the west side of Buckingham Parkway on the east side of the Project site and one existing fire hydrant on the north side of Buckingham Parkway on the south side of the Project site. Given the water pressures provided by GSWC indicated in Section 4.2, the existing infrastructure is sufficient to meet the Project's water demands.

5.0 SEWER

5.1 Existing Condition

There is an existing 8-inch public sewer main in Buckingham Parkway southeast of the Project Site that serves the existing site. There is also an existing 8-inch public sewer main in Slauson Avenue north of the site. The existing design capacity of the Hyperion Water Plant is approximately 450 MGD as stated in the California Regional Water Quality Control Board Order R4-2005-0020 dated April 7, 2005.

5.2 Proposed Condition

The table below shows the proposed Project's wastewater flows by land use type. The Project's anticipated sewer demand was calculated using the city-approved City of Los Angeles sewer generation rates. The Project is expected to generate the following sewer demands:

Table 2: Existing and Proposed Demand Estimation

Existing Office Building				
Description	**Quantity**	**Units**	**Average Daily Demand Rate (GPD)[(a)]**	**Total Average Daily Demand (GPD)**
Office Building	112,276	S.F.	120/1000 GSF	13,473
Parking Garage	80,256	S.F.	20/1000 GSF	1,605
			Total:	**15,078**

Proposed Mixed Use Development				
Description	**Quantity**	**Units**	**Daily Average Demand Rate (GPD)[(a)]**	**Total Average Daily Demand (GPD)**
Res.: Apt. /Studio	73	D.U.	75 / D.U.	5,475
Res.: Apt. /1-BD	116	D.U.	110 / D.U.	12,760
Res.: Apt. /1-BD+Den	23	D.U.	110 / D.U.	2,530
Res.: Apt. /2-BD	120	D.U.	150 / D.U.	18,000
Res.: Apt. /3-BD	19	D.U.	190 / D.U.	3,610
	351			
Retail	7,071	S.F.	25 /1000 GSF	177
Lobby/Lounge	3,264	S.F.	50 /1000 GSF	163
Amenity[(b)]	6,537	S.F.	50 /1000 GSF	327
Parking Garage	195,856	S.F.	20 /1000 GSF	3,917
			Total:	**46,959**
			Net Total:[(c)]	**31,881**

Assumptions:
(a) Average Daily Flow Demands are based on sewage generation rates from the City of Los Angeles SFC Sewer Generation Factor Table dated April 6, 2012.
(b) The required generation factor for the Amenity areas is unclear from the city generation factor table. 50gpd/1000gsf is assumed.
(c) The net total is the difference between the summation of the Proposed usage and the Existing usage average daily flow.

Using the City's sewer generation rates, the Project's total expected sewer demand is 46,959 GPD, and its net expected sewer demand is 31,881 GPD. The Project will likely require multiple 6-inch sewer laterals to connect to main lines in the street.

5.3 Significant Thresholds – Sewer

In accordance with the CEQA Guidelines Appendix G (Appendix G), the Project would have a significant impact related to wastewater if it would:

- Require or result in the relocation or construction of new or expanded wastewater treatment facilities, the construction or relocation of which could cause significant environmental effects.
- Result in a determination by the wastewater treatment provider, which serves, or may serve, the project that [does not have] adequate capacity to serve the project's projected demand in addition to the provider's existing commitments.

5.4 Project Impacts

5.4.1 Construction

Construction activities for the Project would not result in wastewater generation as construction workers would typically utilize portable restrooms, which would not contribute to wastewater flows to the local wastewater system. Thus, wastewater generation from Project construction activities is not anticipated to cause a measurable increase in wastewater flows. Therefore, the Project construction impacts to the wastewater system would be less than significant.

The Project will require construction of new wastewater infrastructure to serve the new buildings and facilities of the proposed Project. Construction impacts associated with wastewater infrastructure would primarily be confined to trenching for miscellaneous utility lines and connections to public infrastructure. Installation of wastewater infrastructure will be limited to on-site wastewater distribution, and minor off-site work associated with connections to the public main. Although no upgrades to the public main are anticipated, minor off-site work is required to connect to the public main. Therefore, as part of the Project, a construction management plan would be implemented to reduce any temporary pedestrian and traffic impacts during construction, including maintaining lanes of travel and ensuring safe pedestrian access and adequate emergency vehicle access. Should perched groundwater be encountered during construction, it would be directed to a dewatering system and discharged in accordance with all applicable rules and regulations under the National Pollutant Discharge Elimination System Construction General Permit (NPDES CGP) regulations and the City's grading permit conditions. Overall, when considering impacts resulting from the installation of any required wastewater infrastructure, all impacts are of a relatively short-term duration (i.e., months) and would cease to occur once the installation is complete. Therefore, Project impacts on wastewater associated with construction activities would be less than significant.

5.4.2 Operation

The Project's proposed total wastewater generation is approximately 46,959 GPD (Table 2). This is far less than one percent of the Hyperion Water Reclamation Plant's capacity where the Project's wastewater would be treated. Consequently, impacts on wastewater treatment capacity are less than significant.

The half-full capacity of the 8-inch sewer line in Buckingham Parkway at 3.72% slope is 753,147 GPD. The Project's gross sewage generation is approximately 46,959 GPD which represents approximately 12.6% of the pipe's half-full capacity. At the request of the city, a sewer flow monitoring effort is required to determine the existing flow in the city's sewer main that will receive flows from the Project. Once this information is received, the total proposed cumulative flow in the existing pipe can be determined, and the resulting capacity can be calculated. Because the Project will be connecting near the upstream end of the public sewer main, and the existing number of residential units being served upstream of the Project is significantly less than the proposed number of units comprising the Project, the impacts on wastewater infrastructure would be less than significant.

6.0 ELECTRICITY

6.1 Existing Condition

The existing power service in the vicinity of the Project is supplied by Southern California Edison Company (SCE). Design survey information and physical inspection reveal the presence of SCE vaults within the property boundary, confirming that SCE provides service to the existing site.

6.2 Proposed Condition

The following table provides the Project's expected electricity consumption:

Table 3: Estimated Project Electricity Demand

Land Use	Size	Total (kWh/yr)[1]
Multi-Family Residential	351 du	----
Commercial	7,071 sf	----
Parking	195,856 sf	----
		----

kWh = kilowatt-hours *yr = year*

[1] *Calculated via CalEEMod (refer to CEQA technical memorandum prepared for Project).*

These figures are preliminary estimates of electricity usage. The proposed energy could change as sustainability measures are incorporated.

6.3 Significant Thresholds – Electricity

Appendix G of the CEQA Guidelines was prepared in response to the requirement in Public Resources Code Section 21100(b)(3), which asks if the Project would require or result in the relocation of construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction of which could cause significant environmental effects.

6.4 Project Impacts

A will serve letter was received by SCE dated March 31, 2025. Based on similar projects of this size, there are no service upgrades expected at this time.

7.0 NATURAL GAS

7.1 Existing Condition

The existing natural gas service in the vicinity of the Project site is supplied by Southern California Gas Company (SCG) as determined from a DigAlert request. A utility record plan and will serve letter request was sent to SCG on December 19, 2024. Psomas has yet to receive a response, but will continue to follow-up. As such, the location and size of SCG's existing infrastructure is unknown at this time.

7.2 Proposed Condition

As stated in the previous section, Psomas has yet to receive record plans or a will serve letter from SCG confirming natural gas availability to serve the Project. The lateral connection size and location for this site are unknown. However, no upgrades to the existing gas system are expected. The Project will be primarily electric, with all residential units fully electric in alignment with the City's Building Initiative for Low-Emissions Development (BUILD) Program, which promotes decarbonization through all-electric design and offers incentives and technical assistance for advanced building systems. To serve the outdoor amenities, one commercial gas meter is planned and for potential future service to the retail space, a stub-out will be provided without a gas meter.

7.3 Significant Thresholds – Natural Gas

In accordance with the CEQA Guidelines Appendix G, the Project would have significant impact related to natural gas infrastructure if it would:

- Require or result in the relocation or construction of new or expanded natural gas facilities, the construction or relocation of which could cause significant environmental effects.

7.4 Project Impacts

As stated in previous sections, a will serve letter request was sent to SCG on December 19, 2024. Psomas has yet to receive a response, but will continue to follow-up. Based on similar projects of this size, there are no service upgrades expected at this time.

8.0 TELECOMMUNICATIONS FACILITIES

8.1 Existing Condition

The existing telecommunications services in the vicinity of the Project site are supplied by various utilities providers such as AT&T Distribution, Spectrum, Ting, Lumen, Crown Castle and Verizon Business. These companies were found through a DigAlert search and were contacted via a Record Utilities Request. There are no existing cellular towers located adjacent to the Project Site and no cellular towers are proposed by the Project.

8.2 Proposed Condition

The proposed connection size and locations for telecom connections for this site are unknown currently. No upgrades to the telecom systems are expected. These connections will be constructed by the private utility service provider and will follow all appropriate regulatory requirements for such a connection. New service point connections to provide telecommunications services to the new buildings will be provided in conformance with all applicable federal, state, and County requirements. It is expected that the Project would not result in the relocation or expansion of telecommunication facilities.

8.3 Significant Thresholds – Telecommunications

In accordance with the State CEQA Guidelines Appendix G (Appendix G), the Project would have a significant impact related to telecommunications infrastructure if it would:

- Require or result in the relocation or construction of new or expanded telecommunications facilities, the construction or relocation of which could cause significant environmental effects.

8.4 Project Impacts

A will serve letter request was sent to Spectrum/Charter, Ting Fiber, AT&T Distribution, Crown Castle, Lumen Technologies and Verizon Business on December 19, 2024.

- Spectrum/Charter has provided a may serve letter dated December 23, 2024 noting that the Project Site is within an area that Charter may lawfully serve, but will not commit to providing service until they conduct a survey of the property.

- Ting Fiber responded via e-mail dated January 15, 2025 that they do not currently serve the existing building, but service from Ting Fiber would be available to serve the new Project.
- ATT Distribution has provided a will serve letter dated January 22, 2025 indicating that they will be providing service to the Project.
- Crown Castle responded via e-mail dated January 29, 2025 that they do not provide will serve letters, but did indicate that Crown Castle is currently serving the existing building and would like to continue serving the new Project with their dedicated fiber service.
- Lumen Technologies responded via e-mail dated January 29, 2025 that they have facilities within the construction area of the Project, but did not provide any commitment to providing service. A determination as to whether there will be any conflicts with their existing facilities requires a plan submittal for their review.
- Verizon Business responded via e-mail dated January 30, 2025 that they have existing facilities in the area of the Project, but did not provide any commitment to providing service. A determination as to whether there will be any conflicts with their existing facilities requires a plan submittal for their review.

Based on similar projects of this size, there are no service upgrades expected at this time.

9.0 LEVEL OF SIGNIFICANCE

Based on the analysis of the proposed Project, no significant impacts have been identified regarding water, sewer, electrical, telecommunication, and natural gas facilities.

LEGAL DESCRIPTION

THAT CERTAIN LAND IN THE STATE OF CALIFORNIA, COUNTY OF LOS ANGELES, DESCRIBED AS FOLLOWS:

PARCEL 1:
LOTS 15 AND 16 OF TRACT 33152, IN THE CITY OF CULVER CITY, AS PER MAP RECORDED IN BOOK 1020, PAGES 31 TO 35 INCLUSIVE OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

EXCEPT ALL OIL, OIL RIGHTS, MINERAL RIGHTS, NATURAL GAS, NATURAL GAS RIGHTS, AND OTHER HYDROCARBONS BY WHATSOEVER NAME KNOWN WITHIN OR UNDER SAID LAND, TOGETHER WITH THE PERPETUAL RIGHT OF DRILLING, MINING, EXPLORING AND OPERATING THEREFORE AND REMOVING THE SAME FROM SAID LAND OR ANY OTHER LAND, INCLUDING THE RIGHT TO WHIPSTOCK OR DIRECTIONALLY DRILL AND MINE FROM LANDS OTHER THAN SAID LAND, OIL OR GAS WELLS, TUNNELS AND SHAFTS INTO, THROUGH OR ACROSS THE SUBSURFACE OF SAID LAND, AND TO BOTTOM SUCH WHIPSTOCKED OR DIRECTIONALLY DRILLED WELLS, TUNNELS AND SHAFTS UNDER AND BENEATH OR BEYOND THE EXTERIOR LIMITS THEREOF, AND TO REDRILL, RETUNNEL, EQUIP, MAINTAIN, REPAIR, DEEPEN AND OPERATE ANY SUCH WELLS OR MINES, WITHOUT, HOWEVER, THE RIGHT TO DRILL, MINE, EXPLORE AND OPERATE THROUGH THE SURFACE OR THE UPPER 100 FEET OF THE SUBSURFACE OF SAID LAND OR OTHERWISE IN SUCH MANNER AS TO ENDANGER THE SAFETY OF ANY HIGHWAY THAT MAY BE CONSTRUCTED ON SAID LANDS, AS EXCEPTED BY HOME SAVINGS AND LOAN ASSOCIATION, IN DEED RECORDED JULY 15, 1971 AS INSTRUMENT NO. 3551, IN BOOK D5125 PAGE 491, OFFICIAL RECORDS.

ALSO EXCEPT ALL OIL, GAS, HYDROCARBON SUBSTANCES AND MINERALS OF EVERY KIND AND CHARACTER LYING MORE THAN 500 FEET BELOW THE SURFACE OF SAID LAND, TOGETHER WITH THE RIGHT TO DRILL INTO, THROUGH, AND TO USE AND OCCUPY ALL PARTS OF SAID LAND LYING MORE THAN 500 FEET BELOW THE SURFACE THEREOF FOR ANY AND ALL PURPOSES INCIDENTAL TO THE EXPLORATION FOR THE PRODUCTION OF OIL, GAS, HYDROCARBON SUBSTANCES, OR MINERALS FROM SAID LAND OR OTHER LANDS, BUT WITHOUT, HOWEVER, ANY RIGHT TO USE EITHER THE SURFACE OF SAID LAND OR ANY PORTION OF SAID LAND WITHIN 500 FEET OF THE SURFACE FOR ANY PURPOSE OR PURPOSES WHATSOEVER, AS RESERVED BY THE CULVER CITY REDEVELOPMENT AGENCY, A PUBLIC BODY CORPORATE AND POLITIC, IN DEED RECORDED DECEMBER 23, 1981 AS INSTRUMENT NO. 81-1255468.

ALSO EXCEPT ALL OIL, GAS, HYDROCARBON SUBSTANCES AND MINERALS OF EVERY KIND AND CHARACTER, LYING MORE THAN 500 FEET BELOW THE SURFACE OF SAID LAND, TOGETHER WITH THE RIGHT TO DRILL INTO, THROUGH AND TO USE AND OCCUPY ALL PARTS OF SAID LAND LYING MORE THAN 500 FEET BELOW THE SURFACE THEREOF FOR ANY AND ALL PURPOSES INCIDENTAL TO THE EXPLORATION FOR THE PRODUCTION OF OIL, GAS, HYDROCARBON SUBSTANCES OR MINERALS FROM SAID LAND OR OTHER LANDS, BUT WITHOUT, HOWEVER, ANY RIGHT TO USE THE SURFACE OF SAID LAND OR ANY PORTION OF SAID LAND WITHIN 500 FEET OF THE SURFACE FOR ANY PURPOSE OR PURPOSES WHATSOEVER, AS EXCEPTED BY THE CITY OF CULVER CITY, A MUNICIPAL CORPORATION, IN DEED RECORDED MAY 16, 1983 AS INSTRUMENT NO. 83-542812, AND BY CULVER CITY REDEVELOPMENT AGENCY, A PUBLIC BODY CORPORATE AND POLITIC IN DEED RECORDED MAY 16, 1983 AS INSTRUMENT NO. 83-542813.

PARCEL 2:
A NON-EXCLUSIVE EASEMENT FOR A CENTRAL WALKWAY ON, OVER, UNDER AND THROUGH A PORTION OF THE PROJECT FOR INGRESS AND EGRESS FROM ONE LOT TO ANOTHER LOT AND TO THE BUILDINGS, INCLUSIVE PARKING STRUCTURES, SITUATED ON SUCH LOTS, AS SET FORTH IN SECTION 5.1 (d) OF THE DECLARATION OF COVENANTS, CONDITIONS AND RESTRICTIONS RECORDED AUGUST 1, 1983 AS INSTRUMENT NO. 83-882633.

MEASUREMENT PER CCMC 17.700.010 F:

FLOOR AREA IS CONSIDERED THE SAME AS **GROSS FLOOR AREA** OR GROSS SQUARE FOOTAGE. FLOOR AREA SHALL INCLUDE ALL AREA WITHIN EACH LEVEL OR FLOOR OF A STRUCTURE, MEASURED FROM EXTERIOR WALL FINISH, EXCEPT AS OTHERWISE DEFINED IN THIS TITLE. ALL SPACE WITHIN EACH FLOOR SHALL BE COUNTED TOWARDS THE AREA FOR THAT FLOOR AND SHALL INCLUDE, BUT NOT BE LIMITED TO HALLWAYS; LOBBIES; STAIRWAYS AND ELEVATORS; MECHANICAL OR UTILITY ROOMS; STORAGE ROOMS; AND RESTROOMS; BUT SHALL NOT INCLUDE BASEMENTS OR SUBTERRANEAN PARKING.

TRASH MANAGEMENT

1. SOLID WASTE, RECYCLABLE WASTE MATERIAL, AND ORGANIC WASTE HANDLING SHALL BE PERFORMED EXCLUSIVELY BY THE CITY OR ITS AUTHORIZED AGENTS. THE CITY COUNCIL MAY REGULATE, BY ORDINANCE OR RESOLUTION, ALL ASPECTS OF SOLID WASTE, RECYCLABLE WASTE MATERIAL, AND ORGANIC WASTE HANDLING, INCLUDING BUT NOT LIMITED TO, FREQUENCY OF COLLECTION, MEANS OF COLLECTION AND TRANSPORTATION, LEVEL OF SERVICES, CHARGES, FEES, AND NATURE, LOCATION AND EXTENT OF PROVIDING SOLID WASTE HANDLING SERVICES.

2. THE CITY OF CULVER CITY SHALL PROVIDE WASTE DISPOSAL AND RECYCLING SERVICES FOR ALL CONSTRUCTION AND DEMOLITION PROJECTS WITHIN THE CITY LIMITS IN ACCORDANCE WITH CCMC 5.01.01..

BICYCLE PARKING

SHEET NOTES

OPEN SPACE REQUIREMENTS PER CCMC 17.220.020:

A MINIMUM OF 100 SQUARE FEET OF COMMON OPEN SPACE PER UNIT SHALL BE REQUIRED, OF WHICH 100% MAY BE LOCATED ON THE ROOFTOP.

A MINIMUM OF 50% OF THE UNITS MUST HAVE 60 SQUARE FEET OF PRIVATE OPEN SPACE.

COMMON OPEN SPACE AREAS SHALL HAVE A MINIMUM DIMENSION OF 15 FEET IN ANY DIRECTION, WHICH MAY INCLUDE A COMBINATION OF OPEN SPACE AND ADJACENT SETBACK AREA.

PRIVATE AND COMMON OPEN SPACE REQUIREMENTS MAY BE SATISFIED BY A SELECTION OR COMBINATION OF THE FOLLOWING: ATRIUMS, BALCONIES, COURTYARDS, DECKS, GARDENS, GYMS/EXERCISE ROOMS, PATIOS, PLAYGROUNDS/TOT LOTS, ROOFTOP DECKS, PATIOS AND GARDENS, AND SWIMMING POOLS. THE DIRECTOR MAY APPROVE SIMILAR AMENITIES NOT LISTED ABOVE.

[BG] AREA, BUILDING PER CBC 2022 SECTION 202 : THE AREA INCLUDED WITHIN SURROUNDING EXTERIOR WALLS, OR EXTERIOR WALLS AND FIRE WALLS, EXCLUSIVE OF VENT SHAFTS AND COURTS. AREAS OF THE BUILDING NOT PROVIDED WITH SURROUNDING WALLS SHALL BE INCLUDED IN THE BUILDING AREA IF SUCH AREAS ARE INCLUDED WITHIN THE HORIZONTAL PROJECTION OF THE ROOF OR FLOOR ABOVE.

TYPE I-A CONSTRUCTION:
ALLOWABLE TYPE I-A BUILDING AREA (PER TABLE 506.2):
S-2, R-2 = UL

ALLOWABLE TYPE I-A BUILDING HEIGHT (PER TABLE 504):
S-2, R-2 = UL

TYPE III-A CONSTRUCTION *(CBC 506.2.1, SINGLE-OCCUPANCY BUILDINGS):*

Aa = ALLOWABLE AREA (SF)
At = TABULAR ALLOWABLE AREA FACTOR PER TABLE 506.2
NS = TABULAR ALLOWABLE AREA FACTOR IN ACCORDANCE WITH TABLE 506.2 FOR A NONSPRINKLERED BUILDING, REGARDLESS OF WHETHER THE BUILDING IS SPRINKLERED
If = AREA FACTOR INCREASE DUE TO FRONTAGE (PERCENT) AS CALCULATED IN ACCORDANCE WITH SECTION 506.3
Sa = 2 (FOR R OCCUPANCIES)

AREA FACTOR INCREASE CALCULATION (If):
TOTAL BUILDING PERIMETER: 138' - 2" + 176' - 11" + 109' + 69' - 6" + 70' - 5" = 564 '- 0"
TOTAL BUILDING PERMITER WITH DISTANCE GREATER THAN 30': 176' - 11" + 109' + 69' - 6" = 355' - 5"

x/x = 100% OF BUILDING PERIMETER HAVING A MINIMUM OF 30 FEET OPEN SPACE

PER TABLE 506.3 AREA INCREASE FACTOR (If) THAT CAN BE USED IS .75

ALLOWABLE TYPE III-A BUILDING AREA PER STORY (***EQUATION 5-1)*** :
Aa = [**At** + (**NS** x **If**)]
At = 24,000 (WITH HEIGHT INCREASE)
NS = 24,000
If = .75

Aa = [24,000 + (24,000 x .75]
Aa = [24,000 + 24,000] = 48,000 SF
ALLOWABLE AREA PER STORY = 48,000 SF

ALLOWABLE TYPE III-A BUILDING AREA FOR R-2 OCCUPANCIES (***EQUATION 5-2)*** :
Aa = [**At** + (**NS** x **If**)] x **Sa**
Aa = ALLOWABLE AREA (SF)
At = 24,000 (WITH HEIGHT INCREASE)
NS = 24,000
If = .75
Sa = 2

Aa = [24,000 + (24,000 x .75)] x 2
Aa = [24,000 + 18,000] x 2 = 84,000 SF
ALLOWABLE AREA = 84,000 SF

ALLOWABLE TYPE III-A BUILDING HEIGHT (CBC TABLE 504):

LEGAL DESCRIPTION:

THAT CERTAIN LAND IN THE STATE OF CALIFORNIA, COUNTY OF LOS ANGELES, DESCRIBED AS FOLLOWS:

PARCEL 1:
LOTS 15 AND 16 OF TRACT 33152, IN THE CITY OF CULVER CITY, AS PER MAP RECORDED IN BOOK 1020, PAGES 31 TO 35 INCLUSIVE OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

EXCEPT ALL OIL, OIL RIGHTS, MINERALS, MINERAL RIGHTS, NATURAL GAS, NATURAL GAS RIGHTS, AND OTHER HYDROCARBONS BY WHATSOEVER NAME KNOWN THAT MAY BE WITHIN OR UNDER SAID LAND, TOGETHER WITH THE PERPETUAL RIGHT OF DRILLING, MINING, EXPLORING AND OPERATING THEREFORE AND REMOVING THE SAME FROM SAID LAND OR ANY OTHER LAND, INCLUDING THE RIGHT TO WHIPSTOCK OR DIRECTIONALLY DRILL AND MINE FROM LANDS OTHER THAN SAID LAND, OIL OR GAS WELLS, TUNNELS AND SHAFTS INTO, THROUGH OR ACROSS THE SUBSURFACE OF SAID LAND, AND TO BOTTOM SUCH WHIPSTOCKED OR DIRECTIONALLY DRILLED WELLS, TUNNELS AND SHAFTS UNDER AND BENEATH OR BEYOND THE EXTERIOR LIMITS THEREOF, AND TO REDRILL, RETUNNEL, EQUIP, MAINTAIN, REPAIR, DEEPEN AND OPERATE ANY SUCH WELLS OR MINES, WITHOUT, HOWEVER, THE RIGHT TO DRILL, MINE, EXPLORE AND OPERATE THROUGH THE SURFACE OR THE UPPER 100 FEET OF THE SUBSURFACE OF SAID LAND OR OTHERWISE IN SUCH MANNER AS TO ENDANGER THE SAFETY OF ANY HIGHWAY THAT MAY BE CONSTRUCTED ON SAID LANDS, AS EXCEPTED BY HOME SAVINGS AND LOAN ASSOCIATION, IN DEED RECORDED JULY 15, 1971 AS INSTRUMENT NO. 3551, IN BOOK D5125 PAGE 491, OFFICIAL RECORDS.

ALSO EXCEPT ALL OIL, GAS, HYDROCARBON SUBSTANCES AND MINERALS OF EVERY KIND AND CHARACTER LYING MORE THAN 500 FEET BELOW THE SURFACE OF SAID LAND, TOGETHER WITH THE RIGHT TO DRILL INTO, THROUGH, AND TO USE AND OCCUPY ALL PARTS OF SAID LAND LYING MORE THAN 500 FEET BELOW THE SURFACE THEREOF FOR ANY AND ALL PURPOSES INCIDENTAL TO THE EXPLORATION FOR THE PRODUCTION OF OIL, GAS, HYDROCARBON SUBSTANCES, OR MINERALS FROM SAID LAND OR OTHER LAND, BUT WITHOUT, HOWEVER, ANY RIGHT TO USE EITHER THE SURFACE OF SAID LAND OR ANY PORTION OF SAID LAND WITHIN 500 FEET OF THE SURFACE FOR ANY PURPOSE OR PURPOSES WHATSOEVER, AS RESERVED BY THE CULVER CITY REDEVELOPMENT AGENCY, A PUBLIC BODY CORPORATE AND POLITIC, IN DEED RECORDED DECEMBER 23, 1981 AS INSTRUMENT NO. 81-1255468.

ALSO EXCEPT ALL OIL, GAS, HYDROCARBON SUBSTANCES AND MINERALS OF EVERY KIND AND CHARACTER, LYING MORE THAN 500 FEET BELOW THE SURFACE OF SAID LAND, TOGETHER WITH THE RIGHT TO DRILL INTO, THROUGH AND TO USE AND OCCUPY ALL PARTS OF SAID LAND LYING MORE THAN 500 FEET BELOW THE SURFACE THEREOF FOR ANY AND ALL PURPOSES INCIDENTAL TO THE EXPLORATION FOR THE PRODUCTION OF OIL, GAS, HYDROCARBON SUBSTANCES OR MINERALS FROM SAID LAND OR OTHER LANDS, BUT WITHOUT, HOWEVER, ANY RIGHT TO USE THE SURFACE OF SAID LAND OR ANY PORTION OF SAID LAND WITHIN 500 FEET OF THE SURFACE FOR ANY PURPOSE OR PURPOSES WHATSOEVER, AS EXCEPTED BY THE CITY OF CULVER CITY, A MUNICIPAL CORPORATION, IN DEED RECORDED MAY 16,1983 AS INSTRUMENT NO. 83-542812, AND BY CULVER CITY REDEVELOPMENT AGENCY, A PUBLIC BODY CORPORATE AND POLITIC IN DEED RECORDED MAY 16,1983 AS INSTRUMENT NO. 83-542813.

PARCEL 2:
A NON-EXCLUSIVE EASEMENT FOR A CENTRAL WALKWAY ON, OVER, UNDER AND THROUGH A PORTION OF THE PROJECT FOR INGRESS AND EGRESS FROM ONE LOT TO ANOTHER LOT AND TO THE BUILDINGS, INCLUSIVE PARKING STRUCTURES, SITUATED ON SUCH LOTS, AS SET FORTH IN SECTION 5.1 (d) OF THE DECLARATION OF COVENANTS, CONDITIONS AND RESTRICTIONS RECORDED AUGUST 1, 1983 AS INSTRUMENT NO. 83-882633.

COMMENTS:

BOUNDARY LINES............WERE ESTABLISHED FROM RECOVERED CITY, COUNTY AND/OR PRIVATE SURVEY MONUMENTS WHOSE CHARACTER AND SOURCE ARE SO NOTED ON THE SURVEY.

LEGAL DESCRIPTION..........FROM SUPPLEMENTAL COMMITMENT DATED AUGUST 30, 2002.

EASEMENTS..................PLOTTABLE EASEMENTS ARE SHOWN FROM AN OWNER SUPPLIED TITLE REPORT. NON-PLOTTABLE ONES ARE NOTED ON THE SURVEY AS HAVING "EFFECT OF". BECAUSE OUR SERVICE IS LIMITED TO REPORTING ON EASEMENT LOCATIONS WE STRONGLY RECOMMEND LEGAL COUNSEL BE RETAINED TO REPORT ON TITLE PAPERS IN THEIR ENTIRETY.

TITLE REPORT...............FIRST AMERICAN TITLE COMPANY PRELIMINARY TITLE REPORT NO. NC-2214438-21 DATED JUNE 13, 2002.

INDICATES TITLE REPORT EXCEPTION NO.

BASIS OF BEARINGS..........THE BEARING NORTH 89° 26' 32" EAST OF THE CENTERLINE OF SLAUSON AVENUE AS SHOWN ON TRACT NO. 33152 MB 1020/31-35 WAS TAKEN AS THE BASIS OF BEARINGS FOR THIS SURVEY.

AREA.......................BASED UPON MEASURED BEARINGS AND DISTANCES AS SHOWN HEREON, THE AREA IS:
195,796 SQ. FT. = 4.49485 ACRES (GROSS)
193,697 SQ. FT. = 4.44667 ACRES (NET)
WHERE "GROSS" IS DEFINED AS THE AREA OF THE SUBJECT FEE PARCEL AS LEGALLY DESCRIBED HEREON AND "NET" IS DEFINED AS THE REMAINING SUBJECT PARCEL AFTER SUBTRACTION OF EXISTING STREET EASEMENTS.

TOPOGRAPHY.................THIS SURVEY WAS PREPARED BY GROUND SURVEY METHODS AND SUPPLEMENTED WITH DATA FROM PHOTOGRAMMETRIC PROCESSES, UTILIZING AERIAL PHOTOGRAPHY DATED NOVEMBER 1997 AND COMPLIES WITH THE NATIONAL MAP ACCURACY STANDARDS.

FLOOD ZONE.................SUBJECT PROPERTY LIES WITHIN FLOOD ZONE C (AREA OF MINIMAL FLOODING) AS SHOWN ON FLOOD INSURANCE RATE MAP COMMUNITY PANEL NO. 060114 0005 C AS PUBLISHED BY FEDERAL EMERGENCY MANAGEMENT AGENCY.

ZONING.....................C-1 LIMITED COMMERCIAL ZONE.
SEE SURVEYOR'S NOTE 4.

BUILDING SETBACK...........STREET FRONTAGE SETBACK............15 FEET
INTERIOR PROPERTY LINE SETBACK.....NONE REQUIRED
SEE SURVEYOR'S NOTE 4.

PARKING....................BASED UPON ON-SITE STRIPING, THE PARKING IS:

REGULAR SPACES	301
COMPACT SPACES	118
HANDICAPPED SPACES.	6
TOTAL	425

EFFECT OF..................RESTRICTIONS STATING THAT ABUTTER'S RIGHTS DO NOT INCLUDE ACCESS TO THE ADJACENT MARINA FREEWAY PER DEED RECORDED DECEMBER 23, 1981, AS INST. NO. 81-1255467. SAID RESTRICTION OF RIGHTS DOES NOT AFFECT THE PROPERTY IN QUESTION SINCE SAID FREEWAY IS 1800 FEET TO THE WEST.
2

EFFECT OF..................RESERVATION OF ANY EXISTING OR PROPOSED STREETS OR ALLEYS WHICH MIGHT OTHERWISE PASS WITH A CONVEYANCE OF THE PROPERTY INCLUDING FEE TITLE REVERSION UNDERLYING THE PUBLIC RIGHTS RIGHTS OF WAY ABUTTING THE BOUNDARIES OF THE PROPERTY AS EXCEPTED IN THE DOCUMENT RECORDED DECEMBER 23, 1981 AS INST. NO. 81-1255468, O.R.
3

EFFECT OF..................UNRECORDED DISPOSITION AND DEVELOPMENT AGREEMENT ON JULY 27, 1981 AND THE FIRST AND SECOND AMEMDMENTS OF THE AGREEMENT, DATED OCTOBER 26, 1981 AND DECEMBER 17, 1981, DISCLOSED BY DEEDS RECORDED DECEMBER 23, 1981 AS INST. NO. 81-1255468 AND MAY 16, 1983 AS INST. NO. 83-542813, O.R.
4

EFFECT OF..................ALL RIGHT, TITLE, AND INTEREST IN THOSE PUBLIC STREETS WHICH WILL ABUT SAID LAND, INCLUDING ANY RIGHTS WHICH MIGHT OTHERWISE PASS WITH A CONVEYANCE OF SAID LAND AS EXCEPTED AND RECORDED IN THE DEED RECORDED ON MAY 16, 1983 AS INST. NO. 83-542812 AND IN DEED RECORDED MAY 16, 1983 AS INST. NO. 83-542813, O.R.
6

EFFECT OF..................RIGHT OF THE CITY OF CULVER CITY TO RESTRICT VEHICULAR INGRESS AND EGRESS TO SLAUSON AVENUE PER DEDICATION STATEMENT ON MAP OF TRACT NO. 33152, RECORDED JULY 28, 1983 IN BOOK 1020 PAGES 31-35 OF MAPS.
7

EFFECT OF..................COVENANTS, CONDITIONS AND RESTRICTIONS REGARDING UNDERGROUND UTILITY EASEMENTS, BUILDING AREA RESTRICTIONS, BUILDING SETBACKS AND PARKING STRUCTURE COMMON WALL PER DOCUMENT RECORDED AUGUST 1, 1983 AS INST. NO, 83-882633 AND AMENDED BY INSTRUMENT NO. 83-1390314, RECORDED NOV. 23, 1983 AND INSTRUMENT NO. 97-1654409, RECORDED OCT. 21, 1997 O.R.
10

EFFECT OF ....COVENANT, CONDITIONS AND RESCTICTIONS PER DOCUMENT RECORDED: OCTOBER 12, 1983 AS INST. NO. 83-1202156, NOVEMBER 22, 198S AS INST. NO. 83-1418528 AND DECEMBER 1, 1983 AS INST. NO. 83-1543113, O.R.
11

EFFECT OF..................COVENANT AND AGREEMENT TO ALLOW TRAFFIC SIGNAL DETECTOR LOOPS IN THE PROPERTY AT THE INTERSECTION OF BUCKINGHAM PARKWAY AND HANNUM AVENUE PER DOCUMENT RECORDED MAY 23, 1985 AS INST. NO. 85-584012, O.R.

SURVEYOR'S NOTES:

THIS SURVEY HAS BEEN PREPARED FOR TITLE INSURANCE PURPOSES

1. THE BOUNDARY DATA AND TITLE MATTERS AS SHOWN HEREON HAVE BEEN DEVELOPED FROM THE REFERENCED TITLE REPORT.
2. THIS SURVEY MAY NOT CONTAIN SUFFICIENT DETAIL FOR DESIGN PURPOSES.
3. THIS SURVEY DOES NOT INCLUDE EASEMENTS EXCEPT THOSE SPECIFICALLY DELINEATED HEREON, NOR DOES IT SHOW THE LOCATION OF, OR ENCROACHMENTS BY SUBSURFACE FOOTINGS AND/OR FOUNDATIONS OF BUILDINGS SHOWN ON THIS MAP.
4. IF UNDERGROUND PUBLIC UTILITIES AND OTHER SUBSTRUCTURES, ZONES, SET BACK AND STREET WIDENING DATA ARE SHOWN HEREON, IT IS FOR INFORMATION ONLY, HAVING BEEN OBTAINED FROM A GENERAL REQUEST AT THE LOCAL AGENCY'S PUBLIC COUNTER AND/OR OTHER SOURCES NOT CONNECTED WITH THIS COMPANY. NO REPRESENTATION IS MADE AS TO THE ACCURACY, CURRENCY OR COMPLETENESS OF SAID INFORMATION AND ANY USERS OF SAID INFORMATION IS URGED TO CONTACT THE UTILITY OR LOCAL AGENCY DIRECTLY.

SURVEYOR'S CERTIFICATE:

ROBERT C. OLSON, A REGISTERED LAND SURVEYOR, LICENSE NO. 5490, IN AND FOR THE STATE OF CALIFORNIA AND LEGALLY DOING BUSINESS IN LOS ANGELES COUNTY, DOES HEREBY CERTIFY (AS DEFINED AND LIMITED BY SECTION 8770.6 OF THE BUSINESS AND PROFESSIONS CODE OF CALIFORNIA) TO NOMURA CREDIT & CAPITAL, INC., A DELAWARE CORPORATION, SLAUSON INVESTORS LLC, A DELAWARE LIMITED LIABILITY COMPANY, C.P. HOLDINGS, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY, GUGGENHEIM PLUS LEVERAGED LLC, A DELAWARE LIMITED LIABILITY COMPANY, CHARLES DUNN EQUITIES, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY, REAL ESTATE LAW GROUP, LLP, FIRST AMERICAN TITLE INSURANCE COMPANY, AND THEIR RESPECTIVE SUCCESSORS AND ASSIGNS:

(1) THE ACCOMPANYING SURVEY ("SURVEY") REPRESENTS A TRUE AND CORRECT SURVEY MADE UNDER MY SUPERVISION ON JULY 16, 2002 OF THE LAND THEREIN PARTICULARLY DESCRIBED;
(2) THE SURVEY AND THE INFORMATION, COURSES AND DISTANCES SHOWN THEREON ARE CORRECT;
(3) EXCEPT AS SHOWN, THE TITLE LINES AND LINES OF ACTUAL POSSESSION ARE THE SAME;
(4) THE LAND DESCRIBED IN THE SURVEY IS THE SAME AS DESCRIBED IN THE TITLE INSURANCE COMMITMENT DESCRIBED BELOW;
(5) THE AREA OF THE SUBJECT PROPERTY AND SIZE, LOCATION AND TYPE OF BUILDINGS AND IMPROVEMENTS SITUATED ON THE SUBJECT PROPERTY ARE AS SHOWN AND ALL BUILDINGS AND IMPROVEMENTS ARE WITHIN THE BOUNDARY LINES AND APPLICABLE SET-BACK LINES OF THE PROPERTY;
(6) THERE ARE NO VIOLATIONS OF ZONING SETBACK REQUIREMENTS AS SHOWN HEREON AND AS SHOWN ON THE LETTER TITLED "ZONING VERIFICATION FOR 100 CORPORATE POINTE, CULVER CITY" FROM THE CITY OF CULVER CITY DATED AUGUST 14, 2002;
(7) THERE ARE NO EASEMENTS OR USES AFFECTING THIS PROPERTY APPEARING FROM A CAREFUL INSPECTION OF THE SAME, OTHER THAN THOSE SHOWN AND DEPICTED ON THE SURVEY, PER REFERENCED TITLE REPORT;
(8) THERE ARE NO ENCROACHMENTS ON THE ADJOINING PROPERTIES, STREETS AND ALLEYS BY ANY OF SAID BUILDINGS, STRUCTURES AND IMPROVEMENTS, OTHER THAN AS SHOWN ON THE SURVEY;
(9) THERE ARE NO PARTY WALLS OR VISIBLE ENCROACHMENTS ON SAID DESCRIBED PROPERTY BY STREETS, ALLEYS OR BUILDINGS, STRUCTURES OR OTHER IMPROVEMENTS SITUATED ON ADJOINING PROPERTY, EXCEPT AS SHOWN ON THE SURVEY;
(10, 11) ALL VISIBLE ABOVE GROUND SIGNS OF UTILITIES THAT COULD PERTAIN TO UNRECORDED EASEMENTS ARE SHOWN HEREON ALONG WITH THOSE EASEMENTS IN THE REFERENCED TITLE REPORT;
(12) ANY DISCHARGE INTO STREAMS, RIVERS OR OTHER CONVEYANCE SYSTEM IS SHOWN ON THE SURVEY;
(13) THE SUBJECT PROPERTY LIES WITHIN ZONE C (AREA OF MINIMAL FLOODING) OF THE FLOOD INSURANCE RATE MAP IDENTIFIED AS COMMUNITY PANEL NO. 060114 0005 C, BEARING AN EFFECTIVE DATE OF FEBRUARY 1, 1980.
(14) THE SUBJECT PROPERTY HAS ACCESS TO AND FROM A DULY DEDICATED AND ACCEPTED PUBLIC STREET OR HIGHWAY;
(15) EXCEPT AS SHOWN ON THE SURVEY, THE SUBJECT PROPERTY DOES NOT SERVE ANY ADJOINING PROPERTY FOR INGRESS OR EGRESS; AND
(16) THE RECORD DESCRIPTION OF THE SUBJECT PROPERTY FORMS A MATHEMATICALLY CLOSED FIGURE.

THE UNDERSIGNED HAS RECEIVED AND EXAMINED A COPY OF FIRST AMERICAN TITLE INSURANCE COMPANY'S COMMITMENT NO. 2214438-21; AND THE LOCATION OF ANY MATTER SHOWN THEREON, TO THE EXTENT IT CAN BE LOCATED, HAS BEEN SHOWN ON THIS SURVEY WITH THE APPROPRIATE RECORDING REFERENCE.

THE PARTIES LISTED ABOVE ARE ENTITLED TO RELY ON THE SURVEY AND THIS CERTIFICATE AS BEING TRUE AND CORRECT.

THE SURVEY IS MADE IN ACCORDANCE WITH THE 1999 "MINIMUM STANDARD DETAIL REQUIREMENTS FOR LAND TITLE SURVEYS" JOINTLY ESTABLISHED AND ADOPTED BY AMERICAN LAND TITLE ASSOCIATION ("ALTA") AND AMERICAN CONGRESS ON SURVEYING AND MAPPING ("ACSM") AND MEETS THE REQUIREMENTS OF AN URBAN SURVEY, AS DEFINED IN THE CURRENT ACCURACY STANDARDS JOINTLY ADOPTED BY ALTA AND ACSM AND INCLUDES ITEMS 2, 3, 4, 5, 7(A), 7(B), 8, 9, 10, 11(A) AND 13 OF TABLE A THEREOF.

Sammy –

Thank you for returning my call this morning.

To recap our discussion, the Psomas sewer analysis will include:

- One week of flowmeter data from sewer manholes G6-36 and G6-45 (see below).
- Calculations indicating the sewer flow delta between the existing site buildings (to be demolished) and the proposed project buildings.

It is my understanding that this is sufficient information for the city to determine the impact that the project flows will have on the existing sewer system, and whether any upgrades will be required. No calculations are necessary to estimate the existing flows in the main line pipes as those will be determined from the flow meters. Calculations are only needed for the existing vs. proposed project flows.

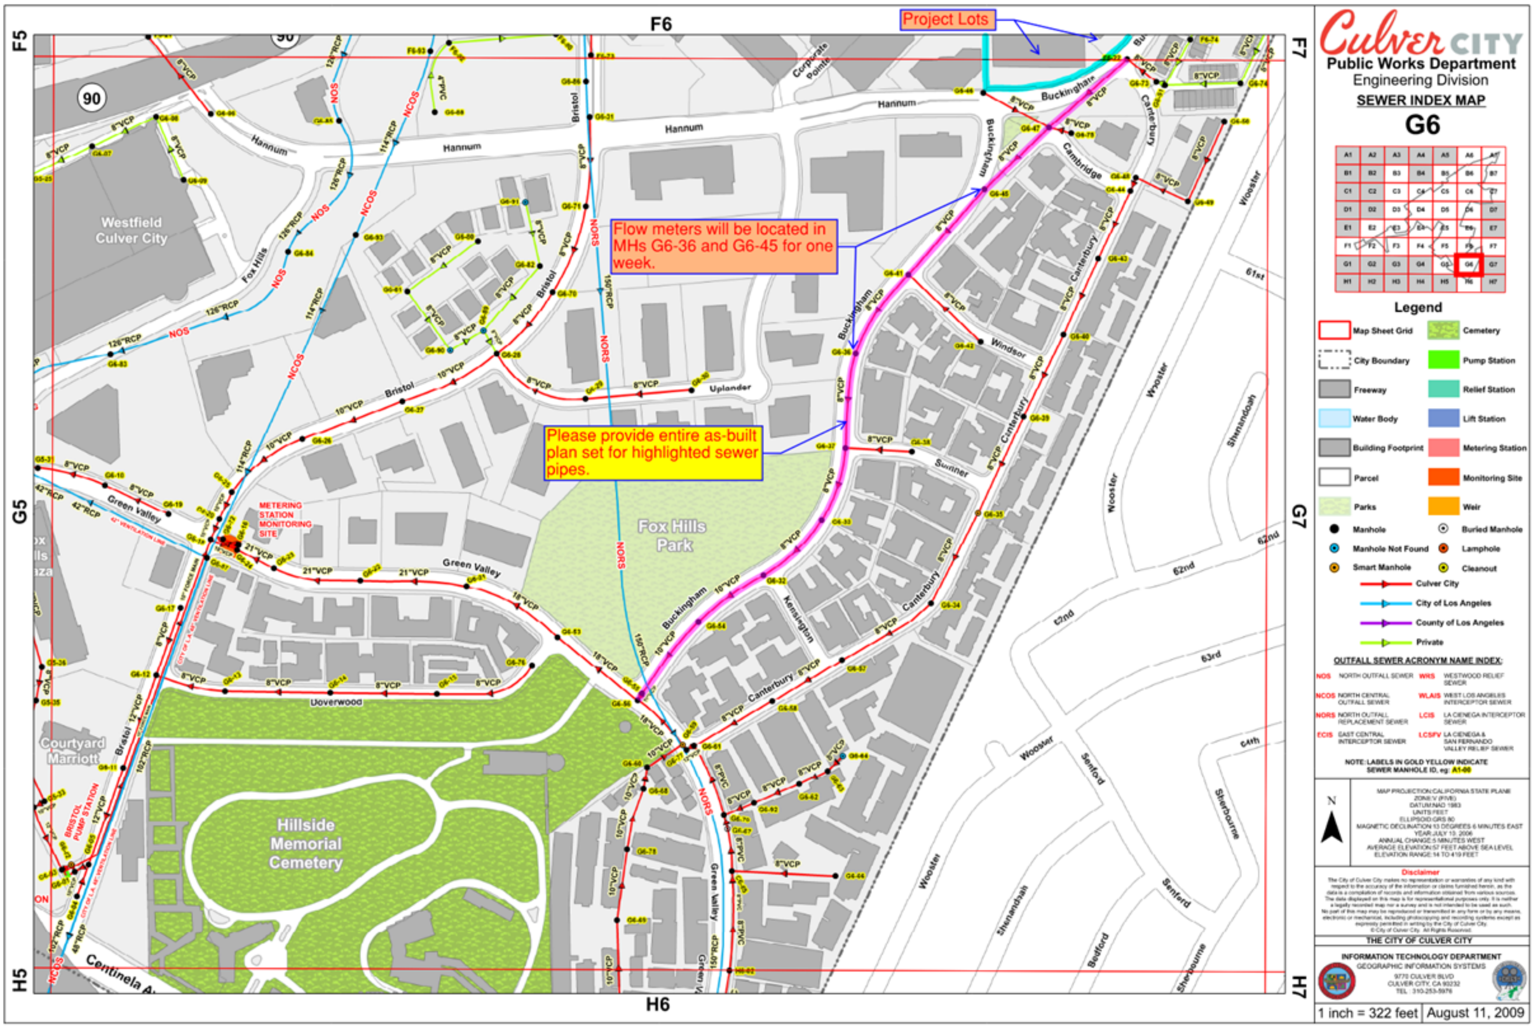
I would also like to request the full as-built plan set(s) of the sewers in Buckingham Parkway as indicated by the highlighted line in the image below.

Please confirm this summary, or clarify as needed.

Thank you,

Dalin Rowe, PE
Sr. Project Engineer
Office: 213.223.1517

PSOMAS



Project Lots
Flow meters will be located in MHs G6-36 and G6-45 for one week.

Re: Will Serve Letter
100 Corporate Pointe
Culver City, California

Dear Mr. Rowe:

This letter is to inform you that water service is available to the above referenced address from Golden State Water Company's (GSWC) Central District water system located in the city of Culver City. Service to the address can be provided from our existing water facilities within Buckingham Pkwy.

Upon completion and execution of a Water Service Agreement, that contains satisfactory financial arrangements and other provisions governing the extension of water service, Golden State Water Company (GSWC) will begin providing water service for the referenced address once all owner obligations have been satisfied. Analysis of more detailed development plans may require the owner to participate in the construction of special facilities prior to the Company providing water service.

GSWC is committed to providing water service to all customers within its service area, consistent with the company's obligations under rules, statutes and regulations of both the California Department of Public Health and the California Public Utilities Commission.

Unless modified or extended by GSWC, this Will Serve Letter shall terminate and be of no further force and effect one year from the date indicated above.

If you have any questions concerning the issues addressed in this letter, please let us know.

Sincerely,

Ray Burk, P.E.

To: Dalin Rowe; Taylor, Sarah
Cc: Carbajal, Michael; de Schepper, Jennifer; Rivas, Julia
Subject: RE: R2 Culver City - 100 Corporate Pointe, Culver City As-Built R and Will Serve Letter Request

The static system pressure in the Slauson main at the locations shown on the map below is approximately 70 psi. This section of main is in a higher pressure zone. Same caveat as below, plus or minus 10 psi.

Ray Burk, P.E.
Operations Engineer

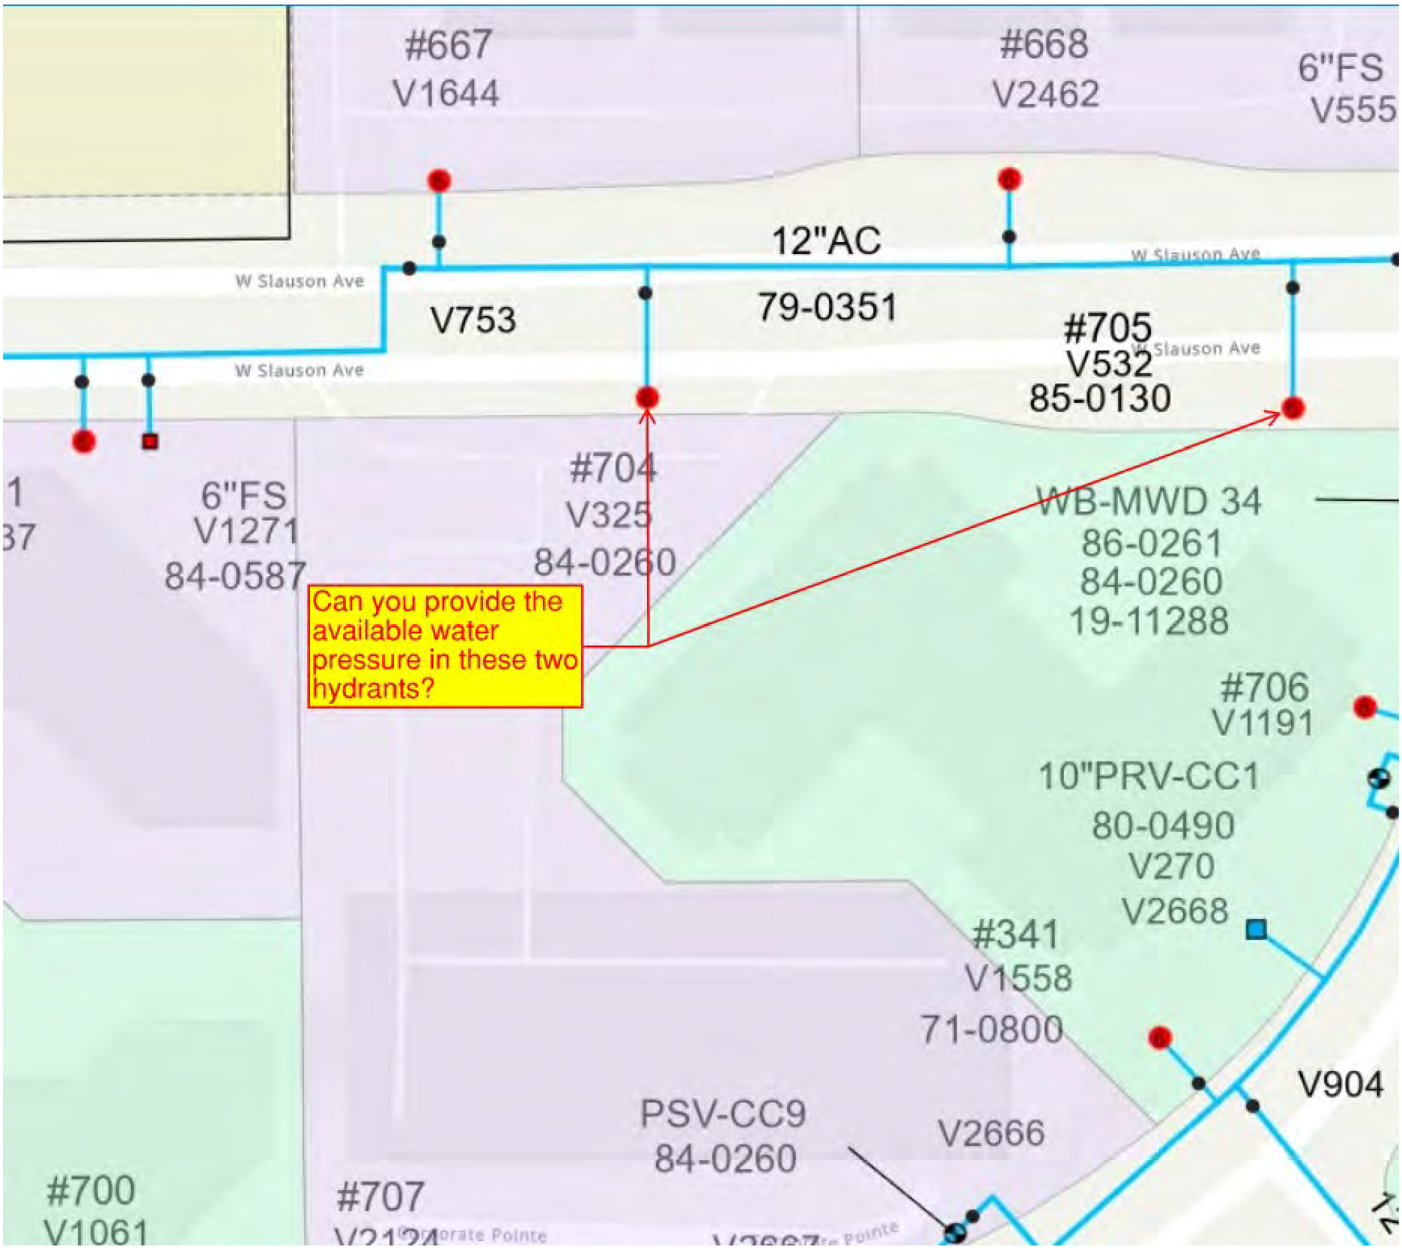
Ray –

Sorry to bother you again, but could you also provide the water pressure in the 12” water main in Slausen Avenue? I didn’t realize this when I sent my original e-mail request this morning, but our Tech Memo needs to speak to the pressures available for fire suppression in each of the hydrants surrounding the project. The pressure you provided for the 14” main in Buckingham Parkway covers the three hydrants east and south of our project.



Thank you, and again, I apologize for any inconvenience.

Dalin Rowe, PE

Hi Dalin-

The 14” main in Buckingham Pkwy to the East of your site has a pressure zone break at a PRV station. The 4” domestic water service to 100 Corporate Pointe is connected to the Culver City Main pressure zone, and has a static system pressure of approximately 50 psi at the service connection location. This pressure should be pretty stable, but I always give the caveat that system pressure can fluctuate plus or minus 10 psi.

I am not sure which 12” main in Buckingham you are referring to, if it is connected to the 14” main near Canterbury, then it is also in the Main pressure zone and would have the same pressure as the 14” main.

Subject: RE: R2 Culver City - 100 Corporate Pointe, Culver City As-Built R and Will Serve Letter Request

Good Morning Dalin,

I do not have that information readily available, so I will defer your question to Ray.

Ray,
Can you help with Dalin’s question below?

Thanks,

Sarah Taylor
Assistant Operations Engineer
Golden State Water Company
Cell: (562) 447-9436

Subject: RE: R2 Culver City - 100 Corporate Pointe, Culver City As-Built R and Will Serve Letter Request

Sarah –

Thank you again for providing the general water atlas information for the pipes surrounding our proposed project. Another key piece of information that would be valuable to include in our Utilities Technical Memo would be the high and low pressures in the water mains that are serving the site. Does GSWC have that information available for the 14" water main in Buckingham Parkway adjacent to our site to the east, and the 12" main in Buckingham Parkway adjacent to our site to the south?

Thank you.

Dalin Rowe, PE
Sr. Project Engineer
Office: 213.223.1517

Subject: RE: R2 Culver City - 100 Corporate Pointe, Culver City As-Built R and Will Serve Letter Request

Hello Dalin,

The typical depth to the top of GSWC pipelines is 36 inches to 42 inches with service lines often less than 36 inches.

GSWC does not provide specific information regarding our facilities. The general information we have provided you regarding the existing facilities should be sufficient for you to generally evaluate your project needs versus our ability to serve. If you still believe that you require more precise information regarding the locations of our existing facilities, you may wish to conduct your own field walk to spot gate valves, meter boxes, etc. Potholing is also encouraged.

Please see attached System Map Overview for your use/reference.

GSWC's engineering staff, in coordination with other departments, determines the best routing and methodology for obtaining new water services from GSWC water mains to meet the developer's needs. Tapping of GSWC facilities is done with GSWC approval, using our plans and under our inspection, after execution of agreements and receipt of funds.

Please contact GSWC's New Business department to discuss the feasibility of the improvement project. Once your water facility needs are determined (fire sprinkler service, domestic service, irrigation service, fire hydrants, etc.), please complete and submit a New Business application. Below are instructions for the New Business application process.

New Service (larger than 2-inch) and/or System Upgrade Process - Please see below for submittal requirements. Please visit http://www.gswater.com/information-contractors-consultants for our complete CAD requirements. Incomplete submittals will be immediately rejected.

- Signed application,
- PDF site plan showing proposed locations of new hydrants,
- AutoCAD files (2017 Civil 3D edition or older),
- Orange County Fire Authority fire flow requirements,
- Completed fire flow,
- Applicable project review fee $2,500

Dear Dalin:

<u>100 Corporate Pointe – Utility Request</u>

Thank you for your email and letter dated December 19, 2024, submitting a map, property profile, and site plan showing the location of your proposed project located at 100 Corporate Pointe and 5899 Buckingham Parkway in the city of Culver City.

As shown on the enclosed map, Metropolitan's 96-inch-inside-diameter prestressed concrete Sepulveda Feeder pipeline with accompanying irregular shaped fee property, 48-inch-inside-diameter precast concrete Culver City Feeder pipeline, Service Connection WB-34 facilities, vault structures with manholes, associated meter cabinet, vent stack facilities, underground piping are in the vicinity of your proposed project area.

We are transmitting a copy of our "Guidelines for Improvement and Construction Projects Proposed in the Area of Metropolitan's Facilities and Rights-of-Way" and prints of a Google Earth map overlay, our Drawings B-12257, B-19911 and B-54376, and Right-of-Way map 1800-25-2 for your information and use.

Our facilities and fee property must be fully shown and identified as Metropolitan's on your project plans and be submitted for our review and written approval as they pertain to our facilities. All applicable portions of the enclosed guidelines should be incorporated into your plans.

We also request that a stipulation be added to your plans and/or specifications to Daniel Diaz of our Water System Operations Group at telephone (323) 276-7623 or cell phone (760) 792-2573 at least three working days prior to starting any work in the vicinity of our facilities.

For any further correspondence with Metropolitan relating to this project, please refer to the Substructures Job Number shown in the upper right-hand corner of this letter. Should you require any additional information, please contact Maurice Long at (213) 217-6901 or via email at mlong@mwdh2o.com.

Sincerely,

Ken Chung

Will Serve Letter

Your project is located in Southern California Edison (SCE) service territory. SCE will serve the above subject project's electrical requirements per the California Public Utilities Commission and Federal Energy Regulatory Commission tariffs.

SCE may need to conduct utility studies, where applicable, to assess whether additions or modifications to the existing electric infrastructure are required to serve this project. Where applicable, SCE has attached Appendix (B) which not only describes the study, and permitting, but includes a Project Information Sheet that will need to be completed by you and submitted to SCE if your project is at a point where SCE has to determine the required electrical utility work. This Will-Serve letter does not imply that either: (i) these studies have been completed, or (ii) that any required California Environmental Quality Act (CEQA) analysis of project-related electric utility impacts has been conducted.

I am the SCE Design Representative currently assigned to this project. SCE or Applicant will design and construct all required electrical infrastructure to serve this project provided you enter into the applicable contractual agreements with SCE identify scope of electrical utility work required, and supply the following information:

- Site plans as required
- Required contracts and agreements (fully executed)
- Applicable fees
- Local permits
- Required easement documents

Your project will be scheduled for construction once SCE has all the necessary information for your project and you have submitted or agreed to the applicable requirements as stated above, and paid any necessary fees.

If your project will not require SCE services, please notify us so that we can update our records.

SCE appreciates your business. If you have any questions, please feel free to call me at
Saul Valle (562) 533-2450

Sincerely,

SCE Design Representative

Re: May Serve Letter by Charter Communications or an affiliate authorized to provide service ("Charter")

Thank you for your interest in receiving Charter service. The purpose of this letter is to confirm that the Property is within an area that Charter may lawfully serve. However, it is not a commitment to provide service to the Property. Prior to any determination as to whether service can or will be provided to the Property, Charter will conduct a survey of the Property and will need the following information from you:

- Exact site address and legal description
- Is this an existing building or new construction?
- Site plans, blue prints, plat maps or any similar data
- The location of any existing utilities or utility easements
- ____

Please forward this information to the construction manager listed below. Upon receipt, a Charter representative will be assigned to you to work through the process. Ultimately, a mutually acceptable service agreement for the Property will be required and your cooperation in the process is appreciated.

RE: 100 Corporate Pointe, Culver City, CA 90230

Dear Applicant:

Under its present plans, AT&T California expects to be in a position to provide telephone service to applicants in the above project upon request, in accordance with requirements of, and at rates and charges specified in its tariffs on file with the California Public Utilities Commission.

This project will be served with AT&T facilities. In accordance with the above mentioned tariffs, the applicant or customer, on property will be responsible for furnishing, installing and maintaining the conduit AT&T requires for the service connection.

Please contact Marisella Amador at ma3936@att.com for all requests for AT&T maps or plans. Ms. Amador will set up an account for you and advise you as to the fees for such request.

Please do not hesitate to contact me if you have any further questions.

Respectfully,

Bryon Love | Sr. Specialist OSP Design Engineer

Subject: Re: 0036810 - 100 Corporate Pointe, Culver City - Record Utility and Will-serve Request

No will serve letters but exactly, we would love to service future tenants with our existing fiber service. We offer dedicated fiber only starting with 50 Mbps.

Subject: RE: 0036810 - 100 Corporate Pointe, Culver City - Record Utility and Will-serve Request

Hi John –

Does Crown Castle provide will-serve letters, or should we just conclude that Crown Castle will be able to serve the new project since they are already serving the existing building (which will be demolished)?

Thank you.

Subject:	P-631878 : RELO - 100 Corporate Pointe

Date: **1/29/2025**
Attn: **Dalin Rowe**
RE: **RELO - 100 Corporate Pointe**
Requestor Project ID:

Lumen has received your project notification.

It has been determined that Lumen does have facilities within your proposed construction area. If you have submitted project plans for review, they will be sent to our Engineering team for conflict analysis, and the estimated review time is 10 business days. Please follow the instructions below when you are ready to submit plans for our review.

Any changes or additions to the project plans or parameters must be submitted using the Lumen Relocation Request Portal by selecting the option “Update An Existing Project”. Please reference the Project ID **P-631878** with any future communications.

Thank you for your cooperation!

Lumen Intake Team
relocations@lumen.com

Remember: Please contact your State One Call prior to construction – call811.com or dial 811 on your phone.

Subject: Design Pending - Potential Conflict - 100 Corporate Pointe
Attachments: 2025-104.pdf

Dear Sir or Madam:

Verizon Business ID: 2025-104

Verizon Business has been notified by your office regarding the above referenced project.

The comparison of your location map with the Verizon Business in-house records determined that Verizon Business facilities do exist in the area of the proposed construction. At this time, since your project is in its conceptual/design phase, a conflict cannot be determined. Once your plans are finalized you can resubmit them for a second review.

In order to avoid a potential conflict, it will be necessary for your construction to maintain a minimum of twenty-four (24) inches vertical clearance when crossing Verizon Business facilities and sixty (60) inches horizontal clearance when your running line is parallel to our facilities.

However, it will be necessary for you to **contact the One Call System for your area at least 48 hours prior to construction** to ensure that no conflicts exist.

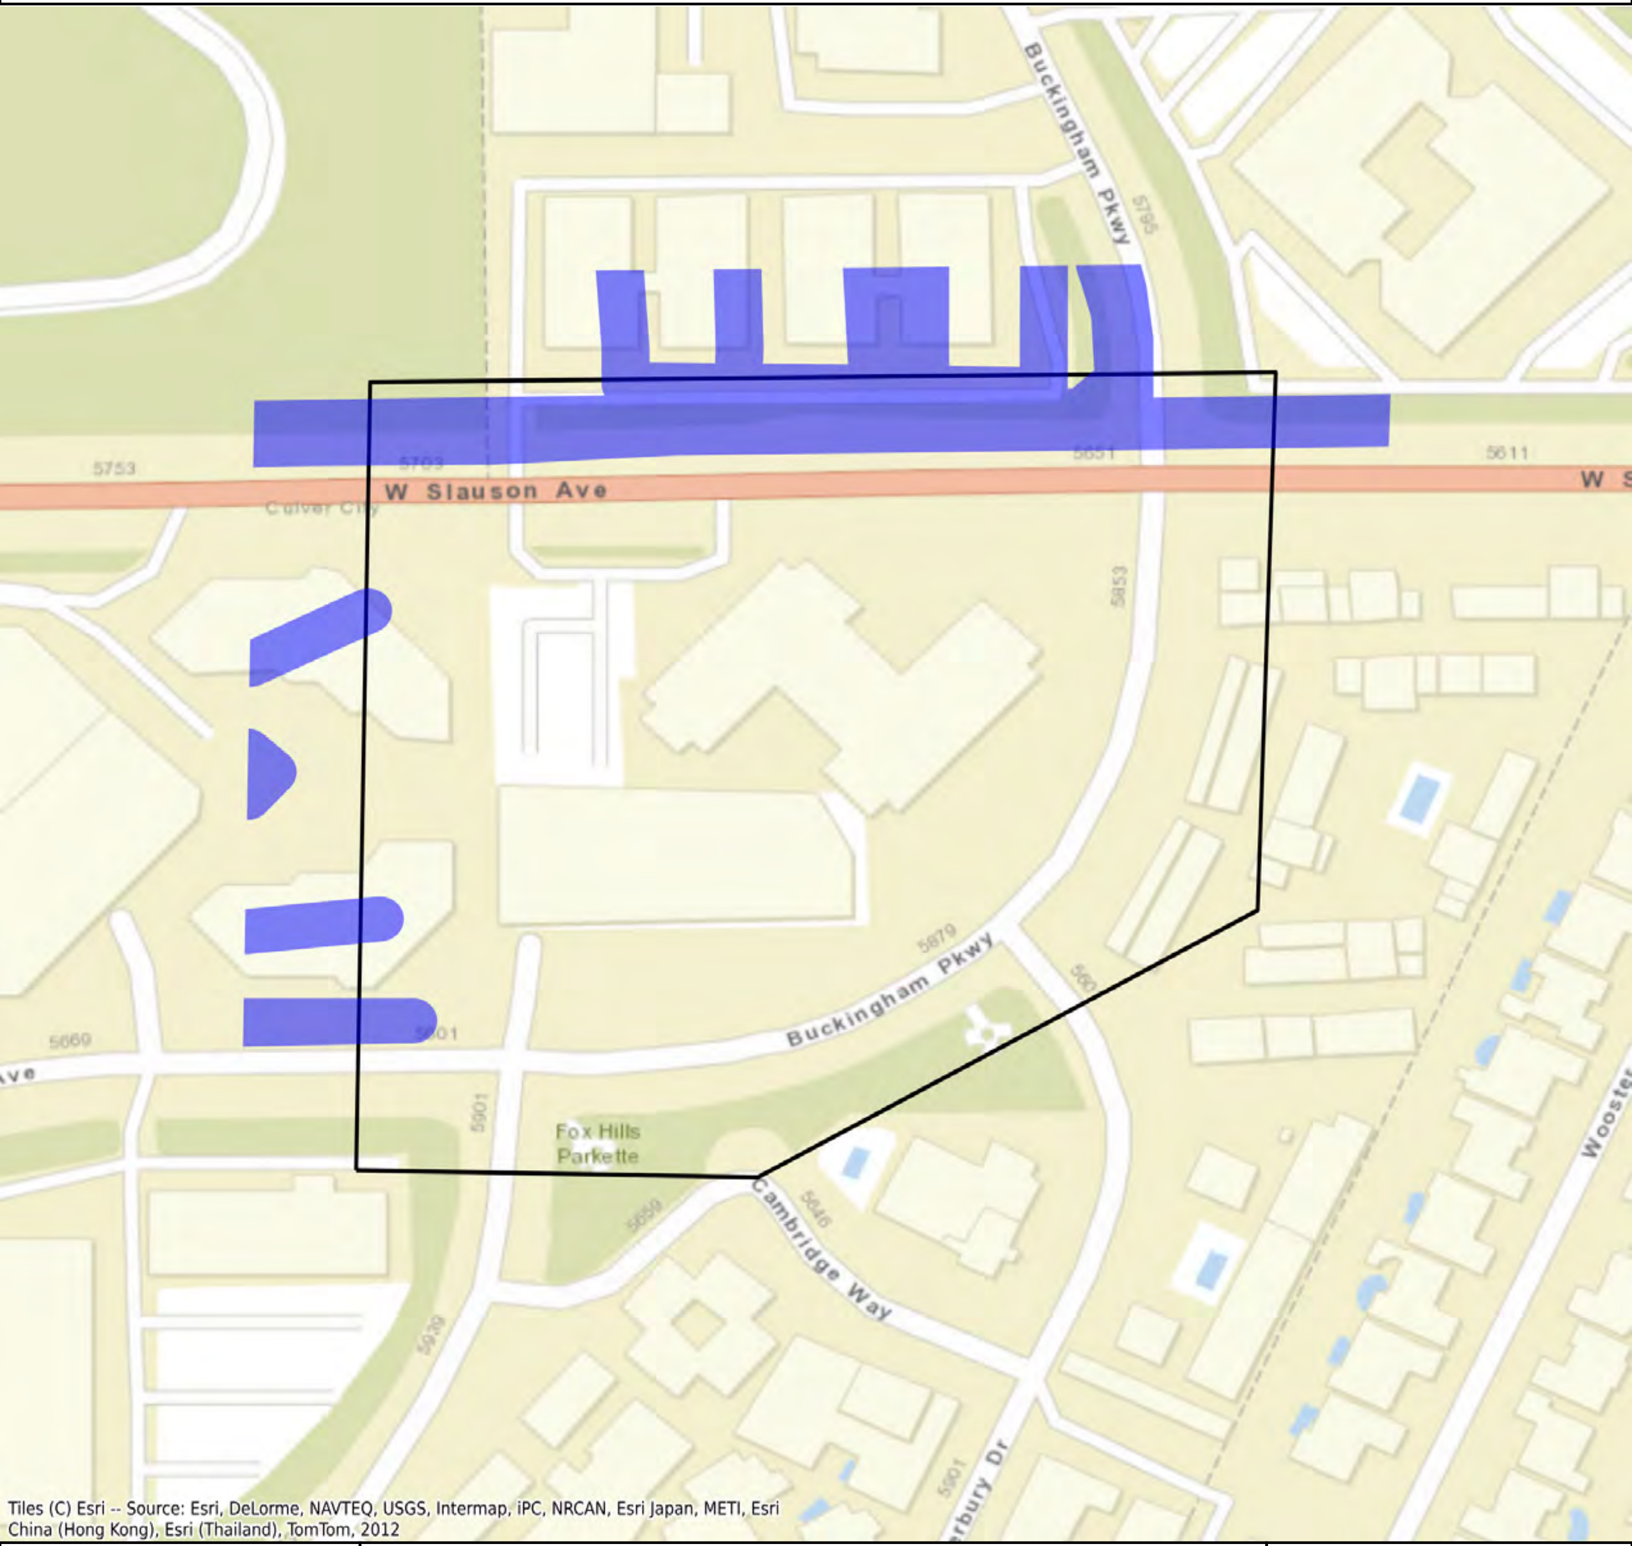
You should address future correspondence to:
https://docs.google.com/forms/d/1WTFKjZVqDismOshjUKMjog2mHrjUPBeGEMKz47s93Mw.

Please include the above **Verizon Business ID number** in your submittal.

Sincerely,

Verizon Business

Verizon Business Facilities Investigation Request: 2025-104



Request Area

Underground Facilities

The facilities detailed above are for informational purposes only. Not to scale. **You must call 811 at least 48 hours prior to any construction.**

ALL APPROPRIATE INQUIRIES (40 CFR 312) CERTIFICATION

I, Marina Grigorova, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR § 312.10.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 INTRODUCTION

Tetra Tech BAS (Tetra Tech) was retained by Slauson Investors, LLC (Slauson Investors) to perform a Phase I Environmental Site Assessment (ESA) of the property located at 100 Corporate Pointe, in Culver City, California (Figure 1).

The subject property is roughly the shape of a quarter-circle, approximately 4.49 acres in size. Currently, the site is developed with a three-story office building in the northeast portion (100 Corporate Pointe), a parking garage in the southwest portion (101 Corporate Pointe), an at-grade asphalt-paved parking lot in the northwest portion, asphalt-paved drive aisles, concrete sidewalks, and landscaped areas. The subject site consists of two land parcels, identified by the Los Angeles County Tax Assessor by APNs 4131-020-020 and 4121-020-023. The site is currently bordered by public roadways on the north, east, and south, and commercial properties to the west.

It is Tetra Tech's understanding that Slauson Investors is considering redevelopment of the site into a multi-family residential complex. The proposed development is anticipated to consist of 351 apartment units situated in a wrap-style 5- to 7-story at-grade building, supported by a 5-level parking garage.

1.1 PURPOSE

The purpose of this Phase I ESA is to evaluate whether *Recognized Environmental Conditions* (RECs), *Controlled RECs* (CRECs), and/or *Historical RECs* (HRECs), as defined in the ASTM Standard E1527-21 and the US Environmental Protection Agency (EPA) All Appropriate Inquiry (AAI) Rule, are present at the site, or, conversely, to reasonably illustrate the lack of any RECs or *de minimis* conditions.

1.2 SCOPE OF WORK

This ESA was performed in accordance with the Tetra Tech proposal dated July 11, 2024, and subsequent communications. The Phase I work described herein was performed in accordance with guidelines for Phase I ESAs provided by ASTM Standard E1527-21 and the EPA AAI rule. In completing this Phase I ESA, the following tasks were performed:

1.2.1 Review of Environmental Setting Information

- Regional geology and hydrogeology review included evaluation of depth to groundwater, localized and regional groundwater flow, and potential groundwater conditions.
- Review of topographic maps provided information regarding general site setting, including elevation, topographic relief and major physiographic features in the site vicinity.
- Review of oil and gas maps was conducted to determine if such exploration activities took place at or around the site.
- Radon and site utilities information was also reviewed.

1.2.2 Site Reconnaissance, Site Vicinity Reconnaissance, and Interviews with Personnel Familiar with the Site

- Tetra Tech searched for evidence of present or past operations that use, used, or may have used potentially hazardous materials.
- Tetra Tech personnel visually inspected and assessed the site for evidence of storage, use, disposal, and/or spills of potentially hazardous materials. Any evidence of visible or suspected hazardous materials was documented with color photographs.
- Tetra Tech visually inspected the site for abnormal or unusual topographic features (such as mounds, depressions, sink holes, etc.) as potential storage and/or disposal areas of hazardous materials.
- A site vicinity reconnaissance was performed to compile a list of companies/businesses in the site vicinity that are reported or appear to use or produce hazardous substances that, in Tetra Tech's judgment, may impact the site.
- Tetra Tech conducted interviews/discussions with personnel familiar with the property and reviewed the User Questionnaire.

1.2.3 Review of Data on Historical Uses of the Site and the Site Vicinity

- Review of readily-available historical aerial photographs and maps – the review provided information on historical land use at the site and in the site vicinity as it relates to potential sources of hazardous waste (e.g., landfills, sumps, or gas stations that are no longer present, or changes to facility features).
- Review of Environmental Lien Search Report, as well as the Title Insurance Commitment Report.
- Review of files available from Culver City and Los Angeles County.

1.2.4 Review of Governmental Environmental Records

- Review of readily available information from pertinent federal, state, county, and city governmental agencies and selected individuals or offices.

1.2.5 Data Evaluation, Report Compilation, and Management

- Tetra Tech evaluated the available data to assess whether the objectives of the investigation had been met. As part of the data evaluation, Tetra Tech is providing the uncertainties associated with the collected data and the stated conclusions and recommendations.
- Tetra Tech prepared this report that includes descriptions of the site under investigation, the purpose and the objectives of the study, approach, detailed scope of work with rationales/justifications, the procedure that was used, pertinent findings, conclusions, recommendations for further work, and limitations, exceptions, and references for cited and/or reviewed documents.

1.3 LIMITATIONS AND EXCEPTIONS

The conclusions and recommendations presented herein are based upon the agreed scope of work outlined in Section 1.2 and detailed in the Tetra Tech proposal dated July 11, 2024, and subsequent communications. Tetra Tech makes no warranties or guarantees as to the accuracy or completeness of information obtained from information provided or compiled by others, such as from Federal and State data base lists, interviewees, and site investigation or other reports. It is possible that relevant site environmental information exists beyond the scope of this investigation. Also, changes in site use may have occurred in the past that are not documented in records made available to Tetra Tech. Additional information, which was not found or obtainable at the time of the writing of this report, may result in modification of our conclusions and recommendations.

The services performed by Tetra Tech have been conducted in a manner consistent with the level of care ordinarily exercised by members of our profession currently practicing under similar conditions, under current regulatory policy and guidelines with respect to environmental concerns. No other warranty is expressed or implied. This report is not a legal opinion.

1.4 USER RELIANCE

This report is certified to, can be relied upon by, and has been prepared for the exclusive use of Slauson Investors, LLC, as well as Alliance Residential Realty, and its members, affiliates, related entities, subsidiaries, equity partners, lenders, title insurers, or regulatory/city agencies or current property owner(s) and their agents, but reliance by any other party requires prior written approval from Tetra Tech.

2.0 GENERAL SITE AND VICINITY CHARACTERISTICS AND SETTING

The following sections describe site location and provide brief site description, general site vicinity characteristics and regional environmental setting, with emphasis on general geological and physiographical features.

2.1 SITE LOCATION, DESCRIPTION AND BOUNDARIES

The subject site is located south of West Slauson Avenue, on the north and west side of Buckingham Parkway, in Culver City, California (Figure 1, Site Location Map). The subject site consists of 4.49 acres in roughly the shape of a quarter-circle. The property is identified by the Los Angeles County Tax Assessor by APNs 4131-020-020 and -023. The street addresses of 100 Corporate Pointe (office building) and 101 Corporate Pointe (parking garage) are associated with the property.

The site is bounded to the north by West Slauson Avenue, and commercial buildings beyond. The east to south curved side of the subject site is bounded by Buckingham Parkway, with residential developments beyond. The site is bounded to the west by multi-level office buildings (200 and 300 Corporate Pointe).

2.2 ENVIRONMENTAL SETTING

2.2.1 Physiographic, Geologic, Groundwater, and Soil Conditions

Major physiographic features in the vicinity of the subject property include the Holy Cross cemetery approximately 0.07 miles to the northwest, across Slauson Avenue; Interstate 405 approximately one mile to the west; Kenneth Hahn State Recreation Area approximately 1.5 miles to the northeast; the Los Angeles International Airport approximately 3 miles to the southwest; the Ballona Wetlands Ecological Reserve approximately 3.5 miles to the southwest; and Venice Beach approximately 5.5 miles to the west.

The site is situated on recent alluvium, consisting of unconsolidated silt, clay, sand, and gravel, which unconformably overlies thick, horizontally bedded, poorly consolidated marine sand/sandstone of the Lower Pleistocene San Pedro Formation.

The site is located between the Baldwin Hills and the Ballona Creek floodplain of the Los Angeles Coastal Plain, in a structural low bounded by the Charnock Fault to the southwest and the Overland Fault to the northeast. Data from the Federal

Emergency Management Agency (FEMA) identifies the subject site as located within FEMA Flood Zone X. The property is characterized as an area of minimal flood hazard.

According to the United States Geological Survey (USGS) Venice, CA Quadrangle 2021 topographic map, the site elevation varies from approximately 150 feet above mean sea level (AMSL) in its northern portion near Slauson Avenue to approximately 130 feet AMSL near its southern boundary at Buckingham Parkway. The site slopes gently to the south (with no distinct mounds or depressions) with changes in elevation being most noticeable near the parking garage, which extends one story below-grade. The nearest bodies of water are Ballona Creek, 1.8 miles west, and harbor at Marina Del Rey, approximately 3.9 miles west-southwest.

The subject site is located in the Charnock subbasin of the Santa Monica Groundwater Basin. According to data from the California State Water Resources Control Board (SWRCB) GeoTracker database for the Los Angeles County ISD, Culver City Branch Leaking Underground Storage Tank (LUST) cleanup site, located approximately 0.5-mile northwest of the subject site, groundwater is first encountered at depth of approximately 20 to 21 feet below ground surface with a groundwater flow direction toward the west.

The National Wetlands Inventory map and other environmental setting maps are included in Appendix A.

2.2.2 Radon

According to the US EPA, the site, being located in Los Angeles County, is situated within Radon Zone 2, with a predicted average indoor radon screening level of more than or equal to 2 picoCuries per Liter (pCi/L) and less than or equal to 4 pCi/L. A zip-code based compilation of California Indoor Radon Levels, published by the California Department of Health Services (DHS) and last updated in February 2016, indicates that out of 43 tests, conducted at properties within the same zip code as the subject site (90230), six resulted in radon concentrations in excess of 4 pCi/L.

2.2.3 Oil and Gas

According to the California Department of Conservation, Geologic Energy Management Division (CalGEM) on-line mapping system (Well Finder), there are no oil wells depicted at the site. However, an idle oil and gas well (API 0403705105) operated by Alanson Co. is identified as being located approximately 0.25-mile to the north-northeast of the subject site. Additionally, a plugged oil and gas well (API 0403705925) operated by Smith, Rucker, and Wilson is identified as being located approximately 0.55-mile to the west-southwest of the subject site. The site is not located within the boundaries of any designated oil field, but is less than one mile southwest of the Inglewood Oil and Gas Field (Appendix A).

According to the National Pipeline Mapping System (NPMS) on-line mapping system, there are no gas or oil pipelines at the subject site. The pipelines nearest to the site are a Chevron gas transmission pipeline and a Crimson hazardous liquid pipeline located under Wooster Avenue, approximately 800 feet east of the site (Appendix A).

2.3 UTILITIES

This area of Culver City is serviced by Southern California Gas Company (gas), Golden State Water Company (water), and Southern California Edison (electric service).

3.0 PHASE I ASSESSMENT RESULTS

To assess existing and historical information regarding the site, Tetra Tech performed the following tasks, described in this section:

- Direct Site Inspection
- Adjacent Sites and Vicinity Observations
- Interviews with the Representative of the Current Site Owner
- Review of User Questionnaire
- Site History/Land Use Research (Aerial Photographs, Topographic Maps, City Directory Listings, Building records, Title report, Environmental Lien/AUL Search)
- Results of the Regulatory Database Review
- Results of Regulatory Agencies Inquiries

3.1 SITE INSPECTION OBSERVATIONS

Tetra Tech inspector, Ms. Reily Rivera, performed direct inspection of the site on January 28, 2025. During the site visit, the property was visually inspected for evidence of possible past and/or current environmental concerns. Photographs included in Appendix B show the general characteristics of the site.

As mentioned in previous sections, the subject site is developed with a three-story office building in the northeast portion, a parking garage in the southwest portion, an at-grade asphalt-paved parking lot in the northwest portion, asphalt-paved drive aisles, concrete sidewalks, and landscaped areas. The landscaped portions of the site did not exhibit characteristics of depressed or inhibited vegetation. The site is relatively level.

Out of approximately 22 tenant spaces in the three-story office building, only approximately five were occupied. The first-floor tenants included California Bank and Trust and Sando Tomida, DDS; second-floor tenants included Achievable Health and MMS Trading (no access); third-floor tenants included Inside Edition, a small production office. The vacant suites exhibited typical office layouts, including private offices, kitchenette areas, and cubicles. Additional spaces in the office building included a main lobby, multi-stall restrooms, storage rooms for office supplies and restroom paper products, fire risers, janitor's closets, phone/electrical rooms, and an engineer's storage room. Minor quantities of common household cleaners were observed in the janitor's closet.

The parking garage and asphalt-paved parking lot exhibited surficial staining and cracking typical of their use and not considered to be an environmental concern. Storage spaces are rented out in the parking garage; access was not provided into these storage spaces.

Visual survey of the site did not identify any conditions of concern.

3.2 ADJACENT SITES AND VICINITY OBSERVATIONS

The general vicinity of the site is a mixture of commercial and residential properties. The site is bounded to the north by West Slauson Avenue, with commercial properties beyond. The curved east and south sides of the subject site are bounded by Buckingham Parkway, and residential properties beyond. The site is bounded to the west by multi-story office buildings.

No environmental concerns were noted for the site vicinity based on visual observations.

3.3 INTERVIEW WITH CURRENT SITE MANAGER/OWNER REPRESENTATIVE

The property is currently owned by Slauson Investors, LLC, a Delaware limited liability company (Slauson Investors). On behalf of Slauson LLC, the property is managed by Sagard Real Estate (Sagard).

An interview with Ms. Ariya Saenz, a senior property manager at Sagard, was conducted during a virtual meeting on January 31, 2025. During the interview, Ms. Saenz indicated that she has managed the subject property on behalf of Slauson Investors for approximately three years, while prior managers at Sagard have managed it since 2020, when Sagard started managing the property for Slauson Investors. According to Ms. Saenz, the property has always been used and maintained as an office complex since acquisition.

Ms. Saenz indicated that the property was developed in 1984 but was unaware of its use prior to current development (refer to Section 3.6 for historical land use review).

Although currently the office building is nearly empty (only five out of 22 units are occupied), the building was more utilized until recently. MGM Studios occupied most of the offices (more than two floors) within the building until December 2024. MGM was a long-term tenant; their uses consisted primarily of office and minor production, similar to the Inside Edition space (refer to Section 3.1). There is no film or photo processing at the property.

The building is not typically open to the general public. The only public-facing tenants in the building are the bank and the dentist, both of which are long-term tenants.

Ms. Saenz indicated that she was not aware of any incidents, floods or fires ever occurring at the property. There are no tanks, wells, clarifiers, grease interceptors, emergency generators, or sumps at the property. According to Ms. Saenz, there are no issues with vandalism or transient activity at or near the property.

Ms. Saenz said that regular maintenance, repairs and/or remodeling of various spaces have taken place at the property. Whenever required, testing for asbestos and/or lead-based paint was performed; neither was found in quantities which would have required mitigation or containment.

Overall, Ms. Saenz was unaware of any features or items of environmental relevance or significance with respect to the subject property.

3.4 REVIEW OF USER QUESTIONNAIRE

In accordance with ASTM E1527-21, Ms. Ariya Saenz of Sagard completed the User Questionnaire for the subject site. A copy of the completed questionnaire is included as Appendix C to this report. As indicated on the Questionnaire, Ms. Saenz was unaware of any environmental concerns for the subject site.

3.5 SITE HISTORY AND LAND USE

Based on a review of available information, the site was undeveloped as early as 1923. By 1928, the subject site and adjoining properties were developed as a golf course, which was part of the Fox Hills Country Club. In approximately 1983, the subject site was redeveloped to its current configuration of office building and associated parking garage.

3.5.1 Historical Aerial Photographs

Historical aerial photographs of the subject site were obtained from EDR. Aerial photographs available for review were taken in 1923, 1928, 1938, 1947, 1952, 1964, 1970, 1976, 1983, 1989, 2002, 2005, 2009, 2012, 2016, and 2020. Copies of these aerial photographs are included in Appendix D.

The subject site appears as undeveloped land in the 1923 aerial photograph. A dirt two-lane road (West Slauson Avenue) adjoins the subject site to the north. Beginning in 1928, the subject site is depicted as part of a golf course with grassy areas and sand traps visible. In the 1983 aerial photograph, construction and grading is observed on the subject site: the entire site has been graded and the parking garage in the southwest portion is under construction. By 1989, the site appears as it is present-day with the office building, parking garage, asphalt-paved parking lot, drive aisles, and landscaped areas.

Properties in the site vicinity are depicted as predominately vacant land in the 1923 aerial photograph with the exception of a rural residence to the north of the subject site, across West Slauson Avenue. The adjacent properties are part of the golf course depicted beginning in the 1928 aerial photograph. Slauson Avenue, adjoining to the north of the subject site, is depicted in its present-day alignment by 1938. Tract housing in the vicinity northeast and east of the site is first depicted in the 1964 aerial image. Buckingham Parkway, adjoining to the east and south of the subject site, is first depicted in 1970. Commercial development to the north and southwest of the subject site increases in 1983. The present-day residential development to the east and commercial development adjoining to the west of the subject site are depicted in the 1989 aerial.

Although no specific concerns were identified for the subject site and/or its vicinity based on the review of the aerial photographs, historical use of the site as a golf course may be considered a general concern. However, because the site has been redeveloped since then, this concern has likely been mitigated.

3.5.2 Historical USGS Topographic Maps

Historical topographic maps of the subject site were obtained from EDR. Maps available for review include a USGS Redondo, CA Quadrangle topographic map prepared in 1896; USGS Inglewood, CA Quadrangle topographic maps prepared in 1924, 1930, and 1948; and USGS Venice, CA Quadrangle topographic maps prepared in 1950, 1964, 1972, 1981, 2012, 2015, 2018, and 2021. Copies of these topographical maps are included in Appendix E.

The site is depicted as undeveloped land beginning in the 1896 topographic map. From 1964 until 1981, the subject site is depicted as a golf course and part of the Fox Hills Country Club. The 2012, 2015, 2018, and 2021 topographic maps depict the subject site and its vicinity as built-up areas, but do not show individual buildings on the maps and there are no details for the site itself, apart from the streets as its boundaries.

The topographic maps indicate the site elevation ranges from approximately 125 to 155 feet AMSL. The Los Angeles City Boundary is shown south of the subject site beginning in 1924. The Holy Cross Cemetery is depicted northwest of the subject site beginning in 1948. The Culver City Airport is shown southwest of the subject site from 1950 until 1981.

Although no specific concerns were identified for the subject site and/or its vicinity based on the review of the USGS Topographic maps, historical use of the site as a golf course may be considered a general concern. However, because the site has been redeveloped since then, this concern has likely been mitigated.

3.5.3 City Directories

EDR provided Tetra Tech with a City Directory Abstract Report for subject site and its vicinity. Listings for the subject site address of 100 Corporate Pointe were available from 1986 until 2020. These listings include typical corporate office building occupants, such as sales consultants, marketers, record technicians, travel agencies, and entertainment/production groups. Listings for the surrounding vicinity indicate typical small commercial businesses beginning in 1985 until present day, and the Fox Hills Country club from in 1950 until 1970. No listings which would suggest a potential environmental concern were identified in the City Directory Abstract Report. A copy of the City Directory Report is provided in Appendix F.

3.5.4 City Records of Culver City

The Culver City Office of the City Clerk is the custodian of public records for the City. A public records request was submitted to the City Clerk on January 29, 2025, for any permits issued for the subject site. The City Clerk provided records from the Building and Safety Division on February 11, 2025, and from the Fire Department on February 13, 2025. It was determined from review of the Building and Safety Division records that permits for the office building were filed under the address of

100 Corporate Pointe and permits for the parking garage were filed under the address of 101 Corporate Pointe.

The earliest available building permit was the original building permit for a "new commercial 3-story office building" at 100 Corporate Pointe issued August 25, 1983. A building permit for "parking garage 3 levels" was dated October 19, 1983, for the address 101 Corporate Pointe. A temporary Certificate of Occupancy for 100 Corporate Pointe was dated July 2,1984. A Certificate of Occupancy for an "office building" was dated December 12, 1988. A Certificate of Occupancy for a "parking structure" at 101 Corporate Pointe was dated December 13, 1988.

Among other available records, a permit for an "addition to existing parking structure" from 381 to 472 spaces was dated April 27, 1998. A building permit for a "storage unit within parking structure" at 101 Corporate Pointe was dated May 23, 1992. A building permit to "install Certainteed Funtlastic Roof System over (1) layer bur cap sheet" was dated March 14, 2002. An electrical permit for "new Nextel site – installing 12 antennas and 1 new pre-fab equipment shelter on roof of existing building for suite #400" was dated December 16, 2004. A building permit for "installing equipment shelter (11'6" x 20') on platform on roof of existing building and installing 12 antennas at exterior part of wall" was dated December 16, 2004.

Numerous additional building, electrical, mechanical, HVAC, and plumbing permits were available for review, the majority of which pertained to tenant improvements made at the subject building. None of the records provided by the City Clerk's Office included items which would be considered an environmental concern at the subject site. Copies of pertinent Culver City Building records are included in Appendix G.

3.5.5 Commitment for Title Insurance Report

Tetra Tech was provided with a copy of the Commitment for Title Insurance Report for the subject site. The report was prepared by Fidelity National Title Insurance Company and dated January 14, 2025. A copy of the report is included in Appendix H. The report indicates that the property is owned by Slauson Investors, LLC, a Delaware limited liability company.

Review of the Title Commitment Report and associated exceptions did not identify any deed restrictions, activity-use limitation (AULs), or environmental liens against the subject site.

Additionally, EDR provided Tetra Tech with an Environmental Lien and AUL Search for the subject site. A copy of the report is included in Appendix H. EDR did not identify any environmental liens or AULs against the subject site.

3.7 RESULTS OF REGULATORY AGENCY LIST REVIEW

A records search of multiple Federal, State, and local environmental databases was provided by EDR. The EDR Database Report is included in Appendix I. Over 100 databases were searched using radii specified in ASTM E1527-21.

Searched databases included Federal, State, and local (Los Angeles County) databases prescribed by the ASTM Standard, as well as multiple supplemental Federal and State databases.

These searches identified the following listings for the subject site address of 100 Corporate Pointe:

- Sprint Cell Site LA7 and T-Mobile West #LA033 were identified on the Facility Index System (FINDS) database under radiotelephone communications.
- Slauson Investors, LLC was identified on the HWTS and HAZNET databases for disposing of approximately two 55-gallons of waste oil and mixed oil, and oil/water separation sludge. Based on follow-up communication with Sagard and Slauson Investors, the disposal information (from 2014 and 2015) is potentially related to elevator repairs. No violations were reported.
- Corporate Pointe Dental was identified on the Los Angeles Co. HMS database; no additional information was available pertaining to this listing.
- 1x 100 Corporate Point was identified on the HWTS database; no additional information was available pertaining to this listing.

Because no additional listings, which would indicate a release are associated with the subject site, as well as the passage of time, these listings are not considered to be a concern.

The following listings were identified corresponding to properties near the subject site:

- 5601 West Slauson Avenue is listed on the SWEEPS UST and EDR HIST AUTO databases. This property is located approximately 0.05-mile northeast and cross-gradient from the subject site. No violations are recorded. No additional information is provided for these listings; based on the database listing, this property does not pose an environmental concern to the subject site.

- 400 Corporate Pointe, Suite 300 is listed on the EDR HIST AUTO database. This property is located approximately 0.1-mile west and down-gradient of the subject site. No violations are recorded. No additional information is provided for these listings; based on the database listing, this property does not pose an environmental concern to the subject site.
- 5750 Hannum Avenue is listed on the RCRA-SQG, FINDS, ECHO, EMI, AND LOS ANGELES CO. HMS databases. This property is located approximately 0.1-mile southwest and cross-gradient from the subject site. No violations are recorded. No additional information is provided for these listings; based on the database listing, this property does not pose an environmental concern to the subject site.
- 600 Corporate Pointe is listed on the CERS HAZ WASTE and RCRA NONGEN / NLR databases. This property is located approximately 0.12-mile west and down-gradient from the subject site. Recorded violations are administrative in nature and do not pertain to the handling or storage of hazardous waste. Based on the database listing, this property does not pose an environmental concern to the subject site.
- 601 Corporate Pointe is listed on the SWEEPS UST, UST, and LOS ANGELES CO HMS databases. This property is located approximately 0.12-mile west and down-gradient from the subject site. No violations are recorded. No additional information is provided for these listings; based on the database listing, this property does not pose an environmental concern to the subject site.

Based on the information presented in the database report, off-site facilities do not appear to pose a threat to the subject site. No listings appear to present a vapor intrusion concern.

3.8 RESULTS OF REGULATORY AGENCIES INQUIRIES

As documented by correspondence records included in Appendix J, Tetra Tech submitted requests for review of records maintained by the Los Angeles County Fire Department (LACoFD) Certified Unified Program Agency (CUPA). Other sources of potential environmentally relevant information that were searched online using publicly available databases included the California Department of Toxic Substances Control (DTSC) EnviroStor database, the State Water Resources Control Board (SWRCB) GeoTracker database, and the SCAQMD Facility INformation Detail (FIND) database.

Mexicana Airlines at the subject site address of 100 Corporate Pointe was identified on the FIND database under Facility ID 99344. No equipment listings, notices of violation, notices to comply, emissions, or permits to operate were available pertaining to this listing. Most likely, this listing was associated with an office used by Mexicana Airlines. As no additional information is provided for this listing; this FIND listing is not considered to pose an environmental concern to the subject site.

Records from the Culver City Fire Department, the local Certified Unified Program Agency (CUPA) pertained to records for the subject site filed under the Fire Department's Hazardous Materials Disclosure Program. These records consisted of inspections dating from 2009 until 2016. The inspections were conducted on the Nextel, Spring, and T-Mobile cellular communications site located on the roof of the office building. The site reportedly had hazardous materials consisting of "sealed batteries within a heavily sealed self-contained cabinet preventing accidental release," as discussed in the CUPA Business Plan and Contingency Plan. No violations were recorded for the subject site. No USTs or ASTs were reported on the subject site. None of the records provided by the City Clerk's Office included items which would be considered an environmental concern at the subject site. Copies of pertinent Culver City Fire Department records are included in Appendix J.

LACoFD's CUPA identified the subject site on their Inactive Facility Inventory under the name Sprint Cell Site LA73XC472 with CERS ID #10310047 and Facility ID FA0037082; however, no additional information was listed with LACoFD as the Culver City Fire Department is the custodian of these records, as discussed above.

Neither GeoTracker nor EnviroStor databases included any records for the site.

4.0 FINDINGS

Based on the results of this ESA, the following findings are presented:

- The subject site is currently developed with a three-story office building in the northeast portion, a parking garage in the southwest portion, an at-grade asphalt-paved parking lot in the northwest portion, asphalt-paved drive aisles, concrete sidewalks, and landscaped areas.
- No potential environmental concerns were noted for the current use of the site.
- Historically, the site was vacant land as early as 1923. By 1928, the subject site and adjoining properties were developed as a golf course which was part of the Fox Hills Country Club. In approximately 1983, the subject site was redeveloped to its current configuration of office building and parking garage.
- The subject site is not identified as being currently evaluated by the State of California, local, or federal government for remedial action under CERCLA or any other environmental regulations.
- Review of available public information did not identify any specific concerns with regard to off-site properties. No potential vapor encroachment issues were identified.

5.0 OPINION

In the professional opinion of Tetra Tech BAS, an appropriate level of inquiry has been made into the previous uses of the site consistent with good commercial and customary practice with the intent to minimize environmental liability. No data gaps were encountered.

The subject site was utilized as a golf course from the mid-1920s until the early 1980s, for a total of approximately 55 years. Pesticides and herbicides may have been used to manage the golf course; however, there was likely significant grading associated with the construction of the current office building. Therefore, it is unlikely that surficial soils still contain significant quantities of pesticides and herbicides, which would present a risk to the proposed development.

6.0 CONCLUSIONS AND RECOMMENDATIONS

As detailed in the previous sections, based on the direct site and vicinity inspections, interviews with person familiar with the site, review of historical aerial photographs and topographic maps, review of regulatory agency database report, and review of information available from the regulatory agencies for the subject property, the following conclusions and recommendations are presented regarding the subject site.

6.1 CONCLUSIONS

This Phase I ESA was performed by Tetra Tech BAS in general accordance with ASTM Practice E1527-21 and EPA's AAI guidelines, as well as the scope of work described in Section 1.0, for the subject site located at 100 Corporate Pointe, north and west of Buckingham Parkway, south of West Slauson Avenue, in Culver City, California and identified by the Los Angeles County Tax Assessor by APNs 4131-020-020 and 4121-020-023. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report.

This Phase I ESA has revealed no evidence of *Recognized Environmental Conditions* (RECs) for the subject property and its vicinity.

6.2 RECOMMENDATIONS

Based on the results of this Phase I ESA, no further investigation of the subject property is considered warranted at this time, and thus none are recommended.

7.0 STATEMENT OF QUALIFICATIONS

The principal investigator for this Phase I ESA was Ms. Marina Grigorova, a Project Manager at Tetra Tech BAS. Ms. Grigorova is a California Registered Engineer (C67877) with more than twenty-five years of environmental engineering and environmental research experience. She is responsible for conducting Phase I and II Environmental Site Assessments, Remedial Investigations, Implementation of Remedial and Corrective Actions, preparation of Remedial Action Plans, Feasibility Studies, Sampling Plans and Health and Safety Plans. She also has extensive knowledge of federal and state environmental statutes and regulations.

Research and field assistance for this project were provided by Ms. Reily Rivera, an environmental geologist possessing the required skills and experience to provide technical and field support for environmental site investigation and remediation programs. This has included preparation of Phase I and Phase II Environmental Site Assessments, groundwater monitoring, soil and soil gas sampling, analysis of site monitoring data, and report preparation.

Methane Mitigation?

Find out if your property is within 1,000 feet of a methane producing site or 300 feet of an oil or gas well.

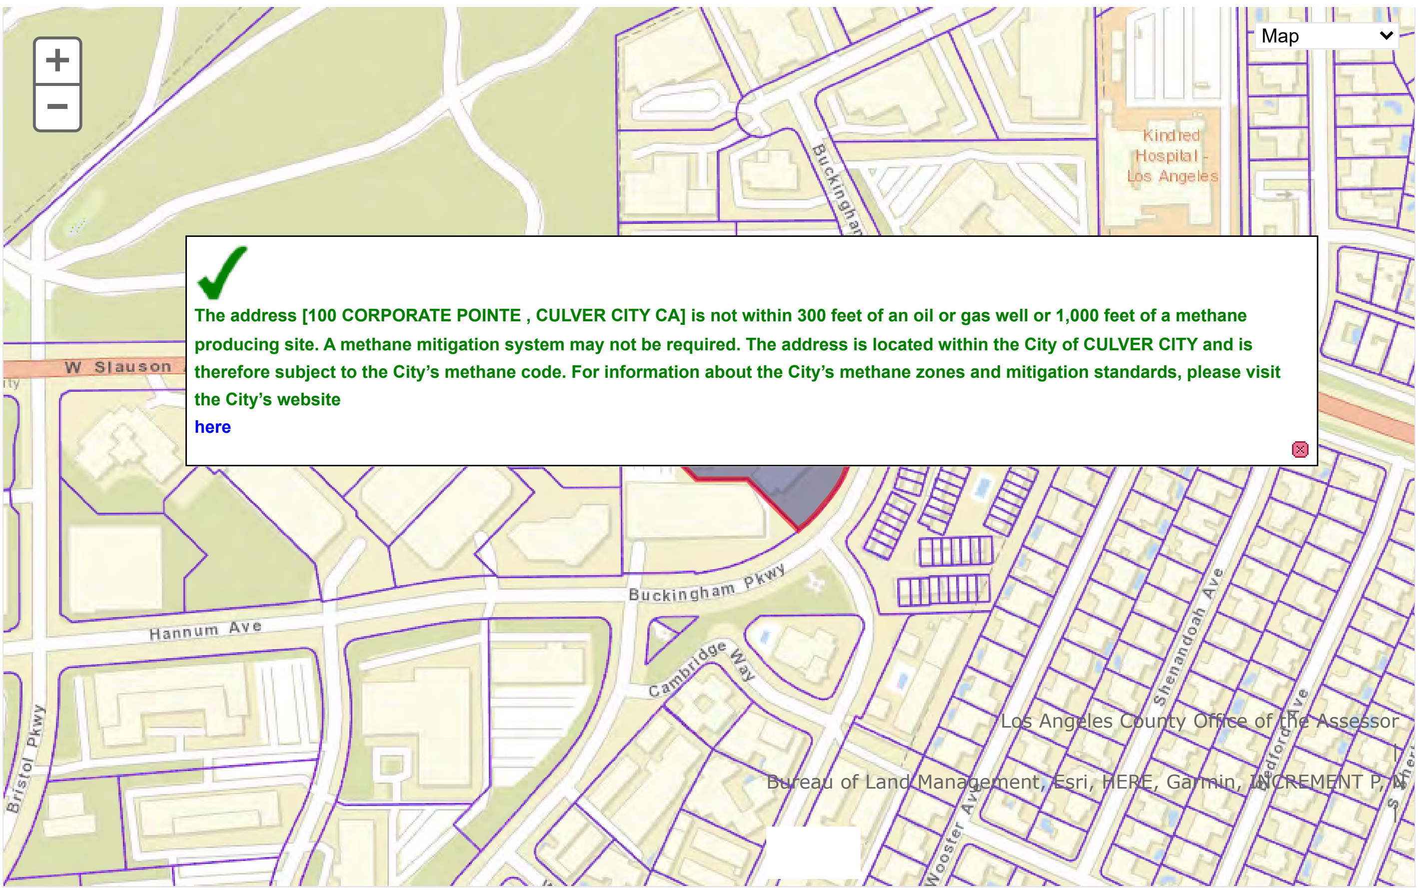
Search by:

Address or Intersection

100 Corporate Pointe Culver City CA

Search

Measure Tool Report a Problem



The address [100 CORPORATE POINTE , CULVER CITY CA] is not within 300 feet of an oil or gas well or 1,000 feet of a methane producing site. A methane mitigation system may not be required. The address is located within the City of CULVER CITY and is therefore subject to the City's methane code. For information about the City's methane zones and mitigation standards, please visit the City's website

APPENDIX C

PHASE I ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE (ASTM E1527-21)

SITE LOCATION AND DESCRIPTION 100 Corporate Pointe, Culver City, CA 90230

QUESTIONNAIRE COMPLETED BY: Ariya Saenz
Name

Sr. Property Manager
Title

Property Management
Affiliation

(1.) Environmental liens that are filed or recorded against the *subject property* (40 CFR 312.25).	
Did a search of *land title records* (or judicial records where appropriate) identify any *environmental liens* filed or recorded against the *subject property* under federal, tribal, state or local law?	**Yes** **No**
If **YES**, describe:	
(2.) Activity and use limitations that are in place on the *subject property* or that have been filed or recorded against the *subject property*.	
Did a search of *land title records* (or judicial records where appropriate) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *subject property* and/or have been filed or recorded against the *subject property* under federal, tribal, state or local law?	**Yes** **No**
If **YES**, describe:	
(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).	
Do you have any specialized knowledge or experience related to the *subject property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *subject property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?	**Yes** **No**
If **YES**, describe:	
(4.) Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29).	
Does the purchase price being paid for this *subject property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *subject property*?	**Yes** **No** I don't know

(5.) Commonly known or *reasonably ascertainable* information about the *subject property* (40 CFR 312.30).	
Are you aware of commonly known or *reasonably ascertainable* information about the *subject property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example:	**Yes** **No**
(a.) Do you know the past uses of the *subject property*?	**Yes** **No**
If **YES**, what was it? Office	
(b.) Do you know of specific chemicals that are present or once were present at the *subject property*?	**Yes** **No**
If **YES**, what were they?	
(c.) Do you know of spills or other chemical releases that have taken place at the *subject property*?	**Yes** **No**
If **YES**, when did they occur?	
If **YES**, what was their nature?	
(d.) Do you know of any environmental cleanups that have taken place at the *subject property*?	**Yes** **No**
If **YES**, describe:	
(6.) The degree of obviousness of the presence or likely presence of contamination at the *subject property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).	
Based on your knowledge and experience related to the *subject property* are there any *obvious* indicators that point to the presence or likely presence of releases at the *subject property*?	**Yes** **No**
If **YES**, what are they?

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk,Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Re: Temporary Certificate of Occupancy - 100 Corporate Pointe

Dear Mr. Miller:

In reference to your letter of June 25, 1984 to Jody Hall-Esser, the Building Safety Division will, in addition to those items listed in your letter, require the following conditions to be met prior to occupancy of any portion of the structure.

1) The two stairways located in the proposed occupied tenant space shall be kept clear of construction material and shall not be used by construction personnel to lift materials to the unfinished areas.

2) Corridors leading to unfinished areas shall be barricaded and posted with signs stating "CONSTRUCTION AREA - AUTHORIZED PERSONNEL ONLY".

3) Stairway exits and elevator lobby at the ground floor shall be kept free of construction material. This includes pathways leading from the building to a public way and/or parking area.

4) The parking structure shall not be used until completed and certified for occupancy by the Building Inspector.

5) Designated parking for tenant shall be kept free of construction material.

6) All fire safety devices shall be maintained in operation at all times.

And finally, any condition deemed a public safety hazzard by the Building Inspector shall be corrected immediately.

If you have any questions regarding these conditions, please do not hesitate to call.

Very truly yours,

Jim Teutimez

CONSTRUCTION & DEMOLITION (C&D)/WASTE RECYCLING AND DISPOSAL SERVICES (Culver City Municipal Code 5.01.010 **MUNICIPAL SERVICE EXCLUSIVE**)

A. Solid waste handling and recyclable waste material handling shall be performed exclusively by the City or its authorized agents. The City Council may regulate, by ordinance or resolution, all aspects of solid waste handling and recyclable material handling, including, but not limited to, frequency of collection, means of collection and transportation, level of serves, charges, fees, and nature, location and extent of providing solid waste handling services.

The City of Culver City provides waste disposal and recycling services for all construction & demolition projects within city limits in accordance with CCMC 5.01.010. As part of the Building & Safety Division's Permitting process, the information provided will assist in establishing your waste disposal and recycling services account and initiate waste collection, processing and disposal services for materials generated at the project address.

☐ Initial Application ☐ Revision ☐ Addendum

Description of work: INTERIOR DEMO AS PER PLAN "A-0.0 DEMO PLAN"

Existing use or business: OFFICE

Proposed use or business: MGM STUDIOS

PLEASE CHECK ALL THAT APPLY:

☐ This is a new ground-up house or commercial structure.
☐ Adding 50% or more of the existing area/square footage.
☐ Adding 50% or more of the existing value of the house or structure as defined by L.A. County Assessor.

Square Footage	Existing	Additional
1st Floor:	15,000	
2nd Floor:		
Garage:		
Other*:		
TOTAL:		

*Please specify ______

COMMERCIAL ONLY / EXISTING SQUARE FOOTAGE:

Tenant Improvement: 15,000 s.f.
Site work only: ______ s.f.

TOTAL VALUATION**: ______

**Building Safety will review valuation based on ICBO Building Valuation Data and/or R.S. Means Construction Cost Data. Applicants have the option of submitting copies of all contracts/bids, or a detailed cost estimate for all on-site construction.

PLEASE TURN FORM OVER TO CONTINUE ⇨

Check if applicable:

☐ This application is a continuation of a Planning Division discretionary review process. (If checked, please contact Planning directly at (310) 253-5710 for further information.)

☐ This project involves site re-grading. (If checked, please contact Engineering Division of Public Works at (310) 253-5600 for further information.)

ART IN PUBLIC PLACES REQUIREMENT (APPP) APPLIES TO THE FOLLOWING PROJECTS:

- All new residential projects of (5) or more units with a valuation of $500,000 or more.
- All new commercial projects (City and Private Property) with a valuation of $500,000 or more.
- All remodeling of existing residential buildings of (5) or more units with a valuation of $250,000 or more.
- All remodeling of existing commercial buildings with a valuation of $250,000 or more.
- If the 1% APPP allocation (based on the project valuation) is *less* than $75,000, then the applicant shall pay the allocation to the Cultural Trust Fund as the only option for complying with the APPP requirement (i.e., the applicant does not have the option of commissioning art for their project unless they want to spend more than $75,000).
- If the 1% APPP allocation (based on the project valuation) is *more* than $75,000, then the applicant may commission Art Work approved by the City's Cultural Affairs Commission worth at least 1% or more of the total valuation.
- Multiple building permits issued **within a three year period** for a single project shall be considered in the aggregate in determining the APPP allocation (so if an applicant has a $600,000 new development project but breaks this up into two $300,000 building permits, they are subjected to the APPP requirement).

Exceptions: Covenanted low- and moderate-income and senior citizen housing and buildings which are dedicated primarily to non-profit performing arts spaces or museum uses for as long as the performing arts or museum uses are maintained within these buildings. (For larger residential and mixed-use projects where a portion of the units are covenanted low- and moderate incoming and senior citizen housing, the project value is reduced by a formula outlined in the CCMC to determine what, if any, the APPP allocation shall be.)

APPENDIX H

ALTA COMMITMENT FOR TITLE INSURANCE

issued by:

Fidelity National Title Insurance Company

Commitment Number:

NCSCO00086
FBDO-2500735

NOTICE

IMPORTANT - READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, Fidelity National Title Insurance Company, a Florida corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Amount of Insurance and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within one hundred eighty (180) days after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

Fidelity National Title Insurance Company

By:

Michael J. Nolan, President

EXHIBIT "A"

Legal Description

THE PROJECT FOR INGRESS AND EGRESS FROM ONE LOT TO ANOTHER LOT AND TO THE BUILDINGS, INCLUSIVE PARKING STRUCTURES, SITUATED ON SUCH LOTS, AS SET FORTH IN SECTION 5.1 (D) OF THE DECLARATION OF COVENANTS, CONDITIONS AND RESTRICTIONS, RECORDED AUGUST 1, 1983 AS INSTRUMENT NO. 83-882633, OFFICIAL RECORDS.

APN: 4134-020-020 AND 4134-020-023

SCHEDULE B, PART I - Requirements

All of the following Requirements must be met:

1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

2. Pay the agreed amount for the estate or interest to be insured.

3. Pay the premiums, fees, and charges for the Policy to the Company.

4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

5. Release(s) or Reconveyance(s) of Item No(s). None

6. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the entity named below.

   Limited Liability Company: SLAUSON INVESTORS LLC, a Delaware limited liability company

   a. A copy of its operating agreement, if any, and any and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member.

   b. If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendment thereto with the appropriate filing stamps.

   c. If the Limited Liability Company is member-managed a full and complete current list of members certified by the appropriate manager or member.

   d. A current dated certificate of good standing from the proper governmental authority of the state in which the entity was created

   e. If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.

   f. If Limited Liability Company is a Single Member Entity, a Statement of Information for the Single Member will be required.

   g. Each member and manager of the LLC without an Operating Agreement must execute in the presence of a notary public the Certificate of California LLC (Without an Operating Agreement) Status and Authority form

7. In order to complete this report, the Company requires a Statement of Information to be completed by the following party(ies),

   Party(ies): All Parties

   The Company reserves the right to add additional items or make further requirements after review of the requested Statement of Information.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Fidelity National Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

SCHEDULE B, PART I - Requirements
(continued)

NOTE: The Statement of Information is necessary to complete the search and examination of title under this order. Any title search includes matters that are indexed by name only, and having a completed Statement of Information assists the Company in the elimination of certain matters which appear to involve the parties but in fact affect another party with the same or similar name. Be assured that the Statement of Information is essential and will be kept strictly confidential to this file.

8. Unrecorded matters which may be disclosed by an Owner's Affidavit or Declaration. A form of the Owner's Affidavit/Declaration is attached to this Preliminary Report/Commitment. This Affidavit/Declaration is to be completed by the record owner of the land and submitted for review prior to the closing of this transaction. Your prompt attention to this requirement will help avoid delays in the closing of this transaction. Thank you.

   The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit/Declaration.

9. Due to the special requirements of SB 50 (California Public Resources Code Section 8560 et seq.), any transaction that includes the conveyance of title by an agency of the United States must be approved in advance by the Company's State Counsel, Regional Counsel, or one of their designees.

END OF REQUIREMENTS

END OF SCHEDULE B, PART I

SCHEDULE B, PART II - Exceptions

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

I. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.

II. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.

III. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.

IV. Any encroachment, encumbrance, violation, variation or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.

V. (a) Unpatented mining claims: (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the Public Records.

VI. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.

VII. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

VIII.Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public records or attaching subsequent to the Effective Date but prior to the date the Proposed Insured acquires for value of record the estate or interest or mortgage thereon covered by this Commitment.

A. Property taxes, which are a lien not yet due and payable, including any assessments collected with taxes to be levied for the fiscal year 2025-2026.

SCHEDULE B, PART II - Exceptions
(continued)

B. Property taxes, including any personal property taxes and any assessments collected with taxes, are as follows:

Tax Identification No.:	4134-020-020
Fiscal Year:	2024-2025
1st Installment:	$19,007.45, PAID
2nd Installment:	$19,007.45, OPEN (Delinquent after April 10)
Penalty and Cost:	$1,910..74
Homeowners Exemption:	$0.00
Code Area:	08855

Property taxes, including any personal property taxes and any assessments collected with taxes, are as follows:

Tax Identification No.:	4134-020-023
Fiscal Year:	2024-2025
1st Installment:	$162,854.16, PAID
2nd Installment:	$162,854.16, OPEN (Delinquent after April 10)
Penalty and Cost:	$16,295.41
Homeowners Exemption:	$0.00
Code Area:	08855

C. Any matters arising with regard to assessments of documentary transfer tax related to the measures below.

NOTICE: Certain cities in Los Angeles County impose a documentary transfer tax that is in addition to the Los Angeles County documentary transfer tax of $.55 per $500 ($1.10 per $1,000) based upon the purchase price or value of the property transferred. Additional transfer tax is imposed by the following cities in Los Angeles County:

Culver City
Los Angeles
Pomona
Redondo Beach
Santa Monica

For details about these taxes, please contact your title officer or escrow officer. Please be advised that, in the City of Santa Monica, effective March 1, 2023, for transfers of property with a sale price or value of $8,000,000 or more, there will be a new, additional transfer tax of $5.60 per $100 ($56.00 per $1,000). In the City of Los Angeles, effective April 1, 2023, for transfers of property with a sale price or value of $5,000,000 up to $10,000,000, there will be a new, additional transfer tax of 4% of the entire sale price or value; for transfers with a sale price or value of $10,000,000 or more, there will be a new, additional transfer tax of 5.5% of the entire sale price or value.

D. The lien of supplemental or escaped assessments of property taxes, if any, made pursuant to the provisions of Chapter 3.5 (commencing with Section 75) or Part 2, Chapter 3, Articles 3 and 4, respectively, of the Revenue and Taxation Code of the State of California as a result of the transfer of title to the vestee named in Schedule A or as a result of changes in ownership or new construction occurring prior to Date of Policy.

1. Water rights, claims or title to water, whether or not disclosed by the public records.

SCHEDULE B, PART II - Exceptions
(continued)

2. Covenants, Conditions and Restrictions contained in deed recorded December 23, 1981 as Instrument No. 81-1255468 of Official Records.

3. All right, title, and interest in those public streets which will abut said land, including any rights which might otherwise pass with a conveyance of said land such as the fee title reversion underlying such public streets, as excepted and reserved by the City of Culver City, a Municipal Corporation, in deed recorded May 16, 1983, as Instrument No. 83-542812, Official Records, and by Culver City Redevelopment agency, a public body, corporate and politic, in deed recorded May 16, 1983, as Instrument No. 83-542813, Official Records.

4. The ownership of said Land does not include rights of access to or from the street, highway, or freeway abutting said Land, such rights having been relinquished by said map/plat.

   Affects: Portion of said land adjacent to Slauson Avenue, as shown on Tract Map No. 33152

5. Easement(s) for the purpose(s) shown below and rights incidental thereto as delineated or as offered for dedication, on the map of said tract/plat;

   Purpose: Street tree, street light, traffic signal, sidewalk and public utility
   Affects: As shown on Tract Map No. 33152

   Affects: Lot 15

6. Easement(s) for the purpose(s) shown below and rights incidental thereto as delineated or as offered for dedication, on the map of said tract/plat;

   Purpose: storm drain
   Affects: As shown on Tract Map No. 33152

   Affects: Lot 15

SCHEDULE B, PART II - Exceptions
(continued)

7. Covenants, conditions and restrictions but omitting any covenants or restrictions, if any, including but not limited to those based upon age, race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, marital status, national origin, ancestry, familial status, source of income, disability, veteran or military status, genetic information, medical condition, citizenship, primary language, and immigration status, as set forth in applicable state or federal laws, except to the extent that said covenant or restriction is permitted by applicable law, as set forth in the document

   Recording Date: August 1, 1983
   Recording No.: as Instrument No. 83-882633 of Official Records

   Said covenants, conditions and restrictions provide that a violation thereof shall not defeat the lien of any mortgage or deed of trust made in good faith and for value.

   Modification(s) of said covenants, conditions and restrictions

   Recording Date: November 23, 1983
   Recording No.: as Instrument No. 83-1390314 of Official Records

   Modification(s) of said covenants, conditions and restrictions

   Recording Date: February 7, 1996
   Recording No.: as Instrument No. 96-216731 of Official Records

   Modification(s) of said covenants, conditions and restrictions

   Recording Date: October 21, 1997
   Recording No.: as Instrument No. 97-1654409 of Official Records

   Modification(s) of said covenants, conditions and restrictions

   Recording Date: August 21, 2003
   Recording No.: as Instrument No. 03-2422681 of Official Records

   Assignment of said Covenants, Conditions, and Restrictions

   Recording Date: December 19, 2007
   Recording No.: as Instrument No. 07-2783062 of Official Records

SCHEDULE B, PART II - Exceptions
(continued)

8. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	Southern California Edison Company, a corporation
Purpose:	Lines of pipe, conduits, vents, and metering structure for water transportation
Recording Date:	March 12, 1984
Recording No.:	as Instrument No. 84-301454 of Official Records
Affects:	As described therein

Partial Quitclaim of said easement recorded November 12, 2002 as No. 02-2694579 of Official Records.

9. An instrument entitled Covenant and Reciprocal Agreement

Executed by:	Bramalea LTD. and Amberdon Corporate Pointe LTD,
In favor of:	City of Culver City
Recording Date:	March 29, 1984
Recording No.:	as Instrument No. 84-384730 of Official Records

Reference is hereby made to said document for full particulars.

This covenant and agreement provides that it shall be binding upon any future owners, encumbrancers, their successors or assigns, and shall continue in effect until the advisory agency approves termination.

Affects: Lot 15

10. An instrument entitled Covenant and Reciprocal Agreement

Executed by:	BRAMALEA LTD. and AMBERDON CORPORATE POINTE LTD.
In favor of:	City of Culver City
Recording Date:	March 29, 1984

Reference is hereby made to said document for full particulars.

This covenant and agreement provides that it shall be binding upon any future owners, encumbrancers, their successors or assigns, and shall continue in effect until the advisory agency approves termination.

Affects: Lot 15

SCHEDULE B, PART II - Exceptions
(continued)

11. An instrument entitled Covenant and Agreement

Executed by:	BRAMELEA LIMITED
In favor of:	City of Culver City
Recording Date:	May 23, 1985
Recording No.:	as Instrument No. 85-584012 of Official Records

Reference is hereby made to said document for full particulars.

This covenant and agreement provides that it shall be binding upon any future owners, encumbrancers, their successors or assigns, and shall continue in effect until the advisory agency approves termination.

12. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	The Metropolitan Water District of Southern California
Purpose:	Lines of pipe, conduits, vents, and metering structure for water transportation
Recording Date:	February 28, 1986
Recording No.:	as Instrument No. 86-257828 of Official Records
Affects:	As described therein

13. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	City of Culver City
Purpose:	public street and highway
Recording Date:	February 28, 1986
Recording No.:	as Instrument No. 86-257829 of Official Records
Affects:	As described therein

Affects: Lot 16

14. An unrecorded lease with certain terms, covenants, conditions and provisions set forth therein as disclosed by the document

Entitled:	Memorandum of Lease Agreement
Lessor:	Slauson Investors, LLC, a Delaware limited liability company
Lessee:	T-Mobile West LLC, a Delaware limited liability company
Recording Date:	April 20, 2017
Recording No.:	as Instrument No. 20170439361 of Official Records

The present ownership of the leasehold created by said lease and other matters affecting the interest of the lessee are not shown herein.

15. Any easements not disclosed by the public records as to matters affecting title to real property, whether or not said easements are visible and apparent.

SCHEDULE B, PART II - Exceptions
(continued)

16. Matters which may be disclosed by an inspection and/or by a correct ALTA/NSPS Land Title Survey of said Land that is satisfactory to the Company, and/or by inquiry of the parties in possession thereof.

17. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

    The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

    The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

18. Please be advised that our search did not disclose any open Deeds of Trust of record. If you should have knowledge of any outstanding obligation, please contact the Title Department immediately for further review prior to closing.

END OF EXCEPTIONS

END OF SCHEDULE B, PART II

INFORMATIONAL NOTES

1. Note: None of the items shown in this report will cause the Company to decline to attach ALTA Endorsement Form 9 to an Extended Coverage Loan Policy, when issued.

2. Note: The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land Commercial Property, known as 100 Corporate Pointe, Culver City, CA, to an Extended Coverage Loan Policy.

3. Note: The policy of title insurance will include an arbitration provision. The Company or the insured may demand arbitration. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. Please ask your escrow or title officer for a sample copy of the policy to be issued if you wish to review the arbitration provisions and any other provisions pertaining to your Title Insurance coverage.

4. Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

5. Pursuant to Government Code Section 27388.1, as amended and effective as of 1-1-2018, a Documentary Transfer Tax (DTT) Affidavit may be required to be completed and submitted with each document when DTT is being paid or when an exemption is being claimed from paying the tax. If a governmental agency is a party to the document, the form will not be required. DTT Affidavits may be available at a Tax Assessor-County Clerk-Recorder.

6. The following Exclusion(s) are added to preliminary reports, commitments and will be included as an endorsement in the following policies:

A. 2006 ALTA Owner's Policy (06-17-06).

6. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

B. 2006 ALTA Loan Policy (06-17-06)

8. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

9. Any claim of invalidity, unenforceability, or lack of priority of the lien of the Insured Mortgage based on the application of a Tribe's law resulting from the failure of the Insured Mortgage to specify State law as the governing law with respect to the lien of the Insured Mortgage.

C. ALTA Homeowner's Policy of Title Insurance (12-02-13) and CLTA Homeowner's Policy of Title Insurance (12-02-13).

10. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

D. ALTA Expanded Coverage Residential Loan Policy - Assessments Priority (04-02-15).

12. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

13. Any claim of invalidity, unenforceability, or lack of priority of the lien of the Insured Mortgage based on the application of a Tribe's law resulting from the failure of the Insured Mortgage to specify State law as the governing law with respect to the lien of the Insured Mortgage.

E. CLTA Standard Coverage Policy 1990 (11-09-18).

7. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the public records but that would be disclosed by an examination of any records maintained by or on behalf of a tribe or on behalf of its members.

8. Any claim of invalidity, unenforceability, or lack of priority of the lien of the insured mortgage based on the application of a tribe's law resulting from the failure of the insured mortgage to specify state law as the governing law with respect to the lien of the insured mortgage.

7. Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.

END OF INFORMATIONAL NOTES

COMMITMENT CONDITIONS

1. DEFINITIONS

a. "Discriminatory Covenant": Any covenant, condition, restriction, or limitation that is unenforceable under applicable law because it illegally discriminates against a class of individuals based on personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or other legally protected class.

b. "Knowledge" or "Known": Actual knowledge or actual notice, but not constructive notice imparted by the Public Records.

c. "Land": The land described in Item 5 of Schedule A and improvements located on that land that by State law constitute real property. The term "Land" does not include any property beyond that described in Schedule A, nor any right, title, interest, estate, or easement in any abutting street, road, avenue, alley, lane, right-of-way, body of water, or waterway, but does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.

d. "Mortgage": A mortgage, deed of trust, trust deed, security deed, or other real property security instrument, including one evidenced by electronic means authorized by law.

e. "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.

f. "Proposed Amount of Insurance": Each dollar amount specified in Schedule A as the Proposed Amount of Insurance of each Policy to be issued pursuant to this Commitment.

g. "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.

h. "Public Records": The recording or filing system established under State statutes in effect at the Commitment Date under which a document must be recorded or filed to impart constructive notice of matters relating to the Title to a purchaser for value without Knowledge. The term "Public Records" does not include any other recording or filing system, including any pertaining to environmental remediation or protection, planning, permitting, zoning, licensing, building, health, public safety, or national security matters.

i. "State": The state or commonwealth of the United States within whose exterior boundaries the Land is located. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and Guam.

j. "Title": The estate or interest in the Land identified in Item 3 of Schedule A.

2. If all of the Schedule B, Part I-Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

a. the Notice;

b. the Commitment to Issue Policy;

c. the Commitment Conditions;

d. Schedule A;

e. Schedule B, Part I-Requirements;

f. Schedule B, Part II-Exceptions; and

g. a counter-signature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company is not liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

a. The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:

   i. comply with the Schedule B, Part I-Requirements;

   ii. eliminate, with the Company's written consent, any Schedule B, Part II-Exceptions; or

   iii. acquire the Title or create the Mortgage covered by this Commitment.

b. The Company is not liable under Commitment Condition 5.a. if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.

c. The Company is only liable under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.

d. The Company's liability does not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Condition 5.a. or the Proposed Amount of Insurance.

e. The Company is not liable for the content of the Transaction Identification Data, if any.

This page is only a part of a 2021 ALTA® Commitment for Title Insurance issued by Fidelity National Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and a counter-signature by the Company or its issuing agent that may be in electronic form.

f. The Company is not obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I-Requirements have been met to the satisfaction of the Company.

g. The Company's liability is further limited by the terms and provisions of the Policy to be issued to the Proposed Insured.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT; CHOICE OF LAW AND CHOICE OF FORUM

a. Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.

b. Any claim must be based in contract under the State law of the State where the Land is located and is restricted to the terms and provisions of this Commitment. Any litigation or other proceeding brought by the Proposed Insured against the Company must be filed only in a State or federal court having jurisdiction.

c. This Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.

d. The deletion or modification of any Schedule B, Part II-Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.

e. Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.

f. When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT IS ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for closing, settlement, escrow, or any other purpose.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. CLAIMS PROCEDURES

This Commitment incorporates by reference all Conditions for making a claim in the Policy to be issued to the Proposed Insured. Commitment Condition 9 does not modify the limitations of liability in Commitment Conditions 5 and 6.

10. CLASS ACTION

ALL CLAIMS AND DISPUTES ARISING OUT OF OR RELATING TO THIS COMMITMENT, INCLUDING ANY SERVICE OR OTHER MATTER IN CONNECTION WITH ISSUING THIS COMMITMENT, ANY BREACH OF A COMMITMENT PROVISION, OR ANY OTHER CLAIM OR DISPUTE ARISING OUT OF OR RELATING TO THE TRANSACTION GIVING RISE TO THIS COMMITMENT, MUST BE BROUGHT IN AN INDIVIDUAL CAPACITY. NO PARTY MAY SERVE AS PLAINTIFF, CLASS MEMBER, OR PARTICIPANT IN ANY CLASS OR REPRESENTATIVE PROCEEDING. ANY POLICY ISSUED PURSUANT TO THIS COMMITMENT WILL CONTAIN A CLASS ACTION CONDITION.

11. ARBITRATION

The Policy contains an arbitration clause. All arbitrable matters when the Proposed Amount of Insurance is Two Million And No/100 Dollars ($2,000,000.00) or less may be arbitrated at the election of either the Company or the Proposed Insured as the exclusive remedy of the parties. A Proposed Insured may review a copy of the arbitration rules at http://www.alta.org/arbitration.

END OF CONDITIONS

WIRE SAFE™ | Inquire before you wire!

WIRE FRAUD ALERT

This Notice is not intended to provide legal or professional advice.
If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the number of relevant parties to the transaction as soon as an escrow account is opened.** DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

SLTC - ServiceLink Title Company	CTIC - Chicago Title Insurance Company

Available Discounts

DISASTER LOANS (CTIC, CLTIC, FNTIC)
The charge for a Lender's Policy (Standard or Extended coverage) covering the financing or refinancing by an owner of record, within twenty-four (24) months of the date of a declaration of a disaster area by the government of the United States or the State of California on any land located in said area, which was partially or totally destroyed in the disaster, will be fifty percent (50%) of the appropriate title insurance rate.

CHURCHES OR CHARITABLE NON-PROFIT ORGANIZATIONS (CTIC, CLTIC, FNTIC)
On properties used as a church or for charitable purposes within the scope of the normal activities of such entities, provided said charge is normally the church's obligation the charge for an owner's policy shall be fifty percent (50%) to seventy percent (70%) of the appropriate title insurance rate, depending on the type of coverage selected. The charge for a lender's policy shall be forty percent (40%) to fifty percent (50%) of the appropriate title insurance rate, depending on the type of coverage selected.

MILITARY DISCOUNT RATE (CTIC, CLTIC, FNTIC)
Upon the Company being advised in writing and prior to the closing of the transaction that an active duty, honorably separated, or retired member of the United States Military or Military Reserves or National Guard is acquiring or selling an owner occupied one-to-four family property, the selling owner or acquiring buyer, as applicable, will be entitled to a discount equal to fifteen percent (15%) of the otherwise applicable rates such party would be charged for title insurance policies. Minimum charge: Four Hundred Twenty-Five And No/100 Dollars ($425.00)

The Company may require appropriate proof of eligibility from the parties to the transaction verifying they are entitled to the discount as described. No other discounts or special rates, or combination of discounts or special rates, shall be applicable.

MILITARY RATE (SLTC)
A discount of twenty percent (20%) off the purchase transaction closing and settlement fee or a discount of One Hundred And No/100 Dollars ($100.00) off the refinance closing and settlement fee, will be applied when the loan is guaranteed by the United States Veterans Administration and the escrow fee is being paid by the consumer and is listed as paid by borrower on the Closing Disclosure and final Settlement Statement.

FIDELITY NATIONAL FINANCIAL
PRIVACY NOTICE

Effective January 1, 2025

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

<u>Collection of Personal Information</u>

FNF may collect the following categories of Personal Information:

- contact information (*e.g.*, name, address, phone number, email address);
- demographic information (*e.g.*, date of birth, gender, marital status);
- identity information (*e.g.,* Social Security Number, driver's license, passport, or other government ID number);
- financial account information (*e.g.,* loan or bank account information);
- biometric data (e.g., fingerprints, retina or iris scans, voiceprints, or other unique biological characteristics; and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

<u>Collection of Browsing Information</u>

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

<u>Other Online Specifics</u>

<u>Cookies</u>. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

<u>Web Beacons</u>. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

<u>Do Not Track</u>. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for these main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To prevent and detect fraud;
- To maintain the security of our systems, tools, accounts, and applications;
- To verify and authenticate identities and credentials;
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.
- To provide reviews and testimonials about our services, with your consent.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to affiliated or nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;
- to affiliated or nonaffiliated third parties with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information

We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

State-Specific Consumer Privacy Information:

For additional information about your state-specific consumer privacy rights, to make a consumer privacy request, or to appeal a previous privacy request, please follow the link Privacy Request, or email privacy@fnf.com or call (888) 714-2710.

Certain state privacy laws require that FNF disclose the categories of third parties to which FNF may disclose the Personal Information and Browsing Information listed above. Those categories are:

- FNF affiliates and subsidiaries;
- Non-affiliated third parties, with your consent;
- Business in connection with the sale or other disposition of all or part of the FNF business and/or assets;

- Service providers;
- Law endorsement or authorities in connection with an investigation, or in response to a subpoena or court order.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (fnf.com/california-privacy) or call (888) 413-1748.

For Nevada Residents: We are providing this notice pursuant to state law. You may be placed on our internal Do Not Call List by calling FNF Privacy at (888) 714-2710 or by contacting us via the information set forth at the end of this Privacy Notice. For further information concerning Nevada's telephone solicitation law, you may contact: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: aginquiries@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes. For additional information about your Oregon consumer privacy rights, or to make a consumer privacy request, or appeal a previous privacy request, please email privacy@fnf.com or call (888) 714-2710

FNF is the controller of the following businesses registered with the Secretary of State in Oregon:
Chicago Title Company of Oregon, Fidelity National Title Company of Oregon, Lawyers Title of Oregon, LoanCare, Ticor, Title Company of Oregon, Western Title & Escrow Company, Chicago Title Company, Chicago Title Insurance Company, Commonwealth Land Title Insurance Company, Fidelity National Title Insurance Company, Liberty Title & Escrow, Novare National Settlement Service, Ticor Title Company of California, Exos Valuations, Fidelity & Guaranty Life, Insurance Agency, Fidelity National Home Warranty Company, Fidelity National Management Services, Fidelity Residential Solutions, FNF Insurance Services, FNTG National Record Centers, IPEX, Mission Servicing Residential, National Residential Nominee Services, National Safe Harbor Exchanges, National Title Insurance of New York, NationalLink Valuations, NexAce Corp., ServiceLink Auction, ServiceLink Management Company, ServiceLink Services, ServiceLink Title Company of Oregon, ServiceLink Valuation Solutions, Western Title & Escrow Company

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

Information From Children
The FNF Websites are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users
FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans
Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is

necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions or would like to correct your Personal Information, visit FNF's Privacy Request website or contact us by phone at (888) 714-2710, by email at privacy@fnf.com, or by mail to:

Fidelity National Financial, Inc.

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE POLICY - 1990 (11-09-18)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the public records at Date of Policy.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART II

(*Variable exceptions such as taxes, easements, CC&R's, etc., are inserted here*)

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE OWNER'S POLICY (02-04-22)
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement on the Land;
      iii. the subdivision of land; or
      iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.
   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy.
   Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7 Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

PART I

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

PART II

(*Variable exceptions such as taxes, easements, CC&R's, etc., are inserted here*)

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (7-01-21)
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy and We will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement on the Land;
      iii. the subdivision of land; or
      iv. environmental remediation or protection.
   b. any governmental forfeiture, police, or regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23, or 27.
2. Any power to take the Land by condemnation. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 17.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by You;
   b. not Known to Us, not recorded in the Public Records at the Date of Policy, but Known to You and not disclosed in writing to Us by You prior to the date You became an Insured under this policy;
   c. resulting in no loss or damage to You;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 5, 8.f., 25, 26, 27, 28, or 32); or
   e. resulting in loss or damage that would not have been sustained if You paid consideration sufficient to qualify You as a bona fide purchaser of the Title at the Date of Policy.
4. Lack of a right:
   a. to any land outside the area specifically described and referred to in Item 3 of Schedule A; and
   b. in any street, road, avenue, alley, lane, right-of-way, body of water, or waterway that abut the Land.

   Exclusion 4 does not modify or limit the coverage provided under Covered Risk 11 or 21.
5. The failure of Your existing structures, or any portion of Your existing structures, to have been constructed before, on, or after the Date of Policy in accordance with applicable building codes. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 14 or 15.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transfer of the Title to You is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 30.
7. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
8. Negligence by a person or an entity exercising a right to extract or develop oil, gas, minerals, groundwater, or any other subsurface substance.
9. Any lien on Your Title for real estate taxes or assessments, imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 9 does not modify or limit the coverage provided under Covered Risk 8.a or 27.
10. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19 and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 5,000.00

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.

   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19 and 21, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 5,000.00

ALTA OWNER'S POLICY (07-01-2021)

EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement on the Land;
      iii. the subdivision of land; or
      iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments, imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

NOTE: The 2021 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed as 1 through 7 below:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

ATTACHMENT ONE
(CONTINUED)

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   - (i) the occupancy, use, or enjoyment of the Land;
   - (ii) the character, dimensions, or location of any improvement erected on the Land;
   - (iii) the subdivision of land; or
   - (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

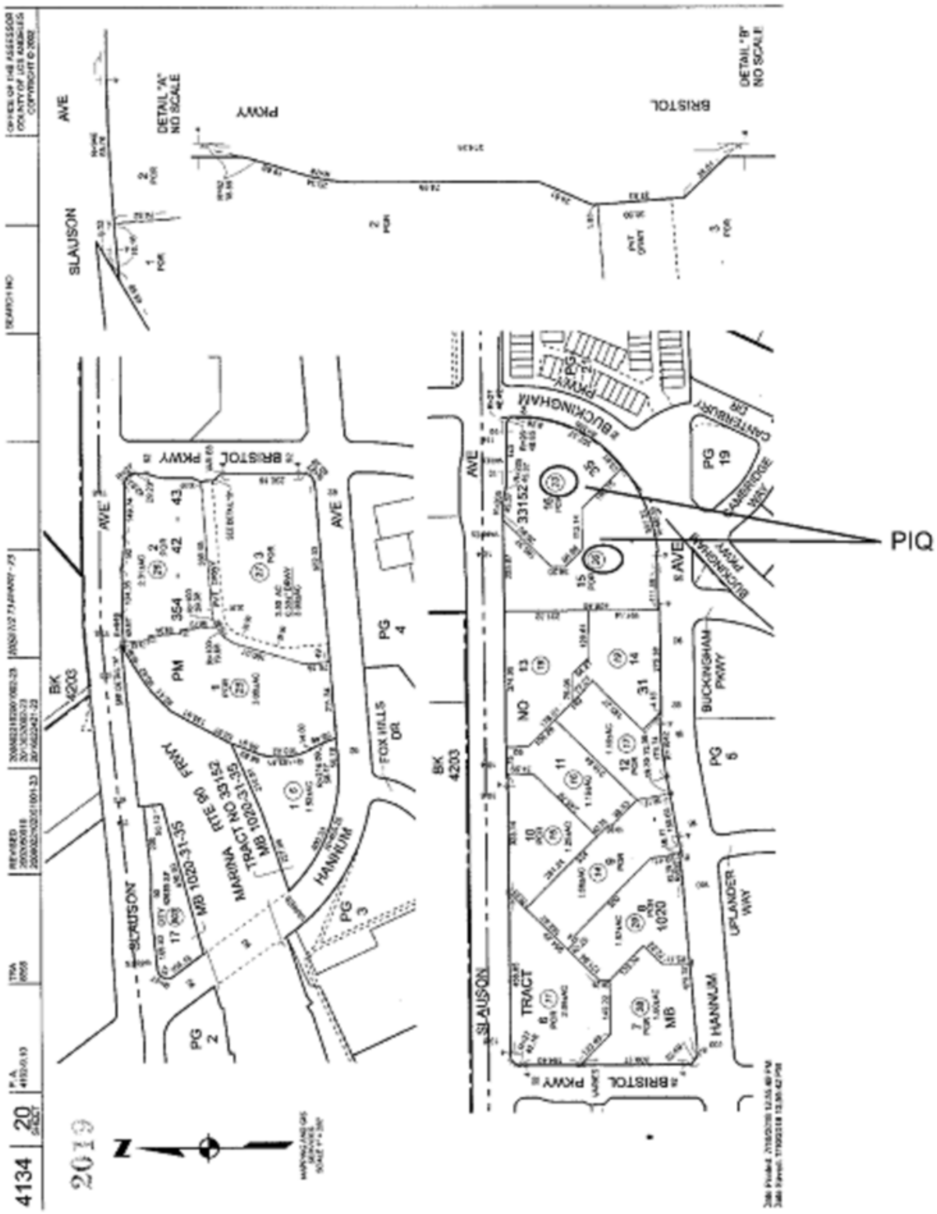
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   - (c) resulting in no loss or damage to the Insured Claimant;
   - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   - (a) a fraudulent conveyance or fraudulent transfer; or
   - (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees, or expenses that arise by reason of:

NOTE: The 2006 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as 1 through 7 below:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.]
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.



This map/plat is being furnished as an aid in locating the herein described Land in relation to adjoining streets, natural boundaries and other land, and is not a survey of the land depicted. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the Company does not insure dimensions, distances, location of easements, acreage or other matters shown thereon.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations (AULs), such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel number and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and the most current publicly available date
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Documentary Transfer Tax Shown by Separate Affidavit Not of Record

For valuable consideration, receipt of which is acknowledged, MANI BROTHERS 100 CORPORATE POINTE, LLC, a California limited liability company ("Grantor"), hereby grants to SLAUSON INVESTORS LLC, a Delaware limited liability company ("Grantee"), that certain real property located in Culver City, Los Angeles County, California, as legally described in Exhibit "A" attached hereto and made a part hereof (the "Property"), together with all right, title and interest in and to all improvements, fixtures and structures located thereon, and all easements, air rights, development rights, appurtenances, rights and privileges appertaining to the Property, and all right, title and interest in, to and under adjoining streets, rights of way and easements.

The Grantee herein covenants by and for himself, his heirs, executors, administrators and assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of sex, marital status, religion, race, color, creed, national origin or ancestry in the sale, lease, sublease, transfer, use, occupancy, tenure or enjoyment of the land herein conveyed, nor shall the Grantee himself or any person claiming under or through him, establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use, or occupancy of tenants, lessees, subtenants, sublessees or vendees in the land herein conveyed. The foregoing covenants shall run with the land.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of

EXECUTIVE SUMMARY

assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
FLEXIBLE PLUMBER TOO Site ID: 0902423 EPA Id: CAD981424880	6029 SLAUSON AVE	WNW 1/4 - 1/2 (0.452 mi.)	135	509

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
MODERN HEALTH LABORA EPA ID:: CAC002798430	***5826 UPLANDER WAY***	***SW 1/8 - 1/4 (0.240 mi.)***	***U122***	***459***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 89 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA’s UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA’s Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there are 65 E MANIFEST sites within approximately 0.25 miles of the target property.

LA CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LA CO LF METHANE list, as provided by EDR, and dated 05/14/2024 has revealed that there is 1 LA CO LF METHANE site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
