

City of Culver City, California
City Council Agenda Item Report

Meeting Date: 7/25/05		Item Number: <u>C-6</u>	
AGENDA ITEM: Consideration to Approve the Final Plans and Specifications and to Authorize the Advertising of Bids for the Washington Boulevard Resurfacing Project, P-843			
Contact Person/Dept.: Lee Torres/PW		Phone Number: 310.253.5623	
Fiscal Impact: Yes ☒ No ☐		General Fund: Yes ☒ No ☐	
Public Hearing: ☐		Action Item: ☒	Attachments: ☒
Public Notification: Master Notification List emailed on July 20 th and Washington Boulevard businesses adjacent to the project limits via First Class Postcard, mailed July 14, 2005			
Department Approval: Charles D. Herbertson 7/14/05		CAO Approval: Jerry Fulwood 7/20/05	
City Controller Approval: Marlee Chang 7/19/05			

RECOMMENDATION:

Staff recommends that the City Council approve the final plans and specifications and authorize the advertising of bids for the Washington Boulevard Resurfacing Project, (Sepulveda to Elenda Boulevards) P-843.

BACKGROUND/ DISCUSSION:

Washington Boulevard between Sepulveda Boulevard and Elenda Avenue is an arterial street and is identified in the Pavement Management System as a high priority for resurfacing. The existing asphalt pavement has deteriorated due to age and impacts from high traffic. The project consists of the following:

1. Removal of 3.0 inches of the existing asphalt concrete pavement by grinding and replacing it with 3.0 inches of new rubberized asphalt concrete along Washington Boulevard between Harter Avenue and Huron Avenue.
2. Removal of 1.5 inches of the existing asphalt concrete pavement by grinding and replacing it with 1.5 inches of new rubberized asphalt concrete along Washington Boulevard between Sepulveda Boulevard to Harter Avenue and from Huron Avenue to Elenda Street.
3. Total pavement reconstruction of limited areas located between two residential streets (Commonwealth Avenue and Center Street) at the south side of Washington Boulevard where significant surface distress has been identified.

City Council Agenda Item Report

4. Reconstruction of commercial driveways to allow for ADA accessibility within the project limits and replacement of all damaged curb, gutter and sidewalk.

The project will be bid with two alternatives, one with standard asphalt and the other with rubberized asphalt. Typically, rubberized asphalt is more expensive than standard asphalt. However, rubberized asphalt is an exceptional paving product that is superior at reducing reflective cracking, produces a significantly quieter ride, and the surface color stays dark for a longer period than conventional asphalt. Depending on the bid amount and available construction budget, staff will recommend the bid alternative at the time of construction contract award.

Under Engineering Division staff supervision, Berryman & Henigar, engineering design consultant for the City prepared the construction plans and specifications for this project for an amount of \$75,225.00. It is estimated that the award of the construction contracts will occur in September 2005, with construction slated to begin in October 2005 and expected to be completed in December 2005.

Public Notification

All Washington Boulevard business and residents directly affected by the project were mailed a postcard on July 14, 2005, amounting to a total of 85 at a cost of \$ 19.32. The postcard is attached for your reference.

FISCAL ANALYSIS:

Sufficient funds were appropriated for these projects in the Redevelopment Agency Budget (55393503).
