Agenda Item Report**

BACKGROUND:

On November 18, 1992, the Los Angeles County Metropolitan Transportation Authority (LACMTA), acting as the Congestion Management Agency for Los Angeles County, adopted the first Congestion Management Program for Los Angeles County. The CMP is a monitoring program that aims to address the impact of local growth on the regional transportation system by linking transportation, land use, and air quality decisions. Each year, cities must report all development activity to LACMTA, as well as the implementation of trip reducing strategies. In the past, the degree to which cities have balanced new development with such congestion mitigation strategies has been calculated via a credit/debit system called the Countywide Deficiency Plan.

For the tenth year, however, the credit/debit requirement has been temporarily suspended while under evaluation, and Culver City must only report the actual amount of development and demolition that has occurred during the reporting period. Furthermore, the City must submit a resolution self-certifying its conformance with all the requirements of the CMP and future updates. As the Congestion Management Agency for Los Angeles County, LACMTA annually determines the County's or cities' conformance or non-conformance.

Culver City's conformance with the CMP and adoption of the Local Development Report ensures that the City continues to receive its portion of state gas tax revenues and preserves its eligibility for other State and Federal transportation revenues. Failure to adopt the resolution jeopardizes the City's eligibility to receive these funds. The self-certifying resolution required by the CMP must be submitted to LACMTA no later than September 1, 2014.

DISCUSSION:

The CMP requires the County and cities to:

1. Continue implementation of the CMP Transportation Demand Management (TDM) Ordinance;
2. Continue implementation of the CMP Land Use Analysis Program;
3. Track new development activity; and,
4. Conduct biennial traffic counts and calculate levels of service for selected arterial intersections.

The City of Culver City currently is in compliance with the above requirements.

City of Culver City, California
Agenda Item Report

FISCAL ANALYSIS:

CMP conformance is required for the City to receive state gas tax (Section 2105) funds and to preserve the City's eligibility for other state and federal transportation dollars. Failure to adopt and submit the resolution to the LACMTA by September 1, 2014 jeopardizes the City's eligibility to receive these funds. For FY 2013/2014, the City received \$254,560.92 (to-date) in state gas tax (Section 2105) funds.

ATTACHMENTS:

1. Proposed Resolution
2. The 2014 Local Development Report

MOTION:

That the City Council:

1. Adopt a resolution finding the City to be in conformance with the Congestion Management Program (CMP); and,
2. Adopt the CMP Local Development Report for 2014.
