Personal Computer Replacement Policies by City

City	PC Policy Life	PC Usual Life	Source Comments from MISAC Members
City of Davis	4	4	We have a 4 year replacement cycle for desktops, laptops, and servers and collect yearly from each department \$ for a replacement fund (\$500/year/pc)
San Carlos		3 PCs / 4 Laptops	Identical to SAWPA
Santa Ana Watershed Project Authority		3 PCs / 4 Laptops	SAWPA has an (as yet unwritten) policy to replace desktop every 3 years, laptops every 4 years, and servers every 4 years unless conditions require otherwise. Like many others, this is a soft number; some machines are more than 4 years old. By using a flowdown replacement process, Power Users (GIS, CAD, other high-end computing users) actually have their machines replaced more often, because they have a need for more capability- their 18 month old machine is more than enough for folks that do nothing but Word Processing and check email- and even though it's an older machine, they feel like they are getting a "new" machine. This process requires more labor than doing a direct replacement of an obsolete machine for a brand new one, but it seems to help the users better (in my humble opinion). Anybody else have thoughts on this process?
Anaheim	3 PCs / 2 Laptops		In Anaheim we lease our 1600 PCs and Laptops. The PC refresh is 3 years and the laptops are 2 years. The users like the idea because they know they are going to get the equipment refreshed plus they know how much to budget each year for their lease payments. Our servers are replaced as needed. I pay for the enterprise servers. The users pay for their own specific use servers up front and then I pay for the ongoing maintenance and support for the life of the server.
Mountain View	4	3 to 5	The City of Mountain View has an equipment replacement plan for (computers, vehicles and radio equipment). In the plan, PC have a four year life and are budgeted at \$1,425 each. Therefore, the each fund that has PC put is 1/4 of the replacement amount each year and in the 4th year their is enough money to replace the machine. When it comes to the replacement, some PC are replaced sooner (3 yrs., but very few) and several go 5 or 6 years, depending on need. We are now being asked to make more of the PC last 5 years. Laptops are also 4 years, NT servers 4 years and UNIX servers 7 years.
Redding	3		We plan on a 3 year replacement, however some departments will go longer. It's entirely up to them, they budget monies for the replacements and we order/migrate/install. Most of the server replacements I.T. will budget for, however if it is a department specific server then, again, they must provide the dollars. If the PC's get too old to do the job they want, we inform the department that they must replace the unit. With the current budget environment I can see departments using equipment longer than we/they really want.

Useful = Kept as long as the device will run the application, the OS can be run on it, until it can't be repaired, or it suffers 3-4 software failures in one month.
Policy Life and Usual Life are in years of service.

Personal Computer Replacement Policies by City

Torrance	4 PCs / 3 Laptops		The City of Torrance has a replacement fund for PCs (4 years), Laptops (3 years), servers (3 years). We charge the departments each year for replacement costs "equipment cost"/"useful life". Once equipment is fully funded in the replacement fund we do not start charging them again unless they actually replace the equipment. We at the City of Lodi created a PC Replacement Fund that covers computer replacements for all departments, except enterprise fund departments. We have no written policy, but handle replacement requests on a case-by-case basis. We will not replace a PC simply because it's 3 years old or the wrong color. We retire computers when it's clear that the system has reached the end of its useful life. This arrangement has worked well so far, but there may come a day when a written document is in order.
Lodi		Useful	
Redondo Beach	3		Workstations and laptops are on a 3 year replacement cycle (lease with Dell). We generally push servers out to 4 years. We just seeded a replacement fund this year and will start using it FY03-04 for all IT equipment not on lease. The Inland Empire Utilities Agency replaces workstations every four years. Laptops (we only have a few) and servers are not on a set schedule. The IS Department budgets for whatever the appropriate number turns out to be in our capital budget each year. As I stated in an earlier e-mail, we replace our PC's every 4 years. We try to minimize the "trickle down" effect because, as you state, it is very labor intensive. However, in most cases, it would be impractical for us to directly replace the oldest machines with new ones. So, we try to limit trickle-downs to one level (i.e., a "power user" gets the new machine and his/her replaced machine goes to the person with the obsolete machine to be taken out of service). For Costa Mesa PC's are supposed to be replaced every 4 years, the reality is closer to 5, NT servers and large Data Base HP 9000 systems are sized to last 5 years with the reality being closer to 6. Every year I renew my battle for a replacement fund. Every year I hear the same story "there isn't enough money to put aside any for this type of program". With the current budget issues I probably won't even bring it up this year.
Inland Empire Utilities Agency	4 PCs		
Costa Mesa	4	5	
Watsonville		4 to 5	In Watsonville we don't have a fixed timetable for replacement. IS looks at the support issues with a given platform and establishes minimum configurations about two times a year. Because we're starting our budget cycle now, we've distributed this to all departments so they can begin planning for next year. As a fact, we probably get 4 - 5 years from a PC workstation, sometimes longer. Amazingly, we are still using the original Novell server we installed 8 or 9 years ago (it doesn't do very much anymore, but it works). Each department is responsible for budgeting their own workstations. There is a centralized Capital Improvement budget set up to take care of centralized servers, networking infrastructure and the like. IS manages this funding. At Moreno Valley PCs are replaced every three years. We try to replace servers in that time frame also but sometimes that doesn't happen. No more that 4 years.
Moreno Valley	3		

Useful = Kept as long as the device will run the application, the OS can be run on it, until it can't be repaired, or it suffers 3-4 software failures in one month.
Policy Life and Usual Life are in years of service.

Personal Computer Replacement Policies by City

Simi Valley	4	Simi Valley has created a replacement program for different types of computer and network equipment, including desktop PCs. The program is documented through our annual budget policy items as well as our five-year IT Strategic Plan (INSIGHT 2007, in final revision). Not all equipment we want to be added gets approved. Last year we tried to get our "mainframes" and laptops added to the contribution process, but no go. Perhaps this year. We review/update our strategic plan annually, and then get buy in from the City Manager/City Council. In theory, we establish the replacement amount and life span; i.e. PC/Desktop = \$2,400/4 yrs. Since we have approx 400 desktop PCs, 25% (100) can get replaced each year. During the annual budget appropriation phase, we add \$600 each year for each PC in the inventory to our "Computer Replacement Fund". During the annual budget process, we identify what needs to be replaced and, hopefully, we get the approval to spend the money. For the current FY02-03, we got approval to replace 100 "obsolete" PCs, but only ordered 60. Next year will involve around 130+ obsolete PCs. The City of Lodi has a PC Replacement fund that is administered by the IS division. The criterion for replacement has mostly to do with serving the needs of the user rather than age of the machine, or any other arbitrary factor. We have no written policy at this time because we've elected to consider requests on an as-needed, case-by-case basis. The "policy" has worked well so far. We have some PCs that have been replaced after three years, but we have a number of 4 year-old boxes still in service. Servers are replaced when they can no longer provide suitable performance for the demands made upon it. As you can see, we have no absolute recipe for box replacement; we try to squeeze the last drop of use from each machine until it is impractical to keep them.
Lodi	3 to 4	In Pinole, we are currently on a 3 year rotation for PCs per directive of the City Manager, however with the recent budget problems, we will be proposing a 4 year cycle. We have about 125 PCs in all offices so there would be a decent savings. Laptops are on the same rotation schedule as the PCs and servers are on a 4-5 year cycle, depending on increased requirements placed on them. IS budgets all computer, peripheral, and software related costs with the annual budget.
Pinole	3 to 4	
Santa Barbara	4	In Santa Barbara our replacement policy is all PCs, Servers, and Laptops are eligible after four years. IT budgets for all General Fund replacements and Enterprise Funds budget for their own. At Eastern Municipal Water District we replace computers when one of the following conditions exist: 1. It breaks down and can't be fixed. 2. It blue screens 3 or 4 times in a month. 3. It won't run the application needed. 4. It can't run the standard operating system. We are standardized on 100% (almost) NT workstations. We have a very few W-2000. We plan to upgrade to XP this year and next. We have some computers that have been in place for 6 years and are working fine. We try to extract every bit of value out of them we can.
Eastern Municipal Water District	Useful	Useful

Useful = Kept as long as the device will run the application, the OS can be run on it, until it can't be repaired, or it suffers 3-4 software failures in one month.
Policy Life and Usual Life are in years of service.

Importance: High

All of our systems are EPEAT Silver, the 745, 755 and D630 are EPEAT Gold.

(only one other machine qualifies as gold---fun piece of knowledge)

Brian Churchin | Dell, inc.

Subject: FW: Dell Quote(s) #374290447 - budget quote for 75-100 PC buy

Brian,

Two questions:

- Is this PC on the EPEAT list with Dell? If not I need to move to the closest unit that will be EPEAT certified by Dell.
- What is the best month in the fall/winter to place a large scale order when the discounts will be best? IE if December is close of quarter and year will the discounts be best in December?

Thanks

IT Staffing Proposal for

Culver City

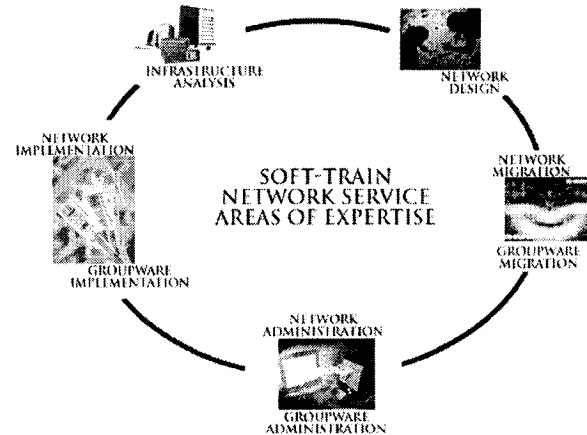

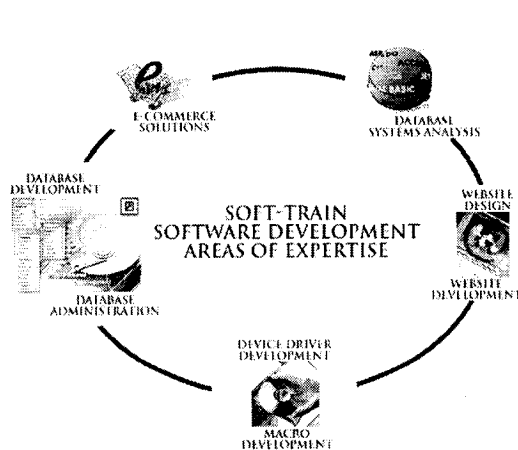

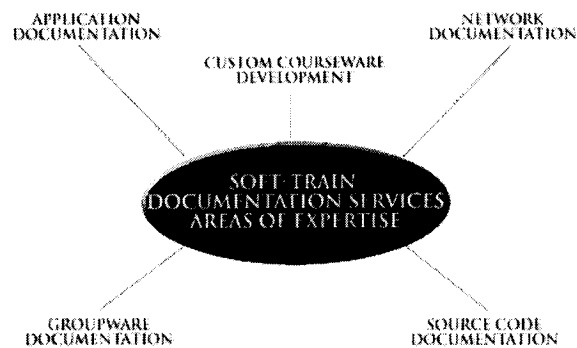

Soft-Train Inc.
2932 S. Daimler Street
Santa Ana, CA 92705
Phone: (949) 242-3600
Fax: (949) 242-3630

(13)

TABLE OF CONTENTS

I.	INTRODUCTION	3
II.	OVERVIEW OF STAFFING METHODOLOGY	3
III.	DESCRIPTION OF PROJECT	4
III.	PRICING	5

I. INTRODUCTION

Soft-Train opened its doors for business in **1983**. Since our inception, our team has gained recognition throughout the business community, as a dependable and consistent **Information Technology staffing resource**. Our consultants have **supported hundreds** of different **software development, network support, and technical writing projects**. Soft-Train consultants and employees retain the philosophy that customer service is our top priority. ***Our clients*** can be assured that all needs & requirements will be met in a courteous and efficient manner, as a result of the experience of Soft-Train's Business Consultants and technical staff. Soft-Train truly understands that our professional relationship will be based purely on the results of our service. At Soft-Train, our goal is to effectively manage your technology needs, so you can focus on your core business! Our team has "earned" the respect of our clients through hard work, dedication and most importantly **RESULTS**.

II. OVERVIEW OF STAFFING METHODOLOGY

Soft-Train follows a proven solution methodology when selecting staff to facilitate our client's information technology projects. Our hiring process takes a deliberate and disciplined approach, which is based upon a defined set of principles, requirements, and proven practices. Furthermore, the hiring process provides an adaptable framework that encourages professional growth and career training, which positions the technical personnel to stay abreast of new technologies and methodologies. Furthermore, our clients can be assured that the information technology resources that we assign have passed the associated technical tests with respect to their new job responsibilities, and have also passed a rigorous background and reference check. In addition, our personnel are encouraged to provide client feedback, so that we can insure that are service correctly identifies our clients needs.

III. DESCRIPTION OF PROJECT

The following section will outline a description of the work that will be associated with our IT Staff with respect to your project.

Description of Project
If awarded the project, Soft-Train will assign three technicians to perform the following tasks. The basic tasks of replacement are as follows: • Identify the PC allocated to users • Identify the user and department where the new PC will be stationed (a list will be provided by the client) • Image new PCs with images • Configure the name and description of the PCs and ensure that it can log onto the network and the technician can login to the system • Test or configure the following systems: ○ Test the Internet connection and verify that the ISA client is enabled and showing the correct server ○ Start Word and verify that the Office applications respond and type in the user's name and initials ○ Install the user's unique software and verify the software is running correctly. • Backup user's files • Migrate user's files from the old PC to the new PC • Profile the user's Outlook Exchange connection • Fill out fixed asset form for the old and new PCs custodian locations. • Return the old PC to IT with tag, so IT can define where the PC came from

III. PRICING

The following section will outline the fee schedule associated with our IT Staff and your project.
