

ATTACHMENT NO. 1

RESOLUTION NO. 2022- P014

1
2 A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF CULVER
3 CITY, CALIFORNIA, APPROVING SITE PLAN REVIEW P2022-0056-SPR AND
4 ADMINISTRATIVE USE PERMIT, P2022-0056-AUP TO ALLOW DEMOLITION
5 OF AN EXISTING OFFICE AND LIGHT INDUSTRIAL BUILDING AND
6 CONSTRUCTION OF A 244,000 SQUARE FOOT CREATIVE OFFICE BUILDING
7 AND 3 SUBTERRANEAN PARKING LEVELS WITH TANDEM PARKING, AT
8 8631 – 8635 HAYDEN PLACE IN THE INDUSTRIAL GENERAL (IG) ZONE.

9 (Site Plan Review and Administrative Use Permit, P2022-0056-SPR; -AUP)

10 WHEREAS, on February 9, 2022, IDS Real Estate Group (the “Applicant”), filed
11 applications for a Site Plan Review and Administrative Use Permit to allow demolition of a
12 64,426 square foot office and light industrial building and construction of a new 43 foot high, 4-
13 level, 244,000 square foot creative office building and 3 subterranean parking levels with 750
14 parking spaces, including 96 tandem spaces or 12.8% of the total parking, in the Industrial (IG)
15 Zone (the “Project”). The Project site is described as Lot 12 of Tract No. 32560, with a Los
16 Angeles County Assessor number of 4204-005-019; and,

17
18 WHEREAS, to implement the proposed Project, approval of the following applications is
19 required:

20 1. Site Plan Review P2022-0056-SPR: To ensure the Project is in compliance with
21 the required standards, design guidelines, and ordinances of the City; minimize potential
22 adverse effects on surrounding properties and the environment; and protect the integrity and
23 character of the residential, commercial, and public areas of the City; and

24
25 2. Administrative Use Permit P2022-0056-AUP: for tandem parking, to ensure that
26 the tandem parking provided for some of the Project’s required parking complies with all
27 required standards and City ordinances and to establish conditions of approval to ensure the
28 uses are compatible with the Project site and surrounding area; and,
29

1 WHEREAS, the Project qualifies for a categorical exemption, pursuant to California
2 Environmental Quality Act (CEQA) Section 15332, Class 32 – In-Fill Development Projects;
3 and

4 WHEREAS, on July 13, 2022, after conducting a duly noticed public hearing on the
5 subject application, including full consideration of the application, plans, staff report,
6 environmental information and all testimony presented, the Planning Commission (i) by a vote
7 of ___ to ___, adopted a Categorical Exemption, in accordance with CEQA, finding the Project
8 will not result in significant adverse environmental impacts; and (ii) by a vote of ___ to ___,
9 conditionally approved Site Plan Review and Administrative Use Permit, P2022-0056-SPR
10 and Administrative Use Permit, P2022-0056-AUP, as set forth herein below;

13 NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF CULVER
14 CITY, CALIFORNIA, RESOLVES AS FOLLOWS:

15 SECTION 1. Pursuant to the foregoing recitations, the provisions of the Culver City
16 Municipal Code (CCMC), the following findings are hereby made:

17 **Site Plan Review:**

18 As outlined in CCMC Title 17, Section 17.540.020, the following required findings for a Site
19 Plan Review are hereby made:

20 **A. The general layout of the project, including orientation and location of buildings,
21 open space, vehicular and pedestrian access and circulation, parking and loading
22 facilities, building setbacks and heights, and other improvements on the site, is
23 consistent with the purpose and intent of this Chapter, the requirements of the
24 zoning district in which the site is located, and with all applicable development
standards and design guidelines.**

25 The general layout of the Project is consistent with the development standards and intent
26 of the Industrial General (IG) zoning district. The Project design is consistent with the IG
27 Zone allowed structure height of 43 feet and street fronting setback of five feet; side and
28 rear setbacks are not required. The Project Site Plan centers the building within most of
29 the Project Site area resulting in a 69.5% lot coverage. North and south setback areas are
large enough to provide robust landscaping as discussed below. The east and west
setbacks are dominated by the east and west driveways/fire lanes with the east driveway

1 serving as the main vehicular access. The floor plan varies from level to level to
2 accommodate, high ceilings, interior mezzanines, interior overlooks, and nontraditional floor
plates.

3 The office building and subterranean parking comply with, or exceed, minimum setback
4 requirements and the north setback of 24 feet is more than adequate to separate the Project
5 from the from the nearest residential area. An approximate 30-foot-wide driveway ramp on
6 the Project's east driveway provides adequate vehicle access to the subterranean parking
7 area. The driveway and parking level maneuvering areas provide sufficient space and back
8 up capacity for Project users and the east driveway provides easy access and safe waste
9 removal and loading staging areas. The Project is designed with multiple pedestrian access
points. Pedestrian and bicycle access is provided from Higuera Street and Hayden Place,
public sidewalks of adequate width, and a ground level entry courtyard/plaza facing Hayden
Place.

10 **B. The architectural design of the structures and the materials and colors are**
11 **compatible with the scale and character of surrounding development and other**
12 **improvements on the site and are consistent with the purpose and intent of this**
13 **Chapter, the requirements of the zoning district in which the site is located, and with**
14 **all applicable development standards and design guidelines.**

15 The architecture is modern in design with first level and portions of the second level
16 consisting of corrugated cement board broken by large window panels. The second and
17 third levels contain full height windows. The separation of the upper glazing walls with the
18 lower cement and window glazing act to break the exterior building surfaces. A flat roof
19 gives the design a low-level look with the front of the building, facing Hayden Place, broken
20 in half with a courtyard/open space ground level entrance and terraced open decks at upper
21 levels looking down into the courtyard. This front is further accentuated by a roof top trellis
22 at the southeast side of the building. This trellis provides both shade and dissipated Sun
23 rays at portions where the upper-level office space is pushed into the building, thereby
24 offsetting the first and second levels at the southeast corner of the building. Light wells
25 incorporated into the front and rear ground level portions provide natural light and air to the
26 first level subterranean parking. Overall, with the Project's rectangular building shape
27 enhanced with features noted above, the architecture advances office design in an
28 industrial area experiencing patterns of use changes to office and design while respecting
29 the original industrial development of the Hayden tract. The Hayden Industrial Tract is an
urbanized area with light industrial, film production, and creative office/design uses, and the
Project design is consistent with the design of surrounding light industrial buildings.

30 **C. The landscaping, including the location, type, size, color, texture, and coverage of**
31 **plant materials, provisions for irrigation, and protection of landscape elements has**
32 **been designed to create visual relief, complement structures, and provide an**
33 **attractive environment and is consistent with the purpose and intent of this Chapter,**
34 **the requirements of the zoning district in which the site is located, and with all**
35 **applicable development standards and design guidelines.**

1 Project landscaping is designed to shield the north frontage facing the residential
2 neighborhood and to soften building mass. An existing row of mature street trees provides
3 separation between the Project Site and the neighborhood. An understory planting will be
4 installed at this edge to strengthen the streetscape, promote a better walking environment,
5 and provide a low to mid-level buffer for residents and pedestrians. A proposed low raised
6 planter along both the east and west sides of the building enhance these elevations that face
7 commercial neighbors. The planters accommodate varied flora that softens building façades,
8 reinforces the geometry of the architecture, and provides lush greenery as viewed at an
9 angle from Higuera Street.

10 A proposed ground level courtyard at the south or Project front elevation located in the
11 middle of the building, contains mix of ground cover and trees. Additional landscaping is
12 proposed at upper deck levels that overlook the courtyard and culminate in a roof top
13 planted deck. The proposed landscaped draws attention to the front of the building at the
14 ground level and moves upward in one single view. Lightwells along the southern edge
15 allow for trees to poke through the parking structure and provide a landscape layer that
16 reinforces the new street tree planting along Hayden Place. The proposed landscape
17 crosses over like a drawbridge over the lightwells.

18 Planting along the terrace edges provide a green edge to the building, softening the views
19 from the south and framing the views to the south. The central courtyard is divided into
20 outdoor rooms with a variety of scales and experiences. An onsite, outdoor kitchen with
21 seating located at the south edge of the courtyard enhances a planned street curb area for
22 food trucks along Hayden Place.

23 The roof deck provides a larger multi-use space designed for events and larger group
24 collaboration. Firepits and a fireplace anchor the space and allow the space to be used in
25 any season. The roof terrace is also divided into outdoor rooms designed to allow flexibility
26 of use. Long views to the north into the Hollywood hills and Griffith Park are created by
27 parapet height planters which cut down the short views into the adjacent neighborhood.
28 Users can stand at the southern edge of the roof terrace, creating interaction with the
29 terraces and courtyard below and providing views of the Baldwin Hills Scenic Overlook.
Finally, a project condition requires zero scape and/or drought tolerant landscaping to
ensure it thrives with minimal watering.

Landscaping and amenities in the landscaped areas are consistent with the purpose and
intent of this Chapter, the requirements of the zoning district in which the site is located,
and with all applicable development standards and design guidelines.

**D. The design and layout of the proposed project will not interfere with the use and
enjoyment of neighboring existing or future development, will not result in vehicular
or pedestrian hazards, and will be in the best interest of the public health, safety, and
general welfare.**

The proposed Project is consistent with IG Zoning standards for height, setbacks, and
parking and exceeds minimum required setbacks. All required parking and excess parking

1 are provided within an on-site subterranean parking area accessed from the Project's 32-
2 foot-wide east driveway and a 30-foot-wide driveway ramp leading from the east driveway.
3 Within subterranean parking areas, parking space dimensions, aisle widths, and vertical
4 height clearances and maximum allowed parking and drive aisle slopes are designed with
5 code compliant minimum and maximum standards. There are multiple pedestrian access
6 points. Pedestrian access is provided from public sidewalks fronting Higuera Street and
7 Hayden Place and a south ground level entry courtyard facing Hayden Place. Adequate
8 on-site space for both vehicle and pedestrian access reduces impacts to surrounding
9 properties and their potential future development because Project users are directed into
10 the Project site without having to traverse neighboring properties. Further, internal
11 pathways and vehicle driveways are of adequate width to provide Project users safe internal
12 circulation. Overall, the Project will not create a hazard to surrounding areas and is in the
13 best interest of the public health, safety, and general welfare.

14 **E. The existing or proposed public facilities necessary to accommodate the proposed
15 project (e.g., fire protection devices, parkways, public utilities, sewers, sidewalks,
16 storm drains, streetlights, traffic control devices, and the width and pavement of
17 adjoining streets and alleys) will be available to serve the subject site.**

18 The site is in an existing urbanized neighborhood and is currently developed with an
19 industrial building sufficiently served by existing utilities. There will be an overall net
20 commercial building increase of 179,574 square feet after building demolition and new
21 construction. Upgrades to existing facilities can be provided and improvements to the
22 adjacent public right-of-way, such as sidewalk, curb and gutter, street trees, and new
23 meters, will be implemented pursuant to Project conditions and code requirements. Further,
24 the existing and proposed public service facilities necessary to accommodate the Project
25 such as: the width and pavement of adjoining streets, traffic control devices, sewers, storm
26 drains, sidewalks, streetlights, proposed street trees, fire protection devices, and public
27 utilities are adequately provided as confirmed by the City agencies that reviewed the Project
28 during the interdepartmental review process.

29 **F. The proposed project is consistent with the General Plan and any applicable specific
plan.**

Based on review of the Project plans, the Project is consistent with the General Plan Land
Use Element, and the Industrial General Plan Land Use designation. The Project is
consistent with General Plan Land Use Element Objective 5, Economic Diversity, because
it will introduce a new creative office space, providing potential new business and economic
expansion; Objective 10, Visual Open Space, because the on-site and off-site landscaping
extends park-like qualities into a commercial area fronting a residential area; and Objective
16, Land Use Compatibility, because the project design and landscaping as designed, will
provide a visual transition between the residential uses north of the Site and the industrial
and commercial uses along Hayden Place. Further, the design includes architectural
elements that incorporate both the original industrial development of the Hayden Tract and
the transition to office and design uses, furthering the intent of Objective 16.

1 **Administrative Use Permit:**

2 As outlined in CCMC Title 17, Section 17.530.020, the following required findings for an
3 Administrative Use Permit are hereby made:

4 **A. The proposed use is allowed within the subject zoning district with the approval
5 of an Administrative Use Permit and complies with all applicable provision of this
6 Title and CCMC.**

7 The Project is proposing 96 tandem parking spaces, out of the total complement of 752
8 spaces, which is allowed in the IG Zoning District pursuant to CCMC Section
9 17.320.035.C.b – Tandem parking spaces. These proposed spaces along with the
10 standard 90-degree spaces result in provisions for code required parking and additional
11 parking. The proposed tandem parking layout complies with all other applicable
12 provisions regarding parking design and layout guidelines.

13 **B. The proposed use is consistent with the General Plan and any applicable Specific
14 Plan.**

15 The Project Site has an Industrial General Plan Land Use designation. The proposed
16 tandem parking is consistent with General Plan Land Use Objective 5, Economic
17 Diversity, because the tandem parking resulting in some additional parking as well as
18 the required parking, will make the Project a more viable space for prospective tenants.
19 This will encourage new business opportunities as stated in Objective 5. The tandem
20 parking will help to make the Project compliant with required parking thereby providing
21 additional support and flexibility for tenaning of the Project Site. The proposed tandem
22 Parking is consistent with Objective 23, because it will facility a new creative office
23 building instead of a more intense industrial or film production use. The less intense
24 office use will create a better balance between the residential and commercial uses in
25 the Hayden Tract area, consistent with Objective 23.

26 **C. The design, location, size and operating characteristics of the proposed use are
27 compatible with the existing and future land use in the vicinity of the subject site.**

28 The proposed use, design, location, size, and operating characteristics of the tandem
29 parking spaces will not have an impact on adjacent uses and are therefore found to be
compatible with the existing and future commercial land uses in the vicinity of the subject
site. Tandem parking spaces will be managed as appropriate by the Project tenants
and will not be visible as they are in the subterranean parking areas with sufficient drive
aisle widths and back up spaces to accommodate vehicle parking and retrieval
operations that will not spill into the public right-of-way. Parking operations will be
contained within the Project Site and will assist in meeting the Project's on-site parking
requirements thereby assuring the Project does not have an impact on nearby street
parking spaces. Thus, existing, and future land uses in the Project vicinity will not be
impacted by the proposed tandem parking.

1 **D. The subject site is physically suitable for the type and intensity of use being**
2 **proposed, including access, compatibility with adjoining land uses, shape, size,**
3 **provision of utilities and the absence of physical constraints.**

4 The generally flat configuration of the site, the adequate vertical clearances in the
5 subterranean parking levels, the vehicular access to the site from the ramp off the east
6 driveway, the adequate design and width of drive aisles where the tandem parking is
7 located, and the proposed onsite parking configuration are physically suitable to
8 accommodate the tandem parking spaces. Tandem parking spaces is compatible with
9 the adjoining commercial and residential uses because it will be managed by project
10 tenants which will lessen parking impacts by the Project on adjoining areas. The tandem
11 parking will not impact any utilities and there are no physical constraints that would
12 prevent the proposed parking. All required Project parking is provided on-site with
13 adequate drive aisles, driveways, and maneuvering areas and can be accommodated
14 within the Project boundaries. The tandem parking is therefore compatible with
15 adjoining land uses as the Project will provide its required parking.

16 **E. The establishment, maintenance or operation of the proposed use will not be**
17 **detrimental to the public interest, health, safety or general welfare or injurious to**
18 **persons, property or improvements in the vicinity and zoning district in which the**
19 **property is located.**

20 The establishment of tandem parking will not be detrimental to the public interest, health,
21 safety, or general welfare or injurious to persons, property or improvements in the
22 surrounding industrial, commercial, and residential zoning districts or vicinity since the
23 tandem parking will not generate on-site or off-site parking impacts. All required and
24 managed parking will occur on the Project Site thereby lessening impacts to surrounding
25 properties. Sufficient on-site maneuvering areas within the drive-aisles will ensure
26 parking and retrieval of alternative parking will occur on-site without the need to use the
27 public right-of-way or public parking spaces.

28 SECTION 2. Pursuant to the foregoing recitations and findings, the Planning
29 Commission of the City of Culver City, California, hereby (i) adopts a Categorical Exemption,
in accordance with CEQA, finding the Project will not result in significant adverse environmental
impacts; and (ii) approves Site Plan Review and Administrative Use Permit P2022-0056-SPR
and -AUP, subject to: the site and floor plans reviewed by the Planning Commission on July
13, 2022; the conditions of approval set forth in Exhibit A, attached hereto and incorporated
herein by this reference; and the applicable code requirements set forth in Exhibit B attached

1 hereto and incorporated herein by this reference. The site and floor plans, and Exhibits A and
2 B are collectively referred to as "Project Requirements."

3 SECTION 3. The Project Requirements are hereby imposed on the proposed Creative
4 Office development at 8631 – 8635 Hayden Place.

5 APPROVED and ADOPTED this 13th day of July 2022.

NO.	CONDITIONS OF APPROVAL	Agency	Source	Compliance Verification
GENERAL				
1.	Street trees, tree wells, and irrigation shall be installed, to the satisfaction of the City Engineer and Current Planning Manager, in conformity with the City’s approved Urban Forest Master Plan, and where appropriate, the Washington National TOD Oriented Street scape plan. All new (and existing) street trees shall be supplied with irrigation water from the overall site irrigation system which shall include a timer and a rain sensor. All new (and existing) street trees, landscaping, and irrigation shall be indicated on the overall site landscaping/irrigation plan. In residential areas, all new off-site landscaping shall conform to the City’s Residential Parkway Guidelines.	Public Works/ Planning	Standard	
2.	At the sole cost and expense of the Property Owner, any curbs, gutters, sidewalks, street lights, street light wires and conduits, traffic signal equipment, street pavement, and any other City infrastructure which are damaged or broken from construction of the Project shall be repaired and reconstructed in conformity with APWA Standards and to the satisfaction of the City Engineer.	Public Works	Standard	
3.	The project shall be subject to Holiday Moratorium dates as required by the December 17, 2009 Public Works/Engineering Holiday Slowdown Policy memo, in which work in the public right-of-way is restricted or prohibited on certain days in November and December.	Public Works	Standard	
4.	Fire sprinkler main lines shall not be allowed to discharge into the public right-of-way, and they shall discharge into the sanitary sewer system.	Public Works	Standard	
5.	Trash enclosures shall be provided and shall each have a minimum inside dimension of 10 feet (depth) x 12 feet (width) for two 3-yard bins and shall be increased to an additional 60 square feet for each additional bin required, a gated opening	Public Works/ Fire/ Current Planning	Standard

	<p>that is at least 10 feet wide, and a 6-inch high by 6-inch-wide concrete curb along the inside perimeter wall. Each enclosure shall also have at least a 6-inch-thick concrete slab that drains at a one percent gradient out of the enclosure. An 8 feet concrete loading pad in front of the proposed trash enclosure/trash room, 10 feet minimum clear opening with gates for bin access, and separate pedestrian access door for tenant use, shall be provided. Additional grade may be necessary to include a floor drain that leads to the sewer for maintenance purposes. Final approval for the size, location, and type of equipment needed for the adequate storage and disposal of all solid and recyclable waste generated by the Project shall be obtained from the City’s Environmental Programs and Operations Manager. A fire suppression sprinkler system shall be provided within any covered trash enclosure area as required by the Fire Marshal. All refuse containers assigned to or otherwise used by the Project shall be stored on-site in the trash enclosures.</p> <p>Final approval for all proposed trash enclosure/room shall be obtained from Environmental Programs and Operation Division.</p>			
6.	All Project related solid and recyclable waste material handling shall be in accordance with CCMC Section 5.01.010 – “Solid Waste Management”, which outlines the Sanitation Division’s exclusive franchise for this service. The project shall provide adequate trash and recycling capacity and shall comply with Assembly Bills 939, 1826, and 341 waste diversion goals.	Public Works	Standard	
7.	The Applicant shall submit a waste management plan to EPO for review and approval.	Public Works	Standard	
8.	The applicant shall develop the traffic signal design plans (if applicable) according to current standards	Public Works	Standard

GENERAL				
	<p>b. A final hydrology and hydraulics report shall be submitted to the City Engineer as part of the grading plan for review and approval. The 25-year storm frequency (i.e., urban flood) shall be used for the design of the on-site conveyance facilities, as the existing site is neither a natural watercourse nor a natural sump.</p> <p>c. The applicant shall provide a geotechnical report from a State licensed geotechnical engineer, as part of the Site Improvement Plan, reporting on the suitability of the onsite soils to support the proposed construction. The report shall also include a liquefaction analysis and a determination of the adequate pavement and base requirements for the drive aisles and parking areas. The report shall also identify any special considerations necessary to satisfy California Building Code requirements.</p> <p>d. Three (3) sets of off-site improvement plans prepared by a civil engineer registered in the State of California shall be submitted to the Engineering Division for review, approval and permitting for all proposed improvements within the public right-of-way. Separate plans shall be submitted for street improvements, street light improvements, traffic signal, signage and striping, and sewer improvements. A landscape and irrigation plan for the public parkway area and raised medians shall be included in the street improvement plans.</p> <p>e. Applicant shall pay an initial plan check fee in the amount of \$750.00 each upon submittal of the on-site-Improvement and off-site Improvement plans for review. Additional plan check and permit fees will be determined per the Engineering Division’s Schedule of Fees and Charges.</p>

GENERAL				
	<p>f. Concurrent with the submittal of the on-site improvement plan, a Standard Urban Stormwater Mitigation Plan (SUSMP) shall be submitted for review and approval by the City Engineer as outlined in CCMC Chapter 5.05. The SUSMP shall be developed and implemented in accordance with the requirements of the Los Angeles County Municipal Stormwater National Pollution Discharge Elimination System (NPDES) Permit No. CAS614001 (Order No. 01-182). The SUSMP shall provide Best Management Practices (BMP's) that adequately address the pollutants generated during the post-construction stage and shall be designed for filtration, infiltration and retention for the first 1.1" of rainfall. The site improvement plans shall note the contractor shall comply with the "California Stormwater Best Management Practice Handbooks". The Site Improvement Plans shall not be accepted for review unless the SUSMP is included in the submittal package, including the plan check fee associated with the SUSMP. Said SUSMP shall be used to guide the "Conceptual – Not For Construction" Post Development Hydrology / SUSMP Map. The approval of the SUSMP is required prior to issuance of the Site Improvement Plan. The SUSMP shall cover the new building and parking lot. The Site Improvement Plans shall not be accepted for review unless the SUSMP is included in the submittal package, including the plan check fee associated with the SUSMP.</p> <p>g. This project proposes to redevelopment property that exceeds one acre. Therefore, prior to the issuance of Grading or Building Permits, proof of obtaining a General Construction Activities NPDES Permit from the State Water Resources Control Board via a Waste Discharger Identification (WDID) number shall be submitted.</p>

STANDARD CODE REQUIREMENTS
Project Subject to some or all Code Requirements as determined by the City

NO.	CODE REQUIREMENTS	Agency	Code Compliance Verification	Check if Applicable
1.	All building permit applications for the Project shall include sufficient information and detail to clearly reflect compliance with all applicable requirements of the Culver City Municipal Code (the "CCMC") and with the Project Conditions of Approval.	Current Planning		
2.	The land use permit to which the Project Conditions of Approval apply (the "Land Use Permit") shall expire one year from the date of final approval of said Land Use Permit, if the use has not been exercised. As provided in CCMC Section 17.595.030 –"Time Limits and Extensions", an applicant may request an extension of said expiration date by filing a written request with the Current Planning Division prior to the expiration of the land use permit.	Current Planning		
3.	Pursuant to CCMC Section 17.630.010.C.4 – "Posted Notice", the public notification sign(s) installed in accordance with the public notification requirements for the Land Use Permit shall be removed within ten days after the end of the appeal period or the final decision by the City Council on the Land Use Permit, whichever occurs last.	Current Planning		
4.	The Project shall be developed pursuant to CCMC Chapter 17.300 – "General Property Development and Use Standards".	Current Planning		
5.	All planted areas on the Property shall be landscaped and irrigated pursuant to CCMC Chapter 17.310 - "Landscaping".	Current Planning		
6.	All parking areas on the Property shall be developed pursuant to CCMC Chapter 17.320 - "Off-Street Parking and Loading".	Current Planning		
7.	Signs proposed for the Project shall meet all applicable requirements of CCMC Chapter 17.330 - "Signs". All signs require a separate permit and approval.	Current Planning

NO.	CODE REQUIREMENTS	Agency	Code Compliance Verification	Check if Applicable
8.	The Project applicant shall obtain all permits and licenses required in connection with the development or use of the Project.	All		
9.	All work within the public right-of-way (including but not limited to curb, gutter, sidewalk, and driveways) shall be designed and completed to the satisfaction of the City Engineer. Drainage devices, concrete curbs and gutters, sidewalks, drive approaches, and roadway pavement shall be designed in conformity with all provisions of the latest edition of the American Public Works Association Standard Plans ("APWA Standards").	Public Works		
10.	Any new utilities shall be placed underground or enclosed within the building construction; no new overhead utilities shall be permitted.	Public Works Current Planning		
11.	The Project shall comply with all applicable requirements of the Culver City Energy Reach Codes as set forth in CCMC Section 15.02.1100-1180, et seq.	Building		
12.	The Project shall comply with all applicable requirements relating to solar photovoltaic requirements as set forth in CCMC Section 15.02.100, et seq. and as amended from time to time.	Building		
13.	Plans submitted as part of the building permit application shall include a schedule of the special inspections anticipated, the firm proposed for the special inspections, and the resumes of all proposed special inspectors. The Building Official reserves the right to reject any special inspector at any time for the duration of the Project. All special inspection reports shall be made available to the Building Official and to any Culver City Building Safety inspector as required by the Building Official. No work shall be covered without a Culver City Building Safety inspection, whether or not a special inspection was performed on such work.	Building
