Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

900 CP OWNER LLC (Continued) **S126976750**

Eval Date:	10-19-2021
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Inspection by A.Domanski, consent by John Rampino. John is new building engineer for building along with assistant Mitch. Helped get them setup with CERS accounts and had data ops make the changes needed. Reviewed what is expected from HMBP program and did a walkthrough of items involved. All elements are accurate and will work on employee training in time. John reported the batteries are likely to be removed from program and water treatment chemicals are going to be moved to ceiling level in a few months.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F004
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 593584
CERS ID: 10880746
CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Christopher Sakoda, Laboratory Manager
Eval Division: Los Angeles County Fire Department
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-26-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A. Domanski, consent by Angela Castillo and Chris Sakoda. Initial inspection for HMBP. All items take care of and all elements extremely proficient - only reportable items are bulk liquid nitrogen and small farm of C02. Biohazard in several locations and minor flammable, acids and bases. Site map accurate for lab area and training is above average. No issues.

Description:	The unknown cleaning product is either rust remover or fabric softener. Caller responded to call at a hotel, reporting a maid had mixed liquids. This mixture caused people to complain of red itchy eyes. There were 5 people who complained of sympttoms and were asymptomatic within an hour of the event. The building was evacuated of it's 350 occupants, evacuations are over, all have returned to the hotel.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Risk Assessment Report
Completed Date:	04/21/1994
Comments:	Risk Assessment with supplemental characterization data was submitted & approved by Department. Risk assessment indicate site is protective of industrial\\commercial scenarios. RP has expressed interest in submitting a RAP with a supplemental risk assessment with data supporting unlimited use of site including residential occupancy, pursuant to Polanco legislation. RP intends to pursue liability immunity pursuant to the Polanco legislation.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	12/18/1992
Comments:	THE DEPARTMENT HAS COMPLETED THE REVIEW OF THE PEA REPORT. THE DEPARTMENT CONCURS WITH THE RECOMMENDATION THAT FURTHER ACTION IS NEEDED AT THE SITE. THE RECOMMENDED FURTHER ACTION IS A HUMAN HEALTH RISK ASSESSMENT BE PERFORMED TO DETERMINE THE HEALTH RISKS FROM CONTAMINANTS IN SITE SOIL AND POSSIBLE VOLATILIZATION FROM GROUNDWATER. IF THE RISK ASSESSMENT INDICATE A SIGNIFICANT RISK TO HUMAN HEALTH FROM ANY OF THE SITE CONTAMINANTS, SOIL AND GROUNDWATER REMEDIATION WILL BE PERFORMED. THE DEPARTMENT CONSIDERS THE PEA AS COMPLETE. THE DEPARTMENT MAILED A DRAFT ENFORCEABLE AGREEMENT TO THE

KITE SITE (Continued) **S100351177**

RESPONSIBLE PARTY FOR THE FURTHER REMEDIAL ACTION. A DEED RESTRICTION WAS NEVER FINALIZED. NFA FOR COMMERCIAL/INDUSTRIAL USE ONLY.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 07/14/1992
Comments: THE DEPT RECEIVED A PEA FOR THE SITE. NO DOCUMENTED RELEASE OF HAZ SUBSTANCES AT THE SITE WERE IDENTIFIED. PAST PRACTICES IN HANDLING HAZARDOUS SUBSTANCES AND/OR WASTE AT THE SITE HAVE RESULTED IN RELEASES OF CONTAMINANTS AT THE SITE. A TOTAL OF 28 CONTAMINANTS WERE IDENTIFIED IN SOIL AND GROUNDWATER AT THE SITE. THE PEA WAS SUBMITTED TO DETERMINE WHETHER REMOVAL OF HAZ SUBSTANCES OR REMEDIAL ACTION WOULD BE REQUIRED AT THE SITE IN ORDER TO PROTECT PUBLIC HEALTH AND THE ENVIRONMENT. THE SITE CONSISTS OF APPROXIMATELY 4.5 ACRES. THE SITE IS CONTAMINATED WITH PETROLEUM HYDROCARBONS, VOLATILE ORGANICS AND HEAVY METALS. THE GROUNDWATER IS AT A DEPTH OF 35 FEET. DIFFERENT AREAS OF THE SITE PREVIOUSLY USED FOR RETAIL LIQUOR SHOP, WELDING CO., MANUFACTURING (TOOL & DIE), CRANE SERVICE, WENDING SERVICE WAREHOUSE, MANUFACTURE OF WOOD PRODUCTS, MACHINE SHOP, DIE CASTING INDUSTRY, GRINDING COMPANY, FOOD PROCESS- ING, GREETING CARD COMPANY, WIRE PRODUCTS MFG, LUMBER STORAGE, CABINET MFG, AUTOMOBILE BODY WRECKING, PAINT BOOTH, PACKAGING CO, CLAY PRODUCTS MFG, MACHINE SHOPS AND METAL LABORATORY, PLASTIC MFG AND STORAGE, TOOL STORAGE, MANUFACT_ URE OF INSECTICIDES, WOOD FABRICATION, BOAT CONSTRUCTION, PLUMBING SUPPLY STORAGE, DENTAL OFFICE, TRAVEL AGENCY, BANKS AND A GASOLINE SERVICE STATION. A PEA IS REQUIRED BECAUSE OF THE EVIDENCE OF CONTAMINATION AT THE SITE.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CA BOND EXP. PLAN:

Reponsible Party:	RWQCB REFERRAL SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The responsible party is providing for the remediation of the site under RWQCB lead. The RP will pay all costs associated with the cleanup. There are no current plans for expenditure of Bond funds for the site.
Site Description:	This 454-acre facility has been used from 1953 to the present by Hughes Tool Company, Hughes Aircraft, and Hughes Helicopters to manufacture and test machine and aircraft parts and to research and develop electronics. Located at the facility is an etching laboratory, a plating shop, a salvage yard, several

HUGHES HELICOPTERS, INC. (Continued) **S100833477**

above and below-ground tanks for fuel oil and aviation fuel, waste neutralization pits, solvent and acid sumps, liquid waste clarifier pits, and an unlined fire-training pit.

Hazardous Waste Desc: Samples from ground water monitoring wells installed by the contractor indicate high levels of trichloroethane (TCE), toluene, ethylbenzene, benzene, vinyl chloride, trans-1,2,-dichloroethylene (DCE), dichloroethane (DCA), xylene isomers, and hydrocarbons (C5 to C8).

Threat To Public Health & Env: The Ballona/Bellflower Aquifers, which are mixed below the site, are encountered from 15 to 40 feet and are the primary water source for the monitoring wells. The contaminated aquifer is in hydraulic communication with the Silverado Aquifer (50 to 100 feet below the site) and with the unlined storm drain to the south of the site which discharges into Ballona Creek. There is potential for contamination of both surface water and the Silverado Aquifer which is a major drinking water source. Groundwater contamination is suspected but has not been verified to date.

Site Activity Status: Phases I and II of the preliminary investigation of hydrologic conditions have been completed. Additional studies have also been completed on contaminated soil due to tank leakage at the site. Based on this information, the responsible party is planning follow-up work to determine the vertical and horizontal extent of contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2022

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 02/22/2022
Date Data Arrived at EDR: 02/23/2022
Date Made Active in Reports: 05/10/2022
Number of Days to Update: 76

Source: Drug Enforcement Administration
Telephone: 202-307-1000
Last EDR Contact: 02/23/2022
Next Scheduled EDR Contact: 06/06/2022
Data Release Frequency: No Update Planned

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/03/2006
Date Made Active in Reports: 08/24/2006
Number of Days to Update: 21

Source: Department of Toxic Substance Control
Telephone: 916-323-3400
Last EDR Contact: 02/23/2009

Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/22/2022
Date Data Arrived at EDR: 02/23/2022

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

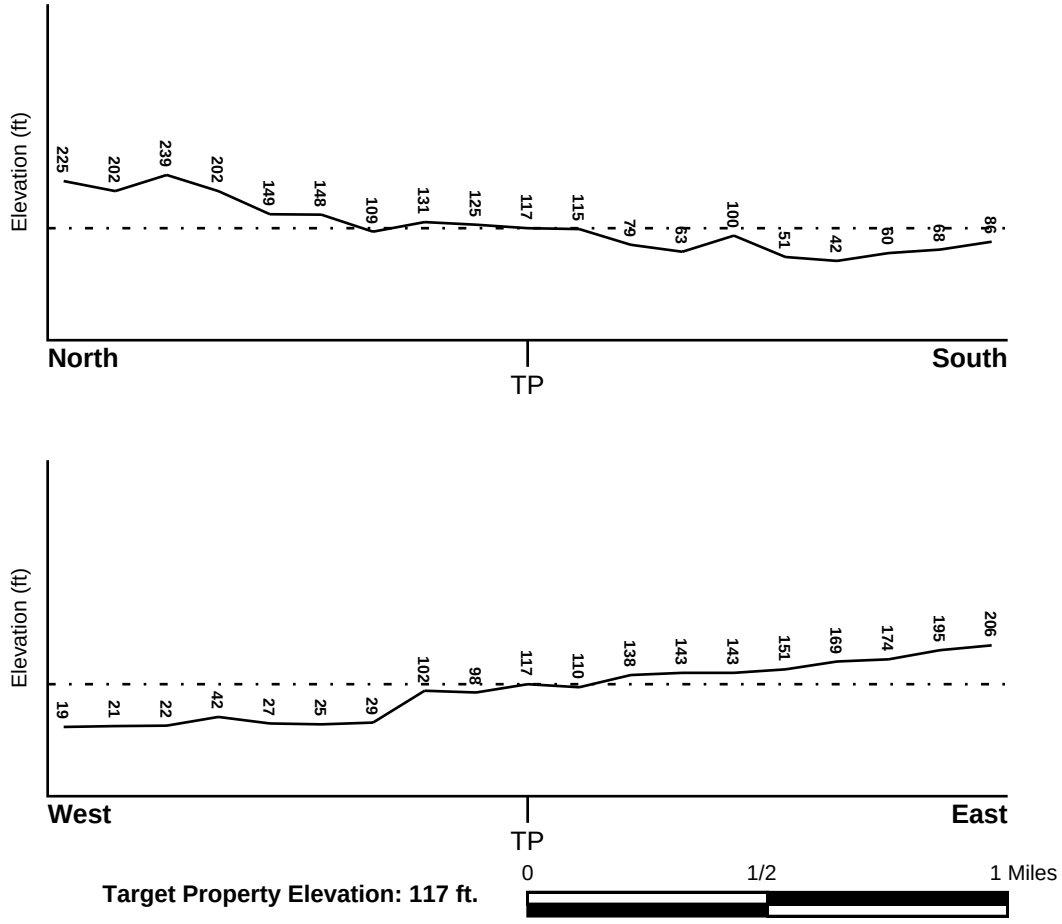
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 117 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1760F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1595F	FEMA FIRM Flood data
06037C1780F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VENICE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile West
Site Name:	HUGHES HELICOPTERS INC
Site EPA ID Number:	CAD040360745
Groundwater Flow Direction:	GENERALLY E IN THE BALLONA AND SILVERADO AQUIFERS.
Measured Depth to Water:	35 to 50 feet in the Ballona aquifer. The inferred depth to groundwater in the Silverado aquifer is from 60 to 90 feet.
Hydraulic Connection:	The Charrock fault on the eastern side of the site restricts the free flow of ground water to the east in the Ballona and Silverado aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Eocene
Code:	Te *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Certified Sanborn® Map Report

05/16/22

Site Name:

462158
5751 - 5769 Uplander Way
Culver City, CA 90230
EDR Inquiry # 6980022.3

Client Name:

AEI Consultants
2500 Camino Diablo
Walnut Creek, CA 94597
Contact: Cierra Vaquera

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 5EF5-454D-9DFF

PO # 306738

Project 462158

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 5EF5-454D-9DFF

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RE: PRA of June 08, 2022, Reference # H050612-060822.

Dear Ron Russell,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 5819 Uplander Way
Culver City CA 90230

The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction click here.

You searched the following address:

Street Number: 5751 Street Name: Uplander Way

Our office does not have any records (related to industrial waste/underground storage tanks/stormwater) for the requested site address.

Please double check the spelling of the street name or search a different address. Both street number and street name must be exact and spelled correctly as they appear for the facility on file. Do not include street direction prefix (i.e. N, S, E, W, etc...) or suffix (i.e. ST, AVE, RD, BLVD, etc...) unless they appear in the street name (i.e. AVENUE K, AVENIDA CESAR CHAVEZ, 10TH ST EAST, CROSSROADS PKWY N, etc...). Do not include any extra spaces after the street number or after the street name.

RE: PRA of June 08, 2022, Reference # H050613-060822.

Dear Ron Russell,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 5835A Uplander Way

Key Site Manager:			
Previous Owners, Operators and/or Occupants:			

PROPERTY USE AND SPECIFICATIONS

☐ Residential ☐ Office/Retail ☐ Industrial ☐ Vacant Land ☐ Agricultural ☐ Other: _____

Provide all known current/former addresses and/or parcel numbers:

Are there any plans for site redevelopment or change in use? ☐ No ☐ Yes If yes, describe:

Total Property Size (acres):	Electricity Provider:
Number of Buildings:	Heating System Fuel Source(s):
Building Size(s) (SF):	Gas Provider:
Original Construction Date(s):	Cooling System Power Source:
Date(s) of Renovation(s):	Potable Water Source/Provider:
Number of vacant units:	Sanitary Sewer Provider:

Any waste water discharge at the site? ☐ Septic Tank/Leachfield ☐ Sanitary Sewer ☐ Other ☐ None

PROPERTY HISTORY

Current and Previous Occupant(s)	**Years of occupancy**	**Brief description of on-site operations**

Has the subject site ever been occupied by the following?
☐ Dry Cleaner ☐ Gas Station ☐ Printing Facility ☐ Manufacturing Facility
If yes, provide years of occupancy:

Have any previous investigations been performed at the subject property? ☐ No ☐ Yes
If Yes, are copies available? ☐ No ☐ Yes
If Yes, what type: ☐ Phase I ESA ☐ Phase II ☐ Asbestos Survey ☐ Lead Paint Survey ☐ Radon Sampling
☐ Other: _____

Project Number:		Return via Fax:	
Project Manager:		Return via Email:

ON-SITE ENVIRONMENTAL CONDITIONS			
Are you aware of any of the following environmental conditions, **either current or former**, on the subject site?			
Environmental Condition/Issue	**Response**	**Environmental Condition/Issue**	**Response**
Aboveground Storage Tanks (ASTs)	☑ No ☐ Yes	Polychlorinated Biphenyls (PCBs)	☑ No ☐ Yes
Underground Storage Tanks (USTs)	☑ No ☐ Yes	Electrical Transformers	☑ No ☐ Yes
Hazardous/Toxic Substances/Chemicals	☑ No ☐ Yes	Hydraulic Lifts	☑ No ☐ Yes
Chemical Spills/Releases	☑ No ☐ Yes	Elevators	☐ No ☑ Yes
Dump Areas/Landfills	☑ No ☐ Yes	Asbestos	☑ No ☐ Yes
Waste Treatment Systems	☑ No ☐ Yes	Lead-Based Paint	☑ No ☐ Yes
Wastewater Discharges	☑ No ☐ Yes	Oil/Gas Wells	☑ No ☐ Yes
Floor Drains, Sumps, Clarifiers/Oil Water Separators	☑ No ☐ Yes	Flooding, Leaks, Other Water Intrusion	☑ No ☐ Yes
Pits, Ponds, Lagoons	☑ No ☐ Yes	Environmental Permits	☑ No ☐ Yes
Stained Soil, Stressed Vegetation	☑ No ☐ Yes	Environmental Cleanups	☑ No ☐ Yes
Pesticide/Herbicide Use	☑ No ☐ Yes	Water Damage, Mold	☑ No ☐ Yes

OTHER ENVIRONMENTAL CONDITIONS

Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? ☑ No ☐ Yes If yes, provide brief explanation.

Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? ☑ No ☐ Yes If yes, provide brief explanation.

Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? ☑ No ☐ Yes If yes, provide brief explanation.

SIGNATURE INFORMATION

Person completing questionnaire: CRAIG MONROW

Title/Affiliation to property: Regional Vice President

Number of years associated with property: 5 YEARS

Date: 5/16/2022

SITE VISIT INFORMATION

- A person knowledgeable of current property use/business operations should be present during the site visit.
- Access to a percentage of units should be provided as requested by the field professional.
- Access to the following areas should be provided: all common areas, storage areas, and utility areas; all underground features and chemical storage/disposal areas.
- The following documentation should be provided for review if applicable: all hazardous waste manifests, environmental permits, and any previous environmental reports.

GENERAL PROPERTY INFORMATION

PROPERTY NAME:	Culver City Business Park				
SITE ADDRESS:	5751-5769 Uplander Way	**CITY**	Culver City	**STATE**	CA
Number of Buildings:	4	**Date of Construction:**	1980	**Current Occupancy:**	95.94 %
Number of Stories:		**Renovation Date(s):**		**Area of Current Vacant Space:**	5,940
Site Area in Acres:	acres	**Gross Building Area:**		**Rentable Building Area:**	sq. ft.
Total Number of Parking Spaces:		**Number of HC Parking Spaces:**		**Number of Van HC Spaces:**	

GENERAL PROPERTY INFORMATION

Please describe all pertinent building maintenance, renovation, seismic, and upgrade work within the last 15 years. If available, please attached supporting documentation, i.e. work orders, receipts, etc.:

Please describe any ongoing/current major building maintenance, renovation, seismic, and upgrade work:

Please describe any future building maintenance, renovation, seismic, and upgrade work:

Please indicate which of the following items is a Tenant or Landlord responsibility for REPLACEMENT:

	Tenant	Landlord		Tenant	Landlord
Paving		✓	HVAC Condensing units		
Pavement Seal-coating		✓	Window AC Units or Other		
Pavement Striping		✓	Domestic Water Heaters		
Sidewalks		✓	Fire Sprinkler in Tenant Space		
Exterior Paint		✓	Fire Alarm in Tenant Space		
Brick Pointing			Elevators/ Escalators		✓
Roofing		✓	Tenant Space Finishes	✓	
HVAC Rooftop Units			Toilet Room Fixtures & Finishes		✓
HVAC Air handling/Fan coil units			ADA compliance		

Please list all major vendors servicing the Property (If addition provided, please attach separate sheet):

	Vendor Name	Phone No.		Vendor Name	Phone No.
Roofing			Painting		
Elevator			HVAC		
Fire Protection			Plumbing		
Electrician			Trash Disposal		
Landscaping			Security System		

Please list all utility providers for the Property:

Domestic Water		Gas/ Oil/ Other	
Sanitary Sewer		Electricity	
Storm Drainage		Steam	

AEI Consultants

QUESTIONNAIRE *Note to Field Observer: Answers should be verified during site interview and field observations. A yes answer should be followed up thoroughly and documented if issues are present.*	YES	NO	UNKNOWN
Are you aware of any violations the property has been cited for? (If Yes, attach citation)		✓	
Is a tenant monthly fee charged for common area maintenance (CAM)?	✓		
Does the Property experience any site drainage, ground water or flooding problems?			✓
Is the amount of on-site parking providedinadequate?			✓
Is there damaged or nonoperational site lighting?		✓	
Are the utilities (water, sewer, gas, electric) inadequate to meet needs of the tenants?			✓
Does the Property have any structural issuesuch as settlement, cracking or deflection?			✓
Has the Property experienced any fire related or seismic damage?			✓
Does the Property exhibit any water/ moisture infiltration?			✓
Does the Property have any leakage or failures at the roof, walls or cellar?			✓
Is fire retardant plywood (FRT) installed anywhere in the structure(s)?			✓
Are any portions of the facades covered with EIFS (synthetic stucco or Dryvit)?			✓
Any problems regarding synthetic stucco or EIFS?			✓
Roof is inaccessible with no on-site OSHA approved ladder or roof hatch?		✓	
Are the HVAC systems inadequate and/or non-functioning?			✓
Are there any plumbing leaks or prevalent past leaks?			✓
Are there any water pressure issues at any time?			✓
Is galvanized or polybutylene "gray" piping present anywhere in the Property?			✓
Has any active or historical leaks related to galvanized or polybutylene piping occurred?			✓
Has retrofitting or replacement of galvanized or polybutylene piping taken place?			✓
Are there any electrical problems or inadequate electrical service?			✓
Electrical amperage to each unit is less than 60-amps??			✓
Is aluminum branch wiring present anywhere in the Property?			✓
If aluminum branch wiring is present, has retrofitting been performed?			✓
Are there any screw-in fuses present in the Property?			✓
Are there kitchens and bathrooms that are not equipped with GFI's/GFCI's?			✓
Are there any elevator or escalator shutdowns or deemed out of service?		✓	
Are there elevators present not regularly serviced under a full-service maintenance contract?	✓		
Are there fire sprinkler systems present and not regularly serviced and tested?			✓
Are there fire alarm and detection devices not regularly serviced and tested?			✓
Is common area interior painting performed as part of routine maintenance?	✓		
Was an "ADA Survey" ever conducted on the property? (If Yes, please attach a copy)			✓
Has any ADA improvements been made to the Property or does a Barrier Removal Plan exist for the Property?			✓
Is there any unresolved ADA related complaints or pending litigation?			✓
Is there any mold or microbial growth at the Property?			✓
Have any tenants or occupants complained about mold or microbial growth at the Property?			✓
Is there a current formal indoor air quality management plan at the Property?			✓

DOCUMENT REVIEW

Please provide us with the following documents prior to our site visit, indicating the availability of each. This documentation may be included as an exhibit within the Property Condition Assessment.

	Available On-site	Available Attached	Not Available
Site Plan and ALTA Survey			
Certificate of Occupancy			
Copy of Open Building Permits or Code Violations			
Copy of Zoning Variances or Easements			
Rent Roll (with unit number, tenant name, unit area and occupancy %)			
Reduced Floor Plans			
Original construction documents (core and shell)			
List of Mechanical Equipment			
List of Capital expenditures for last 5 years			
List of Planned Capital expenditures			
Local Law #11 Façade Inspection Reports (NYC)			
Roof survey and warranty			
Service reports and inspection certificates for (elevator, escalator, HVAC, electrical generator, fire alarm and sprinkler)			
ADA Survey or Barrier Removal Plan			
Previously prepared Property Condition Report or engineering studies

Consumer Confidence Report on Water Quality for 2021

Providing Quality Drinking Water in California Since 1929

www.gswater.com/CulverCityCCR facebook.com/GoldenStateH2O @GoldenStateH2O

About the Company

Golden State Water Company (GSWC) is a wholly owned subsidiary of American States Water Company (NYSE:AWR). GSWC provides water service to more than 1 million people in over 80 communities throughout California. AWR also owns a contracted services subsidiary, American States Utility Services, Inc. (ASUS). ASUS provides operations, maintenance and construction management services for water and wastewater systems located on military bases throughout the country under 50-year privatization contracts with the U.S. government.

Golden State Water Company

President's Message

Dear Golden State Water Customer,

Golden State Water Company (GSWC) is pleased to present our 2022 Annual Water Quality Report (Consumer Confidence Report), providing customers with important information regarding local water quality and service during the 2021 calendar year.

GSWC is proud to be the trusted water provider serving local customers and more than 80 communities throughout California, and we appreciate that customers have peace of mind knowing we never stop working to ensure quality, reliable water is available at their taps when they need it.

We recognize the challenges many customers have faced during this pandemic period and now into the continuing drought. During this unprecedented time, our continued dedication to providing the highest levels of service and care to customers has been a driving force for our team of water professionals. We take great pride in the service we provide and embrace our role as essential workers in the community.

For more than 90 years, water quality has always been a top priority for GSWC. Our team of scientists, engineers and water experts is committed to protecting our water systems and ensuring the water we deliver to local homes and businesses meets the stringent standards set by the state and federal governments and is safe to drink. We aggressively monitor and test for hundreds of contaminants in each of our 38 water systems and have consistently scored among the top water companies for compliance with water quality regulations.

GSWC is proud to report that the water delivered to your tap continues to meet all federal and state quality standards established to protect public health and safety. Within this document, you will find information regarding local water supply sources, testing, and the steps GSWC takes to ensure our water is in compliance with standards set by the United States Environmental Protection Agency (USEPA), State Water Resources Control Board's Division of Drinking Water (DDW) and California Public Utilities Commission (CPUC).

To access the most up-to-date Water Quality Report for your area, sampling results, and to learn more about common contaminants, you can visit **www.gswater.com/water-quality/**. If you have any questions about this report, please contact our 24-hour Customer Service Center at 1.800.999.4033 or email us at **customerservice@gswater.com**.

GSWC is constantly working toward 100 percent customer satisfaction and encourages all customers to visit **www.gswater.com** and follow us on Twitter and on Facebook at @GoldenStateH2O.

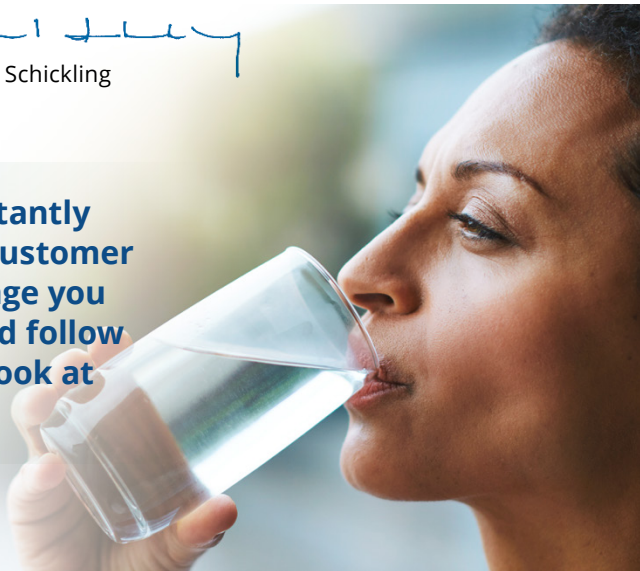
On behalf of everyone at GSWC, thank you for allowing us the opportunity to serve you and your community.

Sincerely,

Robert Sprowls

Dave Schickling

Golden State Water is constantly working toward 100 percent customer satisfaction and we encourage you to visit www.gswater.com and follow us on Twitter and on Facebook at @GoldenStateH20



Where Does My Water Come From?

Water delivered to customers in the Culver City System is imported water from the Colorado River Aqueduct and the State Water Project (imported and distributed by the Metropolitan Water District of Southern California).

Source Water Assessment

In December 2002, the Metropolitan Water District of Southern California (MWD) completed a source water assessment of its Colorado River and State Water Project supplies.

Colorado River supplies are considered to be most vulnerable to the following:

- Increasing urbanization in the watershed
- Recreation
- Urban/storm water runoff
- Wastewater

State Water Project supplies are considered to be most vulnerable to the following:

- Agriculture
- Recreation
- Urban/storm water runoff
- Wastewater
- Wildlife

A copy of the assessment can be obtained by contacting MWD at 1.213.217.6000.

In every one of our water systems, a team of highly-trained employees monitors water quality on an on-going basis to ensure that our customers are receiving high-quality water.

Glossary of Terms

Maximum Contaminant Level (MCL)
The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the public health goals and maximum contaminant level goals as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste and appearance of drinking water.

California Notification Level (NL)
Non-regulatory, health-based advisory levels established by the State Board for contaminants in drinking water for which an MCL has not been established.

Level 1 Assessment
A Level 1 assessment is a study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in the water system.

Maximum Contaminant Level Goal (MCLG)
The level of a contaminant in drinking water below which there is no known or expected risk to health. Maximum contaminant level goals are set by the United States Environmental Protection Agency (USEPA).

Maximum Residual Disinfectant Level (MRDL)
The highest level of a disinfectant allowed in drinking water. There is convincing evidence that the addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG)
The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Primary Drinking Water Standard (PDWS)
MCLs, MRDLs and treatment techniques (TTs) for contaminants that affect health, along with their monitoring and reporting requirements.

Public Health Goal (PHG)
The level of a contaminant in drinking water below which there is no known or expected risk to health. Public health goals are set by the California Environmental Protection Agency (CalEPA).

Regulatory Action Level (AL)
The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

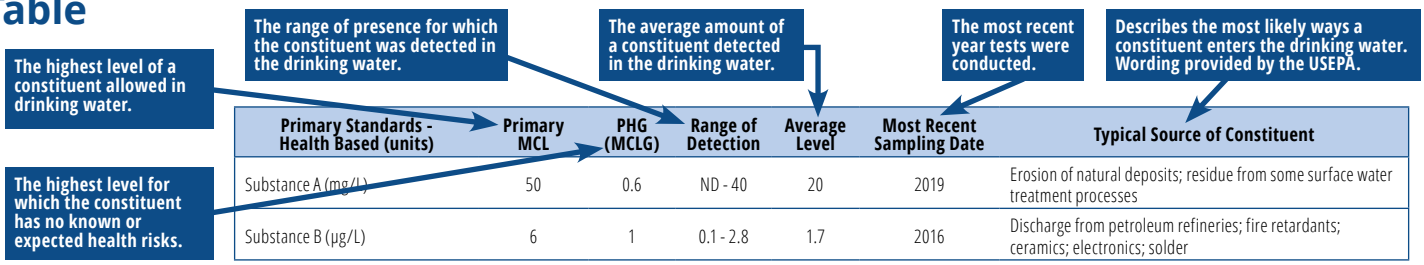
Treatment Technique (TT)
A required process intended to reduce the level of a contaminant in drinking water.

Delivering drinking water is serious business, and our team of scientists, engineers and water experts is dedicated to protecting our water systems and ensuring the water we deliver to local homes and businesses meets stringent standards set by the state and federal governments and is safe to drink.

Unit of Measurement	Unit Abbreviation	Also Known as	This can be compared to...
Parts per million (PPM)	mg/L	milligrams per liter	1 second in 12 days
Parts per billion (PPB)	µg/L	micrograms per liter	1 second in 32 years
Parts per trillion (PPT)	ng/L	nanograms per liter	1 second in 32,000 years
Grains per gallon	grains/gallon	a measurement for water hardness often used for sizing household water softeners	1 grain/gal equals 17.1 mg/L of hardness
Nephelometric Turbidity Units	NTU	a measurement of the clarity of water	Turbidity in excess of 5 NTU is noticeable to the average person
Microsiemens per centimeter	µS/cm	a measurement of a solution's ability to conduct electricity	
Picocuries per liter	pCi/L	a measurement of radioactivity in water	

How to Read Your Table

The consumer confidence report lets you know which constituents, if any, are in your drinking water and how this may affect your health. The constituents presented in this table were detected above the detection limit set by the State Water Resources Control Board. Below is a guide that explains each column of the table.



Primary Standards - Health Based (units)	Primary MCL	PHG (MCLG)	Range of Detection	Average Level	Most Recent Sampling Date	Typical Source of Constituent
Substance A (mg/L)	50	0.6	ND - 40	20	2019	Erosion of natural deposits; residue from some surface water treatment processes
Substance B (µg/L)	6	1	0.1 - 2.8	1.7	2016	Discharge from petroleum refineries; fire retardants; ceramics; electronics; solder

YOUR WATER MEETS ALL CURRENT FEDERAL AND STATE REQUIREMENTS

Culver City Water System – Source Water Quality

Primary Standards – Health Based (units)	Primary MCL	PHG (MCLG)	Range of Detection	Average Level	Most Recent Sampling Date	Typical Source of Constituent
Turbidity						
Highest single measurement of the treated surface water (NTU)	TT = 1.0	n/a	n/a	0.06	2021	Soil runoff
Lowest percent of all monthly readings less than 0.3 NTU (%)	TT = 95	n/a	n/a	100%	2021	Soil runoff
Inorganic Constituents						
Aluminum (mg/L)	1	0.6	ND - 0.24	0.12	2021	Erosion of natural deposits; residue from some surface water treatment processes
Barium (mg/L)	1	2	ND - 0.111	ND	2021	Discharges of oil drilling wastes and from metal refineries; erosion of natural deposits
Fluoride (mg/L)	2.0	1	0.6 - 0.9	0.7	2021	Erosion of natural deposits; water additive that promotes strong teeth; discharge from fertilizer and aluminum factories
Radioactive Constituents						
Gross Alpha Activity (pCi/L)	15(a)	(0)	ND - 3	ND	2021	Erosion of natural deposits
Gross Beta Activity (pCi/L)	50(b)	(0)	ND - 6	ND	2021	Decay of natural and manmade deposits
Uranium (pCi/L)	20	0.43	ND - 3	1.3	2021	Erosion of natural deposits
Secondary Standards – Aesthetic (units)	**Secondary MCL**	**PHG (MCLG)**	**Range of Detection**	**Average Level**	**Most Recent Sampling Date**	**Typical Source of Constituent**
Aluminum (µg/L)	200	n/a	ND - 240	120	2021	Erosion of natural deposits; residue from some surface water treatment processes
Color (units)	15	n/a	1 - 2	1	2021	Naturally-occurring organic materials
Chloride (mg/L)	500	n/a	65 - 97	88	2021	Runoff/leaching from natural deposits; seawater influence
Odor—Threshold (units)	3	n/a	1 - 2	1	2021	Naturally-occurring organic materials
Specific Conductance (µS/cm)	1600	n/a	519 - 965	827	2021	Substances that form ions when in water; seawater influence
Sulfate (mg/L)	500	n/a	61 - 221	170	2021	Runoff/leaching from natural deposits; industrial wastes
Total Dissolved Solids (mg/L)	1000	n/a	298 - 609	500	2021	Runoff/leaching from natural deposits
Other Parameters (units)	**Notification Level**	**PHG (MCLG)**	**Range of Detection**	**Average Level**	**Most Recent Sampling Date**	**Typical Source of Constituent**
Alkalinity (mg/L)	n/a	n/a	86 - 128	110	2021	
Calcium (mg/L)	n/a	n/a	27 - 70	54	2021	
Hardness [as $CaCO_3$] (mg/L)	n/a	n/a	110 - 276	220	2021	The sum of polyvalent cations present in the water, generally magnesium and calcium; the cations are usually naturally occurring
Hardness [as $CaCO_3$] (grains/gal)	n/a	n/a	6.4 - 16	13	2021	
Magnesium (mg/L)	n/a	n/a	12 - 26	21	2021	
pH (pH units)	n/a	n/a	8.1 - 8.4	8.2	2021	
Potassium (mg/L)	n/a	n/a	2.6 - 4.7	3.9	2021	
Sodium (mg/L)	n/a	n/a	61 - 101	85	2021	Refers to the salt present in the water and is generally naturally occurring
Unregulated Drinking Water Constituents (units)	**Notification Level**	**PHG (MCLG)**	**Range of Detection**	**Average Level**	**Most Recent Sampling Date**	
HAA6Br [Total of 6 Brominated Haloacetic Acids] (µg/L)	n/a	n/a	3.2 - 11	8.4	2019	
HAA9 [Total of 9 Haloacetic Acids] (µg/L)	n/a	n/a	4.3 - 15	11	2019	
Manganese (µg/L) (c)	n/a	n/a	0.56 - 1.2	0.94	2019	

(a) MCL is based on Gross Alpha minus Uranium. **(b)** DDW considers 50 pCi/L to be the level of concern for beta particles. **(c)** Manganese is a regulated contaminant but was not detected in routine samples associated with regulatory compliance and is below all regulatory standards. ND = Not Detected $CaCO_3$ = Calcium Carbonate

This table includes data only on constituents that were detected.

Laboratory Analyses

Through the years, we have taken thousands of water samples to determine the presence of any radioactive, biological, inorganic, volatile organic, or synthetic organic contaminants in your drinking water. The table we provide shows only detected contaminants in the water.

Even though all the substances listed here are under the Maximum Contaminant Level (MCL), we feel it is important that you know exactly what was detected and how much of these substances were present in your water. Compliance (unless otherwise noted) is based on the average level of concentration below the MCL. The state allows us to monitor for some contaminants less than once per year because the concentrations do not change frequently. Some of our data, while representative, is more than a year old.

Aluminum — The secondary MCL for aluminum is set for aesthetic reasons and there is no health concern associated with the aluminum levels in this water system.

Chloramination —The water purchased by GSWC from Metropolitan Water District of Southern California (MWD) contains chloramine. Chloramine is added to the water for public health protection. Chloraminated water is safe for people and animals to drink, and for all other general uses. Three special user groups, including kidney dialysis patients, aquarium owners, and businesses or industries that use water in their treatment process, must remove chloramine from the water prior to use.

Hospitals or dialysis centers should be aware of chloramine in the water and should install proper chloramine removal equipment, such as dual carbon adsorption units. Aquarium owners can use readily available products to remove or neutralize chloramine. Businesses and industries that use water in any manufacturing process or for food or beverage preparation should contact their water treatment equipment supplier regarding specific equipment needs.

Fluoridation — Fluoride has been added to the water that GSWC purchases from Metropolitan Water District of Southern California (MWD) since November 2007. Customers should see no difference in the taste, color or odor of their water as a result of fluoridation. Fluoridation does not change the way you normally use water for fish, pets or cooking. Parents and guardians of children who receive fluoride supplements should consult the child's doctor or dentist. For information regarding fluoridation of your water, please visit the Division of Drinking Water's fluoridation website at https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Fluoridation.html.

Lead — If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. GSWC is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to two minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information about lead in drinking water, testing methods and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline at 1.800.426.4791 or at http://www.epa.gov/safewater/lead.

Revised Total Coliform Rule — This Consumer Confidence Report (CCR) reflects changes in drinking water regulatory requirements during 2021. These revisions add the requirements of the federal Revised Total Coliform Rule, effective since April 1, 2016, to the existing state Total Coliform Rule. The revised rule maintains the purpose to protect public health by ensuring the integrity of the drinking water distribution system and monitoring for the presence of microbials (i.e., total coliform and E. coli bacteria). The U.S. EPA anticipates greater public health protection as the rule requires water systems that are vulnerable to microbial contamination to identify and fix problems. Water systems that exceed a specified frequency of total coliform occurrences are required to conduct an assessment to determine if any sanitary defects exist. If found, these must be corrected by the water system. The state Revised Total Coliform Rule became effective July 1, 2021.

Level 1 Assessment — Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially harmful, waterborne pathogens may be present or that a potential pathway exists through which contamination may enter the drinking water distribution system. We found coliforms indicating the need to look for potential problems in water treatment or distribution. When this occurs, we are required to conduct assessment(s) to identify problems and to correct any problems that were found during these assessments.

During the past year, we were required to conduct one Level 1 assessment. A complete assessment of water sources and distribution system showed no sanitary defects. We also conducted several proactive actions including aggressive flushing and replacing and disinfecting a portion of water main in the area.

Turbidity — Turbidity is a measure of the cloudiness of the water. It is monitored because it is a good indicator of the effectiveness of surface water filtration.

Unregulated Contaminant Monitoring — Monitoring for unregulated contaminants helps the USEPA and the State Water Board to determine where certain contaminants occur and whether the contaminants need to be regulated.

Culver City Water System – Distribution Water Quality

Microbiological Constituents (units)	Primary MCL	PHG (MCLG)	Value	Most Recent Sampling Date	Typical Source of Constituent
Total Coliform Bacteria ≥40 Samples/ Month (Present / Absent)	More than 5% of monthly samples are positive	(0)	Highest percent of monthly samples positive was 1.6% for monitoring conducted from January 1, 2021 to June 30, 2021	2021	Naturally present in the environment
Total Coliform Bacteria ≥40 Samples/ Month (Present / Absent)	n/a	(0)	More than 5% of monthly samples were present for total coliform in September. Level 1 assessment was triggered (d)	2021	Naturally present in the environment

Disinfection Byproducts and Disinfectant Residuals (units)	Primary MCL (MRDL)	PHG (MRDLG)	Range of Detection	Average Level	Most Recent Sampling Date	Typical Source of Constituent
Bromate (µg/L)	10	0.1	ND - 9.8	1.5	2021	Byproduct of drinking water disinfection
Chlorine [as Cl2] (mg/L)	(4.0)	(4)	ND - 2.8	1.6	2021	Drinking water disinfectant added for treatment
HAA5 [Sum of 5 Haloacetic Acids] (µg/L)	60	n/a	ND - 4.9	5.5	2021	Byproduct of drinking water disinfection
TTHMs [Total Trihalomethanes] (µg/L)	80	n/a	12 - 32	22	2021	Byproduct of drinking water disinfection

Inorganic Constituents (units)	Action Level	PHG (MCLG)	Sample Data	90th % Level	Most Recent Sampling Date	Typical Source of Constituent
Copper (mg/L)	1.3	0.3	None of the 31 samples collected exceeded the action level	0.14	2019	Internal corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives

Lead sampling in schools and residential plumbing	Action Level	PHG	Sample Data	90th % Level	Most Recent Sampling Date	Typical Source of Constituent	Number of Schools Tested (e)
Lead (µg/L)	15	0.2	None of the 31 samples collected exceeded the action level	ND	2019	Internal corrosion of household water plumbing systems; discharges from industrial manufacturers; erosion of natural deposits	8

(d) Although Level 1 assessment was triggered, the system was in compliance. See Level 1 Assessment and Revised Total Coliform Rule sections under Laboratory Analyses. **(e)** The State of California made lead sampling in schools mandatory with a compliance window through 2019. ND = Not Detected

This table includes data only on constituents that were detected.

Risk to Tap and Bottled Water

Drinking water, including bottled water, may reasonably be expected to contain small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA's Safe Drinking Water Hotline at 1.800.426.4791.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the layers in the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animal or human activity.

In order to ensure that tap water is safe to drink, the USEPA and the State Water Resources Control Board prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. The U.S. Food and Drug Administration regulations and California law also establish limits for contaminants in bottled water that provide the same protection for public health.

Contaminants in Drinking Water Sources May Include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife
- Inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, and farming
- Pesticides and herbicides that may come from a variety of sources such as agriculture, urban stormwater runoff and residential uses
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff and septic systems
- Radioactive contaminants that can be naturally occurring or be the result of oil and gas production and mining activities

For People with Sensitive Immune Systems

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised people, such as those individuals with cancer undergoing chemotherapy, those who have undergone organ transplants, those with HIV/AIDS or other immune system disorders, some elderly populations, and infants, can be particularly at risk from infections. These people should seek advice from their health care providers.

The USEPA and Centers for Disease Control issue guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants. To obtain a copy of these guidelines, please call the USEPA's Safe Drinking Water Hotline at 1.800.426.4791.

For additional information, please contact our 24-hour Customer Service Center at **1.800.999.4033** or email us at **customerservice@gswater.com**.

Cross Connection Control Program

Golden State Water Company's Cross Connection Control Program provides a level of certainty that the water in the company's distribution system is protected from possible backflow of contaminated water from commercial or industrial customers' premises. For additional information, visit **http://www.gswater.com/protecting-our-drinking-water/**.

Flushing

Hydrant flushing is an essential maintenance procedure that all water providers must perform periodically to ensure the water delivered to customers meets state and federal drinking water standards. GSWC is using NO-DES (Neutral Output-Discharge Elimination System) flushing in several of our service areas to help flush our distribution systems sustainably.

Traditional hydrant flushing discharges hundreds of thousands of gallons of water onto the street. GSWC's NO-DES trucks and trailers offer a new maintenance technology, connecting two hydrants to a complex filtration system which cleans the water and returns it to the distribution system.

For more information about hydrant flushing, visit **http://www.gswater.com/flushing.**

If You Have Questions – Contact Us

For information about your water quality or to find out about upcoming opportunities to participate in public meetings, please contact our 24-hour Customer Service Center at 1.800.999.4033. Visit us online at **www.gswater.com** or email us at **customerservice@gswater.com**.

Infrastructure Investments

Water providers have a duty to maintain the local water infrastructure to ensure that the delivery of reliable, quality water is not compromised. At GSWC, we take that responsibility seriously.

In 2021, GSWC installed approximately 109,200 feet of pipeline, 3,000 service lines and 300 fire hydrants throughout the state. Proactive system investments like these are critical to protect the quality of water we serve to the customers and to avoid the costly and sometimes dangerous effects of deferring maintenance.

Customers interested in learning more about current and completed infrastructure projects in their service areas are encouraged to visit their service area's webpage at **www.gswater.com**.

A drought-tolerant garden.

Conserving for California

It's important that all Californians continue using water responsibly, as many parts of our state are experiencing extreme levels of drought. We must all work together to protect available water supplies. As Californians, it is our duty to make conservation a way of life and protect this precious and scarce resource.

GSWC is proud to be your conservation partner. It is important that we all work together to incorporate water-use efficiency into our daily lives.

To learn more about conservation programs and/or water-use restrictions in your area, please visit **www.gswater.com/conservation** or call 1.800.999.4033.

APPENDIX G

QUALIFICATIONS

Ron Russell Associate Consultant

Education:

BS Chemical Engineering, New York University

Summary of Professional Experience:

Mr. Russell has experience in Phase I Environmental Site Assessments (ESAs) since 1995 working as a Senior Project Manager with a major geotechnical engineering firm. As a Senior Project Manager, his duties and responsibilities were to provide oversight for Phase I ESAs and project management implementation inclusive of Phase II and remedial actions to achieve clean closure. He has managed several hundred projects. The types of properties for projects included commercial, industrial, refining, chemical processing and multi-tenant residential.

Select project experience for Mr. Russell includes:

- **Assessment and remediation, various sites, Exxon Mobil Program, Southern California** Mr. Russell acted as Senior Project Manager while working for a major geotechnical engineering firm. He conducted and supervised Phase I Environmental Site Assessments and remediation of numerous retail gasoline stations prior to development as strip malls. The Phase I studies were used to identify LUST sites prior to remediation or closure.
- **Assessment and remediation, Miami International Airport, Miami, Florida** Mr. Russell acted as Senior Project Manager with profit and loss and technical oversight for an assessment and remediation of American Airlines, Terminal C prior to renovation of the baggage handling facility. Some of the issues associated with this project were suspicion of leaked jet fuel below the tarmac at Terminal C. This was confirmed by a Phase I/Phase II Site Assessment. The ensuing remedial action involved installation of subsurface horizontal wells with above ground soil vapor extraction. The site received a clean closure from the fire department and the FAA.
- **Remedial investigation and feasibility study, Redstone Arsenal, Huntsville, Alabama** Mr. Russell acted as Senior Project Manager responsible for the implementation of technical specifications to safely remove and treat pentaborane utilized by NASA. The primary issue associated with this project was the toxicity and flammability of pentaborane which is lethal at 0.5 ppb. The pentaborane was stored in 100-gallon vessels and distilled yielding elemental boron.

Margaret Garcia – National Client Manager

B.S. – Environmental Science, Villanova University, 2013
M.S. – Environmental Science, Rutgers, The State University of New Jersey, 2015

OSHA 40-Hour HAZWOPER and Annual 8-Hour Refreshers
EPA/AHERA Accredited Asbestos Inspector
New York State Asbestos Inspector

Ms. Garcia has been in the environmental and due diligence industry since 2013 and provides national client and project management to ensure ASTM compliance and satisfaction of client requirements.

Currently, Ms. Garcia serves as a National Client Manager, providing client services and review of environmental due diligence projects.

Project experience for Ms. Garcia includes:

- Phase I Environmental Site Assessments in compliance of the American Society for
- Testing and Materials (ASTM E1527 – 13)
- New Jersey Department of Environmental Protection (NJDEP) Preliminary Assessment
- (PA) reports
- Records Search with Risk Assessments (RSRA) reports
- Transaction Screens and Limited Site Assessments
- Historical Records Reviews
- Regulatory Database Reviews
- File and Database Reviews
- Asbestos and Lead-Based Paint Sampling
- Lead in Water Sampling
- Short-Term Radon Sampling

Field Experience for Ms. Garcia includes:

- Soil and Groundwater Sampling
- Soil Vapor and Indoor Air Sampling
- Asbestos Containing Material (ACM) Sampling
- Asbestos Surveys
- Asbestos Air Monitoring for Abatements
- Oversight of Soil Disposal and Hazardous Wastes
- Oversight of Soil Boring Advancements and Monitoring Well Installation

Ms. Garcia's experience also extends to a broad range of environmental disciplines including, but not limited to hazardous waste management, concepts of biodegradation and bioremediation, and land use planning and management. Ms. Garcia completed her M.S. in Environmental Science with a concentration in Pollution Prevention and Control from Rutgers, The State University of New Jersey.

Doane E. Cafferty – National Client Manager / Senior Reviewer

B.A., Geology, University of Vermont
Professional Geologist (PG) – New York (2/2018, #846)
Licensed Geologist (LG) – Washington State (8/2002, #1663)
LEED Accredited Professional

Mr. Cafferty has 20+ years supervising, managing, planning, and conducting Phase I ESAs, Phase II subsurface investigations, remedial investigations, vapor intrusion investigations, and remedial construction oversight. Mr. Cafferty has experience consulting for private business owners, private developers, industrial clients, major oil companies, academia, public sector agencies, and rail & transportation. He is knowledgeable of federal, state, and local environmental requirements in several states with experience extending across the spectrum of environmental investigation and remediation, construction management and geologic investigations

Project experience for Mr. Cafferty includes:

- Supervised, managed, planned, and conducted a NJDEP Preliminary Assessment (PA) of the Seth Boyden Terrace public housing complex in Newark, NJ on behalf of the Newark Housing Authority. The subject property is approximately 11 acres and is developed with 12, three-story apartment buildings, a central heating plant, and associated improvements. The PA identified 19 areas of concern (AOCs) with 189 sub-AOCs.
- Served as the Site Reconnaissance Field Team Leader for the Phase I ESA of the largest real estate transaction in United States history (Peter Cooper Village/Stuyvesant Town, New York, NY) which was conducted on an expedited schedule. The subject property is a residential development on the east side of Manhattan consisting of 90 acres and 110 hi-rise buildings.
- Managed, planned, and conducted Phase I ESAs and subsequent Phase II ESIs for two adjoining commercial properties in Passaic, NJ. One property was an automotive engine rebuilder present on the site since 1929 and the other property was an automobile service center performing oil changes, inspections, brake service, automatic transmission and cooling system flushes, tire rotation and balancing, and bodywork. The Phase II ESIs both consisted of the advancement of soil borings and collection of soil samples for laboratory analysis and the installation of temporary well points with groundwater sampling.
- Managed, planned, and conducted a Phase I ESA and subsequent Phase II ESI for nine contiguous properties in Jersey City, NJ. Recognized environmental conditions (RECs) included the potential for USTs, potential for impact from historic fill and/or hexavalent chromium waste, and the potential for vapor migration from an adjoining property with groundwater contamination. The Phase II ESI consisted of the advancement of soil borings and collection of soil samples for laboratory analysis and the installation of temporary well points with groundwater sampling.
- Managed, planned, and conducted a NJDEP PA of four parcels totaling 122 acres on behalf of the Hunterdon County Open Space – Trust Fund Program. The PA

identified three AOCs consisting of potential USTs, historical agricultural use, and surface water bodies.

- Managed, planned, and conducted a NJDEP PA/Phase I ESA of one parcel totaling 37 acres on behalf of the Hunterdon County Open Space – Trust Fund Program. The PA identified two AOCs consisting of historical pesticide use and historic fill. The Phase I ESA identified two RECs consisting of historical use of the adjacent properties and historic fill on an adjoining property.
- Supervised, managed, planned, and conducted a NJDEP PA/Phase I ESA and subsequent Phase II ESI for three contiguous parcels comprising approximately five acres on behalf of the Hunterdon County Open Space – Trust Fund Program. The PA identified five AOCs consisting of potential USTs, hazardous material storage, historical pesticide use, discharge to surface water bodies, and areas which receive flood waters from potentially contaminated areas. The Phase I ESA identified four RECs consisting of potential USTs, historical site use, historical use of the adjacent properties, and an adjoining property listed on the NPL and several other databases. The Phase II ESI consisted of a geophysical investigation, and a soil and groundwater investigation. The site was located within a flood zone and within a regulated wetlands area. The scope of work also included a freshwater wetlands delineation, preparation of a freshwater wetlands permit, and preparation of a Letter of Interpretation to verify the limits of the freshwater wetlands, freshwater wetlands transition areas, and State open water on the site.
- Managed, planned, and conducted a Phase I ESA for a 12-acre property developed with an approximately 79,400 SF warehouse building. RECs included the potential for USTs, historically applied pesticides, and the potential for vapor migration and/or groundwater contamination from a nearby property.
- Managed, planned, and conducted a Phase I ESA for manufacturing facility with an approximately 30,000 SF warehouse building. RECs included the potential for USTs, the presence of a spray booth used to contain and vent fumes, a nearby dry-cleaning facility, and groundwater contamination (benzene) at a nearby site.

Hydrology and Water Quality Technical Memorandum

HYDROLOGY AND WATER QUALITY TECHNICAL MEMORANDUM

Date: July 31, 2024

To: Link Logistics

From: Kimley-Horn and Associates, Inc.
Michael Choi, P.E., LEED AP

CC: Mr. Andy Beck

Subject: 5757 Uplander Way – Hydrology and Water Quality Technical Memorandum

Introduction

Kimley-Horn & Associates, Inc. is providing this Hydrology and Water Quality Technical Memorandum as a supplement to the CEQA Document. The purpose of this memorandum is to analyze the potential impact of the project to the existing storm drain infrastructure system, and to provide a description of proposed water quality features to meet Low Impact Development (LID) requirements.

The Project site is comprised of approximately 8.34 acres. The site is bounded by Hannum Ave to the north, Bristol Pkwy to the west, Uplander Way to the east, and Uplander Way/Sumner Way to the south, per the ALTA/NSPS Survey, completed October 27,2021. The existing improvements include 4 mixed-use two-story buildings, totaling 103,027 SF, surrounded by ground level parking. The proposed development proposes to construct three, seven-story, multi-family buildings with 2 levels of subterranean parking. To provide for the new use, the existing surface parking lot and existing commercial buildings will be demolished.

Hydrology

Existing Conditions

The existing project site is currently developed and is comprised of a surface parking lot and four existing office buildings. The majority of the site is impervious, including the existing building, concrete hardscape areas, and asphalt concrete paving for the surface parking lots. The remaining pervious areas are limited to the landscape area fronting the site, landscaped parking islands and small landscaped planters adjacent to the existing commercial buildings.

- Existing Impervious Area = 7.2 AC (87%)
- Existing 50-Year Runoff = 16.00 CFS

The existing site elevations range from approximately 100-118 feet above mean sea level (AMSL). The existing site gradient and stormwater runoff generally flows northerly/westerly for the northern half of the site and southerly/westerly for the southern half of the site.

The onsite stormwater flows into the shared access driveway drains relocated throughout the site. The northern, southern, and western landscaped portions of the site drain in their respective directions towards the adjacent streets. Within the property as shown in Figure 1, site drainage sheet flows offsite to the gutter within either Hannum Avenue or Uplander/Sumner way. The overflow points of the existing onsite catch basins and roof drains are undetermined at this time and require further investigation.

Once runoff has left the site and is in the public right-of-way, it is directed via concrete gutter west and south along either Hannum Avenue, Bristol Parkway, and Sumner Way, respectively, until it enters the Culver City storm drain system through a curb opening catch basin. The storm drain system ultimately discharges into Centinela Creek Lower which leads to Ballona Creek. See Figure 2 below for LA County Storm Drain System Map.

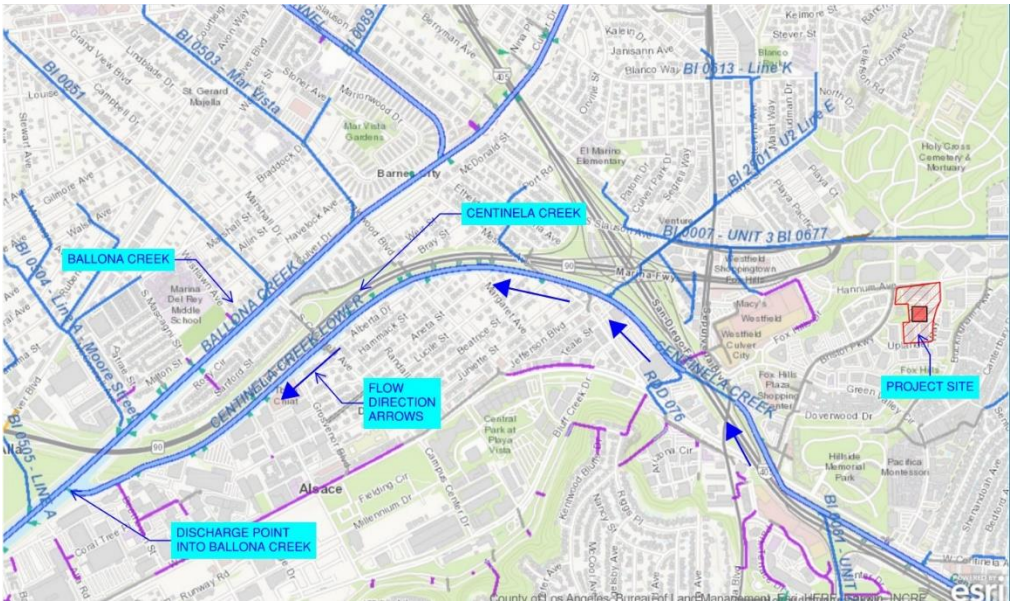

Figure 2. LA County Storm Drain Map.

Proposed Conditions

The project proposes to construct 3 mixed-use, seven-story multi-family and retail buildings totaling 1,019,267 SF with two levels of subterranean parking. A majority of the site will be impervious, comprised of the new building. Perimeter site areas will be pervious and comprised of landscaped drainage swales.

- Proposed Impervious Area = 7.2 AC (86%)
- Proposed 50-year Runoff = 16.00 CFS

Stormwater runoff from the proposed site will be entirely captured and treated by the LID system (further discussed in the Water Quality section of this report). Building roof drainage will be captured by roof drains and routed via plumbing to the LID system located under the building, within the subterranean parking. Site drainage will be captured by drainage swales and inlets, then routed to the LID system. Any overflow stormwater runoff beyond the required volume will be discharged into adjacent street or public storm system. See Appendix 3 for Preliminary Grading and Drainage.

Water Quality

The project is required to comply with County and City LID requirements, which require implementation of a stormwater treatment system that captures the 85th percentile runoff volume for treatment. The stormwater treatment system must be selected in the following order as approved by the City: infiltration, rainwater capture and reuse, or combination / alternative compliance systems.

Based on the project geotechnical investigation, infiltration is feasible for the project due to high infiltration rate and low groundwater table relative to the subterranean parking garage. Geotechnologies, Inc. determined that the infiltration rate was 26.9 inches per hour in their geotechnical report dated May 8, 2024 and groundwater was not detected at their maximum exploration depth of 80 feet. Any additional factor of safety requirement for design infiltration rates will need to be coordinated with the City. The highest historic groundwater depth for the project site was noted to be roughly 40 feet below grade. The project proposes three MaxWell IV drywell systems to treat and infiltrate the 85th percentile storm runoff. See Appendices 1 and 2 for Torrent Resources drywell calculations and MaxWell IV standard detail.

As described in the Proposed Hydrology section of this report, all site and building runoff will be captured and directed to the drywell system. The project proposes three MaxWell IV drywells with a combined storage volume of approximately 27,321 cubic feet (CF). The required mitigated volume is 27,084 CF, but is fully infiltrated with the rate of 26.9 in/hr. The drywells will be located underground, within the respective buildings lowest parking structure. See Appendix 4 for Preliminary LID.

Conclusion

No significant impacts to hydrology or water quality are anticipated as a result of this project. The proposed project does not change the impervious area and thus will not increase runoff from the existing condition. While there is uncertainty as to whether there are currently existing drainage features or water quality measures on site, the project proposes to introduce both which would improve the current condition.

- Existing Impervious Area = 7.2 AC (87%)
- Proposed Impervious Area = 7.2 AC (86%)

- Existing 50-Year Runoff = 16.00 CFS
- Proposed 50-Runoff Volume = 16.00 CFS
- Proposed 85th Percentile Runoff Volume = 27,084 CF

- Proposed drywell system for LID requirement.

Undeveloped Runoff Coefficient (Cu)	0.1
Developed Runoff Coefficient (Cd)	0.82
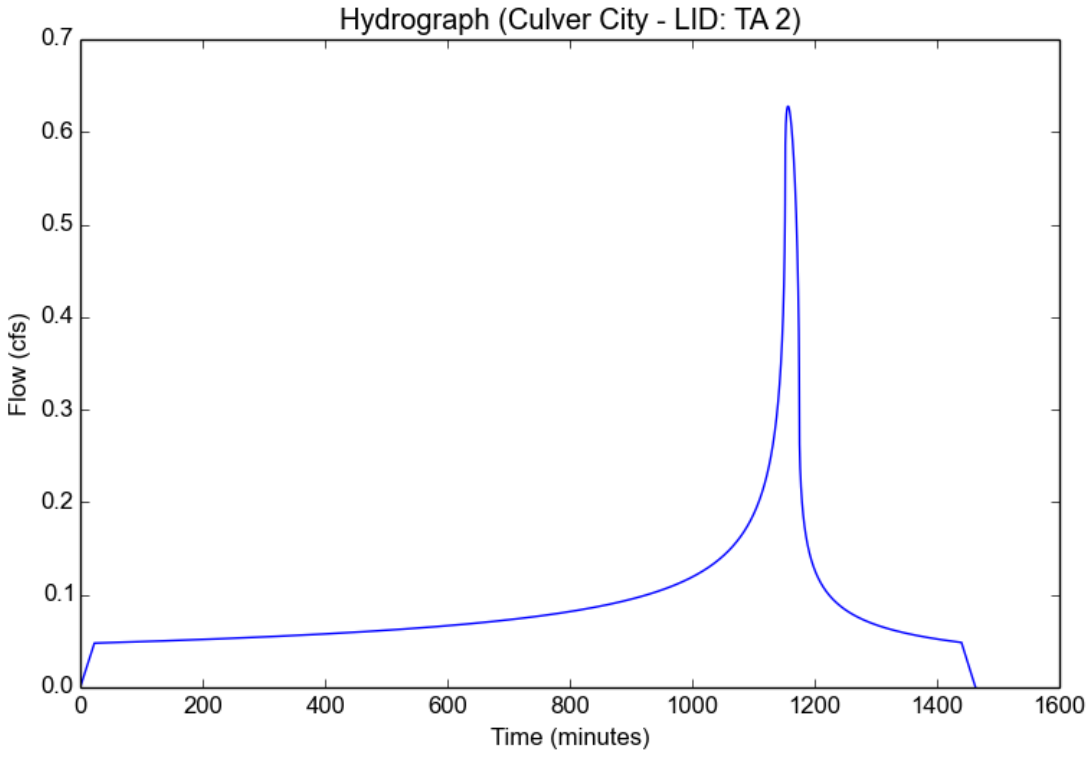
Time of Concentration (min)	23.0
Clear Peak Flow Rate (cfs)	0.6278
Burned Peak Flow Rate (cfs)	0.6278
24-Hr Clear Runoff Volume (ac-ft)	0.1782
24-Hr Clear Runoff Volume (cu-ft)	7760.8601



Peak Flow Hydrologic Analysis

File location: K:/LDT_LDEV/194590001-Culver City - Office Redev/Reports/LID/Calculations/2024.07.29 - Culver City - LID - TA 3.pdf
Version: HydroCalc 1.0.3

Input Parameters

Project Name	Culver City - LID
Subarea ID	TA 3
Area (ac)	2.68
Flow Path Length (ft)	600.0
Flow Path Slope (vft/hft)	0.01
85th Percentile Rainfall Depth (in)	1.1
Percent Impervious	0.9
Soil Type	13
Design Storm Frequency	85th percentile storm
Fire Factor	0
LID	True

Output Results

Modeled (85th percentile storm) Rainfall Depth (in)	1.1
Peak Intensity (in/hr)	0.3024
Undeveloped Runoff Coefficient (Cu)	0.1
Developed Runoff Coefficient (Cd)	0.82
Time of Concentration (min)	26.0
Clear Peak Flow Rate (cfs)	0.6645
Burned Peak Flow Rate (cfs)	0.6645
24-Hr Clear Runoff Volume (ac-ft)	0.1998
24-Hr Clear Runoff Volume (cu-ft)	8702.5709

GENERAL NOTES

1. DESIGN PARAMETERS BASED ON GEOTECHNICAL REPORT PREPARED BY GEOTECHNOLOGIES DATED MAY 8, 2024.
   - 1.1. GROUNDWATER WAS NOT ENCOUNTERED AT DEPTHS OF UP TO 80 FT BGS
   - 1.2. INFILTRATION RATE = 26.9 INCHES PER HOUR INCLUDING REDUCTION FACTOR
2. REFER TO PLUMBING PLANS FOR INTERNAL ROUTING TO THE RESPECTIVE LID BMP AND OVERFLOW CONTROL STRUCTURE.

LID SUMMARY TABLE

TRIBUTARY AREA	PROPOSED LID BMP	DISTURBED AREA (AC)	IMPERVIOUS AREA (AC)	PERVIOUS AREA (AC)	TREATMENT VOLUME REQUIRED (CF)	TREATMENT VOLUME PROVIDED (CF)	REQUIRED DETENTION

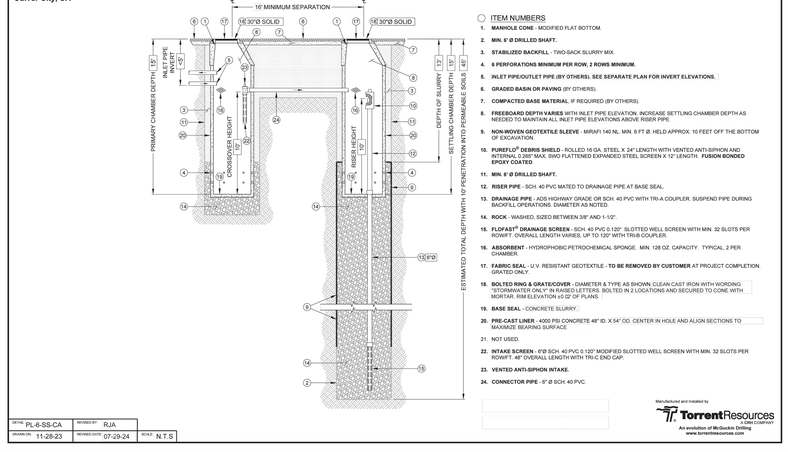
Culver City, CA



ITEM NUMBERS

1. **MANHOLE CONE** - MODIFIED FLAT BOTTOM.
2. **MIN. 6' Ø DRILLED SHAFT.**
3. **STABILIZED BACKFILL** - TWO-SACK SLURRY MIX.
4. **6 PERFORATIONS MINIMUM PER ROW, 2 ROWS MINIMUM.**
5. **INLET PIPE/OUTLET PIPE (BY OTHERS). SEE SEPARATE PLAN FOR INVERT ELEVATIONS.**
6. **GRADED BASIN OR PAVING** (BY OTHERS).
7. **COMPACTED BASE MATERIAL**. IF REQUIRED (BY OTHERS).
8. **FREEBOARD DEPTH VARIES** WITH INLET PIPE ELEVATION. INCREASE SETTLING CHAMBER DEPTH AS NEEDED TO MAINTAIN ALL INLET PIPE ELEVATIONS ABOVE RISER PIPE.
9. **NON-WOVEN GEOTEXTILE SLEEVE** - MIRAFI 140 NL, MIN. 6 FT Ø. HELD APPROX. 10 FEET OFF THE BOTTOM OF EXCAVATION.
10. **PUREFLO® DEBRIS SHIELD** - ROLLED 18 GA. STEEL X 24" LENGTH WITH VENTED ANTI-SIPHON AND INTERNAL 0.265" MAX. SWG FLATTENED EXPANDED STEEL SCREEN X 12" LENGTH. **FUSION BONDED EPOXY COATED**.
11. **MIN. 6' Ø DRILLED SHAFT.**
12. **RISER PIPE** - SCH. 40 PVC MATED TO DRAINAGE PIPE AT BASE SEAL.
13. **DRAINAGE PIPE** - ADS HIGHWAY GRADE OR SCH. 40 PVC WITH TRI-A COUPLER. SUSPEND PIPE DURING BACKFILL OPERATIONS. DIAMETER AS NOTED.
14. **ROCK** - WASHED, SIZED BETWEEN 3/8" AND 1-1/2".
15. **FLOFAST® DRAINAGE SCREEN** - SCH. 40 PVC 0.120" SLOTTED WELL SCREEN WITH MIN. 32 SLOTS PER ROW/FT. OVERALL LENGTH VARIES, UP TO 120" WITH TRI-B COUPLER.
16. **ABSORBENT** - HYDROPHOBIC PETROCHEMICAL SPONGE. MIN. 128 OZ. CAPACITY. TYPICAL, 2 PER CHAMBER.
17. **FABRIC SEAL** - U.V. RESISTANT GEOTEXTILE - **TO BE REMOVED BY CUSTOMER** AT PROJECT COMPLETION. GRATED ONLY.
18. **BOLTED RING & GRATE/COVER** - DIAMETER & TYPE AS SHOWN. CLEAN CAST IRON WITH WORDING "STORMWATER ONLY" IN RAISED LETTERS. BOLTED IN 2 LOCATIONS AND SECURED TO CONE WITH MORTAR. RIM ELEVATION ±0.02' OF PLANS.
19. **BASE SEAL** - CONCRETE SLURRY.
20. **PRE-CAST LINER** - 4000 PSI CONCRETE 48" ID. X 54" OD. CENTER IN HOLE AND ALIGN SECTIONS TO MAXIMIZE BEARING SURFACE
21. NOT USED.
22. **INTAKE SCREEN** - 6"Ø SCH. 40 PVC 0.120" MODIFIED SLOTTED WELL SCREEN WITH MIN. 32 SLOTS PER ROW/FT. 48" OVERALL LENGTH WITH TRI-C END CAP.
23. **VENTED ANTI-SIPHON INTAKE.**
24. **CONNECTOR PIPE** - 6" Ø SCH. 40 PVC.

Water Civil Technical Memorandum

Kimley»Horn

WATER CIVIL TECHNICAL MEMORANDUM

Date: April 24, 2024

To: Link Logistics

From: Kimley-Horn and Associates, Inc.

CC: Mr. Andy Beck

Subject: 5757 Uplander Way – Water Civil Technical Memorandum

Introduction

The Project site is comprised of approximately 8.34 acres and existing improvements include 4 separate, 2-story buildings totaling to be 103,027 sf. Existing improvements also include landscaping along the perimeter of the site along the frontage streets with surface parking lots adjacent to the existing buildings. The proposed development will construct 7-story multifamily buildings with subterranean parking.

Kimley-Horn and Associates, Inc. is providing this water civil technical memorandum based on our review of the PPR Re-Submittal Concept Plan received February 2, 2024, prepared by AC Martin and our understanding of the existing utilities surrounding the site. A summary of our water utility analysis for the proposed development is provided below.

Existing Improvements

Existing water lines within Culver City are operated and maintained by the Golden State Water. The existing water system adjacent to the project site is based on available record documents obtained from the Golden State Water and is described further below:

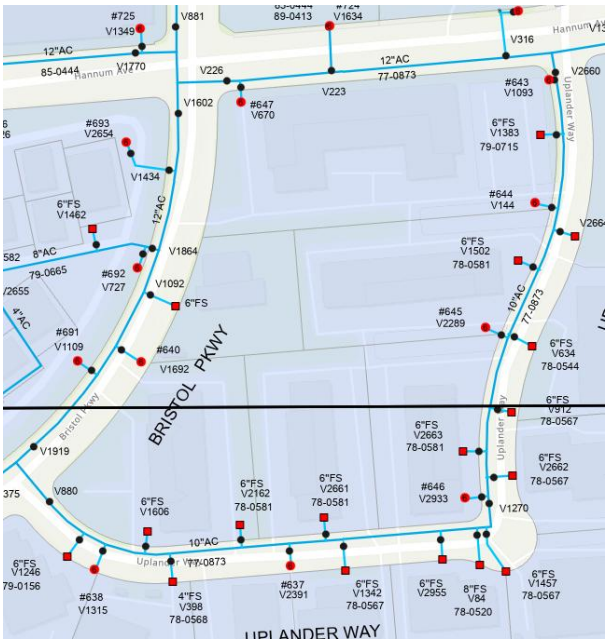

Figure 1: Water Atlas Map

- Bristol Pkwy: Along Bristol Parkway, there is an existing 12" diameter, asbestos cement water, main line located approximately 25 feet west of the center line. Based on record documents received by Golden State Water, there are 4 fire hydrants and 1 fire service connected to the water main located within Bristol Parkway, between the Hannum Avenue and Uplander Way intersections.

- Hannum Avenue: Along Hannum Avenue, there is an existing 12" diameter, asbestos cement water line located approximately 36 feet south of the center line. Based on the record documents received by Golden State Water, there are 3 fire hydrants connected to the water main located within Hannum Ave, between the Bristol Pkwy and Uplander Way intersections. Of those 3 laterals connected to the main, there is 1 existing fire hydrant located at the northwest corner of the property, near the Hannum Avenue and Bristol Pkwy intersection.

- Uplander Way (eastern segment): Along Uplander Way, there is an existing 10" diameter, asbestos cement water line. Based on record documents received by Golden State Water, there are 4 fire hydrants connected to the water main located within Uplander Way along with 7 fire services. All 4 of the fire hydrants, along with 3 fire services are located along the westerly sidewalk, along the property line of our project site.

- Uplander Way (southern segment): Along Uplander/Sumner Way, there is an existing 10" diameter, asbestos cement water line. Based on record documents received by Golden State Water, there are 2 fire hydrants and 9 fire service connected to the water main. The two hydrants are located on the south side of Uplander Way, opposite of the project site.

Proposed Improvements

The following are based on PPR Re-Submittal Concept Plan received February 2, 2024, prepared by AC Martin:

Proposed Project Development Programming: The project will develop or include the following:

- Residential – 851,607 sf
- Retail – 5,259 sf

Table 1: Existing vs. Proposed Water Demand Table

Existing Water Usage (gpm)*	Construction Water Usage (gpm)**	Proposed Peak Water Demand (gpm)***	Available Capacity (gpm)
17	0.05	360	2,983 – 6,119

*Estimated existing water usage was determined using the "Office Building" Category from the Connection Fee Rate and Mean Loadings per Unit of Usage for County of Sanitation District No. 5 of Los Angeles County (200 GPD / 1,000 SF).
** Construction water usage is estimated based on contractor estimate of 75 gpd.
*** Peak water demand is based on sewer peaking factor of 2.5 per LA County.

Table 2: Estimated Water Use Table

Land Use	Units	Wastewater Generation Rate (GPD)	Total Estimated Water Use (GPD)	Total Estimated Water Use (gpm)
Existing				
Office****	103,027 sf	200/1,000 sf	20,605	14.3
Total Estimated Existing Water Use			**20,605**	**14.3**
*Total Estimated Existing Irrigation Use****			**4,121**	**2.9**
*Total Estimated Existing Water Use with Irrigation****			**24,726**	**17.2**
Proposed				
Residential: Studio 1 Bed 2 Bed	163 Units 638 Units 305 Units	156/Dwelling Unit	172,536	119.8
Commercial Store**	5,259 sf	100 gal/1000 sf gross floor area	526	0.4
Total Estimated Proposed Water Use			**173,062**	**120.2**
*Total Estimated Proposed Irrigation Use****			**34,612**	**24**
*Total Estimated Proposed Water Use with Irrigation****			**207,674**	**144.2**

*Estimated water usage is estimated as being equivalent to the estimated sewage generation for the Project. These rates are assessed using LA County Sanitation's Estimated Wastewater Generation Tables (District 5). Table shall be used for estimating daily water consumption only. Refer to Appendix 3 for tables.
**Commercial: Wholesale Outlet is selected for conservative analysis for potential commercial uses
***A 20% factor is included to account for landscape and irrigation needs for the project.
****Office: Office is being selected for purpose of City of Culver calculations

Proposed Water and Fire Service Pressure Requirement**:** Proposed improvements will require plumbing coordination after we receive the fire flow test. The project's plumbing engineer and/or fire service consultant will need to assess the project water/fire service design requirements based on the Fire Service Pressure Flow Report provided by Golden State Water. The plumbing engineer will also need to assess the need for any booster pump for the project in coordination with Golden State Water and the Culver City Fire Department.

Fire Flow Availability Report was provided by Golden State Water for three locations around the project site as summarized below:

- Fire hydrant #645 at Hannum Avenue - 2,983 GPM at 20 PSI for 2 hours. Static pressure of 63 PSI.
- Fire hydrant #637 at Uplander Way – 5,167 GPM at 20 PSI for 2 hours. Static pressure of 63 PSI.
- Fire hydrant #647 at Hannum Avenue – 6,119 GPM at 20 PSI for 2 hours. Static pressure of 71 PSI.

Proposed Water and Fire Service Connection**:** The proposed water/fire service connections for the project will be strategically located throughout the project site. It is anticipated that several proposed domestic water and fire water services for the development will be required. The proposed domestic and fire water service sizing and locations will need to be further assessed for the project in coordination with the project plumbing engineer and fire sprinkler consultant. The proposed connections are anticipated to tie into the existing 10" and 12" water mains on Uplander Way, Bristol Parkway and Hannum Avenue. Per the California Fire Code (2019), required fire flow for type IA, IB, and IIIA is 6,000 GPM for the proposed fire-flow calculation area. Due to anticipation of the project requiring fire sprinklers, the project is expected to qualify for a 75% reduction of the required fire flow, totaling in 1,500 GPM required fire flow for the Project Site. The existing fire flow for fire service tested at a range of 2,983 GPM to 6,119 GPM and shall be sufficient to meet the site fire flow requirements. Documentation is supplemented in Appendix 3 of this memorandum.

Table 3: Required Fire Flow

Fire Flow Calculation Area (sf)	Required Fire Flow (gpm)	Adjusted Required Fire Flow (gpm)*	Available Fire Flow at 20 PSI (gpm)
851,607 sf	6,000	1,500	2,983 & 6,119 at Hannum Ave. 5,167 at Uplander Way

*Adjusted is calculated using CFC 75% reduction; adjusted required must be greater than 1,000 gpm

Based on findings within Appendix B of the 2022 California Fire Code, our project site shall have a minimum of 6 hydrants on site. Documentation is supplemented in Appendix 3 of this memorandum.

Conclusion

Per the Will Serve Letter received from the Golden State Water dated August 2, 2023, the project property can be supplied with water from the existing municipal water system operated and maintained by Golden State Water.

Appendix 1 – Golden State Water Will-Serve Letter

Golden State
Water Company
A Subsidiary of American States Water Company

August 2, 2023

Jonathan Williamson

APN: 4134-005-003
APN: 4134-005-004
APN: 4134-005-021
Culver City, California

Dear Mr. Williamson:

This letter is to inform you that water service is available to the above referenced address from Golden State Water Company's (GSWC) Central District water system located in the city of Culver City. Service to the address can be provided from our existing water facilities within Uplander Way and Hannum Ave.

Upon completion and execution of a Water Service Agreement, that contains satisfactory financial arrangements and other provisions governing the extension of water service, Golden State Water Company (GSWC) will begin providing water service for the referenced address once all owner obligations have been satisfied. Analysis of more detailed development plans may require the owner to participate in the construction of special facilities prior to the Company providing water service.

GSWC is committed to providing water service to all customers within its service area, consistent with the company's obligations under rules, statutes and regulations of both the California Department of Public Health and the California Public Utilities Commission.

Unless modified or extended by GSWC, this Will Serve Letter shall terminate and be of no further force and effect one year from the date indicated above.

If you have any questions concerning the issues addressed in this letter, please let us know.

Sincerely,

Ray Burk, P.E.
Operations Engineer

Golden State Water Company, A Subsidiary of American States Water Company	3/01/2024	
SIGNATURE	TITLE: Operations Engineer	TELEPHONE #: 562-907-9200 (310) 413-0420

Part III

CONDITIONS FOR APPROVAL BY BUILDING AND SAFETY DIVISION
(To be Completed by Building Department)

THE FIRE FLOW MAY BE APPROVED FOR SINGLE AND TWO-FAMILY DWELLINGS WHEN THE ABOVE INFORMATION IS COMPLETE AND SHOWS THAT THE FOLLOWING MINIMUM REQUIREMENTS ARE MET AND THE PROPERTY IS NOT IN FIRE ZONE 4.

THE WATER SYSTEM IS CAPABLE OF DELIVERING AT LEAST 750 GPM AT 20 PSI FOR TWO HOURS. THE DISTANCE FROM THE STRUCTURE TO THE FIRE HYDRANT DOES NOT EXCEED 450 FEET VIA VEHICULAR ACCESS.

APPROVED BY	DATE
OFFICE	

THIS APPROVAL IS VALID FOR SIX (6) MONTHS

Where the Water Service does not meet the requirements of the Building and Safety Division, Fire Department approval of plot plan will be required before a Building Permi can be issued by the Building Department and all approvals by the Fire Department will be issued by the Fire Prevention Division only.

Test Date and Time: 2/28/2024 @ 1:55 PM

Hydrant Number: 645

Project Address: 5757 Uplander Way

1. Introduction

This report summarizes the results of the transportation study conducted by Fehr & Peers to evaluate the potential transportation impacts of the 5757 Uplander Project ("Project") in the City of Culver City ("City"), California.

Project Description

The proposed Project will develop four adjacent parcels with the following Assessor Parcel Numbers (APN): 4134-005-021 (5800 Hannum Avenue), 4134-005-004 (6031 Uplander Way), 4134-005-003 (5821 Uplander Way) and 4134-005-002 (5835 Uplander Way) ("Project Site"). **Figure 1** illustrates the location of the proposed Project in relation to the surrounding streets.

The Project will construct three seven-story buildings that would provide a total of 1,077 multi-family dwelling units, including 78 affordable units, as well as 5,772 square feet (sf) of retail space. For the purposes of this study, the north building will be described as Building 1; the middle building will be described as Building 2; and the south building will be described as Building 3. The Project will remove the four existing office buildings on the Project Site totaling approximately 146,414 sf, plus approximately 552 surface parking spaces and vehicular access that supports the existing uses on the Project Site.

The Project will provide a total of 1,304 vehicular parking spaces (1,283 residential and 21 commercial) within three separate subterranean and podium garages; one at each proposed building. Additionally, the Project will provide 274 long-term and 31 short-term bicycle parking spaces, including spaces for employees and visitors, short-term spaces, and long-term spaces in compliance with respective City codes. The Project will also include a pedestrian-facing plaza design and landscaping at the ground floor along Hannum Avenue at the middle of the Project's northern frontage and a second plaza on Uplander Way at the southeastern corner, with an internal paseo connecting the plazas.

The Project proposes four driveways:

- **Access A:** A right-turn in/right-turn out only driveway on the western frontage along Bristol Parkway, which provides access to the east-west alley and garages for Buildings 1 and 2
- **Access B:** A full-access driveway on the eastern frontage along Uplander Way, which provides access to the east-west alley and garages for Buildings 1 and 2
- **Access C:** A full-access driveway on the southern frontage along Uplander Way, which provides access to the garage for Building 3
- **Emergency Access:** A driveway for emergency vehicle access only along the eastern Project frontage on Uplander Way between Buildings 2 and 3.

The site plan, including the four driveways, is illustrated in **Figure 2**.

Study Scope

Culver City is the lead agency for this study. The scope of work for this study was developed in conjunction with the Mobility & Traffic Engineering Division of the City's Department of Public Works and is in accordance with the City's transportation thresholds of significance under the California Environmental Quality Act ("CEQA") and its and *Transportation Study Criteria and Guidelines* ("TSCG") adopted in July 2020.[1] The base assumptions and technical methodologies for the study are included in the Memorandum of Understanding ("MOU") with the City, signed in July 2024 and included in **Appendix A**.

The TSCG establishes guidelines, methods, and impact criteria for CEQA considerations with a focus on vehicle miles traveled (VMT), geometric hazards, and policy conflicts. The TSCG also establishes a framework for various non-CEQA analyses including intersection analysis, transit operations analysis, driveway analysis, parking assessment, multimodal safety analysis, site plan review, residential street segment analysis, and construction period analysis. Each area of analysis is described in the TSCG with a discussion of methodology and evaluation criteria.

Organization of Study

This study is divided into five chapters, including this introduction, Chapter 1. Chapter 2 describes the existing transportation conditions including an inventory of the streets, transit service, and bicycle facilities in the study area. The required CEQA transportation analyses are presented in Chapter 3, including a review of consistency with the City's plans, programs, ordinances, and policies; a VMT analysis; and a geometric hazards evaluation. Chapter 4 includes the required non-CEQA transportation analyses, and contains a traffic operations analysis, driveway analysis, residential street segment analysis, parking analysis, curb space allocation analysis, transit operations analysis, and construction period analysis. Chapter 5 contains the study summary and conclusions. Appendices to this study include details of the technical analysis, as follows:

- Appendix A includes a copy of the MOU approved by Culver City and by the County of Los Angeles that describes study parameters and assumptions.
- Appendix B contains the reports from the City's VMT Tool.
- Appendix C contains vehicle intersection turning movement and street segment counts for analysis locations.
- Appendix D includes the level of service (LOS), delay, and queuing results for the intersection and driveway operations analyses.
- Appendix E contains the signal warrant analysis sheets for the intersection of Bristol Parkway and Uplander Way.
- Appendix F presents the parking demand study conducted to assist in determining the appropriate quantity of parking to supply for the Project, in the absence of a City-mandated minimum parking requirement.

[1] On July 13, 2020, the City Council adopted a resolution formally implementing the City's updated transportation thresholds of significance for CEQA analyses and overall transportation study guidelines. The TSCG is the document providing the guidance for conducting both CEQA and non-CEQA transportation analyses.

2. Environmental Setting

This study collected data and information across multiple sources to develop its description of existing transportation conditions in the study area within 1/2 mile radius of the Project Site (see **Figure 1**). The assessment of conditions relevant to this study includes a description of the study area, an inventory of the local street system in the vicinity of the Project Site, current transit service in the study area, and existing bicycle & pedestrian facilities. A detailed description of these elements is presented in this chapter.

Study Area

The Project Site is bound by Hannum Avenue to the north, Bristol Parkway and adjacent parcels to the west, and Uplander Way to the south and east. The study area includes the Project Site, its associated street frontages, and the surrounding vicinity. The study area is an urban setting with a variety of land uses and densities. The Project is considered infill development, as it proposes to build on previously developed parcels. The streets in the study area fall under the jurisdiction of the City of Culver City and the County of Los Angeles.

Existing Street System

Hannum Avenue, Bristol Parkway, and Uplander Way provide access to the Project site. Primary regional freeway access to the Project Site is provided by State Route 90 ("SR-90") and Interstate 405 ("I-405"). The following is a brief description of the freeways and streets that serve the site. Street classifications are drawn from the *Culver City General Plan 2045*.

- SR-90 – SR-90 runs generally east/west connecting the site with Venice and terminates approximately 0.2 miles northwest of the Project Site at Slauson Avenue. Additional access to SR-90 is available via an interchange with I-405 (see below).
- I-405 – I-405 runs generally north/south approximately 0.6 miles west of the Project Site and is the main freeway connection to the region. Access to Interstate 10 ("I-10") is available via interchanges at SR-90 and Howard Hughes Parkway.
- Hannum Avenue – Hannum Avenue is a largely east/west primary arterial that provides access to the site from the north via I-405, and the east via Slauson Avenue. It includes two lanes of travel in each direction and left turn pockets at signalized intersections. A Class II bicycle lane is present between Bristol Parkway and Buckingham Parkway and on-street parking is present on the south side of Hannum Avenue along the same extent. The posted speed limit is 35 mph in the study area. Between Playa Street and Slauson Avenue, Hannum Avenue is a secondary arterial.
- Uplander Way – Uplander Way local street surrounding the western and southern portion of the Project Site connecting Hannum Avenue to Bristol Parkway. It provides one lane of travel in each direction. On-street parking is present on both sides of the street.
- Bristol Parkway – Bristol Parkway is a north/south major collector that provides access to the Project Site from the south via I-405 and Green Valley Circle, with two lanes of travel in each direction and

a two-way left turn lane. On-street parking is prohibited north of Green Valley Circle and permitted on the east side south of Green Valley Circle. The posted speed limit is 35 mph in the study area.

- Slauson Avenue – Slauson Avenue is an east/west primary arterial that provides three travel lanes in each direction and left turn pockets at intersections. On-street parking is prohibited. The posted speed limit is 40 mph in the study area. Between Jefferson Boulevard and Port Road, Slauson Avenue is a major collector. Slauson Avenue connects to points east and northeast via La Cienega Boulevard.
- Buckingham Parkway – Buckingham Parkway is a north/south street. Between Slauson Avenue and Hannum Avenue, it is a primary arterial providing two lanes in each direction with left turn pockets. This segment has a Class II bicycle lane between Hannum Avenue and Canterbury Drive and on-street parking is prohibited throughout. The posted speed limit is 35 mph. Between Hannum Avenue and Green Valley Circle, Buckingham Parkway is a major collector with one lane in each direction and a two-way left turn lane. On-street parking is permitted on both sides of the street. The posted speed limit is 30 mph.
- Green Valley Circle – Green Valley Circle is an east/west secondary arterial looping between Sepulveda Boulevard and Centinela Avenue that provides two lanes in each direction with a two-way center turn lane, which narrows to one lane in each direction east of Buckingham Parkway. On-street parking is permitted on the south side of the street east of Bristol Parkway and both sides of the street east of Buckingham Parkway. The posted speed limit is 35 mph.
- Fox Hills Drive – Fox Hills Drive is a northeast/southwest local street that provides one travel lane in each direction with left turn pockets. On-street parking is prohibited.

Existing Transit

Several bus routes that Culver CityBus and LA Metro operate currently serve the Project Site and study area. Transit lines within one mile of the Project Site are detailed below and illustrated in **Figure 3**.

- Culver CityBus Line 3 – Line 3 is a local line connecting Fox Hills to Century City, with daily service (though Sunday service is limited). Line 3 runs along Slauson Avenue, Hannum Avenue, and Bristol Parkway in the study area. Weekday peak hour headways are approximately 20 minutes. The closest stop to the Project site is located along the northern Project frontage at Hannum Avenue and Bristol Parkway.
- Culver CityBus Line 4 – Line 4 is a weekday and Saturday community circulator connecting the Culver City Transit Center with West Los Angeles College and the West Los Angeles Transit Center. Line 4 runs along Slauson Avenue and Sepulveda Boulevard. Weekday peak hour headways are approximately 40-60 minutes. The closest stop to the Project Site is located at the Culver City Transit Center.
- Culver CityBus Line 5C2 – Line 5C2 is a weekday community circulator that connects Overland Avenue and Fox Hills to Washington Boulevard via Braddock Drive. Destinations include Culver City Middle and High Schools, Downtown Culver City, the Hayden Industrial Tract and La Cienega Boulevard. Line 5C2 only operates on weekdays and when school is in session. Line 5C2 operates

five northbound runs on weekday mornings and five southbound runs on weekday afternoons. The closest stop to the Project site is located at Buckingham Parkway and Hannum Avenue.

- Culver CityBus Line 6/6R – Line 6 is a local line from Westwood/UCLA to the Metro C Line Aviation Station, with daily service. Line 6 runs along Sepulveda Boulevard in the study area. Weekday peak hour headways are approximately 9-16 minutes. The closest stop to the Project Site is located at the Culver City Transit Center. Line 6R is a rapid version of Line 6 that operates only during weekday morning and evening peak hours. Weekday peak hour headways are approximately 12-17 minutes. The 6R does not directly serve the Culver City Transit Center like the local 6, and the closest stop to the Project site is located at Sepulveda Boulevard and Slauson Avenue.
- Metro Bus Line 102 – Line 102 is a local line from the LAX City Bus Center to South Gate via La Tijera and Exposition Boulevard, with daily service. Line 102 runs north/south along La Cienega Boulevard in the study area. Weekday peak hour headways are approximately 50-60 minutes. The closest stop to the Project Site is located at La Cienega Boulevard and Slauson Avenue.
- Metro Bus Line 108 – Line 108 is a local line from Marina Del Rey to Pico Riveria via Slauson Avenue, with daily service. Line 108 runs east/west along Slauson Avenue in the study area. Weekday peak hour headways are approximately 7-10 minutes. The closest stop to the Project Site is located at Buckingham Parkway and Hannum Avenue.
- Metro Bus Line 110 – Line 110 is a local line from Playa Vista to Bell Gardens via Jefferson Boulevard and Gage Avenue, with daily service. Line 110 runs east/west along Washington Boulevard in the study area. Weekday peak hour headways are approximately 14-17 minutes. The closest stop to the Project Site is located at the intersection of Bristol Parkway and Hannum Avenue.

Figure 3

Existing Transit Service

Existing Bicycle and Pedestrian Facilities

The Project Site is served by dedicated bicycle infrastructure through Class II bicycle lanes on Hannum Avenue between Slauson Avenue and Bristol Parkway.

A map of existing bike facilities, in addition to the proposed bike facilities per the Culver City Bicycle & Pedestrian Action Plan ("Action Plan"), adopted by City Council in June 2020, is illustrated in **Figure 4**. According to the Action Plan, a Class IV separated bikeway is planned along Buckingham Parkway between Hannum Avenue and Green Valley Circle. Class II bicycle lanes are recommended on Bristol Parkway between Slauson Avenue and Centinela Avenue; Hannum Avenue between Bristol Parkway and Playa Street; and Green Valley Circle between Sepulveda Boulevard and Centinela Avenue.

Both sides of the streets immediately bordering the Project Site and all other public streets in the vicinity all include sidewalks, facilitating pedestrian movement. Marked crosswalks are present at all signalized intersections in the study area. Pedestrian walk phases are either automatically provided at the intersections or are actuated by pedestrian push-buttons.

The proposed Safer Fox Hills project ("Safer Fox Hills") recommends additional bicycle and pedestrian infrastructure in the Project area. The Safer Fox Hills plans are conceptual and have not been incorporated into the Action Plan, nor are they currently funded. Safer Fox Hills proposes the following bicycle infrastructure treatments for streets in the Project area:

- Hannum Avenue: a mix of Class II bicycle lanes and Class IV protected bicycle lanes
- Bristol Parkway: Class IV protected bicycle lanes
- Buckingham Parkway: Class IV protected two-way cycletrack
- Green Valley Circle: a mix of Class II bicycle lanes and Class IV protected bicycle lanes

Safer Fox Hills also proposes a new traffic signal at the intersection of Green Valley Circle and Fox Hills Drive and bus stop improvements, protected intersections, curb extensions, and new or upgraded crosswalks throughout Fox Hills. For full details of the proposed improvements, see **Figure 5**.

3. CEQA Transportation Analyses

Senate Bill 743 Background

Proposed land use projects require an analysis to determine whether they cause a significant impact on VMT. The following section is a background on VMT and an assessment of VMT generated by the Project.

On September 27, 2013, Governor Jerry Brown signed Senate Bill 743 ("SB 743"), which required the Governor's Office of Planning and Research ("OPR")[2] to develop guidelines for evaluating transportation impacts under CEQA using methods that do not focus on measuring automobile delay and level of service ("LOS").[3]

OPR issued proposed updates to the CEQA guidelines in support of these goals in November 2017[4] and a supporting technical advisory in December 2018.[5] The updates established VMT as the primary metric for evaluating a project's environmental impacts on the transportation system. The changes to CEQA Guidelines Section 15064.3 to implement SB 743 were certified by the California Natural Resources Agency in December of 2018[6]. Local jurisdictions were required to revise their procedures accordingly by July 2020. The City, as the lead agency, adopted new significance thresholds for transportation impacts based on VMT, a VMT Calculator tool to measure VMT for development projects, and new transportation study guidelines. These thresholds and guidelines were developed in 2019 and 2020 and were adopted at a City Council Meeting on July 13, 2020.

Vehicle Miles Traveled Analysis

The City's VMT Tool also assesses the VMT impacts of proposed development projects, along with the effectiveness of selected Transportation Demand Management ("TDM") measures proposed for a project based on available research. With the City as the lead agency, the VMT analysis follows the City's procedures identified in the TSCG and VMT Tool.

[2] Effective July 1, 2024, OPR was renamed the Governor's Office of Land Use and Climate Innovation. For simplicity, this memorandum continues to refer to that office as OPR. State of California, Governor's Office of Planning and Research, https://lci.ca.gov/.
[3] Government Code § 21099(c).
[4] State of California, Governor's Office of Planning and Research, *Proposed Updates to the CEQA Guidelines, Final*, November 2017.
[5] State of California, Governor's Office of Planning and Research, *Technical Advisory on Evaluating Transportation Impacts in CEQA*, December 2018.
[6] State of California, Natural Resources Agency, Final Adopted Text, December 2018. https://resources.ca.gov/CNRALegacyFiles/ceqa/docs/2018_CEQA_FINAL_TEXT_122818.pdf

VMT Screening Criteria

The TSCG specifies the City's VMT screening criteria for development projects. Per the criteria, if a development project meets any of the below VMT screening thresholds, it would be exempted from having to conduct VMT impact analysis to comply with CEQA, and a less than significant impact is presumed.

1. Small projects that result in less than 250 daily or 25 peak hour trips.
2. Projects within a ½ mile from these key TPAs: Metro E Line Culver City Station, Metro E Line La Cienega Station, Culver City Transit Center, or Sepulveda/Venice Boulevard intersection.
3. Projects located within any TPA where at least 15% of the on-site residential units are affordable.
4. Affordable housing projects where 100% of the dwelling units are affordable.
5. Local serving retail projects having less than 50,000 sf in size at a single store.

While a portion of the Project Site falls within ½ mile of the Culver City Transit Center, a VMT analysis was conducted for the whole Project Site as a conservative approach.

Thresholds 4 and 5 apply to specific land uses, meaning that these land uses can be screened from a mixed-use project.

The commercial portion of the Project is approximately 5,772 sf of retail space. Per the TSCG, this portion screens out of VMT analysis based on the locally-serving retail screening criteria. The residential portion of the Project does not meet any of the VMT screening thresholds. Therefore, a VMT impact analysis is required for the Project, but no separate analysis is required for the retail portion.

VMT Impact Analysis

The Project's impact on VMT was assessed utilizing the City's VMT Tool. The VMT Tool considers a project's land uses, proposed transportation demand management strategies, and location within the City to estimate the project's impact on VMT, assessed against the City's established impact criteria. The TSCG threshold of significance is 15% below the City VMT per capita. The City VMT per capita is 8.3, so the threshold of significance is 7.1. See **Appendix B** for details.

The Project's land uses are outlined in **Table 1**. Following the TSCG guidance for mixed-use projects, both the commercial/retail and residential land uses are subject to this threshold. The Project's commercial component is below the 50,000 sf threshold and is presumed to be local-serving and to have a less-than-significant impact on VMT. The Project's estimated total daily VMT would be **32,887** and is shown in **Appendix B.**

The estimated daily household VMT per capita for the Project would be **6.2** and is presented in **Table 2**.

The Project's estimated daily household VMT per capita is below the TSCG threshold of significance; therefore, the Project would have a less-than-significant VMT impact and no mitigation measures would be required. **Appendix B** contains additional information about the inputs and supporting documentation for the VMT analysis.

Table 1: Project Land Uses

Proposed Land Use	Proposed Land Use Size
Market Rate Multi-Family Housing	999 DU
Income-Restricted Housing	78 DU
Retail	5,772 sf

Table 2: Project Household VMT per Capita

Proposed Project Daily Household VMT per Capita	Threshold of Significance[1]	Significant VMT Impact?
6.2	7.1	No

Notes

1. Threshold of significance for residential land use projects is 15% below the City metric of 8.3.

Transportation Demand Management Measures

A TDM program consists of strategies that are aimed at reducing single-occupancy vehicle trips and encouraging alternative modes of transportation, such as carpooling, taking transit, walking, and biking. While the Project has a less than significant impact on VMT as discussed above, a TDM program is proposed as part of the Project to comply with Culver City Municipal Code ("CCMC") Section 7.05.015. The applicant has also proposed additional voluntary TDM measures as part of the Project.

Project Site Design Elements

The Project includes site design elements that enhance the usage of walking, biking, and transit modes as alternatives to automobiles. The Project's site design includes pedestrian network improvements throughout and around the Project Site, including sidewalk improvements on all Project frontages that internally link all uses within the Project Site and connect the Project Site to the surrounding public pedestrian network. Along the Hannum Avenue frontage, the existing sidewalk and parkway width will be expanded from 8 feet to 13 feet (including an easement); on the Bristol Parkway frontage, from 10 feet to 15 feet; and on the Uplander Way frontage, from 8 feet to 10 feet. Street lighting and street trees will also be provided.

CCMC Section 7.05.015 TDM Measures

The following TDM measures are required per CCMC Section 70.05.015 based on the scale of the development A summary of the measures is provided below. Per CCMC, all facilities and improvements listed must be maintained in a state of good repair and are subject to monitoring by the City.

- **Transportation Information Board** including information on public transit, carpooling, ridesharing, and bicycling facilities and service available in the vicinity.
- **Carpool/Vanpool Preferential Parking** designated for at least 10% of employee parking spaces.
- **Secure Bicycle Parking** at a minimum ratio of four spaces for the first 50,000 gross sf of new development, and one space for each additional 50,000 gross sf of new development.
- **Sidewalks/Pedestrian Pathways** with direct and safe routes from the external pedestrian circulation system, vehicle and bicycle parking areas and transit facilities to each building in the development.
- **Bus Stop Improvements,** if determined necessary by the City to mitigate the impacts of the new development.
- **Carpool/Vanpool Loading Zone**

Voluntary TDM Measures

Beyond the required measures detailed above, the Project will implement the following voluntary TDM measures to reduce vehicle trips generated by the Project and support residents, guests, employees, and customers choose to use a commute alternative to reach their destination.

- Project Transportation Coordinator – A Transportation Coordinator will be designated for the Project Site who will be responsible for implementing, coordinating, and maintaining the TDM Plan.

The Transportation Coordinator's identity and contact information will be provided to the City and kept current.

- Transportation Information Packet for New Residents and Employees – Each new resident and employee will receive an information packet summarizing the transit and transportation alternatives available to Project tenants. The packet will emphasize the location of the promotions and marketing kiosk and include the Transportation Coordinator's contact information.
- Bike Repair Station – The Project will provide an on-site bike parking station for use by Project residents and employees that has a space and a basic tool set for bike repairs.
- Subsidized Ride Hail Service – Employees who arrive to work via a means other than a single-passenger vehicle will automatically be registered in a subsidized ride hail service by which, upon request to the Transportation Coordinator, the employee will be given a voucher to travel home on Uber/Lyft (or similar shared ride service) in case of illness or emergency. The Project will provide up to $750 in total for this program every year. The subsidy would be for two years after the Certificate of Occupancy is issued.
- Subsidized Transit Passes – The Project will provide up to $500 per pass per year of subsidies for up to five LA Metro TAP cards for a period of three years for employees who opt to take Metro instead of personal vehicles.

Plans, Programs, Ordinances, and Policies Conflict Review

Under CEQA, a project is considered consistent with an applicable plan if it is consistent with the overall intent of the plan and would not preclude the attainment of its primary goals. Any inconsistency with an applicable policy, plan, or regulation is only a significant impact under CEQA if the policy, plan, or regulation was adopted for the purpose of avoiding or mitigating an environmental effect and if the inconsistency itself would result in a direct physical impact on the environment.[7]

The City's TSCG requires a review for conflicts with transportation-related plans, programs, ordinances, or policies. Based on applying the screening criteria, the threshold test is to assess whether a project would conflict with an adopted program, policy, plan, or ordinance that is adopted to protect the environment. A project would not be shown to result in an impact merely based on whether a project would not implement a particular program, policy, plan, or ordinance. Rather, it is the intention of this threshold test to ensure that proposed development does not conflict with nor preclude the City from implementing adopted programs, plans, and policies. This evaluation was conducted by reviewing the following City documents: Traffic Code, General Plan Circulation Element, Neighborhood Traffic Management Program, Short Range Mobility Plan, Bicycle and Pedestrian Action Plan, Complete Streets Policy, and Local Road Safety Plan. Additionally, this evaluation determined that the following City documents do not apply to the Project Site and are thus not analyzed further: General Plan Land Use Element, Gateway Neighborhood Design

[7] *2025 California Environmental Quality Act (CEQA) Statute & Guidelines* (2025). Association of Environmental Planners.

Guidelines, Gateway Adjacent Neighborhood Design Guidelines Residential Parkway Guidelines, and Upper Culver Crest Hillside Design Standards.

Traffic Code, Chapter 7.05: Motor Vehicle Air Quality Management

This Chapter of the CCMC establishes TDM and trip reduction measures for developments of 25,000 sf or more. The Project is greater than 25,000 square feet and would comply with CCMC requirements, as detailed above.

City General Plan (2024) Mobility Element ("ME")

This document guide the physical development of neighborhoods, providing neighborhood level detail for land uses, the transportation network, policies, and implementation strategies. The following is a review of the Project's consistency with transportation related measures, objectives, and policies in this plan:

ME Policy M-2.5

Multimodal connectivity: Transform traditional bus stops into mobility centric locations that provide easy access and hassle-free connectivity between modes of transportation.

The proposed Project would comply with any bus stop improvements as required by the City under CCMC Section 7.05.015.

ME Policy M-3.4

High-quality transit service: Prioritize capital investments and improvements that align with Culver City's SRMP, regional studies, and LA Metro's LRTP to enhance transit reliability and rider experience to make transit competitive with driving.

The proposed Project Site is located in an area served by public transportation, including the Los Angeles County Metropolitan Transportation Authority (Metro) and Culver City Department of Transportation, which provide an extensive system of bus lines in Culver City and the greater Los Angeles metropolitan area. The proposed Project would support this policy by providing new residential development adjacent to existing transit lines which would encourage ridership. The proposed TDM plan would also encourage transit use.

ME Policy M-4.2

First/last mile barriers: Prioritize investments that reduce first/last-mile barriers to transit stops and encourage alternative transportation options for daily activities and/or improve access to high quality jobs.

The proposed Project would support this policy by enhancing pedestrian circulation and promoting an active streetscape with pedestrian paseos on Hannum Avenue and Uplander Way, enhanced sidewalks, landscape, and street trees along Hannum Avenue and Uplander Way. These facilities would facilitate connections to Fox Hill Park and the Westfield Culver City Mall, through enhanced sidewalks, landscape, and street trees along Hannum Avenue, Uplander Way, and Bristol Parkway.

ME Policy M-4.4

Bicycle parking: Provide secure and covered bicycle parking at key destinations, including all public parking garages.

The proposed Project would support this policy by providing 305 secure bicycle parking spaces (31 short-term and 274 long-term) in compliance with respective City codes.

ME Policy M-4.6

Accessible pedestrian facilities: Construct pedestrian facilities, including sidewalks and controlled crossings, that are ADA-compliant and connect with key land uses and regional and local transit services.

The proposed Project would support this policy by enhancing pedestrian circulation and promoting an active streetscape with pedestrian paseos on Hannum Avenue and Uplander Way, enhanced sidewalks, landscape, and street trees along Hannum Avenue and Uplander Way. These facilities would facilitate connections to Fox Hill Park and the Westfield Culver City Mall, through enhanced sidewalks, landscape, and street trees along Hannum Avenue, Uplander Way, and Bristol Parkway.

ME Policy M-5.3

Transportation demand management implementation: Deploy TDM measures citywide to shift the mobility paradigm by promoting and incentivizing the use of non-drive alone and sustainable mobility options.

The proposed Project's proximity to several public transportation options would support this policy by allowing residents to commute via alternative modes to reduce vehicle volumes. The proposed TDM program (as described above) would also help to promote non-driving transportation modes.

ME Policy M-5.4

Transportation demand management requirements. Require employers and new developments to effectively reduce the number of single-occupancy vehicle trips they generate and ensure safe and comfortable access for the local multimodal network, including promoting and incentivizing the use of transit, walking, and cycling over driving.

The proposed Project's proximity to several public transportation options would support this policy by allowing residents to commute via alternative modes to reduce vehicle volumes. The proposed TDM program (as described above) would also help to promote non-driving transportation modes.

ME Policy M-5.8

Funding sources for multimodal investment projects: Leverage appropriate and eligible alternative funding sources including the Mobility Improvement Fee and assessment districts to support multimodal projects and mobility services in transit priority areas and transit priority corridors.

The proposed Project would contribute its required Mobility Improvement Fee in support of funding multimodal projects and mobility services as selected by the City.

ME Policy M-8.2

Active modes of travel to parks, recreation facilities, open spaces, and trails: Improve access of active modes of travel to parks, recreation facilities, open space, and trails.

The proposed Project would support this policy by providing new residential development near to Fox Hills Park.

ME Policy M-8.4

Streetscaping: Provide and maintain shade trees, street furniture, bike racks, and other streetscaping features to enhance the street environment and encourage active modes of travel.

The proposed Project would support this policy by enhancing pedestrian circulation and promoting an active streetscape with pedestrian paseos on Hannum Avenue and Uplander Way, enhanced sidewalks, landscape, and street trees along Hannum Avenue and Uplander Way.

ME Policy M-5.5

Traffic congestion and parking management: Proactive manage traffic congestion and parking at major destinations and job centers.

The proposed Project would support this policy by providing new residential development near to existing office uses and destinations such as Fox Hill Park and the Westfield Culver City Mall that could be accessed via non-vehicular modes. The proposed TDM program (as described above) would also help to promote non-driving transportation modes. The proposed Project would also provide an adequate amount of parking based on a parking demand study of comparable properties located near the Project. The Culver City Municipal Code no longer requires a minimum number of parking spaces as of October 2022. The Project would provide 1,304 off-street parking spaces within three parking garages, one for each proposed building.

Neighborhood Traffic Management Program

The City established a process for Neighborhood Traffic Management Programs (NTMPs) in a Procedures Manual dated November 22, 2004 to identify and implement areas impacted by cut-through traffic and implement traffic control, speed control, and safety infrastructure in the public right-of-way. The Fox Hills NTMP includes proposed traffic circles, speed humps, radar feedback signs, centerline striping, curb extensions, pedestrian refuge islands, and bike lanes in the study area.

As noted above, Uplander Way does not provide any neighborhood access. Due to the Project location and driveways providing more direct access to major arterials, Project trips are not anticipated to lead to diversion or cut-through traffic on residential local streets. The Project would also voluntarily provide 1,304 off-street parking spaces, minimizing the possibility that residents, guests, and employees would navigate onto neighborhood streets in search of on-street parking.

The Project would not conflict with the goals of the Fox Hills NTMP nor inhibit implementation of measures identified within.

Short Range Mobility Plan (2022-2026)

The City's Transportation Department Short Range Mobility Plan provides a service analysis of the current fixed route bus service, the impact of local and regional transit projects, and an evaluation of main corridors and the on-demand services offered, such as Dial-A-Ride and microtransit. It focuses on public transportation services, enhancing fixed route and paratransit services, expanding micro-mobility with scooters and bikes, and offering microtransit services. The implementation of the Short Range Mobility Plan is largely within the purview of the City rather than private developers or property owners. The Project would support this plan because of the Project's proximity and accessibility to several public transportation options. The proposed Project Site is in an area well served by public transportation, as described above. The Project would comply with any bus stop improvements as required by the City under CCMC Section 7.05.015. Therefore, the Project would not preclude the implementation of the Short Range Mobility Plan.

Short Range Transit Plan (FY 2019-2021)

The City's Transportation Department Short Range Transit Plan has been superseded by the Short Range Mobility Plan. The prior Short Range Transit Plan, similarly to the current Short Range Mobility Plan, provides a service analysis of fixed route bus service, the impact of local and regional transit projects, and an evaluation of main corridors and the on-demand services offered, such as Dial-A-Ride and microtransit. It focuses on public transportation services, enhancing fixed route and paratransit services, expanding micro-mobility with scooters and bikes, and offering microtransit services. The implementation of the Short Range Transit Plan is largely within the purview of the City rather than private developers or property owners. The Project would support this plan because of the Project's proximity and accessibility to several public transportation options. The proposed Project Site is in an area well served by public transportation, as described above. The Project would comply with any bus stop improvements as required by the City under CCMC Section 7.05.015. Therefore, the Project would not preclude the implementation of the Short Range Transit Plan.

Vision Zero

The City Council passed a resolution in 2016 (Resolution No. 2016-R082) in support of the Vision Zero initiative to improve transportation safety and aim to eliminate fatal and severe collisions on City roadways. While the City does not have one specific plan, program, ordinance, or policy implementing Vision Zero, its goals are implemented via the Bicycle and Pedestrian Action Plan, Complete Streets Policy, and Local Road Safety Plan

Bicycle and Pedestrian Action Plan

The City's Action Plan establishes the vision and values that focus on establishing walking and cycling as viable modes of travel for all trip types. The Action Plan aims to provide a safe, convenient, and accessible active transportation network, accessible by users of all ages and abilities. The following is a review of the transportation related measures, objectives, and policies in the Action Plan:

Action HS-3.2

Use current design guidelines to encourage development patterns that promote active transportation and allow for short trips between destinations.

The Project supports this action by proposing residential uses near existing office uses, in an area with several transit options. Bicycle parking would also be provided. These design features would encourage pedestrian trips and shorter trips between destinations. The Project also supports this action by enhancing pedestrian circulation and promoting an active streetscape with pedestrian paseos on Hannum Avenue and Uplander Way, enhanced sidewalks, landscape, and street trees along Hannum Avenue and Uplander Way.

Action HS-4.1

Build an active transportation network that encourages Culver City residents to use means of transportation other than driving by providing safer, more comfortable biking and walking facilities.

The Project supports this action by implementing 305 bicycle parking spaces (31 short-term and 274 long-term). A Class II Bicycle Lane is located along Hannum Ave fronting the Project Site. The Project Site frontage designs and access points will not preclude the implementation of this facility and other future high-quality bicycle facilities. The Project also supports this action by enhancing pedestrian circulation and promoting an active streetscape with pedestrian paseos on Hannum Avenue and Uplander Way, enhanced sidewalks, landscape, and street trees along Hannum Avenue and Uplander Way.

Complete Streets Policy

The Complete Streets Policy lays out a plan for designing safer, more vibrant streets, that are accessible to people, no matter how they travel. The supplementary Complete Streets Design Guidelines have not yet been adopted at the time of this study. The following policies in the Complete Streets Policy are relevant to the Project:

Policy 5a.i

The City will plan, design, operate, and maintain a transportation system that provides a connected network of streets and facilities that accommodate all modes of travel. The City will actively seek opportunities to repurpose or enhance rights-of-way to improve connectivity for pedestrians, bicyclists, and transit users.

The Project supports this policy by introducing development that is conducive to walking, biking, and taking transit. The Project would introduce new bicycle parking and enhance pedestrian rights-of-way by providing enhanced sidewalks, landscape, and street trees along Hannum Avenue and Uplander Way. Existing transit options near the Project Site would allow for pedestrian and bicycle access to public transit.

Policy 5a.ii

The City will pursue enhancements to the bicycle and pedestrian connectivity to public transit services, as well as to schools, parks, service retail, public facilities, regional connections, and business districts.

The proposed Project would support this policy by enhancing pedestrian circulation and promoting an active streetscape with connections to Fox Hill Park and the Westfield Culver City Mall, through enhanced

sidewalks, landscape, and street trees along Hannum Avenue, Uplander Way, and Bristol Parkway. Existing transit options near the Project Site would allow for pedestrian and bicycle access to public transit. The Project would comply with any bus stop improvements as required by the City under CCMC Section 7.05.015.

Policy 5b.ii

The City will emphasize pedestrian access along and across City streets by, for example, providing convenient and protected crossing locations, shortening crossing distances through the use of curb extensions and tight curb radii, and enhancing signage and pavement markings.

The Project would provide enhanced sidewalks, landscape, and street trees along Hannum Avenue, Uplander Way, and Bristol Parkway. It would not conflict with or inhibit future City improvements to pedestrian access in the public right-of-way.

Policy 5d.ii

The City will coordinate street improvements with business owners along retail and commercial corridors to develop or enhance vibrant business districts.

The Project supports this policy by providing new neighborhood-serving retail uses, and by introducing development that is conducive to walking, biking, and taking transit.

Local Road Safety Plan

The City's Local Road Safety Plan ("LRSP") is a living document that identifies conditions that contribute to collisions within the City and recommends potential traffic safety improvements to the city's unique traffic needs and issues. No streets along the Project frontage are identified in the LRSP's High-Risk Roadway Segments or Intersections.

Conclusion

The Project features and design support multimodal transportation options and would be consistent with policies, plans, ordinances, and programs that support alternative modes of transportation. The Project design includes features to minimize impacts to the public right-of-way and enhance the user experience by integrating multimodal transportation options.

The Project would not conflict with adopted policies, plans, ordinances, and programs, or preclude City action to fulfill or implement projects associated with these networks and will contribute to overall walkability through enhancements to the Project Site. **Therefore, the Project would have a less than significant impact on the City's transportation-related plans, programs, ordinances, and policies.**

Geometric Design Hazards

This section discusses impacts regarding the potential increase of hazards due to geometric design features, which generally considers the design of access points to and from the Project Site and may include safety, operational, or capacity impacts.

Pedestrian access to the Project Site would be provided via sidewalks located along Project Site frontages on Hannum Avenue, Uplander Way, and Bristol Parkway. Residents and visitors arriving at the Project Site by bicycle would have the same access opportunities as pedestrians and would be able to utilize on-site bicycle parking facilities. The Project's access locations are designed to the City's adopted standards and CCMC Section 17.320.040, and will provide adequate sight distance, sidewalks, crosswalks, and pedestrian movement controls that meet the City's requirements to protect pedestrian safety. All Project driveways will intersect streets (Bristol Parkway or Uplander Way) at right angles. Street tree placement and the location of other potential impediments to driver and pedestrian visibility will be considered to maintain safe conditions near the Project driveways. Pedestrian entrances separated from vehicular driveways with curb and sidewalk would provide access from the adjacent streets and transit stops.

The Project shall convert two unrestricted on-street parking spaces on Hannum Avenue in front of the Building 1 entrance to passenger loading only. Re-striping of the existing Class II bicycle lane shall include green conflict markers ("elephant tracks" similar to the existing condition on the opposite side of the street) to alert drivers and bicyclists of potential cross-over traffic. The Project shall also convert approximately one metered parking space each at the entrances to Buildings 2 & 3 to passenger loading only. Thes passenger loading zones would provide a designated space for vehicles to wait in a curbside space without obstructing travel lanes or the existing bicycle lane on Hannum Avenue. Although this would still require vehicles to cross the bicycle lane, providing a dedicated and demarcated space congregates these curb demands into one area rather than occurring haphazardly at any location around the site. Such curbside loading zones should have no effect on the pedestrian safety as they would not be located at or near designated pedestrian crossings. The streets immediately bordering the Project Site and nearly all the other streets in the vicinity include sidewalks, facilitating pedestrian movement. Marked crosswalks are present at permitted pedestrian crossings for all study intersections in the study area.

The Project was analyzed with the following access assumptions:

- Vehicle access to the Project Site would be provided as follows:
    - **Access A:** One right-in/right-out only driveway on the western frontage with Bristol Parkway providing access to the east-west alley and garages for Buildings 1 and 2
    - **Access B:** One full-access driveway on the eastern frontage with Uplander Way providing access to the east-west alley and garages for Buildings 1 and 2
    - **Access C:** One full-access driveway on the southern frontage with Uplander Way, providing access to the garage for Building 3
    - **Emergency Access:** A proposed curb cut along the eastern Project frontage on Uplander Way between Buildings 2 and 3 provides vehicle access only for emergency vehicles.
- Pedestrian access via three entrances, described below:
    - Northern Building: Pedestrian entrances on Hannum Avenue for residential and commercial uses
    - Middle Building: Pedestrian entrance on Uplander Way (eastern frontage)
    - Southern Building: Pedestrian entrance on Uplander Way (southeastern frontage)

The Project driveways will comply with City standards as outlined in CCMC Section 17.320.040. The driveways would be configured to avoid or minimize potential conflicts with transit services and pedestrian traffic by providing curbs and sidewalks to separate pedestrian movements from vehicular movements. The pedestrian access points are located to minimize pedestrian-vehicle conflicts. The Project would not substantially increase hazards or conflicts and would contribute to overall walkability through enhancements to the Project Site. **Therefore, the Project would cause a less than significant impact regarding geometric design hazards.**

4. Non-CEQA Transportation Analyses

The purposes of the non-CEQA transportation analyses required in the City's TSCG are to promote orderly development, evaluate and address transportation-system issues, and promote public safety and the general welfare by ensuring that development projects are properly related to their sites, surrounding properties, and traffic circulation. This section includes a site plan review, intersection operations analysis, driveway operations analysis, residential street segment analysis, parking assessment, multimodal safety analysis, and transit operations analysis.

Site Plan Review

As mentioned in the CEQA geometric hazards analysis, the proposed Project would not result in a significant impact related to geometric design hazards. As shown in **Figure 2**, the Project would propose four driveways, a reduction from the eight that currently serve the existing uses on the Project Site. Vehicular access to the parking garages, as well as loading docks and trash areas, would be provided via three main driveways: one on Bristol Parkway serving Buildings 1 and 2, one on Uplander Way (N/S) serving Buildings 1 and 2, and one on Uplander Way (E/W) serving Building 3. The Bristol Parkway driveway is proposed to be right turn in/right turn out only. A fourth driveway on Uplander Way between Buildings 2 and 3 is for emergency vehicle access only. Further driveway LOS and queuing analysis is provided in the operations analysis.

Commercial use deliveries would utilize loading docks located in the alley between Buildings 1 and 2.

Intersection Operations Analysis

The purpose of the intersection operations analysis is to assess the ability of the circulation system to accommodate the vehicular traffic generated by the Project and other related projects. This analysis includes intersection LOS, delay, and queuing analysis.

Analysis Scenarios

The Project is expected to be completed by the year 2031. According to TSCG requirements, the following traffic scenarios have been developed and analyzed as part of this study:

- Existing (2024) Conditions – The analysis of existing traffic conditions sets a baseline for the remainder of the study. The existing conditions analysis includes a description of the street system serving the site, current traffic volumes, and an assessment of the operating conditions at these locations. Traffic counts were collected in May 2024.
- Existing (2024) Plus Project Conditions – This traffic scenario provides projected traffic volumes and an assessment of operating conditions under existing conditions with the addition of Project-generated traffic.
- Future Year (2031) Conditions – Future year traffic conditions without the proposed Project were developed for the year 2031. The objective of this analysis is to project future traffic and operating

conditions that could be expected to result from regional changes and related projects in the vicinity of the Project Site by 2031.

- Future Year (2031) Plus Project Conditions – This traffic scenario provides projected traffic volumes and an assessment of operating conditions under Future Year conditions with the addition of project-generated traffic.
- Horizon Year (2045) Conditions – According to the Culver City Travel Demand Forecasting Model (TDFM), the future horizon year is 2045. Horizon year traffic conditions without the proposed Project would be developed for the year 2045. The objective of this analysis is to predict future traffic and operating conditions that might be expected to result from regional changes and related projects in the vicinity of the Project Site by 2045.
- Horizon Year (2045) Plus Project Conditions – This traffic scenario provides projected traffic volumes and an assessment of operating conditions under Future Buildout conditions with the addition of project-generated traffic.

Study Locations

The scope and selection of study intersections and residential street segments was developed in conjunction with City staff. This study analyzed 12 intersections based on guidance from the TSCG and staff.

This study analyzes the following Culver City and Los Angeles County intersections:

1. Hannum Avenue & Slauson Avenue
2. Fox Hills Drive & Hannum Avenue
3. Bristol Parkway & Slauson Avenue
4. Bristol Parkway & Hannum Avenue
5. Bristol Parkway & Uplander Way
6. Bristol Parkway & Green Valley Circle
7. Uplander Way & Hannum Avenue
8. Buckingham Parkway & Hannum Avenue
9. Buckingham Parkway & Slauson Avenue
10. Shenandoah Avenue & Slauson Avenue (Los Angeles County)
11. Corning Avenue & Slauson Avenue (Los Angeles County)
12. La Cienega Boulevard & Slauson Avenue (Los Angeles County)

All intersections except Bristol Parkway & Uplander Way are signalized. Additionally, the segment of Green Valley Circle between Bristol Parkway and Centinela Avenue was studied for potential neighborhood intrusion. The study intersections and street segment are illustrated in **Figure 6**.

Existing Traffic Volumes and Level of Service

This section presents the existing peak hour turning movement traffic volumes for each of the intersections analyzed in the study, describes the methodology used to assess the traffic conditions at each intersection, and analyzes the resulting levels of service at each. Traffic counts are provided in **Appendix C**.

Existing Traffic Volumes

Weekday morning and evening peak hour traffic counts were collected at the 12 study intersections in May 2024. The 24-hour counts at the analyzed street segment were taken in May and June 2024. These counts occurred while all local schools and districts were in session. The existing weekday traffic volumes are illustrated in **Figure 7**.

Level of Service Methodology

LOS is a qualitative measure used to describe the condition of traffic flow on the street system, ranging from excellent conditions at LOS A to overloaded conditions at LOS F. LOS definitions for signalized and unsignalized intersections are provided in **Table 3**. All intersections except Bristol Parkway & Uplander Way are signalized.

The Highway Capacity Manual, 7th Edition (HCM) methodology was used to determine the average intersection delay (seconds) and corresponding LOS for the study intersections. This analysis was performed using the Synchro software program. Synchro calculates vehicle delay and LOS based on procedures outlined in the HCM. The most current signal timing information from each jurisdiction was used in the analysis of signalized study intersections.

Existing Levels of Service

The traffic volumes presented in **Figure 7** were analyzed using the methodologies described above to determine the current operating conditions at the 12 analyzed intersections. **Table 4** summarizes the Existing (2024) LOS analysis results. As shown in the table, the following two intersections are currently operating at LOS E or F:

3. Bristol Parkway & Slauson (AM Peak Hour)
12. La Cienega Boulevard & Slauson Avenue (AM Peak Hour)

Detailed LOS calculation worksheets are presented in **Appendix D**.

Study Intersections/Streets

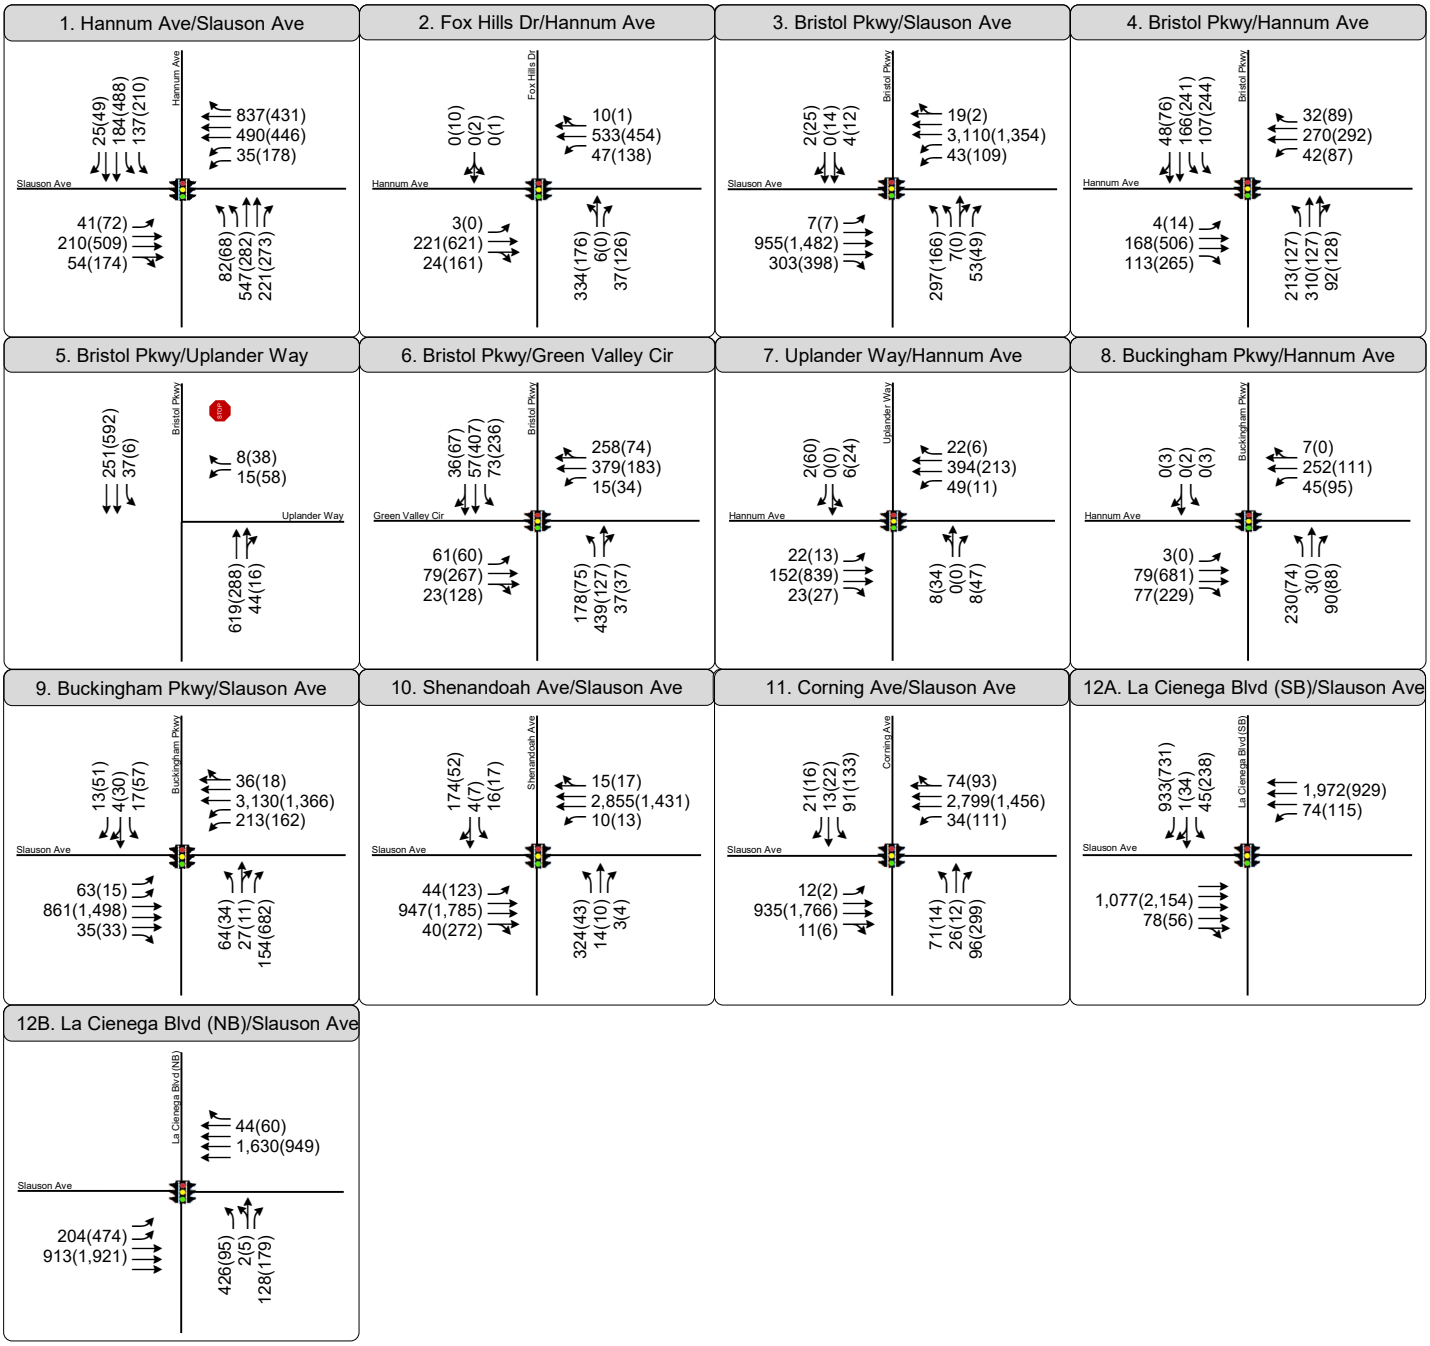

Figure 7

5757 Uplander Way
Existing (2024) Volumes AM(PM)

Table 3: Level of Service Defintions for Intersections (HCM 7 Methodology)

Level of Service	Average Stopped Delay per Vehicle (seconds) [Unsignalized]	Average Stopped Delay per Vehicle (seconds) [Signalized]	Definition
A	≤10	≤10	No vehicle waits longer than one red light and no approach phase is fully used.
B	>10 and ≤15	>10 and ≤20	An occasional approach phase is fully utilized; many drivers begin to feel somewhat restricted within groups of vehicles
C	> 15.0 and ≤ 25.0	>20 and ≤35	Occasionally drivers may have to wait through more than one red light; backups develop behind turning vehicles.
D	> 25.0 and ≤ 35.0	>35 and ≤55	Delays may be substantial during portions of the rush hours, but enough lower volume periods occur to permit clearing of developing lines, preventing excessive backups.
E	> 35.0 and ≤ 50.0	>55 and ≤80	Represents the most vehicles intersection approaches can accommodate; may be long lines of waiting vehicles through several signal cycles.
F	>50	>80	Backups from nearby locations or on cross streets may restrict or prevent movement of vehicles out of the intersection approaches. Tremendous delays with increasing queue lengths.

			PM	15.8	B
12	La Cienega Blvd & Slauson Ave[b]	Signalized	AM	80.6	F
			PM	25.9	C

Note:

[a] SSSC = Side Street Stop-Controlled

[b] LOS and delay for the clustered intersection is reported as a weighted average.

Project Traffic

The development of trip generation estimates for the Project was a three-step process: trip generation, trip distribution, and traffic assignment.

Project Traffic Generation

The Project would provide a total of 1,077 dwelling units and 5.772 ksf of retail space across three buildings on the Project Site. The parcel is currently developed with four office buildings totaling approximately 146,000 sf which would be demolished, as well as surface parking and vehicular access that supports the existing uses on the Project Site. The office uses are currently occupied, so an existing use credit was calculated when developing the trip generation for the Project.

Table 5 presents the trip rates used to estimate trip generation for the Project. Trip generation data published by the Institute of Transportation Engineers (ITE) in Trip Generation Manual (11th Edition, 2021) was used to estimate vehicle trip generation. The ITE Multifamily Housing (Mid-Rise) rate (Land Use #221) was used for the proposed residential use. The ITE Restaurant (High Turnover Sit-Down) rate (Land Use #932) was used for the proposed retail use. As the future retail use is not yet determined, a relatively high trip generating use was selected to provide a conservative estimate. An internal capture credit was taken for both the residential and retail uses to account for the percentage of trips that take place within the site, using the MXD 2.0 Mixed Use Trip Generation Methodology. Additionally, as pass-by credit was taken for the retail use, based on guidance from the Los Angeles Department of Transportation (LADOT) Transportation Assessment Guidelines (TAG). The basis for these credit decisions is outlined in the TSCG.

After including the credits for existing uses, internal capture, and pass-by trips, the Project is estimated to generate 186 trips (-87 inbound/273 outbound) in the AM peak hour and 215 trips (223 inbound/-8 trips outbound) in the PM peak hour. Inbound trip generation in the AM peak hour and outbound trip generation in the PM peak hour are negative due to the existing use credit and difference in time-of-day trip patterns between the existing office use and the proposed residential use.

Project Traffic Distribution

The geographic distribution of the traffic generated by the proposed Project depends on several factors. These factors include the type and density of the proposed land uses, the geographic distribution of population from which the employees and potential patrons of the proposed development are drawn, and the location of the Project in relation to the surrounding street system. A select zone analysis was conducted for the proposed uses using the City of Culver City TDFM to inform the general distribution pattern for this study. The distribution is illustrated in **Figure 8**.

Project Traffic Assignment

The traffic to be generated by the proposed Project was assigned to the street network using the distribution patterns described in **Figure 8**. The assignment of traffic volumes took into consideration the locations of the proposed driveways on Bristol Parkway and Uplander Way, as well as each building's access to the driveways. **Figure 9** provides the assignment of the proposed project-generated peak hour traffic volumes at the analyzed intersections during the AM and PM peak hours.

Table 5: Project Vehicle Trip Generation Estimate

Land Use	ITE Land Use Code	Size	Trip Generation Rates [a]							Estimated Trip Generation

TOTAL EXISTING USE CREDIT										1,583	195	27	222	36	174	210
NET INCREMENTAL EXTERNAL TRIPS										3,640	-87	273	186	223	-8	215

Notes:

[a] Source: Institute of Transportation Engineers (ITE), *Trip Generation, 11th Edition* , 2021.

[b] Internal capture represents the percentage of trips between land uses that occur within the site. It is informed by MXD 2.0 Mixed Use Trip Generation Methodology, which incorporated the findings of NCHRP Project 8-51 as described in "Improved Estimation for Internal Trip Capture for Mixed-use Developments," ITE Journal, August 2010.

[c] Project design features - off-street parking pricing and pedestrian-oriented design - are applicable to residential uses to reduce the number of vehicle trips to/from the Project Site. Values are derived from the Culver City VMT Tool.

[d] Pass-by trip adjustment applied to account for the percentage of trips that would already be on the adjacent roadway but make a stop by the Project Site. ITE pass-by rates for this land use are extremely high and are derived from primarily rural and suburban sites. The pass-by rate for high turnover restaurants (20%) from the LADOT Transportation Assessment Guidelines (TAG) is used as a better representation of travel conditions in the project area.

Figure 9

Existing Year Plus Project Volumes and Level of Service

The estimated Project traffic was added to the Existing Year (2024) traffic volumes to estimate Existing Year Plus Project traffic volumes. **Figure 10** shows the Existing Year Plus Project turning movement traffic volumes. These volumes were analyzed to determine the intersection LOS and delay for each intersection. **Table 6** summarizes the Existing Year plus Project LOS. LOS E or F are projected at two of the 12 study intersections during at least one of the analyzed peak hours:

3. Bristol Parkway & Slauson (AM Peak Hour)
12. La Cienega Boulevard & Slauson Avenue (AM Peak Hour)

Detailed LOS calculation worksheets are presented in **Appendix D**.

[b] LOS and delay for the clustered intersection is reported as a weighted average.

Future Year (2031) Volumes and Level of Service

Estimates of Future Year traffic conditions both with and without the Project were developed to evaluate the potential effects of the proposed Project on the local street system. Future Year traffic volumes without the Project are first estimated, representing the Future Year conditions. The traffic generated by the proposed Project is then estimated and separately assigned to the surrounding street system. The sum of the Future Year and Project-generated traffic represents Future Year plus Project traffic conditions.

The Future Year traffic projections reflect changes in traffic from two primary sources: background or ambient growth in the existing traffic volumes to reflect the effects of overall regional growth both in and outside of the study area, and traffic generated by specific projects in, or in the vicinity of, the study area. These factors are described below.

Areawide Traffic Growth

To provide a conservative short-term analysis, traffic volumes in the vicinity of the study area were projected to increase at a rate of 0.6% per year in the AM peak period and 0.1% in the PM peak period, which was calculated using the Culver City TDFM. With the assumed completion date of 2031, the existing baseline 2024 traffic volumes were adjusted upward by a factor of 0.6% (AM) and 0.1% (PM) for seven years to reflect areawide regional growth up to Year 2031.

Related Projects Traffic Generation

The second major source of traffic growth in the study area is from specific planned development projects, also called related projects, expected to be built in the vicinity of the proposed Project Site prior to Project opening. Data describing related projects in the area was developed based on information obtained from Culver City and the City of Los Angeles. A total of seven related projects were identified in the study area as summarized in **Table 7**. It was conservatively assumed that all four related projects would be completed and occupied by the Future year of this Project. Trip generation estimates for each of the related projects were developed according to ITE (11th Edition) rates. **Figure 11** displays the locations of the related projects. **Figure 12** illustrates the assignment of this traffic at each of the study intersections. Related project traffic was distributed across study intersections using assumptions found in their respective transportation studies or the travel demand model.

Table 7: Related Projects

ID	Project Title	Project Address	Land Use	Size	Daily	Trip Generation Estimates [a]					
						AM Peak Hour			PM Peak Hour		
						In	Out	Total	In	Out	Total

[b] LOS and delay for the clustered intersection is reported as a weighted average.

Horizon Year (2045) Volumes and Level of Service

Areawide Traffic Growth

Using the same methodology described in the Future Year section above, the existing baseline 2024 traffic volumes were adjusted upward by a factor of 0.6% (AM) and 0.1% (PM) for 21 years to reflect areawide regional growth up to Year 2045.

Horizon Year (2045) Volumes and Level of Service

Figure 15 shows the Horizon Year (2045) turning movement traffic volumes that include the estimated the ambient growth and related projects volumes. These volumes were analyzed to determine the intersection LOS and delay at each intersection. **Table 9** summarizes the Horizon Year LOS and delay. LOS E or F are projected at three of the 12 study intersections during at least one of the analyzed peak hours:

3. Bristol Parkway & Slauson (AM Peak Hour)
10. Shenandoah Avenue & Slauson Avenue (AM Peak Hour)
12. La Cienega Boulevard & Slauson Avenue (AM Peak Hour)

Horizon Year Plus Project Volumes and Level of Service

The estimated Project traffic was added to the Horizon Year (2045) traffic volumes to estimate Horizon Year Plus Project traffic volumes. shows the Future Year Plus Project turning movement traffic volumes.

Horizon Year Plus Project traffic volumes, presented in **Figure 16**, were analyzed to determine the intersection LOS and delay for each intersection. **Table 9** summarizes the Horizon Year plus Project LOS. LOS E or F are projected at four of the 12 study intersections during at least one of the analyzed peak hours:

1. Hannum Avenue & Slauson Avenue (AM Peak Hour)
3. Bristol Parkway & Slauson (AM Peak Hour)
10. Shenandoah Avenue & Slauson Avenue (AM Peak Hour)
12. La Cienega Boulevard & Slauson Avenue (AM Peak Hour)

[b] LOS and delay for the clustered intersection is reported as a weighted average.

Corrective Actions

This operations analysis was conducted assuming no signal optimization at study intersections. It can be assumed that signal timings will be updated in response to changing traffic conditions by the Horizon year. Additionally, due to the number of related projects (identified in **Table 7**) in the area that propose replacing office and commercial land uses with residential uses, peak hour directional demand will likely change due to these uses' differing patterns of inbound and outbound traffic in the AM and PM peak hours. For example, this analysis estimates an improvement in LOS and delay at the intersection of La Cienega Boulevard and Slauson Avenue (#12) in the AM peak hour in all Plus Project scenarios due to this shift in travel patterns.

Due to LOS E and F conditions under the Horizon Plus Project scenario at study intersections 1, 3, 10, and 12, corrective actions were explored in order to reduce intersection and vehicular delay. Under the Horizon Plus Project scenario, the addition of Project traffic is projected to very slightly increase overall intersection delay at one intersection (#3: Bristol Parkway and Slauson Avenue) already operating at LOS E or F and increase delay at one intersection (#1: Hannum Avenue and Slauson Avenue) from LOS D to LOS E. The addition of Project traffic is projected to reduce overall intersection delay at the other intersections already operating at LOS E or F (#10: Shenandoah Avenue & Slauson Avenue, and #12: La Cienega Boulevard and Slauson Avenue). In general, intersection delay is high throughout the area due to high traffic demand during peak hours and concentration of vehicular traffic from the single-family neighborhoods surrounding La Cienega Boulevard and Slauson Avenue at few entry/exit points. Changes in intersection delay are not considered significant impacts under CEQA.

The Project would provide a variety of voluntary TDM measures which would aim to reduce Project traffic and trip-making. Measures including a transportation coordinator, bike repair station, and subsidized ride hail services and transit passes for employees would offer alternatives to making trips in private vehicles. The full extent of the Project TDM program would reduce the trip generation and therefore reduce the additional delay caused by Project trips beyond what is assumed in this study, although not necessarily eliminating the estimated increase in delay related to the Project.

The feasibility of adding additional roadway capacity at the intersections on Slauson Avenue operating at LOS E and F was investigated. Adding east-west travel lane capacity would require substantial reconfiguration of the segment between La Cienega Boulevard and Hannum Avenue, which already features a 7 to 9-lane cross section plus a segment with residential frontage roads between Shenandoah Avenue and La Cienega Boulevard. This would likely result in impacts to dozens of adjacent properties along the corridor (including potential demolition of existing structures) and further reduce opportunities for safe walking, bicycling, and transit use. Therefore, this corrective action was not deemed feasible.

Driveway Level of Service and Queuing Analysis

Four Project driveways are proposed to serve the Project Site:

- **Access A:** One right-in/right-out only driveway on the western frontage with Bristol Parkway providing access to the east-west alley and garages for Buildings 1 and 2
- **Access B:** One full-access driveway on the eastern frontage with Uplander Way providing access to the east-west alley and garages for Buildings 1 and 2

- **Access C:** One full-access driveway on the southern frontage with Uplander Way, providing access to the garage for Building 3
- **Emergency Access:** A proposed curb cut along the eastern Project frontage on Uplander Way between Buildings 2 and 3 provides vehicle access only for emergency vehicles.

Because the fourth driveway is for emergency vehicle use only and does not connect to any of the Project's parking garages, it was not included in this analysis.

Table 10 shows estimated LOS and queue lengths for the three driveways – Access A, Access B, and Access C. Approach LOS for all driveways does not exceed LOS B in the Future Plus Project and Horizon Plus Project scenarios, and queues do not exceed one vehicle length (25 feet) in both scenarios.

Appendix D contains the complete LOS sheets for the Project driveways.

Table 10: Driveway Queueing

NO.	Driveway	Movement	Peak Hour	Future Year (2031) With Project		Horizon Year (2045) With Project	
				Driveway LOS	95th Percentile Queue Length (ft)	Driveway LOS	95th Percentile Queue Length (ft)

Neighborhood Street Segment Analysis

Twenty-four-hour street segment counts were conducted in May and June 2024 at Green Valley Circle between Centinela Avenue and Bristol Parkway. **Table 11** presents the results of the segment analysis.

The analysis used the TSCG's significant project conditions thresholds for residential streets, which would not be considered significant impacts under CEQA:

Projected Average Daily Traffic (ADT) with Project	**Project-Related Increase in ADT**
999 or Less	120 trips or more
1,000 – 1,999	12% or more of final ADT
2,000 – 2,999	10% or more of final ADT
3,000 or more	8% or more of final ADT

Based on **Table 11**, this analysis demonstrates that the Project would not create significant project conditions on the studied neighborhood street in any Project scenario. After the buildout of the Project Site, the City of Culver City would reserve the right to monitor traffic volumes on the studied neighborhood street and require traffic calming measures to be built to minimize Project cut-through traffic.

Table 11: Neighborhood Street Segment Analysis

Street Segment	Weekday Two-Way Daily Volume				Plus Project Volume		Segment Analysis			
	Existing (2024)	Future (2031) Base	Horizon (2045) Base	Project Only	Future (2031) Plus Project	Horizon (2045) Plus Project	% of Final ADT - Future Plus Project	% of Final ADT - Horizon Plus Project	Significance Threshold	Significant Project Condition?
Green Valley Cir between Bristol Pkwy & Centinela Ave	8,675	9,464	10,254	73	9537	10,327	0.8%	0.7%	+8.0%	No

Signal Warrant Analysis

As directed by the City in the MOU process (**Appendix A**), a signal warrant analysis was conducted for the Bristol Parkway & Uplander Way intersection (#5) for determination on the need for a traffic signal at this location. The satisfaction of a traffic signal warrant does not itself require the installation of a signal, and other factors relative to safety, traffic flow, signal spacing, coordination, etc. should be considered. This section summarizes the results of the signal warrant.

Using the Manual on Uniform Traffic Control Devices (MUTCD), the intersection was tested to see if its volumes meet signal warrants. The peak hour signal warrant was used for this analysis, and it is intended for use at a location where traffic conditions are such that for a minimum of 1 hour of an average day, the minor-street traffic suffers undue delay when entering or crossing a major street. The traffic counts used for this signal warrant analysis were collected in May 2024.

The Bristol Parkway & Uplander Way intersection does not trigger the signal warrant under the Future (2031) Plus Project or Horizon (2045) Plus Project scenarios in either the AM or PM peak hours. Analysis sheets for signal warrants can be found in **Appendix E**.

Parking

Off-Street Parking Supply

The CCMC no longer requires a minimum number of parking spaces as of October 2022. The Project would voluntarily provide 1,304 off-street parking spaces within three parking garages, one for each proposed building. A parking demand study was conducted at several nearby multifamily housing developments to assist in right-sizing Project parking supply with observed demand. A memorandum summarizing this study is included as **Appendix F.**

Bicycle Parking

The CCMC provides required bicycle parking rations in accordance with residential and commercial land uses. As noted above, the Project would provide a total of 305 bicycle parking spaces (31 short-term and 274 long-term) bicycle parking spaces to fulfill the CCMC requirements.

On-Street Parking

Along the Project frontage, there is currently unmetered on-street parking on Hannum Avenue; no permitted on-street parking on Bristol Parkway; and metered on-street parking on Uplander Way. Existing on-street spaces would largely be maintained. Some spaces may be removed to accommodate Project driveways and necessary red curbs to provide adequate sight distance for vehicles utilizing the driveways, as well as on-street passenger loading zones as described below.

Curb Space Allocation

Passenger and Commercial Loading

The Project shall convert two unrestricted on-street parking spaces on Hannum Avenue in front of the Building 1 entrance to passenger loading only. Re-striping of the existing Class II bicycle lane shall include green conflict markers ("elephant tracks" similar to the existing condition on the opposite side of the street) to alert drivers and bicyclists of potential cross-over traffic. The Project shall also convert approximately one metered parking space each at the entrances to Buildings 2 & 3 to passenger loading only.

Additionally, three on-site loading zones (Loading A-C) for the Project would be provided, with one providing loading space for each building.

- **Loading A:** One commercial loading zone and one residential loading zone for Building 1, accessed via the alley between Buildings 1 and 2 using Access A or Access B.
- **Loading B:** One residential loading zone for Building 2, accessed via the alley between Buildings 1 and 2 using Access A or Access B.
- **Loading C:** One residential loading zone for Building 3, accessed via the Access C driveway on Uplander Way.

Figure 17 details the location of the on-site loading zones at the Project Site.

Figure 17

Transit Stop Facilities

There is one existing transit stop along the Project frontage at the northwestern corner of the Project Site, at eastbound Hannum Avenue at the far side of Bristol Parkway. The stop is served by Culver CityBus Line 3. During construction, access would be maintained to the transit stop. Any temporary stop closure or relocation would be coordinated with the City and Culver CityBus. There are no proposed Project driveways on Hannum Avenue and therefore no potential for conflicts between transit vehicles and Project vehicles at driveways.

Bicycle Parking

There are no existing bicycle parking facilities along the Project frontage. Short-term bicycle parking would be provided at the exterior of Project frontage along Hannum Avenue and Uplander Way and would not be located directly adjacent to Project driveways. Long-term bicycle parking would be located in enclosed rooms internal to the Project Site.

Transit Operations Analysis

Per the TSCG, the purpose of the transit operations analysis is to determine what effects the proposed Project may have on public transit demand, capacity, delay, and conditions. The Project is expected to generate more than 300 new vehicle trips in the PM peak hour. Therefore, per the TSCG, a transit delay analysis is required.

Transit Demand and Capacity

Vehicle trip generation rates used in this study conservatively do not assume any Project trips would utilize public transit. This transit demand and capacity analysis assumes that at least 5 percent of Project trips would utilize public transit, and based on research cited by Caltrans assumes that average vehicle occupancy may be as low as 1.5 persons per vehicle. Using these factors, the Project is estimated to attract approximately 30 new transit trips in the AM peak hour and 32 new transit trips in the PM peak hour. **Figure 3**, introduced in Chapter 2, shows data for transit services near the Project Site. This transit demand and capacity analysis considers only those services that have bus stops or rail stations within a quarter mile (a reasonable walk for most people to access transit service) of the Project Site. These include Culver CityBus Lines 3 and 5C2 and Metro Bus Lines 108 and 110. Based on existing transit headways, up to 16 buses per hour would service bus stops in a given direction within a quarter mile of the Project Site during both the AM and PM peak periods. However, just beyond the quarter mile radius is the Culver City Transit Center, where connections to multiple additional routes are possible, substantially increasing the range someone can access by transit.

Assuming a capacity of 83 total (seated and standing) passengers per 40 foot long bus, the bus transit capacity that would serve the Project Site would be 2,656 passengers per hour during peak periods (capacity of 1,328 for all buses heading north- or eastbound, and the same for buses heading south- or westbound).

Using the trip direction proportions from the trip distribution discussed earlier in **Figure 8** estimated Project transit trips can be allocated to those transit services with stops or stations within a quarter mile of the

Project. **Table 12** displays headways, capacity, ridership data, and estimated Project transit trips that would utilize each of the services. The Project transit trips are a conservative estimate that assumes all riders traveling on a particular transit line direction would board the same vehicle at the same time. Even with those assumptions, no single transit line is likely to receive greater than 15 additional riders in each peak hour and no transit line would see boardings representing more than 6% of peak hour transit vehicle capacity. Current line-level total ridership is also shown.

Table 12: Transit Demand and Capacity

Line	Weekday Average Frequency (min.)			Peak Hour Transit Vehicles per Hour	Seated Vehicle Capacity	Peak Hour Seated Capacity	Weekday Line Ridership	Direction	AM Project Trips	PM Project Trips	AM % of Capacity	PM % of Capacity
	Peak	Mid-Day	Evening									
Culver CityBus												
3	20	20-30	30	3	83	249	689	North/South	7	8	3%	3%
5C2	17	-	-	3	83	249	521	East/West	5	6	2%	2%
Metro Bus												
108	8	10	20-60	5	83	415	13,665	East/West	5	6	1%	1%
110	10	15	45-60	5	83	415	7,042	East/West	5	6	1%	1%

Notes:

Culver CityBus Line 5C2 only operates when school is in session. It provides northbound only service in the morning and southbound only service in the afternoon.

Transit Delay

As required by the TSCG, an analysis to estimate the transit delay caused by the Project was conducted. This evaluation was based on three components: traffic congestion delay, transit reentry delay, and passenger boarding delay. Existing transit routes, stops, frequency, and pre-pandemic ridership can be found in **Figure 3**.

Traffic Congestion Delay

Traffic congestion delay is the additional time experienced by a transit vehicle as it travels between stops across one or more intersections in the corridor due to congestion caused by other vehicular traffic traveling parallel or perpendicular to the transit flow. LOS can be used to qualitatively describe the operating conditions of study intersections near the Project and approximate any Project-related changes in traffic congestion delay.

As shown in **Table 8** and **Table 9**, minimal changes in delay are anticipated due to Project trips, and in some cases, delay is expected to decrease at study intersections in the Future Plus Project and Horizon Plus Project scenarios (this is primarily due to change in directional traffic volumes between the Project's land use trip generation and that of the existing uses on site). Because changes in delay in the Future Plus Project and Horizon Plus Project scenarios are minimal, changes to delay for transit vehicles would also be minimal.

Transit Reentry Delay

Transit reentry delay is the wait time for a sufficient gap in traffic flow to allow a bus to pull back into the travel lane. Transit reentry delay can be approximated using the approach delay for the direction that a transit vehicle would be traveling near study intersections. It is expected that transit reentry delay could marginally increase as a result of increasing traffic congestion, both without and with the Project. However, bus stops near the Project Site are all located near to signalized intersections where re-entry gaps are available between signal phases (as opposed to stops located on a long unsignalized corridor where the flow of traffic might be uninterrupted for long periods).

Passenger Boarding Delay

Passenger boarding delay is the sum at each transit stop of passenger boarding delay (calculated by using a second per passenger boarding/alighting and based on projected transit boarding). It is estimated that the Project would result in approximately 22 new transit trips in the AM peak hour and 26 new transit trips in the PM peak hour. Using the same methodology outlined in the transit demand and capacity analysis, it is estimated that the maximum boardings per peak hour for any given transit vehicle would not exceed 7 trips in the AM or PM peak hour. Assuming one second per passenger boarding, the project would therefore be anticipated to increase passenger boarding delay by up to 7 seconds per bus trip in the AM and PM peak hours. These are relatively marginal effects, especially as it is unlikely that the maximum number of passengers on a given route would be boarding the same bus within that peak hour, the effect is likely to be at most a few seconds of additional passenger delay for any given trip on any given line.

Hazardous Conditions Assessment

The intent of this assessment is to determine the potential for hazardous conditions for transit operations, vehicles, and users due to the Project's vehicular trip generation and Project design elements. As discussed in Chapter 2, the Project Site is bordered by Hannum Avenue, Bristol Parkway, and Uplander Way. Culver CityBus Lines 3, 4, 5C2, and 6/6R, and Metro Lines 102, 108, and 110 operate in the vicinity of the Project. Only Culver CityBus Line 3 has a stop immediately along the Project's frontage, at the southeast corner of Hannum Avenue and Bristol Parkway. There are no Project driveways on Hannum Avenue where the sole bus stop along the Project frontage (Culver CityBus Line 3 on Hannum Avenue at Bristol Parkway) is located.

Because Project driveways would be designed according to applicable City standards and there would be no new driveways on streets with existing bus service, there would no new potential points of conflict between buses and vehicles. The Project would also be designed to minimize obstructions to sightlines. Project trips would ingress/egress on Bristol Parkway and Uplander Way. There is no transit service on Uplander Way. The driveway on Bristol Parkway would be right-in/right-out only, minimizing hazardous conditions for transit. An estimated 9 vehicles and 17 vehicles would take a right-turn into the Project Site from Bristol Parkway during the AM and PM peak hours, respectively. It is expected that the driveway would be able to accommodate the additional right-turn ingress movements created by the Project. Therefore, no queues are expected to form in the right-most travel lane where a bus would be traveling. Consequently, the Bristol Parkway and Uplander Way driveways are not expected to create potentially hazardous conditions for transit.

Project Construction Analysis

The Project is expected to be constructed over an approximately 45-month period with forecasted completion in 2031. It is estimated that approximately 7,650 truckloads of export would be hauled from the Project Site for excavation. It is estimated that approximately 2,310 truckloads of concrete will be brought into the Project Site.

Anticipated Construction Activity

Project construction is expected to occur in stages starting in January 2027 and finishing in late 2031. Below are the following phases of construction and their estimated durations:

- Phase 1 (Building 1)
    - Phase 1.1: Demolition – 3 months
    - Phase 1.2: Grading/Excavation – 3 months
    - Phase 1.3: Concrete Structure – 6 months
    - Phase 1.4: Framing – 6 months
    - Phase 1.5: Finishes – 9 months
    - Phase 1.6: Paving/Site Work – 4 months

- Phase 2 (Building 2)
    - Phase 2.1: Demolition – 3 months
    - Phase 2.2: Grading/Excavation – 3 months
    - Phase 2.3: Concrete Structure – 6 months
    - Phase 2.4: Framing – 6 months
    - Phase 2.5: Finishes – 9 months
    - Phase 2.6: Paving/Site Work – 4 months
- Phase 3 (Building 3)
    - Phase 3.1: Demolition – 3 months
    - Phase 3.2: Grading/Excavation – 3 months
    - Phase 3.3: Concrete Structure – 6 months
    - Phase 3.4: Framing – 6 months
    - Phase 3.5: Finishes – 9 months
    - Phase 3.6: Paving/Site Work – 4 months

Construction Trucks

Haul Trucks

During construction, up to 184 one-way haul truck trips per day are anticipated on peak haul days.

Hauling hours are anticipated to begin at 7:00 AM and continue to 5:00 PM, Monday through Friday. The inbound haul route would likely utilize I-405 to Sepulveda Boulevard, Slauson Avenue, Bristol Parkway, Hannum Avenue, and Uplander Way to access the Project Site. The outbound haul route would likely utilize Uplander Way, Hannum Avenue/Buckingham Parkway, and Slauson Avenue to access landfill sites. These proposed haul routes would avoid routing trucks past the Culver City Fire Department station on Bristol Parkway south of Hannum Avenue.

Equipment and Delivery Trucks

In addition to haul trucks, the Project is expected to generate equipment and delivery truck trips during construction. One example would be for concrete delivery, which would be required for the subterranean parking and the buildings on-site. Other deliveries could include plumbing supplies, electrical fixtures, and items used in furnishing the buildings. These materials would be delivered to the Project Site and stored on-site. These deliveries are expected to occur in variously sized vehicles including small delivery trucks, cement mixer trucks, and 18-wheel trucks. Additionally, construction equipment would have to be delivered to the Project Site. This equipment could include cranes, bulldozers, excavators, and other large items of

machinery. Most of the heavy equipment is expected to be transported to the Project Site on large trucks such as 18-wheelers or other similar vehicles.

Up to 100 one-way delivery/concrete truck trips are expected per day during the peak construction phase of pouring the foundation.

Construction Employees

The number of construction workers would vary throughout the construction period. Up to 439 one-way worker trips are expected per day during the peak construction phase.

Construction Worker Parking

The applicant will direct construction workers to park at an off-site location to be determined at a future date. Staging and parking areas during construction would initially be located at an off-site location to be determined at a future date. Workers would park in the Project's subterranean parking garage after it is constructed and safe to occupy.

Construction Analysis

A detailed Construction Management Plan, including lane closure scenarios, a detour plan, haul routes, a staging plan, and construction worker parking, would be prepared and submitted to the City for review and approval prior to construction. The Construction Management Plan would formalize how construction would be carried out and identify specific actions that would be required to reduce effects on the surrounding community.

Temporary Traffic Constraints

Long-term closures to primary travel lanes are not anticipated to occur during construction of the Project along Hannum Avenue or Uplander Way. If necessary to maintain access to the sidewalk and crosswalks along Hannum Avenue or Uplander Way during construction of the Project, a pedestrian canopy would be constructed. Inbound and outbound vehicle trips associated with construction (construction workers, deliveries, haul trucks, and heavy equipment) would be routed to the Project Site via Hannum Avenue to Uplander Way or Bristol Parkway to Uplander Way (for inbound vehicles traveling north of Bristol Parkway) in order to avoid congestion or driveway blockages due to queueing on Bristol Parkway at the Culver City Fire Department station access driveway.

Temporary Loss of Access

The existing land uses near the vicinity of the Project Site will remain open throughout construction. Pedestrian and vehicular access to properties located adjacent and near to the Project Site would remain open and unobstructed for the duration of construction. No loss of ADA pedestrian access to transit stops, stations, or facilities is anticipated. On-street parking is currently permitted on the Project frontage along Hannum Avenue and Uplander Way. During construction, use of on-street parking spaces may be temporarily restricted to accommodate construction activity. After construction is completed, on-street parking on both Hannum Avenue and Uplander Way would be restored, except for the proposed on-street

passenger loading zones noted in the Curb Space Allocation section. Project construction will otherwise not affect on-street parking availability.

Temporary Loss of Bus Stops or Rerouting of Bus Lines

Project construction would not require temporary loss or relocation of bus stops or rerouting of bus lines. Access to the existing bus stop at the southeast corner of Hannum Avenue and Bristol Parkway would be maintained throughout construction. If temporary closure of the stop were needed to accommodate construction, transit riders could utilize the existing Culver CityBus Line 3 existing stop at the southeast corner of Hannum Avenue and Uplander Way (approximately 675 feet west).

5. Summary and Conclusions

This study was undertaken to analyze the potential transportation impacts of the proposed 5757 Uplander Project. The following summarizes the results of this analysis:

- The Project will involve the demolition of approximately 146,000 sf of office space and involves the development of four adjacent parcels in the City of Culver City. The Project will construct three seven-story buildings that would provide a total of 1,077 new multifamily residential units (inclusive of 78 affordable units) and 5,772 square feet (sf) of new retail floor area. The four Project driveways will be located on Bristol Parkway and Uplander Way, one of which will be for emergency vehicle access only.
- Based on the TSCG, the commercial portion of the Project is screened from having to conduct a VMT analysis and is presumed to have a less than significant impact on VMT as it is a locally-serving retail project smaller than 50,000 square feet. The residential portion of the Project is required to complete a VMT analysis. The Project's daily household VMT per capita is 6.2, lower than the City threshold of significance of 7.1.
- The Project features, location, and design would be consistent with both City's plans, programs, ordinances, and policies that support alternative transportation and have been adopted to protect the environment. Therefore, the Project would have a less than significant impact on both City's transportation-related plans, programs, ordinances, and policies.
- The Project is not projected to substantially increase hazards, conflicts, or preclude City action to fulfill or implement projects associated with surrounding transportation networks and will contribute to overall walkability through enhancements to the Project Site and streetscape. Therefore, the Project is expected to have a less than significant impact.
- The LOS analysis for the Existing scenario determined that two study intersections currently operate at LOS E/F. In the Future (2031) scenario, two study intersections are forecasted to operate at LOS E/F. In the Horizon (2045) scenario, three study intersections are forecasted to operate at LOS E/F.
- The Project would generate an estimated 186 trips (-87 inbound/273 outbound) in the AM peak hour and 215 trips (223 inbound/-8 trips outbound) in the PM peak hour. Due to the proposed change in land use from office to residential, peak period traffic distribution patterns will shift, leading to negative inbound AM and outbound PM trip generation.
- The LOS analysis for the Existing Plus Project scenario determined that two intersections are forecasted to operate at LOS E/F. In the Future Plus Project scenario, two intersections are forecasted to operate at LOS E/F. In the Horizon Plus Project scenario, four intersections are forecasted to operate at LOS E/F. In all three Plus Project scenarios, most intersections would experience minor increases in delay while others would experience slight decreases in delay.
- The street segment analysis for the Existing plus Project, Future Plus Project, and Horizon Plus Project scenarios determined that the proposed Project would not result in TSCG significant project conditions along the street segment selected for analysis.

- The signal warrant analysis for the intersection of Bristol Parkway and Uplander Way determined that the intersections does not meet peak hour warrants in the Existing plus Project, Future Plus Project, or Horizon Plus Project scenarios.
- The Project could generate up to 22 new transit trips in the AM peak hour and 26 new transit trips in the PM peak hour. The Project is estimated to add no more than 15 seconds of delay per bus trip.
- No transit routes are anticipated to incur substantial additional delay related to Project trips.
- The Project would not worsen any hazardous conditions for transit operations.

Appendix A: Memorandum of Understanding (MOU)

Docusign Envelope ID: 1984CB67-E4BD-4457-84B9-ADAF95FA2B1B

Memorandum of Understanding for Transportation Study

This Memorandum of Understanding (MOU) acknowledges and agrees to all the City of Culver City requirements and fees for the review of a transportation study for the following project.

Date Submitted: 7/22/24 MOU Version # 2

Project Name: 5757 Uplander Project

Project Address: 5757 Uplander Way

Project Description: Three seven-story buildings with 1,106 dwelling units and 5,258 sf of retail space, replacing four buildings with 146,000 sf of office space

Land Use	Gross Floor Area (sq. ft.) *Defined per latest ITE publication*	Residential Units (#)
Multi-Family Housing	n/a	1,021
Multi-Family Housing (Affordable)	n/a	85
Restaurant (High Turnover Sit-Down)	5,258 sf	n/a

Project Horizon Year: 2027

Ambient Growth Rate (% per year): 0.6% AM, 0.1% PM

Directional Distribution (%): N: 33% S: 17% E: 42% W: 8%

Trip Generation Rates: Show AM, PM and daily trip generation rates for each land use and attach total daily trips generation calculations. Indicate ITE Latest Edition/Other 11th Edition

Land Use	ITE Code#	AM Trips In	AM Trips Out	PM Trips In	PM Trips Out	Daily Totals In	Daily Totals Out
			See Table 1				

Study Intersections: Show all study intersections, intersections subject to capacity analysis credit for advanced traffic signal control synchronization, whether intersections are signalized or non-signalized, and use the same numbering system for all lists of intersections and figures in the study.

No.	Intersection	Signalized/Non-Signalized	Jurisdiction
	See Figure 3		

Residential Streets: Show all residential streets to be studied.

No.	Street Name	Limits	Jurisdiction
1	Green Valley Circle	Bristol Parkway / Buckingham Parkway	Culver City

also see Figure 3

Docusign Envelope ID: 1984CB67-E4BD-4457-84B9-ADAF95FA2B1B

Trip Credits: Indicate trip credits to be requested (subject to City approval)

	Trip Credits	Yes/No
Existing Uses	See Table 1	
Pass-By Trips	See Table 1	
Internal Trip Capture	See Table 1	
Transit-Oriented Development (TOD)	n/a	
Transportation Demand Management (TDM)	See Table 1	

Related Projects: Before the start of any proposed project analysis, consultants shall: Table 2 & Figure 5

1. Obtain a list of related projects from the Culver City Current Planning Division and other affected jurisdictions.
2. Prepare a draft list of "related projects specific to the proposed project."
3. Obtain written approval from the City of the "related projects specific to the proposed project."

Maps: The following maps shall be attached to the MOU:

1. A map showing the study intersections and street segments to be analyzed, including City limit lines where applicable. Figure 3
2. A map showing the project's trip distribution percentages for each land use (inbound and outbound) on the area's road network. Figure 2 & Figure 4
3. A map showing the project's trip assignments at the study intersections and project driveways, as well as road segments when applicable.
4. A site plan of the project showing property lines, alleys, project's driveways and nearby driveways and intersections on both sides of the street including dimensions. Figure 1

Proposed Mitigation and Transportation Improvements: Any proposed transportation improvement(s) or mitigation measure(s) shall be listed and accompanied by plans of the existing and proposed improvements, including city limit lines and existing and proposed property lines. The City may initially accept conceptual plans to be included in the Transportation Study. Detailed design of such improvements will be part of the project's plans submittals.

Post-Occupancy Traffic Counts: By signing below, the Property Owner/ Developer/Applicant hereby agrees to pay for and submit to the City a post-occupancy traffic count analysis of the development to the satisfaction of the City. The analysis shall determine the amount of actual traffic (motor vehicle, bicycle, and pedestrian) generated by the development compared to the ITE trip generation rates. The analysis shall include a traffic count of all onsite driveways taken upon reaching eighty-five percent (85%) occupancy of the total building gross floor area or within one (1) year of the issuance of the first Temporary Certificate of Occupancy (TCO), as determined by the City. The data shall be used to confirm the findings in the approved study and not result in any additional traffic mitigation measures and/or conditions of approval on the subject project.

Fees: Payment of a fee to the City's PWD for the City's processing of the MOU shall be required before the City approves the MOU. Payment for review of the Transportation Study shall be paid before the City's PWD completes its review of the Transportation Study. Said fees shall be per the most recent Fee Schedule as approved by the City Council.

FEHR PEERS

Memorandum

Date: May 2024

To: City of Culver City

From: Jeremiah LaRose, Tom Gaul, and Andrew Jarnagin, Fehr & Peers

Subject: Methodologies and Assumptions for 5757 Uplander Transportation Impact Analysis

LA23-3476

This memorandum documents the methodologies and assumptions which will be used in the Transportation Study to be prepared as part of the environmental impact report (EIR) for 5757 Uplander, located at 5800 Hannum Avenue, 6031 Uplander Way, 5821 Uplander Way, and 5835 Uplander Way. This memorandum serves as a supplement to the City of Culver City Memorandum of Understanding (MOU) for Transportation Study form to approve the approach for the transportation impact analysis. The approach detailed here addresses analyses laid out in the City of Culver City Transportation Study Criteria and Guidelines.

Because three proposed study intersections are in the unincorporated Los Angeles County, the MOU will also require approval from LACDPW.

Project Description

The Project involves the development of four adjacent parcels in the City of Culver City (APNs 431-400-5021, 431-400-5004, 431-400-5003, and 431-400-5002). The Project proposes to construct three seven-story buildings that would provide a total of 1,106 dwelling units (inclusive of 85 affordable units), 5,259 sf of retail, and 1,564 vehicular parking spaces within three separate three-level semi-subterranean garages for each proposed building. The Project would provide 278 long-term bicycle parking spaces and 28 short-term bicycle parking spaces, in compliance with City codes. The Project would also include pedestrian design features, including plazas located along both Hannum Avenue and the southeast frontage along Uplander Way, as well as an internal north-south pedestrian paseo connecting private courtyards at each building.

Docusign Envelope ID: 1984CB67-E4BD-4457-84B9-ADAF95FA2B1B

The Project proposes four driveways for site access:

- Driveway A: A driveway at Bristol Parkway (on the western frontage), providing access to the residential garages in Buildings A & B and the retail garage in Building A. A right-in/ right-out condition will be considered for Driveway A.
- Driveway B: A driveway at Uplander Way (on the eastern frontage), providing access to the residential garages in Buildings A & B and the retail garage in Building A.
- Driveway C: A full-access driveway at Uplander Way (on the southern frontage), providing access to the residential garage in Building C.
- Driveway D: An emergency access-only driveway at Uplander Way (on the eastern frontage).

Currently the EIR project description is expected to rely on the driveways proposed above.

The site is currently developed with four office buildings totaling 146,414 sf, 552 surface parking spaces, and vehicular access that supports the existing uses on the Project Site.

Figure 1 shows the site plan for the Project. See the proposed approach for Site Plan Review in the following section.

CEQA Transportation Analysis Requirements

This section describes the proposed approaches for the CEQA transportation analysis as outlined in the Culver City Guidelines.

Programs, Plans, Ordinances, and Policies

Fehr & Peers will review plans, programs, ordinances, and policies related to the transportation system in the City of Culver City.

Vehicle Miles Traveled Analysis

The Project will follow the lead agency's guidance for the VMT analysis. The Project is not screened from conducting a vehicle miles traveled (VMT) analysis and the applicant is required to conduct the analysis. Separate analysis is not required for the retail component is not required as it is less than 50,000 square feet.

Geometric Design Hazards

Fehr & Peers will review potential on-street geometric design hazards caused by the Project per the City of Culver City's guidance.

Freeway Safety Analysis

The Project is not expected to generate 25 or more Project trips on any freeway off-ramps in either the AM or PM peak hour. Therefore, a freeway safety analysis is not required, per the LADOT TAG Freeway Safety Analysis Screening.

Supplemental Transportation Analysis Requirements

This section describes the proposed approaches for the non-CEQA transportation analysis for the City of Culver City. Supplemental analyses are required if a project is estimated to add 250 or more new daily trips. Because the Project is estimated to add 3,725 new daily trips, the following analyses will be conducted.

Traffic Operations

Project Trip Generation

Trip generation rates from the Trip Generation, 11th Edition (Institute of Transportation Engineers [ITE], 2021) were used to estimate the number of trips for the Project. ITE trip generation rates for Mid-Rise Multi-Family Housing (ITE Code 221) for a Dense Multi-Use Urban context were used to estimate trips for the residential use, and rates for High-Turnover Sit-Dow Restaurant (ITE Code 932) were used to estimate trips for the retail use. This variant of the ITE rate already accounts for transit mode share. **Table 1** presents the estimated trip generation. The Project is expected to

Docusign Envelope ID: 1984CB67-E4BD-4457-84B9-ADAF95FA2B1B

generate an estimated 192 net vehicle trips (-87 inbound/279 outbound) during the AM peak hour and 223 vehicle trips (228 inbound/-5 outbound) during the PM peak hour. A Transportation Demand Management (TDM) reduction was applied to the residential use for off-street parking pricing and pedestrian-oriented site design. The reduction percentage was derived from the Culver City VMT Tool. A trip credit was applied to account for the trip generation of the existing office land use (ITE Code 710) that currently occupy the Project site.

Trip Distribution

The forecasted regional vehicular trip distribution of the project was modeled in the Culver City travel demand model in a 2019 scenario. This regional distribution was developed based on several factors including the typology of proposed office land use, the geographic distribution of population and activity centers in the surrounding area, and the project access points in relation to the surrounding street and freeway system. The regional trip distribution was translated into a local trip distribution based on street and lane configuration, allowable turning movements, and likely vehicular ingress/egress routes.

Figure 2 illustrates the trip distribution pattern of the project trips.

NET INCREMENTAL EXTERNAL TRIPS										3,725	-87	279	192	228	-5	223

Notes:

[a] Source: Institute of Transportation Engineers (ITE), *Trip Generation, 11th Edition* , 2021.

[b] Internal capture represents the percentage of trips between land uses that occur within the site. It is informed by MXD 2.0 Mixed Use Trip Generation Methodology, which incorporated the findings of NCHRP Project 8-51 as described in "Improved Estimation for Internal Trip Capture for Mixed-use Developments," ITE Journal, August 2010.

[c] Project design features - off-street parking pricing and pedestrian-oriented design - are applicable to residential uses to reduce the number of vehicle trips to/from the Project Site. Values are derived from the Culver City VMT Tool.

[d] Pass-by trip adjustment applied to account for the percentage of trips that would already be on the adjacent roadway but make a stop by the Project Site. ITE pass-by rates for this land use are extremely high and are derived from primarily rural and suburban sites. The pass-by rate for high turnover restaurants (20%) from the LADOT Transportation Assessment Guidelines (TAG) is used as a better representation of travel conditions in the project area.

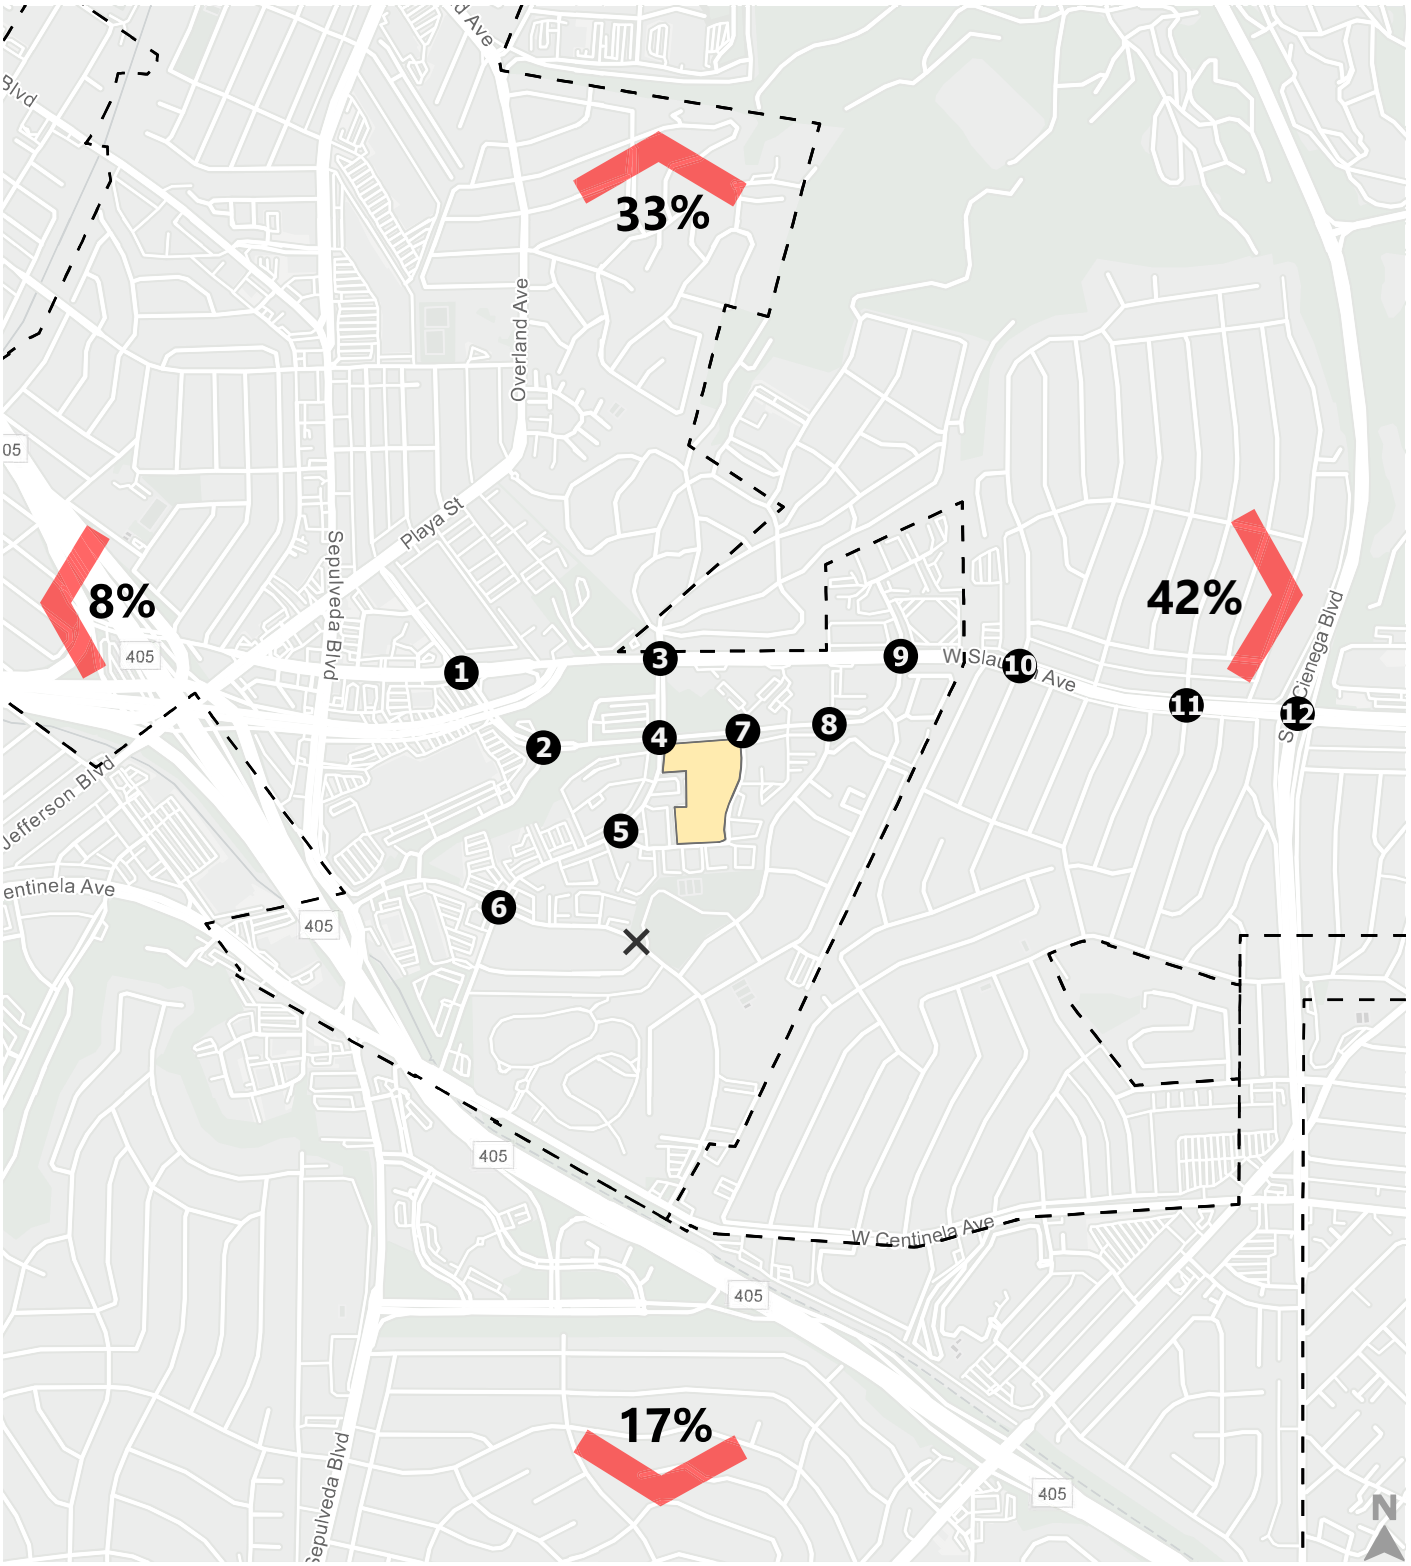

Figure 2

Project Trip Distribution

Docusign Envelope ID: 1984CB67-E4BD-4457-84B9-ADAF95FA2B1B

Study Intersections and Street Segments

This study will analyze the following intersections, shown in **Figure 3**:

1. Hannum Avenue & Slauson Avenue
2. Fox Hills Drive & Hannum Avenue
3. Bristol Parkway & Slauson Avenue
4. Bristol Parkway & Hannum Avenue
5. Bristol Parkway & Uplander Way
6. Bristol Parkway & Green Valley Circle
7. Uplander Way & Hannum Avenue
8. Buckingham Parkway & Hannum Avenue
9. Buckingham Parkway & Slauson Avenue
10. Shenandoah Avenue & Slauson Avenue (Los Angeles County)
11. Corning Avenue & Slauson Avenue (Los Angeles County)
12. La Cienega Boulevard & Slauson Avenue (Los Angeles County)

All study intersections except #5 are signalized. As noted above, the MOU will also require approval from LACDPW because three proposed study intersections are in the unincorporated Los Angeles County.

Estimated Project trips at driveways and study intersections are shown in **Figure 4.** Pass-by trip volume was added only to Driveway A, which provides access to the retail parking area.

Docusign Envelope ID: 1984CB67-E4BD-4457-84B9-ADAF95FA2B1B

Data Collection (Traffic Counts)

Weekday peak hour counts will be collected at the study intersections to determine turning movement volumes. These counts will be used as the base year for the Existing analysis.

Buildout/Future Year Forecasts

A list of pending and approved related projects from Culver City in the vicinity of the Project that are expected to be completed by the buildout horizon will be included in the forecasting effort for Future scenarios. **Figure 5** illustrates the related projects within a 1 mile radius of the Project site. **Table 2** shows the list of related projects and estimated trip generation.

An ambient growth rate of 0.6% per year for the AM peak hour and 0.1% for the PM peak hour will be used to forecast future year volumes. This growth rate was determined using the Culver City travel demand model.

Related Projects

Docusign Envelope ID: 1984CB67-E4BD-4457-84B9-ADAF95FA2B1B

Intersection Level of Service (LOS) Analysis

The assessment of the proposed project will involve evaluating intersection level of service (LOS) for the following scenarios during weekday AM and PM peak hour conditions:

- Existing
- Existing with Project
- Future (2027) Base
- Future (2027) with Project

Any adverse project traffic effects will be identified by comparing Existing LOS to Existing with Project LOS and Future (2027) Base LOS to Future (2027) with Project LOS. Based on the location of the study intersection, each agency's respective criteria will be used to identify project traffic effects.

Synchro 11 software and the Highway Capacity Manual 6th Edition (HCM) methodology will be used to evaluate the operation of the study intersections. Fehr & Peers assumes that the intersection analysis will require microsimulation in the immediate vicinity of the Project site to correctly evaluate the closely-spaced intersections and new geometric and signal changes that have taken place since 2019.

Driveway LOS and Queuing Analysis

Synchro 11 software and the Highway Capacity Manual 6th Edition (HCM) methodology will be used to evaluate the operation of the Project driveways.

Neighborhood/Residential Street Analysis

A neighborhood/residential street analysis will be conducted on Green Valley Circle between Bristol Parkway and Centinela Avenue. See **Figure 2** for Project trip distribution as derived from the Culver City travel demand model.

Transit Operations Analysis

Travel Demand/Capacity by Route Analysis

The Project will analyze transit demand by route based on the trip generation estimates and mode split. The new transit trips will be assigned to the transit routes/stops that serve the project site to estimate whether the existing capacity can accommodate the increase in transit trips generated by the Project. **Table 3** and **Figure 6** show the transit routes within one mile of the Project site.

Transit Delay by Route Analysis

Based on the preliminary trip generation as shown in **Table 1**, the Project is estimated to generate more than 3,000 daily vehicles trips and therefore will conduct a qualitative transit delay analysis per the Culver City Guidelines.

Docusign Envelope ID: 1984CB67-E4BD-4457-84B9-ADAF95FA2B1B

Hazardous Conditions

The Project will assess the potential for hazardous conditions for transit operations due to the Project's vehicular trip generation and design elements.

Site Plan Review

A marked-up site plan will illustrate vehicles maneuvering within the site. This review will also include bicycle/pedestrian access to the Project site.

Proposed Mitigation and Transportation Improvements

Mitigations and transportation improvements, particularly related to lane configuration on Bristol Parkway along the Project frontage and at Hannum Avenue, may be proposed pending analysis in the Transportation Study. Considerations will include the clear zone at Culver City Fire Department Station No. 3 and planned Class II bike lanes on Bristol Parkway as part of the Fox Hills Neighborhood Traffic Management Plan and Bikeways Project. A signal warrant analysis will also be conducted for the intersection of Bristol Parkway and Uplander Way.

Docusign Envelope ID: 1984CB67-E4BD-4457-84B9-ADAF95FA2B1B

Table 3: Transit Lines within One Mile of the Project Site

Line	Description	Peak Hour Headway

RE: ESTU2025000080 -Traffic Scoping Document Review - 5757 Uplander Way

From Nicolas Akli <NAkli@dpw.lacounty.gov>
Date Mon 4/21/2025 3:41 PM
To Andrew Jarnagin <A.Jarnagin@fehrandpeers.com>
Cc Shirley Lai <slai@dpw.lacounty.gov>; Mingliang Shi <mshi@dpw.lacounty.gov>; Kent Tsujii <KTSUJII@dpw.lacounty.gov>

[EXTERNAL EMAIL]

Hi Andrew,

We have completed our review of the traffic scoping document for the mixed-use development at 5757 Uplander Way. We generally concur with the findings of the traffic scoping document; thus, the project may proceed with submitting its Transportation Impact Analysis.

Once prepared, the TIA study can be submitted to Culver City for Review and Approval. Please let us know when the TIA is submitted to the City so we can coordinate with them.

Best Regards,

Nicolas Akli, EIT
Civil Engineering Assistant
Los Angeles County Public Works
Office: (626) 300-4810

Subject: Re: ESTU2025000080 -Traffic Scoping Document Review - 5757 Uplander Way

CAUTION: External Email. Proceed Responsibly.

Hi Nicolas,

Please see attached - I've added existing traffic counts and their associated quick figures to the end of the MOU, as well as a note to both quick figure pages clarifying that PM peak hour volumes are shown in parentheses.

In terms of the comment about additional back up required for Figure 4, is there anything beyond the trip generation rates and distribution per the Culver City model described on pgs. 4-5, Table 1, and Figure 2 that you're looking for detail on?

Thanks,

Appendix B: VMT Tool Reports

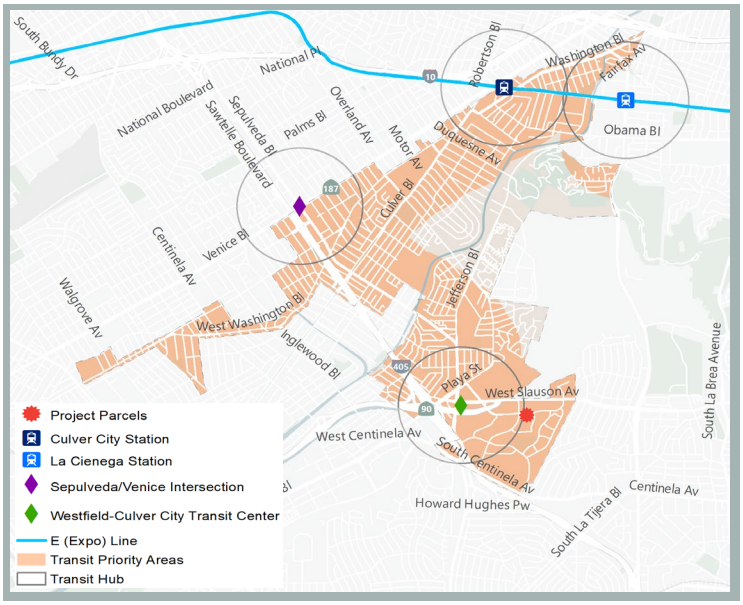
Project Screening

Apply to Full Project

Is this project within ½ mile of one of the following transit hubs? - Culver City Expo Station - La Cienega/Jefferson Expo Station - Westfield-Culver City Transit Center - Sepulveda/Venice intersection	No
Is the project located within any TPA and are at least 15% of the on-site residential units are affordable?	No
Does this project generate fewer than 250 daily trips?	No

Apply to Specific Land Uses

Is the retail component of project fewer than 50,000 square feet in size at every store?	Yes
Is this residential component of the project 100% affordable housing?	No



Project Daily Trips 4,770

Project Land Use

Proposed Project Summary

	Total Daily		Household VMT				Work VMT			
	Trips	VMT	City VMT per capita	Project VMT per capita	Project vs. City Difference (%)	Significant VMT Impact?*	City VMT per employee	Project VMT per employee	Project vs. City Difference (%)	Significant VMT Impact?*
Proposed Project	**4,566**	**32,887**	**8.3**	**6.2**	**-25.3%**	**No**	**10.1**	**N/A**	**N/A**	**N/A**
Proposed Project w/ Mitigation	**4,566**	**32,887**	**8.3**	**6.2**	**-25.3%**	**No**	**10.1**	**N/A**	**N/A**	**N/A**

* A significant impact occurs unless the project metric is 15% or more below the City metric. For VMT per capita, the project metric must be below 7.1 for VMT per employee the project must be below 8.6.

VMT Tool - Report

Transportation Demand Management Strategies

TDM VMT Adjustments Summary *

	Residential	Office/Retail/Other	Combined Total
Proposed Project	-8.6%	-0.1%	-3.9%
Proposed Project w/ Mitigation	-8.6%	-0.1%	-3.9%

* The TDM Adjustments Summary shows the combined total effect of all selected TDM strategies by land use. These reductions are fully reflected in the Total VMT above, but only those strategies and land uses that are relevant to each efficiency metric are reflected in the Household VMT and Work VMT efficiency metrics.

HCM 7th LOS	B

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 7th computational engine requires equal clearance times for the phases crossing the barrier.

Appendix F: Parking Demand Study

FEHR PEERS

Memorandum

Date: April 22, 2024

To: Andy Beck, Link Logistics

From: Jeremiah LaRose & Andrew Jarnagin, Fehr & Peers

Subject: Parking Demand Study for 5757 Uplander Project

LA23-3476

This memorandum documents the results of parking demand studies conducted at three multi-family residential properties in Los Angeles to assist in determining planned parking supply at 5757 Uplander (Project) in Culver City, CA. In 2022, Culver City removed minimum parking requirements in new developments. In the absence of a requirement, this study will inform an optimal parking supply for the proposed Project. Additionally, an overview of existing on-street parking conditions in the vicinity of the Project is provided.

Project Description

Current plans for the Project include 1,106 dwelling units and a small retail component (5.26 ksf), with a total of 1,461 parking spaces provided. As 26 of those spaces are designated for the retail use, they are not considered for the purposes of this study to estimate residential parking demand for the Project.

Off-Street Parking Studies

Parking occupancy studies at three comparable residential developments were conducted in February and March 2024 on Wednesday, Thursday, and Sunday nights shortly before midnight. These collection days and times were selected to capture maximum parking occupancy, based on our experience conducting similar studies at residential sites. Details of the study properties, including distance from 5757 Uplander, unit mix, current occupancy, and parking inventory, are provided in **Table 1**. Current plans for the Project are also shown for reference.

Table 1: Parking Study Site Context

Property	Distance from 5757 Uplander	Opening Year	Studio Units	1 BD Units	2 BD Units	Total Units	% Units Occupied	Parking Space Inventory (Residents)	Parking Space Inventory (Visitors)	Parking Space Inventory (Leasing)	Total Parking Space Inventory	Parking Spaces Provided per Unit	Unbundled Parking?
Villas at Playa – Sausalito (12411 W Fielding Cir)	1.4 mi (W)	2015	60 (8%)	300 (43%)	343 (49%)	703	95%	1,178	169	6	1,353	1.92	No
Villas at Playa – Malibu (12665 Village Ln)	1.8 mi (W)	2015	23 (5%)	254 (52%)	214 (43%)	491	95%	851	124	8	983	2.00	No
Kinley West LA (6711 S Sepulveda Bl)	0.7 mi (SW)	2021	35 (20%)	88 (49%)	57 (31%)	180	92%	209	0	3	212	1.18	Unknown
5757 Uplander (Project)	-	-	163 (15%)	638 (58%)	305 (27%)	1,106	-	1,303	117	15	1,435*	1.30	Yes

Source: Fehr & Peers.

*Retail parking is excluded from this total, as it is physically separated from residential parking at the site.

The parking demand rate is calculated as the number of occupied spaces divided by the number of units. No adjustment was made for unit occupancy, as the properties are functionally fully occupied (we were unable to confirm with the property manager of Kinley West LA, but we presume it is similarly occupied). **Table 2** shows the details of parking demand rate for the surveyed properties based on the maximum observed parking occupancy over the study dates.

Table 2: Maximum Parking Demand at Study Sites

Property	Maximum Observed Parked Vehicles	Maximum Overnight Parking Occupancy (%)	Overall Parking Demand Rate	Resident Parking Demand Rate	Visitor Parking Demand Rate
Villas at Playa – Sausalito	830	61%	1.18	0.99	0.18
Villas at Playa – Malibu	620	63%	1.26	1.06	0.18
Kinley West LA	176	83%	0.98	0.98	n/a
Weighted Average		***65%***	***1.18***	***1.01***	***0.18***

Source: Fehr & Peers.
Note: At both Villas at Playa properties, the overall parking demand rates are higher than the sum of resident and visitor parking demand rates due to a small number of parking spaces reserved for leasing office/future residents.

Using the weighted average overall parking demand rate of the surveyed properties, the estimated parking demand for the residential portion of 5757 Uplander would be approximately 1,305 spaces. The current design for 5757 Uplander includes 1,435 spaces for residential uses (1.3 spaces per dwelling unit), which is 130 spaces (or 10%) above the parking demand rate derived by this study. 5757 Uplander will provide slightly more parking than the observed parking demand rates at the comparable properties studied would suggest, but it falls within a reasonable range. However, if reducing the planned parking supply by 130 spaces represents a significant step change in cost savings (ie. eliminating an entire floor of parking), that option could be explored by the design team.

On-Street Parking in Project Vicinity

The Project is bounded by Hannum Avenue, Bristol Parkway, and Uplander Way. The nearest on-street parking locations with adjacent residential uses are Buckingham Parkway and Green Valley Circle. **Table 3** details the on-street parking conditions on the nearby streets. No data was on collected on the supply or utilization of on-street parking near 5757 Uplander.

Table 3: On-Street Parking Conditions

Street	N/E Side of Street	S/W Side of Street	Notes
Hannum Ave	Not permitted	Unrestricted	-
Bristol Pkwy	Not permitted	Not permitted	-
Uplander Way (N/S)	Metered 8:00 AM-6:00 PM ($1/hr, 10-hr limit)	Metered 8:00 AM-6:00 PM ($1/hr, 10-hr limit)	Low utilization observed during January fieldwork
Uplander Way (E/W)	Metered 8:00 AM-6:00 PM ($1/hr, 10-hr limit)	Metered 8:00 AM-6:00 PM ($1/hr, 10-hr limit)	Low utilization observed during January fieldwork
Buckingham Pkwy	Unrestricted (street sweeping 10:00 AM-2:00 PM Tues)	Unrestricted (street sweeping 10:00 AM-2:00 PM Tues)	No direct pedestrian access to Uplander Way except via Hannum Ave (5-15 min. walk)
Green Valley Cir	Not permitted	Unrestricted (street sweeping 10:00 AM-2:00 PM Tues)	No direct pedestrian access to Uplander Way except via Bristol Pkwy (10-15 min. walk)

A residential parking permit district (Parking District 11) has been established for the area bounded by Buckingham Parkway and the City boundary as well as the area between Green Valley Circle and the Hillside Memorial Park, but no restrictions have been imposed. The Project is not within the limits of Parking District 11.

Regular use of the on-street parking on Buckingham Parkway and Green Valley Circle by future residents or visitors to the Project is unlikely, given the time-consuming and circuitous pedestrian route required to reach the Project from these locations. Because the neighboring area has already established a residential parking permit district, they have the ability to enact regulations to protect on-street parking within the district from long-term use by future residents of the Project.

Appendix L

Wastewater Civil Technical Memorandum

WASTEWATER CIVIL TECHNICAL MEMORANDUM

Date: September 17, 2025

To: Link Logistics

From: Kimley-Horn and Associates, Inc.
Michael Choi, P.E., LEED AP

CC: Mr. Andy Beck

Subject: 5757 Uplander Way – Wastewater Civil Technical Memorandum

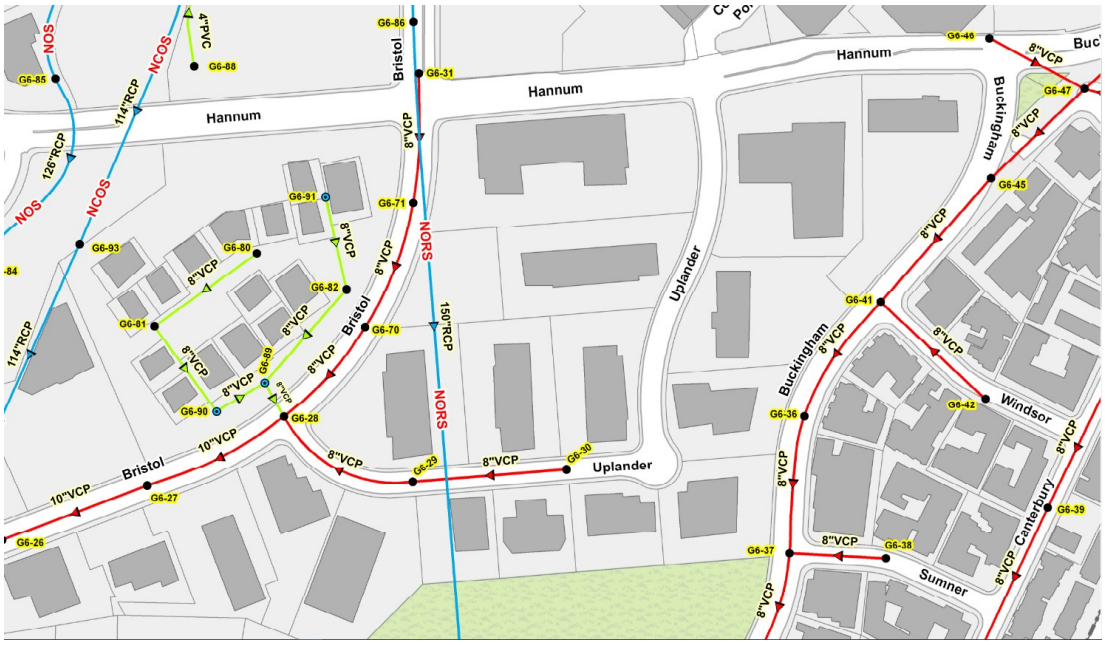
Introduction

The Project site is comprised of approximately 8.3 acres and existing improvements include 4 separate, 2-story buildings totaling to be 103,027 sf. Existing improvements also comprise of landscaping along the front of the site, as well hardscaping adjacent to the existing buildings for the purpose of parking. The proposed development proposes to construct 6 new, 5-story buildings with 2 levels of subterranean parking, totaling in at 7-stories.

Kimley-Horn and Associates, Inc. is providing this wastewater civil technical memorandum based on our review of the PPR2 Draft Concept Plan received August 18, 2024, prepared by KFA and our understanding of the existing utilities surrounding the site. A summary of our wastewater utility analysis for the proposed development is provided below.

Existing Improvements

Existing sewer lines within Culver City are maintained by the City of Culver City's Public Works Department. The existing sewer system adjacent to the project site is based on available record documents obtained from the City's online Sewer Infrastructure Management System (SIMS) and is described further below:



Sewer Atlas Map

- Bristol Parkway: Along Bristol Parkway, there is an existing 8" vitrified clay pipe (VCP) sewer line. The 8" pipe begins at the northeast corner of Hannum Ave and Bristol Pkwy at manhole G6-31 and flows in the south/southwest direction. The sewer line is later joined at the Bristol Pkwy and Sumner intersection by two, existing 8" VCP sewer lines at sewer manhole G6-28. The sewer line becomes a 10" VCP downstream of manhole G6-28.

- Uplander Way/Sumner Way per ALTA/NSPS Survey: Along Uplander/Sumner Way, there is an existing 8" vitrified clay pipe, sewer line. The 8" pipe connects to the sewer line at the intersection of Bristol Pkwy and Uplander/Sumner Way along the west side and later terminates at manhole G6-30, adjacent to of Lot 12 of the Project site on the east side of the pipe.

- North Outfall Replacement Sewer: Starting at Bristol Parkway, there is an existing 150" reinforced concrete pipe that goes through Lot 8 of our Project site. The 150" RCP flows in the southerly direction and is owned by the City of Los Angeles.

Proposed Improvements

The following are based on PPR2 Draft Concept Plan received July 25, 2024, prepared by KFA:

Proposed Project Development Programming: The project will develop or include the following:

- Residential – 837,855 (1,077 units)
  - Studio – 145 units
  - 1 Bedroom – 644 units
  - 2 Bedrooms – 288 units
- Retail – 5,772 SF
- Fitness Center – 6,070 SF

Other development programming such as lobby, general residential amenity areas, community pool and subterranean parking areas were not accounted for since the County of Los Angeles Sewer Generation rates do not include these categories.

Proposed Sewer Demand:

Based on the above summary, the proposed project will generate 0.264 cfs (170,410 GPD) or 0.659 cfs (426,026 GPD) peak flow (including the peak factor of 2.5) of additional sewer discharge to the existing sewer system around the project site. Our detailed analysis based on the LA County wastewater generation factors is summarized in the tabulation provided below.

Table 4.2.2.1 – Estimated Wastewater Generation

Land Use	Units	Wastewater Generation Rate[1] (GPD)	Total Wastewater Generation (GPD)	Peak Wastewater Generation (GPD)*
Existing Development				
Office***	146,414 sf	200/1,000 sf	29,283	73,207
Total Existing Development Wastewater Generation			**29,283**	**73,207**
Proposed Development				
Residential: Studio 1 Bed 2 Bed	145 Units 644 Units 288 Units	156/Unit	168,012	420,030
Commercial: Store**	5,772 sf	100/1,000 sf	577.2	1,443
Fitness Center (w/o shower)	6,070 sf	300/1,000 sf	1,821	4,553
Total Proposed Development Wastewater Demand			**170,410**	**426,026**
Net Increase in Wastewater Demand (Proposed - Existing)			***141,127***	***352,819***

*Peak Wastewater Factor is 2.5 per LA County Sanitation District requirements.

**Commercial: Store is selected for conservative analysis for potential commercial uses

Proposed Off-Site Improvements:

There are no off-site improvements proposed for this project.

*** Office is being selected for purpose of County of Los Angeles Sewer Generation calculations

[1]: Wastewater generation rates are based on County of Los Angeles Sewer Generation rates. Refer to Appendix 3 for County of Los Angeles Sewer Generation Rates.

Sewer Flow Monitoring Study Results

The Project proposes to connect two proposed sewer laterals at the south and west sides of the project site from the proposed development to the 8" sewer main between manholes G6-31 and G6-70, as well as, between manholes G6-30 and G6-29. Utility Systems Science & Software conducted a sewer metering and flow monitoring study of existing manhole G6-71, G6-29 and G6-27 to assess the existing sanitary sewer system's capacity within Bristol Parkway and Uplander/Sumner Way adjacent to the site. Sewer metering was conducted using a FloDar AV Sensor, over a 2-week period between the dates of March 9, 2024, and March 25, 2024. See Appendix 1 for the US[3] sewer monitoring results.

- Manhole #G6-71 (Bristol North): Based on the April 2, 2024, data reports from US[3], manhole #G6-71 has a maximum flow rate of 0.009 million gallons per day (0.017 cfs).

- Manhole #G6-29 (Uplander): Based on the April 2, 2024, data reports from US[3], manhole #G6-29

has a maximum flow rate of 0.012 million gallons per day (0.022 cfs).

- Manhole #G6-27 (Bristol South): Based on the April 2, 2024, data reports from US[3], manhole #G6-27 has a maximum flow rate of 0.064 million gallons per day (0.12 cfs).

Based on City sewer requirements, it was concluded sufficient capacity for the proposed development exists in the monitored sewer lines, since the depth of the peak flows observed during this study did not exceed d/D limits of 0.50 or 50% pipe capacity.

Based the metering results and proposed net increase, it appears there is sufficient hydraulic capacity. Since the sewer discharge split between the Bristol Parkway and Uplander Way, we've assessed the total project demand to either street. Our assessment adds the total development sewer discharge or demand to each manhole where the existing sewer metering was conducted. The maximum sewer flow rate from the metering was used to assess the pipe capacity at each of these locations. Based on this approach to our analysis, the site's sewer discharge could be sent to either sewer line (or split between both), and any of these scenarios would have adequate capacity to handle the additional sewer demand for the project. For example, if 100% of the sewer discharge is sent to Bristol Parkway, it would still be sufficient, as well as if 100% was sent to Uplander Way, there would still be sufficient capacity.

Proposed Development Discharge = 0.65 cfs (426,026 gpd)

	Pipe Slope	Max Metered Flow	Proposed Flow	Combined Flow	d/D (% full)
8" VCP (Bristol N)	(.008) 0.8%	0.017 cfs	0.659 cfs	0.676 cfs	0.49 (49%)
8" VCP (Uplander)	(0.0164) 1.64%	0.022 cfs	0.659 cfs	0.681 cfs	0.40 (40%)
10" VCP (Bristol S)	(0.0104) 1.04%	0.120 cfs	0.659 cfs	0.779 cfs	0.35 (35%)

A Will Serve Letter from Culver City Public Works received on May 22, 2023, confirms that the pipe can be served by existing Culver City wastewater services. This letter can be found in Appendix 2.

Conclusion

Per the sewer metering performed by Utility Systems Science & Software and the Will Serve Letter from Culver City Public Works, the sanitary sewer on the project can be conveyed from the project property to the existing municipal system.

Re: Sanitary Sewer "Will-Serve" Letter for Project at 5835 Sumner Way

Dear Jonathan:

This letter serves as confirmation that the City of Culver City Public Works Department will provide sanitary sewer conveyance from the property at 5835 Sumner Way.

If you have any questions, please contact me at Sammy.romo@culvercity.org or 310-253-5619.

Sincerely,

Sammy Romo, P.E.
Senior Civil Engineer

Appendix 3 – County of Los Angeles Sewer Generation Table

AN ORDINANCE PRESCRIBING THE CONNECTION FEE RATE AND MEAN LOADINGS PER UNIT OF USAGE FOR COUNTY SANITATION DISTRICT NO. 5 OF LOS ANGELES COUNTY

THE BOARD OF DIRECTORS OF COUNTY SANITATION DISTRICT NO. 5 OF LOS ANGELES COUNTY ORDAINS AS FOLLOWS:

SECTION 1.0 - USER CATEGORIES AND MEAN LOADINGS

Pursuant to Section 3.04(2) of the *Master Connection Fee Ordinance of County Sanitation District No. 5 of Los Angeles County*, the following shall constitute the user categories and mean loadings per unit of usage for flow, chemical oxygen demand (COD), and suspended solids:

DESCRIPTION	UNIT OF MEASURE	FLOW (Gallons per Day)	COD (Pounds per Day)	SUSPENDED SOLIDS (Pounds per Day)
RESIDENTIAL				
Single Family Home	Dwelling Unit	260	1.22	0.59
Condominiums	Dwelling Unit	195	0.92	0.44
Multi-Unit Residential	Dwelling Unit	156	0.73	0.35
Mobile Home Parks	No. of Spaces	156	0.73	0.35
COMMERCIAL				
Hotel/Motel/Rooming House	Room	125	0.54	0.28
Store	1000 ft^2	100	0.43	0.23
Supermarket	1000 ft^2	150	2.00	1.00
Shopping Center	1000 ft^2	325	3.00	1.17
Regional Mall	1000 ft^2	150	2.10	0.77
Office Building	1000 ft^2	200	0.86	0.45
Medical, Dental, Veterinary Clinic or Building	1000 ft^2	300	1.29	0.68
Restaurant	1000 ft^2	1,000	16.68	5.00
Indoor Theatre	1000 ft^2	125	0.54	0.28
Car Wash				
Tunnel - No Recycling	1000 ft^2	3,700	15.86	8.33
Tunnel - Recycling	1000 ft^2	2,700	11.74	6.16
Wand	1000 ft^2	700	3.00	1.58
Bank, Credit Union	1000 ft^2	100	0.43	0.23
Service Shop, Vehicle Maintenance & Repair Shop	1000 ft^2	100	0.43	0.23
Animal Kennels	1000 ft^2	100	0.43	0.23
Gas Station	1000 ft^2	100	0.43	0.23
Auto Sales	1000 ft^2	100	0.43	0.23
Wholesale Outlet	1000 ft^2	100	0.43	0.23
Nursery/Greenhouse	1000 ft^2	25	0.11	0.06
Light Manufacturing	1000 ft^2	25	0.23	0.09
Lumber Yard	1000 ft^2	25	0.23	0.09
Warehousing	1000 ft^2	25	0.23	0.09
Open Storage	1000 ft^2	25	0.23	0.09
Drive-in Theatre	1000 ft^2	20	0.09	0.05

DESCRIPTION	UNIT OF MEASURE	FLOW (Gallons per Day)	COD (Pounds per Day)	SUSPENDED SOLIDS (Pounds per Day)
COMMERCIAL				
Night Club	1000 ft^2	350	1.50	0.79
Bowling/Skating	1000 ft^2	150	1.76	0.55
Club & Lodge Halls	1000 ft^2	125	0.54	0.27
Auditorium, Amusement	1000 ft^2	350	1.50	0.79
Golf Course and Park (Structures and Improvements)	1000 ft^2	100	0.43	0.23
Campground, Marina, and Recreational Vehicle Park	Sites, Slips, or Spaces	55	0.34	0.14
Convalescent Home	Bed	125	0.54	0.28
Laundromat	1000 ft^2	3,825	16.40	8.61
Mortuary, Funeral Home	1000 ft^2	100	1.33	0.67
Health Spa, Gymnasium				
With Showers	1000 ft^2	600	2.58	1.35
Without Showers	1000 ft^2	300	1.29	0.68
Convention Center, Fairground, Racetrack, Sports Stadium/Arena	Average Daily Attendance	10	0.04	0.02
INSTITUTIONAL				
College/University	Student	20	0.09	0.05
Private School	1000 ft^2	200	0.86	0.45
Library, Museum	1000 ft^2	100	0.43	0.23
Post Office (Local)	1000 ft^2	100	0.43	0.23
Post Office (Regional)	1000 ft^2	25	0.23	0.09
Church	1000 ft^2	50	0.21	0.11

SECTION 2.0 - CONNECTION FEE RATE

Pursuant to Section 3.03 of the *Master Connection Fee Ordinance of County Sanitation District No. 5 of Los Angeles County*, the following, to be effective on the dates given, shall constitute the Connection Fee Rate per capacity unit:

COST COMPONENT	July 1, 2022	July 1, 2023	July 1, 2024	July 1, 2025
District Capital	$0	$0	$0	$0
Joint Outfall Capital	$1,570	$1,570	$1,570	$1,570
Operational	$171	$175	$179	$183
Total	$1,741	$1,745	$1,749	$1,753

SECTION 3.0 - COST ALLOCATION FACTORS

Pursuant to Section 3.04(1) of the *Master Connection Fee Ordinance of County Sanitation District No. 5 of Los Angeles County*, the proportions of the total capital costs required to construct the sewerage system including, conveyance, treatment, and disposal of wastewater which are attributable to flow, COD, and suspended solids, designated as X, Y, and Z, respectively, to be effective on the dates given, shall be:

X = 0.6783 Y = 0.1222 Z = 0.1995

SECTION 4.0 - VALIDITY

If any part, section, subsection, paragraph, sentence, clause, or phrase of this Ordinance is held invalid or unconstitutional for any reason by any court, that decision does not affect the validity or constitutionality of the remainder of this Ordinance. The Board of Directors declares that it would have adopted each provision of this Ordinance irrespective of the validity of any other provision.

SECTION 5.0 - EFFECTIVE DATE

This Ordinance shall become effective July 1, 2022.

ATTEST:
Kimberly A. Christensen

Clerk, Board of Directors
County Sanitation District No. 5
of Los Angeles County

Chairperson, Board of Directors
County Sanitation District No. 5
of Los Angeles County

PASSED AND ADOPTED by the Board of Directors of County Sanitation District No. 5 of Los Angeles County on May 18, 2022 by the following vote:

AYES: Directors Pimentel, Cerda, Monteiro, Pullen-Miles, Gazeley, Stern, McGowan, Bradley, Brand, Wilson, Zerunyan, Furey, and Hahn

NOES: None

ABSTAIN: None

ABSENT: Directors Lee, Butts, and Martinez

Kimberly A. Christensen

Secretary of the Board of Directors
County Sanitation District No. 5
of Los Angeles County

Appendix A Project Demand UWMP Inclusion Analysis

1 INTRODUCTION

Included herein is a Senate Bill (SB) 610-compliant water supply assessment (WSA) in support of the 5757 Uplander Way Project ("Proposed Project"; **Figure 1**). The Proposed Project site is comprised of approximately 8.3 acres located in the City of Culver City, California. The Proposed Project includes the demolition of the existing office/flex structures on the project site and the construction of three new, seven-story buildings totaling 1,638,819 square feet (sq ft), including 1,077 new dwelling units, 8,970 sq ft of lobby space, 6,070 sq ft of fitness center space, and approximately 5,772 sq ft of food service use on the ground floor (Link Logistics, 2024a; 2024e). Additionally, the Proposed Project would include 532,661 sq ft of covered parking and 48,647 sq ft of irrigated landscaping (KFA Architecture, 2024; Link Logistics, 2024a). The Proposed Project is located within the Golden State Water Company (GSWC) Culver City service area, and GSWC will be the water service provider for the Proposed Project (**Figure 2**).

The information provided in this WSA is consistent with California Water Code (CWC) §10910-10912 requirements and the California Department of Water Resources' (DWR's) *Guidebook for Implementation of Senate Bill 610 and Senate Bill 221 of 2001: To Assist Water Suppliers, Cities, and Counties in Integrating Water and Land Use Planning*, dated 8 October 2003. The text of specific sub-sections of the CWC is included within gray text boxes with italicized font at the beginning of specific sections of this WSA. The information presented in those respective sections, and the associated tables and figures, respond directly to CWC requirements.

The purpose of this WSA is to evaluate whether GSWC has sufficient water supply to meet the current and planned water demands within the GSWC Culver City service area, including the demands associated with the Proposed Project, during normal, single, and multiple dry hydrologic years over a 20-year time horizon.[1] More specifically, this WSA includes:

- A summary of the WSA requirements articulated in CWC §10910-10912 and a description of how they apply to the Proposed Project;
- A description and analysis of the current and projected future water demands of the Proposed Project through the year 2045;
- A description and analysis of the historical, current, and projected future water demands for the GSWC Culver City service area through the year 2045;
- A description and analysis of the current and projected future water supplies for the GSWC Culver City service area through the year 2045; and
- A comparison of the water supplies and demands for the GSWC Culver City service area, including the projected water demands associated with the Proposed Project.

[1] The CWC specifies that a WSA must look at supplies and demand on a 20-year horizon (i.e., to 2044), but given the available data, this WSA looks beyond that to 2045.

The information contained in this WSA is based primarily on the 2020 Urban Water Management Plan (UWMP) prepared for the GSWC Culver City service area, except where updated with relevant water demand and supply reliability and other information from sources including GSWC, the Santa Monica Basin Groundwater Sustainability Plan (GSP), and others, as noted.

This WSA concludes that sufficient water supply is available to GSWC to meet all future demands within the GSWC Culver City service area, including those associated with the Proposed Project.

2 GENERAL REQUIREMENTS FOR THE PREPARATION OF A WATER SUPPLY ASSESSMENT

The purpose of this section is to outline what types of projects require the preparation of a WSA, who is responsible for its preparation, and the necessary components of a WSA.

2.1 Applicability of SB Bill 610 to the Proposed Project

☑ ***CWC § 10910 (a)***

Any city or county that determines that a project, as defined in Section 10912, is subject to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) under Section 21080 of the Public Resources Code shall comply with this part.

☑ ***CWC § 10912***

For the purposes of this part, the following terms have the following meanings:

(a) "Project" means any of the following:

(1) A proposed residential development of more than 500 dwelling units.

(2) A proposed shopping center or business establishment employing more than 1,000 persons or having more than 500,000 square feet of floor space.

(3) A proposed commercial office building employing more than 1,000 persons or having more than 250,000 square feet of floor space.

(4) A proposed hotel or motel, or both, having more than 500 rooms.

(5) A proposed industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or having more than 650,000 square feet of floor area.

(6) A mixed-use project that includes one or more of the projects specified in this subdivision.

(7) A project that would demand an amount of water equivalent to, or greater than, the amount of water required by a 500 dwelling unit project.

(b) If a public water system has fewer than 5,000 service connections, then "project" means any proposed residential, business, commercial, hotel or motel, or industrial development that would account for an increase of 10 percent or more in the number of the public water system's existing service connections, or a mixed-use project that would demand an amount of water equivalent to, or greater than, the amount of water required by residential development that would represent an increase of 10 percent or more in the number of the public water system's existing service connections.

The Proposed Project would include a residential development of more than 500 dwelling units and therefore satisfies the definition of a "project" requiring a WSA pursuant to SB 610 (CWC §10910(a) and 10912(a)(3)). It should be noted that per SB 221, over 500 dwelling units may also trigger the need for a Water Supply Verification.

2.2 Responsibility for Preparation of the Water Supply Assessment

☑ ***CWC § 10910 (b)***

The city or county, at the time that it determines whether an environmental impact report, a negative declaration, or a mitigated negative declaration is required for any project subject to the California Environmental Quality Act pursuant to Section 21080.1 of the Public Resources Code, shall identify any water system that is, or may become as a result of supplying water to the project identified pursuant to this subdivision, a public water system, as defined in Section 10912, that may supply water for the project. If the city or county is not able to identify any public water system that may supply water for the project, the city or county shall prepare the water assessment required by this part after consulting with any entity serving domestic water supplies whose service area includes the project site, the local agency formation commission, and any public water system adjacent to the project site.

The Proposed Project is located within the GSWC Culver City service area, and potable water for the Proposed Project will be supplied by GSWC. Therefore, in accordance with CWC §10910(b), GSWC is the entity responsible for adopting the WSA for the Proposed Project.

2.3 Components of a Water Supply Assessment

☑ ***CWC § 10910 (c) (4)***

If the city or county is required to comply with this part pursuant to subdivision (b), the water supply assessment for the project shall include a discussion with regard to whether the total projected water supplies, determined to be available by the city or county for the project during normal, single dry, and multiple dry water years during a 20-year projection, will meet the projected water demand associated with the proposed project, in addition to existing and planned future uses, including agricultural and manufacturing uses.

☑ ***CWC § 10911***

(b) The city or county shall include the water supply assessment provided pursuant to Section 10910, and any information provided pursuant to subdivision (a), in any environmental document prepared for the project pursuant to Division 13 (commencing with Section 21000) of the Public Resources Code.

(c) The city or county may include in any environmental document an evaluation of any information included in that environmental document provided pursuant to subdivision (b). The city or county shall determine, based on the entire record, whether projected water supplies will be sufficient to satisfy the demands of the project, in addition to existing and planned future uses. If the city or county determines that water supplies will not be sufficient, the city or county shall include that determination in its findings for the project.

As listed above in CWC §10910(c)(4), the primary purpose of a WSA is to evaluate whether sufficient water supply is available to meet all future demands within the water supplier's service area, including those associated with the Proposed Project, during normal and dry hydrologic years for a 20-year time horizon.[2] Therefore, the following information is included in this WSA:

[2] The CWC specifies that a WSA must look at supplies and demand on a 20-year horizon (i.e., to 2044), but given the available data, this WSA looks beyond that to 2045.

- A description and analysis of the current and projected future water demands of the Proposed Project through the year 2045;
- A description and analysis of the historical, current, and projected future water demands for the GSWC Culver City service area through the year 2045;
- A description and analysis of the current and projected future water supplies for the GSWC Culver City service area through the year 2045; and
- A comparison of the water supplies and demands for the GSWC Culver City service area, including the projected water demands associated with the Proposed Project.

3 PROJECT DESCRIPTION

The Proposed Project site is comprised of approximately 8.3 acres located in the City of Culver City, California on Assessor Parcel Numbers (APNs) 4134-005-021, 4134-005-004, 4134-005-003, and 4134-005-002 (Link Logistics, 2024c). The Proposed Project site is bordered by Hannum Avenue to the north, Uplander Way to the east and the south, and the Culver City Fire Department Station No. 3, a business park building, and Bristol Parkway to the west.

The Proposed Project will involve the demolition of four existing office/flex buildings on the project site and the construction of three seven-story mixed-use residential buildings, which will include approximately:

- 558 one-bedroom apartments, 288 two-bedroom apartments, 145 studio apartments, 66 junior one-bedroom apartments, and 20 one-bedroom town homes, for a total of 1,077 new dwelling units;
- 8,970 sq ft of lobby space;
- 6,070 sq ft of fitness center use;
- 25,325 sq ft of amenity use;
- 5,772 sq ft of food service use on the ground floor;
- 1,750 sq ft of residential community pools;
- 48,647 sq ft of irrigated landscape area; and
- 532,661 sq ft of covered parking (KFA Architecture, 2024; Link Logistics, 2024a; 2024d; 2024e).

The Proposed Project will be implemented in a phased approach, with development on APN 4134-005-021 set to be complete by 2029, development on APN 4134-005-004 set to be complete by 2030, and development on APN 4134-005-003 set to be complete by 2031. The anticipated completion and full buildout of the Proposed Project is expected by 2031 (Link Logistics, 2024b).

4 PROJECT WATER DEMAND

The City of Culver City has adopted green building standards and water efficient landscaping ordinances consistent with previous versions of the CalGreen building standards and the California Model Water Efficient Landscape Ordinance (MWELO). Landscaping will also be consistent with Assembly Bill (AB) 1572. As part of State requirements, all new developments must comply with these efficiency standards. As such, the Proposed Project development is expected to include a number of water-efficient features, including, but not limited to:

- Use of low-flow lavatory faucets, kitchen faucets, toilets, and urinals in accordance with CalGreen Code; and
- Inclusion of low-water use landscaping and high-efficiency irrigation systems to minimize outdoor water use in accordance with MWELO and AB 1572.

As described below, the average annual water demand for the Proposed Project was estimated based on: (1) literature values for commercial water use (City of Los Angeles Bureau of Engineering, 2012; Los Angeles County Sanitation Districts, 2024) and (2) information about the Proposed Project provided by Link Logistics (KFA Architecture, 2024; Link Logistics, 2024a; 2024d; 2024e).

Table 1 includes a summary of the water demand projections associated with the proposed land uses at the Proposed Project completion. The Proposed Project will be implemented in a phased approach, with developments coming online by 2029, 2030, and 2031. Full buildout of the Proposed Project is assumed to be completed by 2031 (Link Logistics, 2024b).

4.1 Indoor Water Use

Table 1 provides a summary of the land uses, unit demand factors, and respective water demands associated with each land use anticipated in the Proposed Project. Below is a summary of the calculations and assumptions for each indoor land use category.

4.1.1 Residential Use

Based on current development plans, the Proposed Project is expected to include 1,077 units of residential use (Link Logistics, 2024a). Of these 1,077 units, 558 are one-bedroom apartments, 288 are two-bedroom apartments, 145 are studio apartments, 66 are junior one-bedroom apartments, and 20 are one-bedroom town homes (Link Logistics, 2024a). The water demand for the residential use is estimated using the Los Angeles County Sanitation Districts (LACSD) wastewater generation factor for residential land uses with five or more units (LACSD, 2024). For the purpose of this analysis, wastewater flows are assumed to be 90% of the total water demand for each land use consistent with the methodology used in the Paramount Pictures Master Plan, which was approved by the City of Los Angeles in April 2016 (City of Los Angeles Department of City Planning, 2016; Incledon, 2015). As such, the LACSD wastewater generation factor for

residential land uses with five or more units was divided by 0.9 to determine a water demand factor of 173 gallons per day (gpd) per dwelling unit. Based on this residential demand factor, the total residential use for the Proposed Project at full buildout is estimated to be 209 acre-feet per year (AFY).

4.1.2 Food Service Use

The Proposed Project includes one ground-floor restaurant, totaling 5,772 sq ft of food service use (Link Logistics, 2024a; 2024d). The water demand for the Proposed Project's food service use is estimated using the LACSD wastewater generation factor for restaurants (LACSD, 2024). Similar to the residential demand factor calculation, wastewater flows are assumed to be 90% of the total water demand for each land use. As such, the LACSD wastewater generation factor for restaurant land uses was divided by 0.9 to determine a water demand factor of 1.1 gpd per sq ft. The resultant water demand associated with the food service portion of the Proposed Project at full buildout is estimated to be 7.2 AFY.

4.1.3 Lobby Use

The Proposed Project includes approximately 8,284 sq ft of lobby use (Link Logistics, 2024a). The water demand for the lobby use is estimated using the LACSD wastewater generation factor for professional buildings (LACSD, 2024). Similar to the residential demand factor calculation, wastewater flows are assumed to be 90% of the total water demand for each land use. As such, the LACSD wastewater generation factor for professional building uses was divided by 0.9 to determine a water demand factor of 0.33 gpd per sq ft. The resultant water demand associated with the lobby portion of the Proposed Project at full buildout is estimated to be 3.3 AFY.

4.1.4 Fitness Center Use

The Proposed Project includes approximately 6,070 sq ft of fitness center use (Link Logistics, 2024a). The water demand for the fitness center use is estimated using the LACSD wastewater generation factor for health spas and gymnasiums without showers (LACSD, 2024). Similar to the residential demand factor calculation, wastewater flows are assumed to be 90% of the total water demand for each land use. As such, the LACSD wastewater generation factor for health spas and gymnasiums without showers was divided by 0.9 to determine a water demand factor of 0.33 gpd per sq ft. The resultant water demand associated with the fitness center portion of the Proposed Project at full buildout is estimated to be 2.3 AFY.

4.1.5 Other Amenity Space Use

The Proposed Project includes approximately 25,325 sq ft of other amenity use (Link Logistics, 2024a). The water demand for the other amenity use is estimated using the LACSD wastewater generation factor for professional buildings (LACSD, 2024). Similar to the residential demand factor calculation, wastewater flows are assumed to be 90% of the total water demand for each land use. As such, the LACSD wastewater generation factor for professional buildings was divided by 0.9 to determine a water demand factor of 0.33 gpd per sq ft. The resultant water demand

associated with the other amenity portions of the Proposed Project at full buildout is estimated to be 9.5 AFY.

4.1.6 Total Indoor Water Use

Based on the above calculations and assumptions, total indoor water use for the Proposed Project is estimated to be 90 AFY at full buildout.

4.2 Covered Parking Water Use

The Proposed Project includes ground floor parking, as well as two levels of subterranean parking, totaling approximately 532,661 sq ft of covered parking facilities (Link Logistics, 2024a). Water use associated with this space is anticipated to be minimal, limited to cleaning of the facility approximately twelve times per year (LADWP, 2022). It is assumed that 0.020 gallons per sq ft will be used per each cleaning event (City of Los Angeles Bureau of Engineering, 2012). Thus, it is estimated that 0.39 AFY will be used for the purpose of cleaning the parking facility.

4.3 Community Landscaping and Water Feature Water Use

The Proposed Project includes general landscaping along with three pools as a part of the residential community (collectively referred to as "water features"). The projected water demands for the community landscaping and water features were estimated based on the Maximum Applied Water Allowance (MAWA) per the MWELO (DWR, 2015). The MWELO requires that the annual estimated total water use for landscape irrigation and water features does not exceed the MAWA (DWR, 2015). As shown below, the MAWA is calculated based on the regional reference evapotranspiration rate, an evaporation adjustment factor, the total landscaped area, and the area of "special landscaped area."[3] Water use for the Proposed Project landscaping irrigation has been conservatively assumed to be equal to the MAWA, which is the upper limit of annual applied water for established landscaped areas and water features.

The MAWA is calculated using the following equation:

$$MAWA = ETo \times [(ETAF \times LA) + (1\text{-}ETAF) \times SLA]$$

where:

ETo	=	The regional reference evapotranspiration rate
ETAF	=	Evapotranspiration Adjustment Factor For residential landscaping = 0.55 For water features = 1
LA	=	Total landscape area (including SLA)
SLA	=	Special Landscape Area

[3] Special Landscaped Area includes landscaping dedicated solely to edible plants, recreational areas, areas irrigated with recycled water, or water features using recycled water.

Based on the above methodology, and shown in **Table 2,** the total annual water demands for the Proposed Project's landscaping and water features are estimated to be 2.3 AFY and 0.15 AFY, respectively, at full buildout (excluding the distribution system losses discussed in Section 4.5).

AB 1572 was signed into law in October 2023 and took effect in January 2024. This regulation prohibits the use of potable water for the irrigation of nonfunctional turf[4] located on commercial, industrial, and institutional (CII) properties, other than a cemetery, and on properties of homeowners' associations, common interest developments,[5] and community service organizations or similar entities. AB 1572, however, does not prohibit the use of potable water for irrigation of other types of landscaping, such drought-tolerant landscaping. It is important to note that MAWA already incorporates conservative measures that limit the total water use for landscape irrigation. Therefore, this WSA assumes that landscaping for the Proposed Project will be equal to the MAWA and comply with AB 1572.

4.4 Distribution System Losses

Water distribution systems experience a degree of water loss over the course of transmission from the source to the customer. Although distribution system losses from the newly constructed portion of the system's infrastructure associated with the Proposed Project would initially be expected to be minimal, it is conservatively assumed that distribution system losses associated with delivering water for the Proposed Project will ultimately be consistent with the proportion of real and apparent water loss per the most recent (2021) validated water loss audit submitted to DWR for the GSWC Culver City service area (i.e., 4.8%; DWR, 2021). It should be noted that while these real losses represent a demand on the system, water lost through the distribution system returns to the underlying groundwater basin and thus is not a true demand on the groundwater supply. However, for purposes of this WSA, all water loss is conservatively considered a demand. **Table 1** shows the distribution system losses for the Proposed Project, estimated at a total of 12 AFY at full buildout.

4.5 Existing Current Water Demand on the Proposed Project Site

The Proposed Project site is currently developed with four existing business park buildings and associated surface parking (Link Logistics, 2024c). From 2022 to 2023, water use at the Proposed Project site averaged 9.4 AFY, with a maximum annual use over this period of 9.7 AFY (Link

[4] Nonfunctional turf is defined as any turf that is not functional turf, and includes turf located within street rights-of-way and parking lots. Nonfunctional turf excludes recreational areas, or areas designated by a property owner or a governmental agency to accommodate human foot traffic for recreation, including, but not limited to, sports fields, golf courses, playgrounds, picnic grounds, or pet exercise areas.

[5] A common interest development is defined as a community apartment project, a condominium project, a planned development, or a stock cooperative.

Logistics, 2024d).[6] Water demand for the new development associated with the Proposed Project is conservatively assumed incremental to this existing demand, and thus, as shown in **Table 1**, the average existing site demand of 9.4 AFY is subtracted from the estimated demands associated with the Proposed Project.

4.6 Total Proposed Project Water Demand

Based on the above methodologies and assumptions, the total annual water demand associated with the Proposed Project at full buildout and occupancy is conservatively estimated to be 237 AFY, as shown in **Table 1**. Demands are assumed will come online consistent with the phased development schedule for the Proposed Project. Full buildout of the Proposed Project is assumed to be completed by 2031.

[6] At the time of preparing this WSA, historical water usage data was unavailable for the first seven to eight months of 2022 for portions of the project site. For purposes of this analysis, the monthly average water use data from 2023 was used to approximate the water use for those months in 2022 in order to estimate the total annual water use at the site in 2022.

Table 1

Summary of Estimated Incremental Annual Project Water Demand

5757 Uplander Way, Culver City, California

Land Use	Land Use at Full Buildout (a)	Land Use Units	Water Demand Factor (b)	Water Demand Factor Units	Total Water Demand (AFY) (c)				
					2025	2030	2035	2040	2045
Residential Units (d)	1,077	du	173	gpd/du	0	73	209	209	209
Food Services (e)	5,772	sq ft	1.1	gpd/sq ft	0	7.2	7.2	7.2	7.2
Lobby	8,970		0.33		0	2.1	3.3	3.3	3.3
Fitness Center	6,070		0.33		0	1.3	2.3	2.3	2.3
Other Amenity (f)	25,325		0.33		0	6.6	9.5	9.5	9.5
Covered Parking (g)	532,661		0.020	gal/sq ft/cleaning	0	0.27	0.39	0.39	0.39
Community Pools	1,750		(h)		0	0.10	0.15	0.15	0.15

Existing Site Demand	--	--	(j)		0	-9.4	-9.4	-9.4	-9.4
Net Annual Water Demand (k)					**0**	**87**	**237**	**237**	**237**

Abbreviations:

"AFY" = acre-feet per year
"APN" = Assessor Parcel Numbers
"du" = dwelling unit
"gal" = gallons
"gpd" = gallons per day
"MWELO" = Model Water Efficient Landscape Ordinance
"Proposed Project" = 5757 Uplander Way
"sq ft" = square feet
"WSA" = Water Supply Assessment

Notes:

(a) Estimated residential units and land use square footages for the food services, lobby, fitness center, other amenity, and covered parking per Reference 1 and for community pools and irrigated landscaping per Reference 2.

(b) Water demand factors for covered parking per Reference 3. Water demand factors for the residential units, food service use, fitness center use, lobby use, and other amentiy uses were calculated based on wastewater generation factors per Reference 4. Wastewater generation factors per Reference 5 were provided by the Los Angeles County Sanitation Districts and represent the average wastewater flow factor for each land use. For the purpose of this analysis, wastewater flows are assumed to be 90% of the total water demand for each land use, consistent with the methodology used in the Paramount Pictures Master Plan which was approved by the City of Los Angeles in April 2016 per Reference 5 and Reference 6. Therefore, flow factors provided in Reference 4 were divided by 0.9 to determine the water demand factors for these uses.

(c) The Proposed Project will be implemented in a phased approach, with estimated completion of APN 4134-005-021 by 2029, APN 4134-005-004 by 2030, and APN 4134-005-003 by 2031 per Reference 7.

(d) Residential units for the Proposed Project include 558 one-bedroom apartments, 288 two-bedroom apartments, 145 studio apartments, 66 junior one-bedroom apartments, and 20 one-bedroom town homes per Reference 1.

(e) "Food Services" includes a restaurant per Reference 8.

Table 1

Summary of Estimated Incremental Annual Project Water Demand

5757 Uplander Way, Culver City, California

(f) At the time of writing this WSA, the Proposed Project's amenity use is unknown and is assumed herein to be used as conference space.

(g) Water use associated with the covered parking is anticipated to be minimal, limited to cleaning of the facility. For purposes of this WSA, it is assumed that the covered parking will be cleaned twelve times per year and that 0.02 gal/sq ft will be used per each cleaning event, per Reference 3.

(h) Estimates of the irrigated landscaping and community pool water demands are based on MWELO calculations for Estimated Total Water Use per Reference 9. See Table 2 for the MWELO calculations.

(i) Estimated distribution system water loss associated with delivery of water to the Proposed Project is based on a rate of 4.8% per Reference 10 and includes both real and apparent losses.

(j) Existing site demands per Reference 11. At the time of preparing this WSA, historical water usage data was unavailable for the first seven to eight months for portions of the Proposed Project site. For purposes of this analysis, the monthly average water use data from 2023 was used to approximate the water use for those months in 2022 in order to estimate the total annual water use at the site in 2022.

(k) Totals may not sum due to rounding.

5 GSWC CULVER CITY SERVICE AREA WATER DEMAND

☑ ***CWC § 10910 (c)***

(1) The city or county, at the time it makes the determination required under Section 21080.1 of the Public Resources Code, shall request each public water system identified pursuant to subdivision (b) to determine whether the projected water demand associated with a proposed project was included as part of the most recently adopted urban water management plan adopted pursuant to Part 2.6 (commencing with Section 10610).

(2) If the projected water demand associated with the proposed project was accounted for in the most recently adopted urban water management plan, the public water system may incorporate the requested information from the urban water management plan in preparing the elements of the assessment required to comply with subdivisions (d), (e), (f), and (g).

(3) If the projected water demand associated with the proposed project was not accounted for in the most recently adopted urban water management plan, or the public water system has no urban water management plan, the water supply assessment for the project shall include a discussion with regard to whether the public water system's total projected water supplies available during normal, single dry, and multiple dry water years during a 20-year projection will meet the projected water demand associated with the proposed project, in addition to the public water system's existing and planned future uses, including agricultural and manufacturing uses.

Consistent with the UWMP Act (CWC §10610-10656), the 2020 UWMP presents estimates of projected future water demand for the GSWC Culver City service area in five-year increments, between the years 2025 and 2045 (GSWC, 2021). Projected water demand is subdivided between the following seven customer sectors or use types: (1) single family, (2) multi-family, (3) commercial/institutional, (4) industrial, (5) landscape, (6) other, and (7) water loss. As discussed further below, the 2020 UWMP demand projections account for: (1) demands for the existing service area and accounts, (2) projected growth based on historical growth in accounts, and (3) all anticipated new development based on information then available to GSWC.

5.1 Current and Historical Water Demand Within the GSWC Culver City Service Area

Historical water demand within the GSWC Culver City service area from 2016 through 2022 is shown in **Table 3**. Based on 2020 water use, the single-family residential and commercial/institutional sectors use the most water, at 34% and 33%, respectively, followed by multi-family residential at 23%. Industrial and "other" uses represent just 2.4% and 2.9% of water use, and distribution system losses represent 5.3% of the service area's water demand (GSWC, 2021). Between 2016 and 2022, water demands remained fairly stable, averaging 4,819 AFY (DWR, 2024; GSWC, 2021).

5.2 GSWC Culver City Service Area Demand Projections

The 2020 UWMP water demand projections account for growth within the GSWC Culver City service area through 2045. The 2020 UWMP includes population growth estimates based on Southern California Association of Governments (SCAG) projections. Based on a review of historical growth in accounts and the SCAG projected population and employment, GSWC

projected the growth in accounts by sector within the Culver City service area and applied unit demand factors for each customer category to estimate future demands.

As shown in **Appendix A,** based on a review of the GSWC Culver City service area growth projections, GSWC has confirmed that the water demands associated with the Proposed Project's commercial uses, landscape uses, and the corresponding water distribution losses are within the anticipated growth for the GSWC Culver City service area. Thus, this WSA can assume that the demands for these project elements (approximately 27 AFY) were included in the 2020 UWMP for the GSWC Culver City service area, consistent with CWC §10910(c)(1) (GSWC, 2024).

However, per **Appendix A**, GSWC has confirmed the water demands associated with the Proposed Project's multi-family residential use and the corresponding water distribution losses are not included in the growth anticipated within the GSWC Culver City service area. Thus, this WSA assumes that the demands for these project elements (approximately 210 AFY after subtracting the average existing site demand of 9.4 AFY) are additive to 2020 UWMP demands (GSWC, 2024).

The demand projections for the GSWC Culver City service area, including the additive demands of the Proposed Project and those of other known developments, are presented in **Table 4** by water use sector in five-year increments through 2045. It is estimated that, inclusive of the Proposed Project, the total annual water demand for the GSWC Culver City service area will be approximately 5,680 AFY in 2045.

5.3 Planned Development Projects Within the GSWC Culver City Service Area

As discussed above, the 2020 UWMP demand projections include projections of growth within the existing service area based on historical account growth and SCAG population and employment forecasts, which included the demand associated with the Crossings Campus Building 1 Project (Crossings Project), a planned development for which a WSA was completed in 2022. The Crossings Project includes a 167,000 sq ft four-story office building with associated landscaping and covered parking. The demands associated with the Crossings Project are estimated to be 24 AFY by full buildout in 2025. The Crossings Project is considered to be included within GSWC Culver City service area's growth projections and the 2020 UWMP demand projections (EKI, 2022).

Additionally, the 10950 Washington Boulevard mixed-use residential development is a known project within the GSWC Culer City service area for which a WSA was recently developed and finalized by GSWC in August 2024. The 5.5 acre-site would include the construction of 508 multi-family units and approximately 14,087 sq ft of commercial use (EKI, 2024). The WSA determined that the demands associated with the commercial uses, approximately 4.0 AFY by full buildout, are included in the 2020 UWMP demand projections. However, the WSA determined that the estimated demands associated with the multi-family residential uses are not included in the 2020 UWMP demand projections for GSWC Culver City (100 AFY). Therefore, the projected multi-

family residential demands that are considered additive to GSWC Culver City's projected demands are shown in **Table 4**.

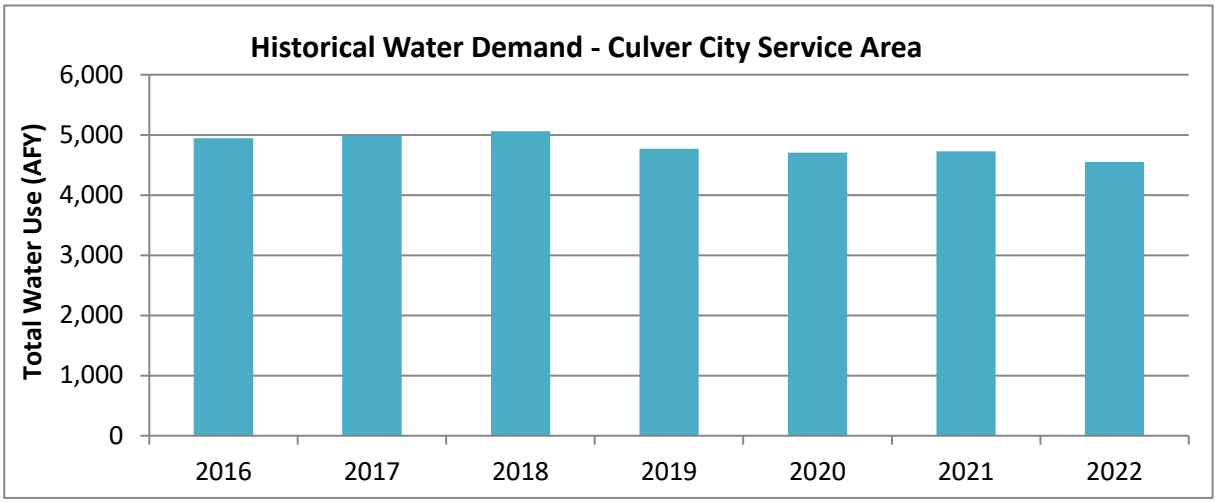
This WSA understands that GSWC tracks future planned water uses through service applications that it receives for new developments and has determined that all currently planned water uses, except for the multi-family residential demands and corresponding water losses associated with the 10950 Washington Boulevard development and the Proposed Project, are accounted for in its 2020 UWMP.

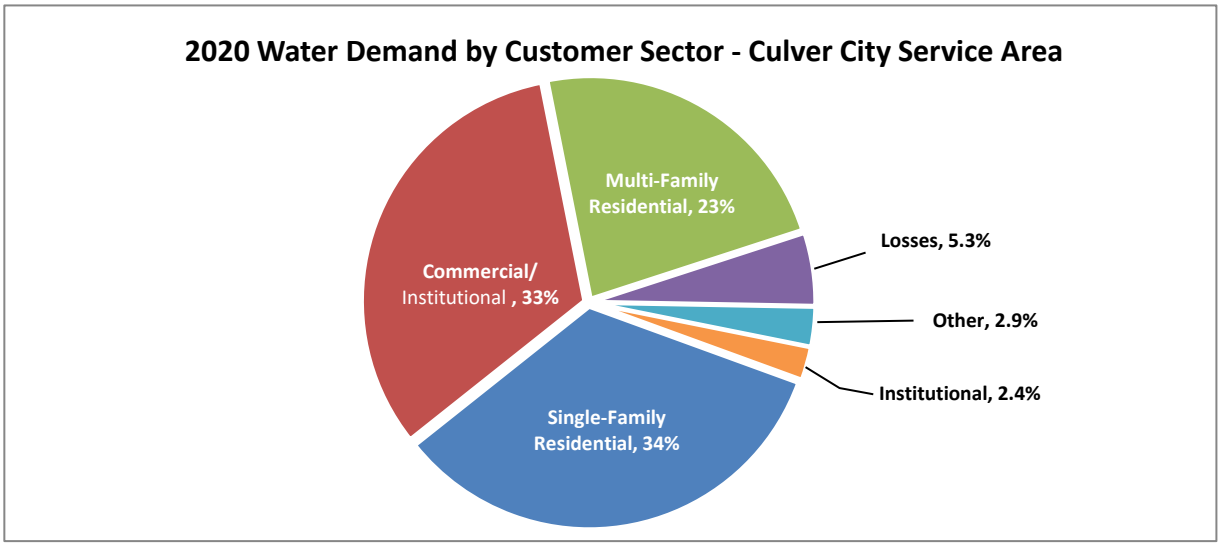
Table 3

Historical Water Demand for GSWC Culver City Service Area

5757 Uplander Way, Culver City, California

	Historical Water Demand (AFY) (a)						
	2016	**2017**	**2018**	**2019**	**2020**	**2021**	**2022**
Water Demand	4,942	4,982	5,061	4,767	4,707	4,726	4,551





Abbreviations:

"AFY" = acre-feet per year

"GSWC" = Golden State Water Company

Notes:

(a) Historical water demands from 2016-2020 per Reference 1, and for 2021 and 2022 per Reference 2. The 2020 water use by customer sector is provided in Reference 1.

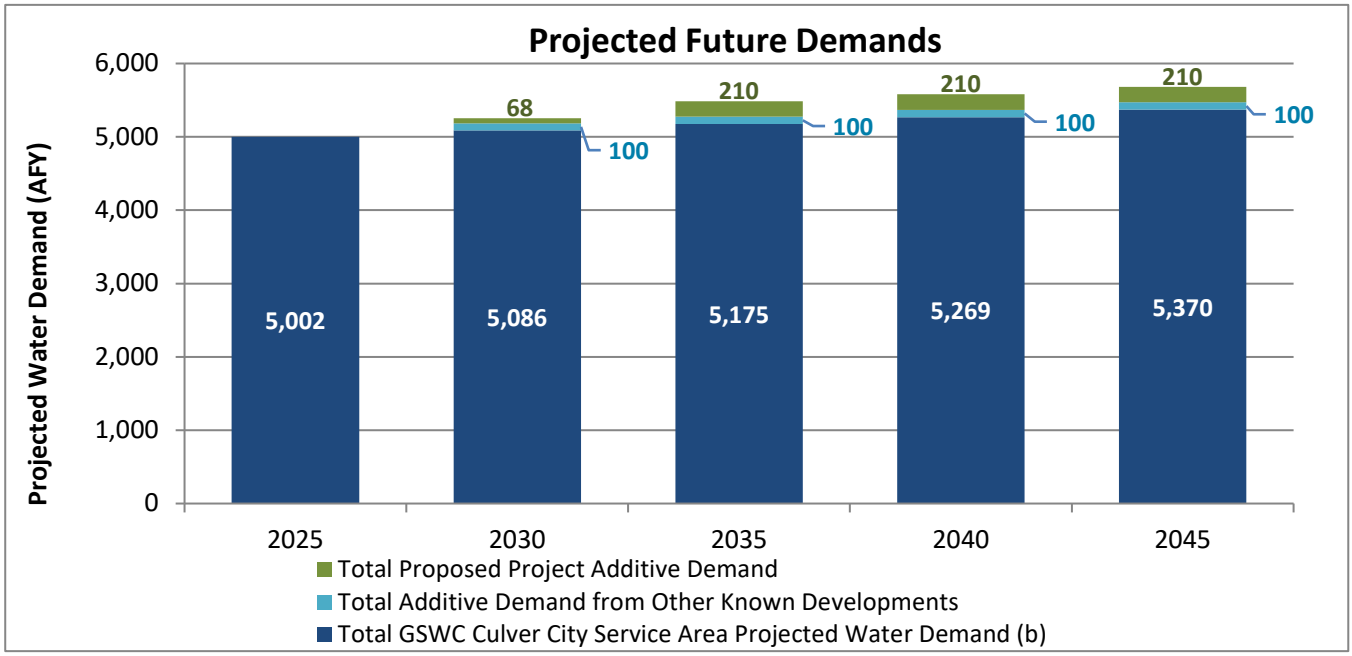
Total GSWC Culver City Service Area Water Demand Inclusive of the Proposed Project	**5,002**	**5,254**	**5,485**	**5,579**	**5,680**

Table 4

Projected Future Water Demand for GSWC Culver City Service Area

5757 Uplander Way, Culver City, California



Abbreviations:

"AFY" = acre-feet per year

"GSWC" = Golden State Water Company

"UWMP" = Urban Water Management Plan

"Proposed Project" = 5757 Uplander Way

Notes:

(a) The projected water demands by sector for the GSWC Culver City Service Area are provided in the 2020 UWMP per Reference 1.

(b) Total may not sum due to rounding.

(c) Another known development is the 10950 Washington Boulevard Project. The demands associated with the 10950 Washington Boulevard Project mixed-use residential development are included herein per Reference 2. A portion of the total project's projected demands (shown in the table above) are considered additive to GSWC's growth.

(d) Commercial and landscape demands for the Proposed Project, as well as the corresponding water losses, are within the growth anticipated by GSWC and therefore, are included in the GSWC Culver City Service Area 2020 UWMP. However, the Proposed Project's multi-family residential demands and the corresponding water losses were not included within the projected growth in the 2020 UWMP. Therefore, these demands are additive to those in the 2020 UWMP, as confirmed through correspondence with GSWC per Reference 3.

(e) Distribution losses associated with the Proposed Project's multi-family residential demands are proportional to the Proposed Project's total distribution system losses in Table 1.

6 GSWC CULVER CITY SERVICE AREA WATER SUPPLY

This section identifies the water supplies for the GSWC Culver City service area and discusses the variability of the different supplies based on drought and other factors affecting water supply reliability. The Proposed Project will be served with potable water by GSWC, which primarily relies on imported water purchased from the West Basin Municipal Water District (WBMWD), although GSWC has previously extracted a minimal amount of groundwater from the Santa Monica Subbasin (GSWC, 2021).

6.1 Identification of Water Supply Rights

☑ ***CWC § 10910 (d)(1)***

The assessment required by this section shall include an identification of any existing water supply entitlements, water rights, or water service contracts relevant to the identified water supply for the proposed project, and a description of the quantities of water received in prior years by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), under the existing water supply entitlements, water rights, or water service contracts.

Pursuant to CWC §10910(d)(1), a WSA is required to include identification of all water supply entitlements, water rights, and water service contracts relevant to the identified water supply for the Proposed Project. In accordance with these requirements, this WSA includes a summary of GSWC's water supply sources for the GSWC Culver City service area.

6.2 Purchased Water

GSWC purchases water for the GSWC Culver City service area from WBMWD. The water purchased from WBMWD may be managed and moved between the GSWC Culver City service area and GSWC Southwest service area, depending upon the circumstances for supply availability in each particular service area (GSWC, 2021).

GSWC entered into a five-year purchase order agreement between GSWC and WBMWD, effective 1 January 2008 through 31 December 2012. The agreement was extended an additional two years to 31 December 2014. This agreement provided GSWC with an annual maximum allocation of 30,651 AFY with a total purchase commitment of 91,953 acre-feet (AF) over the five-year term of the agreement, shared by all of GSWC's systems served by WBMWD. At this time, this agreement has not been extended (WBMWD, 2024).

WBMWD is a member agency of the Metropolitan Water District of Southern California (MWD). WBMWD acts as secondary wholesale water agency, purchasing water from MWD and reselling it to GSWC. WBMWD entered into a new ten-year term purchased order with MWD effective 1 January 2015 through 31 December 2024 (WBMWD, 2021). At this time, no new purchase order agreement has been made between WBMWD and MWD effective past 31 December 2024, per email correspondence with WBMWD (WBMWD, 2024).

MWD supplies imported water sourced from the State Water Project (SWP) and the Colorado River via a series of pipelines and aqueducts. The Colorado River was MWD's original source of water following its establishment in 1928. MWD has a legal entitlement to receive water from the Colorado River under a permanent service contract with the United States Secretary of the Interior. The Colorado River Aqueduct, which has a capacity of 1.25 million AFY, is owned and operated by MWD. It transports water from Lake Havasu, at the border of California and Arizona, approximately 242 miles west to its terminus at Lake Mathews in Riverside County and MWD's service area (WBMWD, 2021).

MWD also imports water from the SWP, which is owned by the State of California and operated by DWR. The SWP transports Feather River water stored in and released from Oroville Dam and conveyed through the San Francisco Bay and Sacramento-San Joaquin River Delta (Bay-Delta), as well as unregulated flows diverted directly from the Bay-Delta, south via the California Aqueduct to four delivery points: one from the California Aqueduct's West Branch at Castaic Lake and three from the East Branch along the northeastern portion of MWD's service area between Devil's Canyon Power Plant and Lake Perris (WBMWD, 2021).

MWD continuously engages in planning for various aspects of its water management, including operations, long-term reliability, and emergency response. These planning efforts include: (1) the 1996 Integrated Water Resources Plan (IRP) and its three updates in 2004, 2010, and 2015; (2) the 2020 IRP (currently in development); (3) the Water Shortage Contingency Plan (WSCP); (4) the Water Surplus and Drought Management (WSDM) Plan; (5) the Water Supply Allocation Plan (WSAP); (6) the Emergency Storage Objective; and (7) the Seismic Risk Assessment and Mitigation Plan. Collectively, they provide a policy framework, operating guidelines, and resource targets for MWD to ensure regional water supply reliability (MWD, 2022; WBMWD, 2021).

The IRP is MWD's evolving long-term plan to assure adequate water supplies for Southern California. The first IRP was adopted in 1996 to address the complexity of developing, maintaining, and delivering water to meet changing demands in the face of growing challenges. This version of the IRP was last updated in 2015 and detailed a series of reliability goals, approaches, and targets for each of their water resource areas, with some focus on maintaining existing capabilities and increasing net quantities over the 25-year planning horizon (MWD, 2016). The 2015 IRP identified the following goals:

- Maintain Colorado River Aqueduct supplies;
- Stabilize State Water Project supplies;
- Achieve additional conservation savings; and
- Develop and protect local water supplies.

MWD published annual implementation reports on its progress towards the 2015 IRP goals. The most recent Implementation Report (2019) highlighted the progress on achieving the resource and reliability goals established in the 2015 IRP as follows:

- MWD worked closely with other agencies to improve the reliability of its imported water supplies. MWD led efforts in crafting the Lower Colorado River Basin Drought Contingency Plan and supported efforts to make the Delta more resilient and support Governor Newsom's direction to advance a single tunnel solution in the Delta.
- MWD continued to support and encourage local supply development through the Local Resources Program. MWD's board approved three projects with a total contract yield of 3,660 AFY from January 2019 to October 2019. As of October 2019, seven additional applications for a total of 116,580 AFY were under consideration. MWD was also assessing the water supply benefits from stormwater through pilot programs.
- MWD continued to inform residents of water use efficiency through its ongoing advertising campaigns and education. In addition to rebates for water efficient fixtures, MWD also implemented programs targeting outdoor conservation with its landscape education and turf replacement programs. In 2019, MWD's Board of Directors (Board) approved a conservation initiative that focuses on reaching disadvantaged communities (MWD, 2019).

In 2020, MWD initiated a new IRP process with a fresh approach, looking at multiple scenarios that could play out in the future and how MWD could respond to maintain water reliability for the region. The 2020 IRP is a two-phase process including a Regional Needs Assessment (Phase 1) and a One Water Implementation phase (Phase 2). The Regional Needs Assessment was completed and adopted by the MWD Board in April 2022, and includes the analysis of regional needs under a range of scenarios: (1) Scenario A, low demand and stable imports; (2) Scenario B, high demand and stable imports; (3) Scenario C, low demand and reduced imports; and (4) Scenario D, high demand and reduced imports (MWD, 2022). The Regional Needs Assessment found plausible reliability outcomes by the year 2045, with potential shortages ranging from no net shortage at all under Scenario A to as high as 1.2 million AF under Scenario D, and identifies needs and opportunities related to five focus areas: (1) SWP dependent areas; (2) storage; (3) retail demand/ demand management; (4) MWD imported supplies; and (5) local supply. The Regional Needs Assessment concludes that:

> *Collectively, these findings instill a sense of optimism about Southern California's water future. Metropolitan has identified the tools necessary to adapt to a variety of plausible futures successfully. It is also well within Southern California's control to avoid a fate with increased per-capita water use and higher demands that would prove unsustainable.*

The Regional Needs Assessment further notes that through the One Water Phase of the process:

> *The precise combination of actions will emerge as more is known about the future that we actually face. Southern California is poised to be agile enough to adjust its portfolio of water actions to keep up with our changing times.*

Completion of Phase 1 launched the beginning of the One Water Implementation (Phase 2). This phase, which is ongoing, involves collaboration between MWD's Board, member agencies, and interested parties to establish a joint process for monitoring key reliability indicators, develop a coordinated approach to regional problems and resource needs identified in Phase 1, and create an adaptive management strategy (MWD, 2022).

While MWD coordinates regional supply planning through its inclusive IRP process, MWD's member agencies also conduct their own planning analyses, including their own urban water management plans, and may develop projects independently of MWD (MWD, 2022; WBMWD, 2021).

6.3 Groundwater Supply

☑ ***CWC § 10910 (f)***

If a water supply for a proposed project includes groundwater, the following additional information shall be included in the water supply assessment:

(1) A review of any information contained in the urban water management plan relevant to the identified water supply for the proposed project.

(2)(A) A description of any groundwater basin or basins from which the proposed project will be supplied.

(B) For those basins for which a court or the board has adjudicated the rights to pump groundwater, a copy of the order or decree adopted by the court or the board and a description of the amount of groundwater the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), has the legal right to pump under the order or decree.

(C) For a basin that has not been adjudicated that is a basin designated as high- or medium-priority pursuant to Section 10722.4, information regarding the following:

(i) Whether the department has identified the basin as being subject to critical conditions of overdraft pursuant to Section 12924.

(ii) If a groundwater sustainability agency has adopted a groundwater sustainability plan or has an approved alternative, a copy of that alternative or plan.

(D) For a basin that has not been adjudicated that is a basin designated as low- or very low priority pursuant to Section 10722.4, information as to whether the department has identified the basin or basins as overdrafted or has projected that the basin will become overdrafted if present management conditions continue, in the most current bulletin of the department that characterizes the condition of the groundwater basin, and a detailed description by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), of the efforts being undertaken in the basin or basins to eliminate the long-term overdraft condition.

(3) A detailed description and analysis of the amount and location of groundwater pumped by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), for the past five years from any groundwater basin from which the proposed project will be supplied. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historic use records.

(4) A detailed description and analysis of the amount and location of groundwater that is projected to be pumped by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), from any basin from which the proposed project will be supplied. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historic use records.

(5) An analysis of the sufficiency of the groundwater from the basin or basins from which the proposed project will be supplied to meet the projected water demand associated with the proposed project. A water supply assessment shall not be required to include the information required by this paragraph if the public water system determines, as part of the review required by paragraph (1), that the sufficiency of groundwater necessary to meet the initial and projected water demand associated with the project was addressed in the description and analysis required by paragraph (4) of subdivision (b) of Section 10631.

As shown in **Figure 3**, the majority of the GSWC Culver City service area overlies the Santa Monica Subbasin of the Los Angeles Basin (DWR Basin No. 4-011.01; referred to as "Santa Monica Subbasin" or "Subbasin").[7]

In 2020, 0.1 AF of groundwater pumped from the Santa Monica Subbasin was used by the GSWC Culver City service area (**Table 5**). However, GSWC does not anticipate using groundwater to meet demands for the Proposed Project or the rest of its GSWC Culver City service area within the 2045 planning horizon (GSWC, 2021; GSWC, 2022a). Per the 2020 UWMP, while the GSWC Culver City service area has not relied upon groundwater to serve its customers over the last few years, GSWC maintains a well and may institute potential service from the Subbasin in the future upon completion of the Santa Monica Groundwater Subbasin GSP and implementing actions. Although groundwater is not currently anticipated to supply the Proposed Project, details regarding the Subbasin pursuant to CWC §10910(f) are provided below given the possibility that groundwater could be utilized in the future.

6.3.1 Basin Description

The following is a description of the groundwater basin from which the Proposed Project could be supplied, if GSWC uses its well in the future. The discussion is based on review of relevant information contained within the GSWC Culver City service area 2020 UWMP and the Santa Monica Groundwater Subbasin GSP (GSWC, 2021; SMBGSA, 2022).

The Santa Monica Subbasin comprises the northwestern part of the Coastal Plain of Los Angeles Groundwater Basin. It is bounded by impermeable rocks of the Santa Monica Mountains on the north and by the Ballona escarpment on the south. The Subbasin extends from the Pacific Ocean on the west to the Inglewood fault on the east. Ballona Creek is the dominant hydrologic feature and drains surface waters to the Pacific Ocean. The Subbasin is bounded to the south by the West Coast Subbasin and to the east by the Hollywood and Central Subbasins.

Holocene age alluvium forms much of the surficial deposits for the central part of the Subbasin and fills the Ballona gap, an erosional channel cutting into and across the Inglewood fault. These deposits include the clay-rich Bellflower aquiclude and underlying gravels of the Ballona aquifer. Late Pleistocene alluvial sediments form much of the elevated plateau areas in the Subbasin and include older dune sands and the Lakewood Formation. The Lakewood Formation includes thin coarse-grained laterally discontinuous units in the Subbasin, not contiguous with the named aquifers of the Lakewood Formation elsewhere in the Los Angeles Basin. In general, groundwater supply wells are not screened within the Lakewood Formation. The Silverado aquifer within the early Pleistocene age San Pedro Formation is the main productive unit in the Subbasin in which the majority of the groundwater production wells in the basin are screened. Water bearing units

[7] Small portions of the GWSC Culver City service area also overly the Central and West Coast Subbasins (DWR 4-011.04 and DWR 4-011.03, respectively). However, GSWC's Culver City service area well is located within the Santa Monica Subbasin.

below the San Pedro Formation include the Pliocene marine sediments of the Pico Formation, which are not widely produced.

The primary source of recharge to the Silverado aquifer (the primary productive unit within the Subbasin) is mountain front recharge from the Santa Monica Mountains to the north of the Subbasin. The Subbasin is highly urbanized and little recharge occurs via direct infiltration of precipitation in the Subbasin boundaries.

Primary sources of groundwater discharge from the Santa Monica Subbasin include groundwater production wells. Groundwater in the Santa Monica Subbasin moves mainly southward toward the Ballona gap, then flows toward to the ocean. Under normal water level conditions, underflows are expected from the Santa Monica Subbasin to the West Coast Subbasin in the south. Relatively minor amounts of underflows are expected across the eastern boundary with the Hollywood and Central Subbasins or the western boundary with the ocean.

6.3.2 Basin Status

Pursuant to CWC §10910f(2)(C), the Santa Monica Subbasin is not adjudicated and, in its recent evaluation of California groundwater basins, DWR determined that the Santa Monica Subbasin was not in a condition of critical overdraft (DWR, 2022).

The Santa Monica Subbasin is, however, designated as a medium priority basin under DWR's 2019 Phase 2 Basin Prioritization (DWR, 2019). The main factors driving this designation include Population (5 out of 5 possible points), Population Growth (3 out of 5 possible points), and Total Wells (3 out of 5 possible points). Additional factors include Groundwater Reliance (2.5 out of 5 possible points), Public Supply Wells (2 out of 5 possible points), and Impacts (2 out of 5 possible points) (DWR, 2022).

As discussed in the Santa Monica Groundwater Subbasin GSP, a very small portion on the southern coastal edge of the Santa Monica Subbasin overlaps the adjudicated area of the West Coast Subbasin (DWR 4-011.03). GSWC's groundwater well is located outside of this area, and thus the adjudication does not impact potential groundwater use by the GSWC Culver City service area. Additional information on this adjudicated area is provided in the Santa Monica Groundwater Subbasin GSP (SMBGSA, 2022).

6.3.3 SGMA Groundwater Management

In 2014, the California State Legislature enacted the Sustainable Groundwater Management Act (SGMA) with subsequent amendments in 2015. SGMA requires the formation of Groundwater Sustainability Agencies (GSAs) and the development and implementation of GSPs for groundwater basins that are designated by DWR as medium or high priority. As a medium priority, non-critically overdrafted and non-adjudicated basin (see previous discussion), the Subbasin is subject to the requirements of SGMA, including the requirement to be covered by one or more GSAs and to prepare and submit to DWR one or more GSPs by 31 January 2022.

Per the Santa Monica Groundwater Subbasin GSP, the Santa Monica Basin Groundwater Sustainability Agency (SMBGSA) was formed in 2017. The five member agencies of the SMBGSA include the City of Santa Monica, the City of Beverly Hills, the City of Los Angeles (by and through its Department of Water and Power), the City of Culver City, and the County of Los Angeles. The five member agencies signed a Memorandum of Understanding for the formation of the SMBGSA in May 2017.

The Santa Monica Groundwater Subbasin GSP was submitted to DWR in 2022 and approved on 26 October 2023. DWR has recommended Corrective Actions to be addressed in the 2027 five-year GSP update. The GSP and DWR's Determination Letter can be found on the DWR SGMA Portal: https://sgma.water.ca.gov/portal/gsp/preview/129. This GSP and subsequent updates will govern groundwater use within the Subbasin going forward.

6.4 Recycled Water

Recycled water is not currently served to customers within the GSWC Culver City service area and is not expected to supply the Proposed Project. It is noted, however, that wastewater generated within the service area is treated by the City of Los Angeles, and a portion of that treated wastewater is sold to WBMWD for further treatment for recycled water uses throughout the WBMWD service area (GSWC, 2021). Although the GSWC Culver City service area does not directly utilize recycled water, its customers contribute to the regional water supply reliability benefit achieved through WBMWD's distribution of recycled water.

6.5 Total Projected Potable Supply in Normal, Single Dry, and Multiple Dry Years

As discussed above, water purchased from WBMWD constitutes the primary source of supply for the GSWC Culver City service area historically and is expected to be the sole source of supply within the 2045 planning horizon (GSWC, 2021). The WBMWD 2020 UWMP states that it will be able to serve 100% of projected demands in normal, single-dry and multiple-dry years (WBMWD, 2021). Because of this, GSWC expects that under all hydrologic conditions purchased water supplies will fully meet future purchased water demands included in the GSWC 2020 UWMP. Additionally, GSWC has confirmed that it has the ability to purchase additional water from WBMWD to meet the additive demands of the other known developments and the Proposed Project (GSWC, 2024).

Therefore, the available supplies to the GSWC Culver City service area are considered to be equal to GSWC 2020 UWMP demands plus the additive demands of other known developments and the Proposed Project under all conditions (i.e., current and projected, and for normal, single dry, and multiple dry years including a five-year drought period).

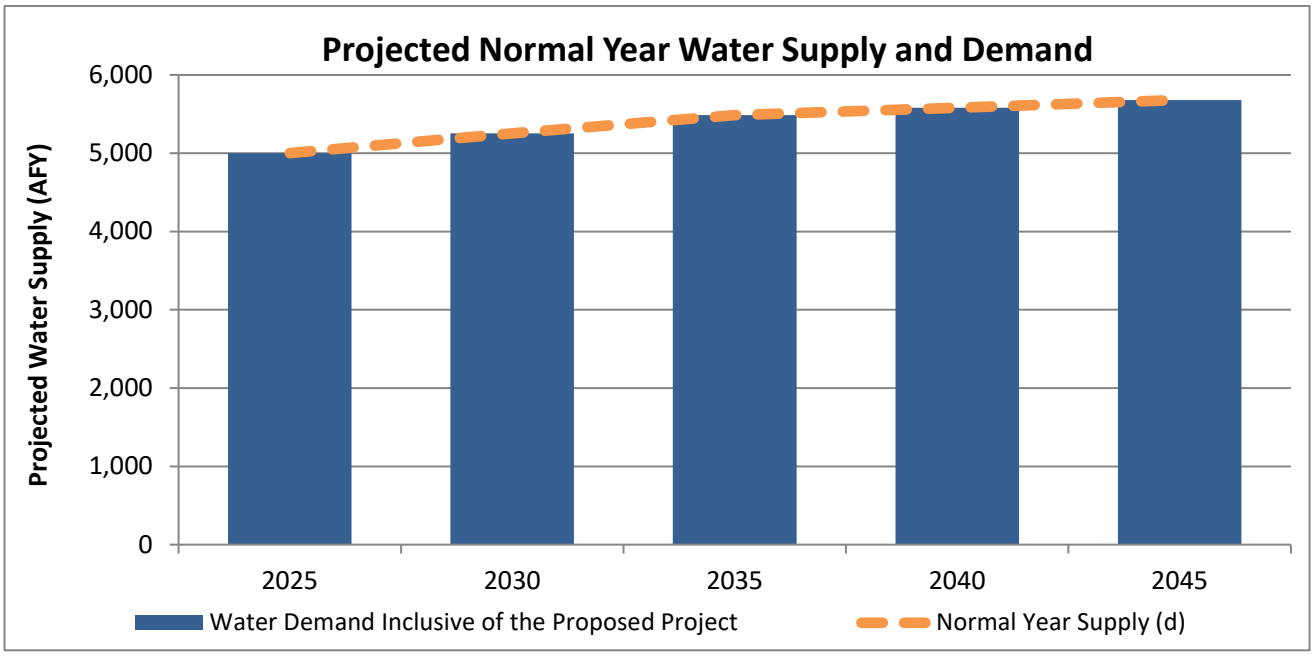
The total projected potable supplies for the GSWC Culver City service area for normal, single dry, and multiple dry years are presented in **Tables 6**, **7**, and **8**.

Table 6

Projected Normal Year Water Supply and Demand for GSWC Culver City Service Area

5757 Uplander Way, Culver City, California

Water Demand and Supply	Projected Normal Year Supply and Demand (AFY)				
	2025	2030	2035	2040	2045
Water Demand Inclusive of the Proposed Project	5,002	5,254	5,485	5,579	5,680
GSWC Culver City Service Area Normal Year Demand (a)	5,002	5,086	5,175	5,269	5,370
Other Known Developments' Additive Demand (b)	0	100	100	100	100
Proposed Project Additive Demand (c)	0	68	210	210	210
Normal Year Supply (d)	5,002	5,254	5,485	5,579	5,680
Supply Shortfall (% demand)	***None***	***None***	***None***	***None***	***None***



Abbreviations:

"AFY" = acre-feet per year

"GSWC" = Golden State Water Company

"Proposed Project" = 5757 Uplander Way

"UWMP" = Urban Water Management Plan

"WBMWD" = West Basin Municipal Water District

"WSA" = Water Supply Assessment

Notes:

(a) The projected normal year water demands for the GSWC Culver City Service Area are provided per Reference 1.

(b) Additive demands associated with other known developments in the GSWC Culver City Service Area include the demands associated with 10950 Washington Boulevard Project, per Reference 2.

(c) As discussed in Section 5 of this WSA, the demands associated with the Proposed Project's multi-family residential use and corresponding distributional losses are not included within the GSWC Culver City Service Area's 2020 UWMP projections.

(d) Per References 2 and 3, GSWC confirmed ability to purchase water from WBMWD as needed to meet demands. As such, the normal year supplies available to GSWC are equal to the projected demands in the 2020 UWMP plus the additive demands of both the Proposed Project and the 10950 Washington Boulevard Project.

Abbreviations:

"AFY" = acre-feet per year

"GSWC" = Golden State Water Company

"Proposed Project" = 5757 Uplander Way

"UWMP" = Urban Water Management Plan

"WBMWD" = West Basin Municipal Water District

"WSA" = Water Supply Assessment

Notes:

(a) While WSA regulations only require an analysis of a three-year drought scenario, UWMP regulations were updated in 2018 to include a five-year drought scenario (California Water Code §10635), Therefore, a five-year drought scenario is presented here.

(b) The projected multiple dry year water demands for the GSWC Culver City Service Area are provided per Reference 1.

(c) Demands associated with other known developments in the GSWC Culver City Service Area include the demands associated with 10950 Washington Boulevard Project, per Reference 2.

(d) As discussed in Section 5 of this WSA, the demands associated with the Proposed Project's multi-family residential use and corresponding distributional losses are not included within the GSWC Culver City Service Area's 2020 UWMP projections.

(e) Per References 2 and 3, GSWC confirmed ability to purchase water from WBMWD as needed to meet demands. As such, the multiple dry year supplies available to GSWC are equal to the projected demands in the 2020 UWMP plus the additive demands of both the Proposed Project and the 10950 Washington Boulevard Project.

7 COMPARISON OF SUPPLY AND DEMAND

☑ ***CWC § 10910 (c)(3)***

If the projected water demand associated with the proposed project was not accounted for in the most recently adopted urban water management plan, or the public water system has no urban water management plan, the water supply assessment for the project shall include a discussion with regard to whether the public water system's total projected water supplies available during normal, single dry, and multiple dry water years during a 20-year projection will meet the projected water demand associated with the proposed project, in addition to the public water system's existing and planned future uses, including agricultural and manufacturing uses.

☑ ***CWC § 10911 (a)***

If, as a result of its assessment, the public water system concludes that its water supplies are, or will be, insufficient, the public water system shall provide to the city or county its plans for acquiring additional water supplies, setting forth the measures that are being undertaken to acquire and develop those water supplies. If the city or county, if either is required to comply with this part pursuant to subdivision (b), concludes as a result of its assessment, that water supplies are, or will be, insufficient, the city or county shall include in its water supply assessment its plans for acquiring additional water supplies, setting forth the measures that are being undertaken to acquire and develop those water supplies. Those plans may include, but are not limited to, information concerning all of the following:

(1) The estimated total costs, and the proposed method of financing the costs, associated with acquiring the additional water supplies.

(2) All federal, state, and local permits, approvals, or entitlements that are anticipated to be required in order to acquire and develop the additional water supplies.

(3) Based on the considerations set forth in paragraphs (1) and (2), the estimated timeframes within which the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), expects to be able to acquire additional water supplies.

☑ ***CWC § 10911 (c)***

The city or county may include in any environmental document an evaluation of any information included in that environmental document provided pursuant to subdivision (b). The city or county shall determine, based on the entire record, whether projected water supplies will be sufficient to satisfy the demands of the project, in addition to existing and planned future uses. If the city or county determines that water supplies will not be sufficient, the city or county shall include that determination in its findings for the project.

Pursuant to CWC §10910(c)(3), this WSA includes an estimate of the projected water supplies available to GSWC Culver City service area under normal, single dry, and multiple dry years, based on the 2020 UWMP, and a discussion of whether those supplies will meet the projected demand associated with the Proposed Project as well as the water system's existing and planned future uses. This assessment is parallel to the multiple-dry year supply reliability analysis required for UWMPs under CWC §10635. In 2018, CWC §10635 was revised to require UWMPs to extend this analysis to consider "a drought lasting five consecutive water years." Although the parallel WSA requirement (i.e., CWC §10910(c)(3)) has not been updated to require this for WSAs, a five-year drought scenario is also evaluated herein.

Tables 6, **7**, and **8** provide a comparison of the demands and supplies, inclusive of the Proposed Project and other known developments, in normal year, single-dry year, and multiple-dry year hydrologic scenarios for the GSWC Culver City service area. As discussed above, the available supplies to the GSWC Culver City service area are considered to be equal to GSWC Culver City service area 2020 UWMP demands plus the additive demands of other known developments and the Proposed Project under all conditions (i.e., current and projected, and for normal, single dry, and multiple dry years).

While supply shortfalls are not projected, any shortfalls that could occur in the future would be managed through the implementation of GSWC Culver City service area's WSCP. The overall reduction goals in the WSCP are established for six drought stages ranging from 10% to greater than 50% shortfalls.

During the historic 2013-2017 drought, the GSWC Culver City service area was subject to the State Water Resources Control Board's (SWRCB's) mandatory water reduction target at 16% between June 2015 and May 2016,[8] and met its target through implementation of its WSCP and reducing its water demand 17% relative to its water use in 2013 (SWRCB, 2016). On 8 July 2021, in response to the recent drought conditions, Governor Newsom signed Executive Order (EO) N-10-21 calling Californians to voluntarily reduce water use by 15% compared to 2020 levels. On 28 March 2022, following the driest first three months of a year in the State's recorded history, Governor Newsom signed EO N-7-22 calling on local water suppliers to move to Stage 2 of their WSCP. GSWC enacted Stage 2 of its WSCP for the GSWC Culver City service area on 27 June 2022 and implemented numerous drought response actions, including, but not limited to, outdoor watering day restrictions and drought emergency surcharges for usage in excess of customer baseline (GSWC, 2021; GSWC, 2022b). As a result of recent dramatic rainfall in 2023, GSWC moved the GSWC Culver City service area from Stage 2 to Stage 1 effective 14 May 2023 (GSWC, 2023). As a customer within the GSWC Culver City service area, the Proposed Project would be obligated to comply with any demand reduction efforts imposed by GSWC through implementation of the WSCP in any future water shortage conditions. Therefore, the Proposed Project would contribute a proportionate share of the reduction in water demands during dry years or other water shortage conditions.

In 2016, Governor Brown signed EO B-37-16 *Making Water Conservation a California Way of Life* and subsequently SB 606 and AB 1668 were passed. SB 606/AB 1688 set new requirements for urban water agencies to continue to increase water efficiency beyond the 2020 water use targets developed under the Water Conservation Act of 2009 (SB X7-7). Beginning in 2024, agencies are required to report on "urban water use objective" (UWUO), which is based on an aggregate

[8] On 5 May 2015, the SWRCB adopted Resolution 2015-0032 that mandates minimum actions by water suppliers and their customers to conserve water supplies into 2016 and assigned a mandatory water conservation goal to each water supplier based on their residential gallons per capita per day (R-GPCD). The Resolution was adopted pursuant to Executive Order B-29-15 that directed SWRCB to impose mandatory restrictions on urban water suppliers to achieve a statewide 25% reduction in potable urban water usage to address California's severe drought conditions.

estimate of efficient urban water use for the previous year based on local service area characteristics for that year and the adopted water use efficiency standards for the previous year (DWR, 2023). Additionally, agencies can adjust their UWUO's by adding an allowable potable reuse bonus incentive under CWC §10609.20(d). Through comparing UWUOs from the previous to the current year, agencies are expected to be better equipped to eliminate unnecessary uses of water, resulting in continued increases in efficiency for all urban water suppliers in the State.

In addition, SB 606/AB 1668 added new requirements related to drought planning and WSCPs, including requirements for agencies to: (1) conduct a drought risk assessments part of their future UWMPs to assess water supply reliability (or vulnerability) for a period of drought lasting five consecutive water years (CWC §10635(b)), and (2) conduct annual water supply and demand assessments to determine its water supply reliability for the current year and one dry year (CWC §10632(a)). These elements are included in the GSWC Culver City service area 2020 WSCP (i.e., Chapter 6 of the 2020 UWMP).

Therefore, given that: (1) the projections inclusive of the Proposed Project do not identify supply shortfalls under any hydrologic conditions evaluated; (2) GSWC has the ability to implement the WSCP in the case of supply shortages, and demonstrated its effectiveness during recent droughts; and (3) the recent increasing efficiency and drought planning requirements from the State, sufficient water supply is estimated to be available to GSWC to meet all future demands within the GSWC Culver City service area including those associated with the Proposed Project.

8 CONCLUSIONS

As listed in CWC §10910(c)(4), the primary purpose of this WSA is to evaluate whether sufficient water supply is available to meet all future water demands within the water supplier's service area, including those associated with the Proposed Project, during normal, single, and multiple dry hydrologic years for a 20-year time horizon.

As described in Section 4, the water demand of the Proposed Project (i.e., estimated at 237 AFY at buildout) has been conservatively estimated. As discussed in Section 5, the Proposed Project's commercial and landscaping demands, and associated water distribution losses, are within the projected water demand growth that form the basis of GSWC's demand projections in the adopted GSWC Culver City 2020 UWMP, while the multi-family residential and corresponding distributional loss demands are additive to the 2020 UWMP projections. GSWC has confirmed that it is able to purchase 100% reliable water supply from WBMWD to meet these additive demands of the Proposed Project. In addition, GSWC, due to new requirements by the State, is currently required to continue to increase water efficiency in its service area into the future. GSWC has demonstrated effectiveness in reducing demand during recent water shortage conditions through implementation of its WSCP and would be expected to rely on its WSCP to meet any potential water shortages or regulatory-required cutbacks.

Therefore, this WSA concludes that sufficient water supply is available to GSWC to meet all future demands within the GSWC Culver City service area, including those associated with the Proposed Project.

Abbreviations:

"AFY" = acre-feet per year

"GSWC" = Golden State Water Company

"Proposed Project" = 5757 Uplander Way

"UWMP" = Urban Water Management Plan

Notes:

(a) Values in black indicate cumulative anticipated sector growth (i.e., number of service connections) included in the GSWC - Culver City 2020 UWMP (Reference 1). Values in blue indicate the anticipated incremental growth in service connections between each five-year period included in the 2020 UWMP for each sector. Values in purple and green indicate the number of service connections associated with other known developments in the GSWC Culver City service area from available WSAs (in this case, the Culver Crossings Campus Building 1 Project and the 10950 Washington Boulevard Project, respectively). Values in orange indicate the incremental growth in service connections associated with the Proposed Project. It should be noted that Proposed Project demands, along with the demands of the other known developments, were converted from acre-feet per year (AFY) to number of service connections for comparison purposes using the conversion factors provided in the 2020 UWMP.

(b) The 10950 Washington Boulevard Project demands are provided per Reference 2.

(c) The number of service connections for the Proposed Project associated with the multi-family residential use (orange) is greater than the anticipated growth indicated in the 2020 UWMP for the multi-family residential sector (blue). Because of this, it can be assumed that these demands are not included in the 2020 UWMP and are, therefore, additive to the demands of the 2020 UWMP.

(d) The Culver Crossings Campus Building 1 Project demands are provided per Reference 3.

(e) The number of service connections for the Proposed Project associated with the commercial use (orange) and landscaping use (orange) is less than the anticipated growth indicated in the 2020 UWMP for the commercial and landscaping sector (blue). Because of this, it can be assumed that these demands are included in the 2020 UWMP.
