Culver city, CA 90232

Dear Shetauna,

Per your request, this letter is to confirm that Fire Rover, LLC is the manufacturer, installer, and exclusive authorized seller in the US for our Fire Rover solutions.

Our solution is fully patented with utility patent #US20160271434A (source: [http*//patents.google.com/patent/US20160271434A1/en](http://patents.google.com/patent/US20160271434A1/en)). Our solution encompasses the full equipment, installation, maintenance, human monitoring and warranty for the early detection and remotely operated response solution should you choose to add suppression capabilities in the future and that runs 24/7/365.

It is our understanding that Fire Rover is the only company that provides specialized early detection with human remote fire monitoring and response for waste collection operations. We identified and responded to over 3500+ confirmed fires/hotspots at our clients waste and recycling operations in 2025 from our UL approved central stations.

Please let me know how else I can help.

Sincerely,

Ryan Fogelman

Ryan
