The community meeting held in Culver City California on December 3, 2015 was to gain more information regarding the community. For this meeting, the questions that came up were that if this is “free housing for the elderly”, which we answered on the spot, due to the fact that this project is not for “free housing”. Additionally, there was another community member that was curious regarding our company; which we informed him that we are a family run business that is here to beautify the city of Culver City more than it already is. Furthermore, we assured those that joined our meeting that we will respect 100% of the cities rules and regulations regarding, building, safety and hours of operation.
