

1 RESOLUTION NO. 2020-P009

2 A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF CULVER  
3 CITY, CALIFORNIA, APPROVING ADMINISTRATIVE SITE PLAN REVIEW,  
4 P2019-0329-ASPR, AND RECOMMENDING TO THE CITY COUNCIL  
5 APPROVAL OF TENTATIVE TRACT MAP NO. 82973, P2019-0329-TTM, FOR  
6 THE CONSTRUCTION AND CREATION OF AN EIGHT (8) UNIT RESIDENTIAL  
7 CONDOMINIUM SUBDIVISION AT 3336 AND 3340 HELMS AVENUE IN THE  
8 RESIDENTIAL MEDIUM DENSITY MULTIPLE FAMILY (RMD) ZONE.

9 (Administrative Site Plan Review, P2019-0329-ASPR  
10 Tentative Tract Map No. 82973, P2019-0329-TTM)

11 WHEREAS, on December 11, 2019, BCG Helms Homes, LLC (the "Applicant" and the  
12 "Property Owner") filed an application for an Administrative Site Plan Review and Tentative  
13 Tract Map, to construct a two-story, eight (8) unit attached residential condominium  
14 development with semi-subterranean parking (the "Project"). The Project site is legally  
15 described as Lot 27 and Lot 28 of the Lehosky Tract, in the City of Culver City, County of Los  
16 Angeles, State of California; and,

17 WHEREAS, in order to implement the proposed Project, approval of the following  
18 applications are required:

19 1. Administrative Site Plan Review, P2019-0329-ASPR, for the construction of the  
20 proposed two-story, eight-unit dwelling structure with semi-subterranean 18-car parking  
21 garage, to ensure the Project complies with all required standards and City ordinances and to  
22 establish all onsite and offsite conditions of approval necessary to address the site features  
23 and ensure compatibility of the proposed Project with the development on adjoining properties  
24 and in the surrounding neighborhood, and

25 2. Tentative Tract Map No. 82973, P2019-0329-TTM, for the creation of an eight (8)  
26 airspace lot residential condominium subdivision, to ensure the subdivision complies with all  
27  
28  
29

1 required standards, City ordinances, and state law; to ensure lots are compatible with existing  
2 conditions in the immediate neighborhood; to provide necessary street dedication and  
3 improvements; and to prevent interference with the opening or extension of streets for  
4 emergency vehicular access, proper traffic circulation, draining; and

5 WHEREAS, pursuant to CEQA Section 15332, Class 32 – In-Fill Development Projects,  
6 the Project is Categorical Exempt; and  
7

8 WHEREAS, on May 27, 2020, after conducting a duly noticed public hearing on the  
9 subject application, including full consideration of the applications, plans, staff report,  
10 environmental information and all testimony presented, the Planning Commission, (i) by a vote  
11 of \_\_\_ to \_\_\_, adopted a Categorical Exemption, in accordance with the California Environmental  
12 Quality Act (CEQA), finding the Project will not result in significant adverse environmental  
13 impacts; and (ii) by a vote of \_\_\_ to \_\_\_, conditionally approved Administrative Site Plan Review,  
14 P2019-0329-ASPR; and (iii) by a vote of \_\_\_ to \_\_\_, recommended to the City Council approval  
15 Tentative Tract Map No. 82973, P2019-0329-TTM.  
16  
17

18 NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF CULVER  
19 CITY, CALIFORNIA, RESOLVES AS FOLLOWS:

20 SECTION 1. Pursuant to the foregoing recitations and the provisions of Culver City  
21 Municipal Code (CCMC), the following findings are hereby made:  
22

23 **Administrative Site Plan Review**  
24

25 As outlined in CCMC Section 17.540.020, the following required findings for an Administrative  
26 Site Plan Review are hereby made:

- 27 **A. The general layout of the project, including orientation and location of buildings,  
28 open space, vehicular and pedestrian access and circulation, parking and loading  
29 facilities, building setbacks and heights, and other improvements on the site, is  
consistent with the purpose and intent of this Chapter, the requirements of the**

**zoning district in which the site is located, and with all applicable development standards and design guidelines.**

The general layout of the Project is consistent with the Residential Medium Density Multiple Family (RMD) zoning district. The building is located in conformance with the minimum required Zoning Code setbacks, and designed to provide vehicular access, as well as pedestrian walkways to access the individual unit entries. The overall layout is similar to a U-shape, with the two (2) rear unit entries facing the sides of the property, three (3) middle units have entries facing an interior courtyard, and three (3) remaining units and general building and design oriented to communicate with Helms Avenue, where the front yard setback provides an open space area with landscaping in accordance with the requirements of the CCMC, thereby creating an enhanced streetscape. The building layout gives the appearance of two (2) buildings from the street view. In conformance with the minimum requirements in the subject zone, the building is set back fifteen (15) feet from the front, five (5) feet from the sides, and ten (10) feet from the rear property lines. The maximum allowed building height in the RMD Zone is thirty (30) feet, with allowances of an additional five (5) feet for parapets and 13'-6" for select rooftop projections, while the average block height is 18.47 feet. The proposed Project is two (2) stories, with a maximum overall building height of 28 feet – 6 inches to the top of the building roof, not including parapets/guardrails and stairwell projections which are five (5) and 6.5 feet above the level of the highest roof decks. The proposed building incorporates flat roofs of varying heights with straight and sloped parapets/guardrails to provide height variation and separate the visual mass, with the stairwell projections set back from the front of the building and various edges, so as to be compatible with the lower height structures in the surrounding neighborhood and adjacent to the site. Each dwelling unit meets the minimum required area of 900 and 1,100 square feet for a two- and three-bedroom unit respectively. Open space is provided on the ground level, as well as on rooftop decks. The minimum one hundred (100) square foot Zoning Code requirement for private open space is met by the rooftop decks, which are approximately 300 to 400 square feet each, with the ground floor private open space areas providing an additional 100 to 300 square feet. The structure location, setbacks, and street facing landscaping maximize the site's development potential while conforming to Zoning Code residential development standards.

The Project provides a total of eighteen (18) off-street parking spaces, in compliance with the minimum Zoning Code required number of spaces for the proposed eight (8) unit residential development, including two (2) required guest spaces. Vehicular access is oriented to occur from Helms Avenue by means of a twelve (12) foot wide driveway located along the northerly edge of the site, and designed in compliance with zoning standards. Provision of this access point will not impact street parking or street trees since the proposed apron will replace one that already exists along the same side of the property. The driveway is designed to descend into the subterranean garage, where parking stalls are configured such that a right-turn into the 24-foot wide drive aisle is required and then into the individual garages providing 2-car parking for each unit or into the open guest spaces. The area within the garage provides sufficient back-up clearance to maneuver in and out of the parking stalls and the site in a forward direction, via the proposed driveway. Pedestrian access to the site is provided by means of multiple paved walkways that will connect the public sidewalk to the diversely located entries of all the units and to the lift and

1 stairways providing access to subterranean garage. All pedestrian walkways are proposed  
2 to be a minimum of four (4) feet wide. The Project will have sufficient parking and adequate  
3 vehicular and pedestrian access and the configuration of the proposed onsite driveway,  
4 vehicle maneuvering areas, and pedestrian access are designed in accordance with all  
applicable CCMC standards. There are no other applicable design guidelines. The  
conditions of approval will further ensure all CCMC requirements are met.

5 **B. The architectural design of the structures and the materials and colors are**  
6 **compatible with the scale and character of surrounding development and other**  
7 **improvements on the site and are consistent with the purpose and intent of this**  
8 **Chapter, the requirements of the zoning district in which the site is located, and with**  
9 **all applicable development standards and design guidelines.**

10 The architectural design of the structure is characterized by a modern style, incorporating  
11 straight lines and right angles with a flat roof. The two-story structure reaches a maximum  
12 of 28'-6" in height to the highest second floor roof. Additional projections for the  
13 parapets/guardrails and stairwells reach thirty-three (33) and thirty-five (35) feet,  
14 respectively. The building is dressed in a smooth stucco finish on the exterior walls of all  
15 elevations with segments cement board lap siding and cement board panels, with siding at  
16 two (2) focal locations along the front façade. The architectural design of the street facing  
17 façade is further enhanced by the provision of a vertically oriented projecting metal trim/fin  
18 feature, metal awnings, and metal railing feature. Although the dwelling units sit atop a  
19 podium for the semi-subterranean parking, the structure is designed to minimize the visual  
20 impact of the off-street parking facilities from the public right-of-way, by utilizing a twelve  
21 (12) foot wide driveway and setting back the entry approximately forty-five (45) feet from  
22 the front property line. The building mass is broken up by the use of a U-shape layout that  
23 gives the appearance of two (2) smaller buildings when seen from the street. The overall  
24 building height and massing is designed to minimize the visual scale of the development  
25 through the utilization of step backs of height projections, sloping parapets/guardrails, and  
26 material variation. The use of black/dark grey and orange metal trim accents provides  
27 additional visual relief throughout the building façades. The sloped parapets and guardrail  
28 features create visual interest and reduce the appearance of a plain square mass. The  
29 stairwells provide access to rooftop decks which are bound by low screen walls/guardrails  
and set in further from the roof edge. Further, the proposed development is sensitive to the  
character and scale of surrounding residential development in the neighborhood, and to  
preserving the privacy of surrounding properties. Residential structures in the block vary  
from one to two stories in height. The mix of architectural styles in the neighborhood  
includes traditional residential styles from the 1940's to 1970's, as well as the 1920's and  
some newer renovations in a more modern architectural style; the neighborhood color  
palette includes subdued colors, including the structures abutting the subject site. Similarly,  
the proposed color palette for the Project includes primarily white and grey tones. Roof  
design in the neighborhood includes primarily gable and hip, with some mansard, flat and  
shed style; exterior materials range from traditional wood siding to stucco. Overall, the  
design of the proposed Project is compatible with the architectural style and scale of the  
surrounding neighborhood and is consistent with the zoning standards of the RMD Zone.  
There are no other applicable design guidelines.

1 **C. The landscaping, including the location, type, size, color, texture, and coverage of**  
2 **plant materials, provisions for irrigation, and protection of landscape elements has**  
3 **been designed to create visual relief, complement structures, and provide an**  
4 **attractive environment and is consistent with the purpose and intent of this Chapter,**  
5 **the requirements of the zoning district in which the site is located, and with all**  
6 **applicable development standards and design guidelines.**

7 In compliance with the CCMC all front, side and rear yards not devoted to paved driveways,  
8 walkways or patios will be provided with landscape. The front yard will be landscaped the  
9 necessary amount to comply with the minimum required 55% of landscape coverage for the  
10 front yard for multi-family developments per CCMC Section 17.400.105. Landscape will  
11 include a variation in plant materials and colors to soften the building façade and enhance  
12 the street view aesthetics of the site. Three (3) trees are also proposed in the front yard  
13 area and will serve to provide visual relief and further break up the building massing. The  
14 two (2) side (north and south) yard pathways over the semi-subterranean parking structure  
15 will also include a landscape strip along the edge to provide greenery between the subject  
16 property and the abutting properties. Small shrubs and four (4) trees will be provided in the  
17 rear setback. Landscaping will also include replanting the parkway and the provision of at  
18 least one (1) street tree on Helms Avenue per the City's Urban Forest Master Plan.  
19 Complete landscape and irrigation plans indicating planting sizes, spacing and quantities  
20 shall be submitted for review and approval by all applicable divisions/departments prior to  
21 installation and final inspection to ensure this meets all Zoning Code requirements and  
22 provides a visual relief that also complements the building's colors and materials.

23 **D. The design and layout of the proposed project will not interfere with the use and**  
24 **enjoyment of neighboring existing or future development, will not result in vehicular**  
25 **or pedestrian hazards, and will be in the best interest of the public health, safety, and**  
26 **general welfare.**

27 The proposed building complies with the minimum required setbacks and is below the  
28 maximum allowed height, so as to not impact the use, privacy, and enjoyment of  
29 neighboring residential properties. The Project design and layout is intended to give the  
appearance of two (2) smaller buildings when viewed from the street, so as to be compatible  
with surrounding residential uses, which include both single and multi-family residential  
development in both single and two-story structures. The site provides adequate onsite  
vehicular and pedestrian access, circulation and parking in compliance with all zoning code  
requirements and will not produce any vehicular or pedestrian hazards. No off-site  
circulation hazards are presented by the proposed Project since access points are designed  
in the same manner as other residential developments seen in the surrounding  
neighborhood.

The use and enjoyment of neighboring development is not negatively impacted or interfered  
with, as the building is designed in a manner that is sensitive to maintaining the privacy and  
character of the surrounding neighborhood. For example, the building is set back the  
required amount from the side property lines, and provides deeper setbacks at select  
segments, including unit entries along the sides of the building. Side and rear perimeter  
fencing will be a 5-foot high CMU wall in order to preserve privacy for the abutting neighbors.  
Landscape strips with vine planting will also be provided at select segments of the side

1 setbacks in order to further buffer the properties. The Project also considers the existing  
2 neighboring window locations along the side elevations, in order to minimize the incidence  
3 of new windows directly aligning with the adjacent. The conditions of approval and  
4 compliance with all CCMC requirements will ensure the proposed Project will not be a  
5 detriment to the public interest, health, safety, or general welfare, or injurious to persons,  
6 property, or improvements in the vicinity and zoning district in which the property is located.  
7 Further, by providing additional housing in the neighborhood, the Project will serve the  
8 public interest and welfare.

9  
10 **E. The existing or proposed public facilities necessary to accommodate the proposed  
11 project (e.g., fire protection devices, parkways, public utilities, sewers, sidewalks,  
12 storm drains, street lights, traffic control devices, and the width and pavement of  
13 adjoining streets and alleys) will be available to serve the subject site.**

14 The site is located in an existing urbanized neighborhood, and is currently developed with  
15 two (2) detached single family dwellings and detached garages. Therefore, public facilities  
16 to the site currently exist. It is not anticipated that the proposed Project and resulting  
17 additional six (6) units will require new public facilities. Any upgrades to the existing facilities  
18 that are required will be provided. Improvements to the abutting right-of-way, such as new  
19 curb and gutter and street repair, will be implemented per the conditions of approval.  
20 Further, the existing and proposed public service facilities necessary to accommodate the  
21 Project such as: the width and pavement of the adjoining streets, traffic control devices,  
22 sewers, storm drains, sidewalks, street lights, proposed street trees, fire protection devices,  
23 and public utilities are provided for adequately as confirmed by the City Departments that  
24 reviewed the Project during the interdepartmental review process.

25  
26 **F. The proposed project is consistent with the General Plan and any applicable specific  
27 plan.**

28 The proposed construction of eight (8) new attached residential dwelling units will provide  
29 six (6) net new residential dwelling units at the site, at a density consistent with the General  
Plan's Medium Density Multiple Family Land Use designation. The Project is also  
consistent with the goals of the General Plan, specifically, Objective 2 of the Land Use  
Element, which calls for the retention and creation of housing throughout the City and the  
encouragement of multiple-family housing opportunities within neighborhoods designated  
for this development type. Based on review of the preliminary development plans, the  
proposed residential development is not anticipated to result in any significant impacts on  
surrounding uses or to be inconsistent with the goals of the General Plan. Furthermore, the  
addition of six (6) net units will count toward meeting the Regional Housing Needs  
Assessment (RHNA) allocation for Culver City, and will be consistent with Objective 2 of  
the Housing Element, which encourages opportunities for developing a variety of housing  
types while protecting the character and stability of existing neighborhoods. There is no  
applicable Specific Plan for this area.

**Tentative Tract Map (No. 82973)**

As outlined in CCMC Section 15.10.260 and 15.10.265.D, the following required findings for a

1 Tentative Tract Map (TTM) are hereby made:

2 **1. The proposed map is consistent with applicable general and specific plans.**

3 The proposed Tentative Tract Map will not create multiple parcels to be developed with  
4 various units separately, but rather will consist of an airspace subdivision to allow separate  
5 ownership opportunities of the units allowed on the parcel per the Zoning Code standards,  
6 and to consolidate the two (2) parcels that comprise the Project site. The General Plan  
7 Land Use Element designates the site as Medium Density Multiple Family, which  
8 corresponds to the RMD Zone, and per the Land Use Element is intended to allow multiple  
9 family dwellings, and encourage future developments of quality medium density housing on  
10 individual development parcels of up to 13,000 square feet. Per CCMC Section 17.210.020,  
11 the RMD Zone requires a minimum lot area of 5,000 square feet or the average area of  
12 residential lots within a 500-foot radius of proposed subdivision, whichever is greater. This  
13 section further notes condominium, townhome, or planned development projects may be  
14 subdivided with smaller parcel sizes for ownership purposes, with the minimum lot area  
determined through the subdivision review process, provided that the overall development  
site complies with the minimum lot size requirements of the Zoning Code. The two (2)  
parcels that comprise the subject site are consistent with the typical parcel size in the  
surrounding area and will not be reduced as a result of the proposed map; together the  
consolidated parcel will meet the minimum requirements. Therefore, the proposed map is  
consistent with the applicable general plan, and there is no applicable specific plan.

15 **2. The design or improvement of the proposed subdivision is consistent with applicable  
16 general and specific plans.**

17 The design and improvement of the proposed airspace subdivision is in compliance with  
18 the applicable general plan. The Project is consistent with the goals of the General Plan  
19 Land Use Element, specifically, Objective 2, which calls for the retention and creation of  
20 housing throughout the City and the encouragement of multiple-family housing  
21 opportunities within neighborhoods designated for this development type. Further per  
22 Section 17.210.020, the corresponding RMD Zone permits eight (8) units to be developed  
23 on the subject property, based on the allowance of one (1) unit per 1,500 square feet of net  
24 lot area. The subdivision improvements will include eight (8) new attached residential  
25 dwelling units, resulting in six (6) net new residential dwelling units at the site, at a density  
26 consistent with the General Plan's Medium Density Multiple Family Land Use designation.  
27 The proposed subdivision component of the Project will not increase the number of units  
28 allowed on the overall site, or cause any physical changes or reduction to the current overall  
29 lot area; the improvement component of the Project will comply with all applicable provisions  
of the Zoning Code and is a permitted use in the RMD Zone. The addition of six (6) net  
units will count toward meeting the Regional Housing Needs Assessment (RHNA) allocation  
for Culver City, and will be consistent with Objective 2 of the Housing Element, which  
encourages opportunities for developing a variety of housing types while protecting the  
character and stability of existing neighborhoods. Therefore, the design and improvement  
of the proposed subdivision is consistent with the applicable General Plan, and there is no  
applicable specific plan.

1 **3. The site is physically suitable for the type of development.**

2  
3 The subject site is a rectangular, generally flat parcel, which measures 90 feet in width by  
4 139.55 feet in depth for a total of 12,559.5 square feet, and is located within the RMD Zone.  
5 Therefore, the site conforms to the minimum lot dimensions and minimum lot area required  
6 per Zoning Code Section 17.210.020, as noted above, and is absent of physical or  
7 topographic constraints. The proposed development consists of eight (8) attached  
8 residential dwelling units with semi-subterranean parking, and is consistent with allowable  
density and development standards of the subject zone. The site is accessible by means  
of the existing fifty (50) foot wide public right-of-way, Helms Avenue, and will be served by  
all necessary utilities. Therefore, the subject site is physically suitable for the proposed  
residential development.

9 **4. The site is physically suitable for the proposed density of development.**

10  
11 As noted above, the site measures a total of 12,559.5 square feet and conforms to the  
12 minimum required lot dimensions and lot area. The proposed development consists of an  
13 eight (8) unit dwelling structure at a density of one (1) unit per 1,500 square feet of net lot  
14 area, as allowed by the applicable RMD Zone development standards. The site is physically  
15 suitable and of sufficient size to construct eight (8) dwelling units and provide the required  
off-street parking, circulation, open space, setbacks, and related improvements. The  
proposed condominium subdivision will not result in a change to the allowable density or to  
the size or dimensions of the overall development site.

16 **5. The design of the subdivision or the proposed improvements are not likely to cause**  
17 **substantial environmental damage or substantially and avoidably injure fish or**  
18 **wildlife or their habitat.**

19  
20 The proposed Tentative Tract Map is for the purpose of consolidating two (2) existing  
21 parcels and for the subdivision of airspace only and not to subdivide actual land parcels,  
22 and is designed in conformance with all required Zoning Code standards. The subject site  
23 is located in an existing urbanized area, and consists of land already improved with single-  
24 family residential development, such that the proposed eight (8) unit residential Project will  
result in a net increase of six (6) dwelling units. Further, there is no known fish or wildlife  
habitat on the subject site or surrounding area. Therefore, the proposed condominium  
subdivision and improvements will not cause any damage to any fish or wildlife or their  
habitat.

25 **6. The design of the subdivision or the type of improvements is not likely to cause**  
26 **serious public health problems.**

27  
28 The proposed Tentative Tract Map subdivision will not cause any known serious public  
29 health problems. The design of the proposed condominium subdivision is in compliance  
with the development standards of the RMD Zone. It has also been conditioned that the  
subdivision and proposed improvements must be in compliance with all applicable federal,

1 state, and local codes and statutes, as well as all conditions of approval required by  
2 reviewing City divisions/departments such as Community Risk Reduction, Building and  
3 Safety Division, and Engineering Division. Further, the site located in an urbanized setting  
4 and is developed with two (2) single-family dwellings and two (2) detached garages, and  
5 the proposed use is an eight (8) unit residential structure in the form of a condominium  
6 subdivision. Therefore, the improvements remain residential and are unlikely to cause any  
7 known serious public health problems.

8 **7. The design of the subdivision or the type of improvements will not conflict with  
9 easements, acquired by the public at large, for access through or use of, property  
10 within the proposed subdivision, or alternate easements, for access or for use, will  
11 be provided, and will be substantially equivalent to ones previously acquired by the  
12 public.**

13 The proposed Tentative Tract Map is for the purpose of consolidating the two (2) existing  
14 parcels and creating airspace lots for a condominium subdivision, and per the map provided  
15 there are no on-site easements. Furthermore, the proposed design and the on-site and off-  
16 site improvements will not conflict with any existing and/or proposed easements. Public  
17 right-of-way access and placement of utilities will not be affected or impaired by the  
18 proposed condominium subdivision.  
19  
20  
21  
22  
23  
24  
25  
26  
27  
28  
29

1 SECTION 2. Pursuant to the foregoing recitations and findings, the Planning  
2 Commission of the City of Culver City, California, hereby (i) adopts a Categorical Exemption,  
3 in accordance with the California Environmental Quality Act (CEQA), finding the Project will not  
4 result in significant adverse environmental impacts; and (ii) approves Administrative Site Plan  
5 Review, P2019-0329-ASPR; and (iii) recommends to the City Council approval of Tentative  
6 Tract Map No. 82973, P2019-0329-TTM, subject to the conditions of approval set forth in  
7 Exhibit A attached hereto and incorporated herein by this reference.  
8

9 APPROVED and ADOPTED this 27th day of May, 2020.

EXHIBIT A  
 RESOLUTION NO. 2020-P009  
 Case No. P2019-0329-ASPR, P2019-0329-TTM  
 3336 and 3340 Helms Avenue

NO.	CONDITIONS OF APPROVAL	Agency	Source	Compliance Verification
<b>GENERAL</b>				
1.	These Conditions of Approval are being imposed on the eight (8) unit residential condominium development (the "Project"), for the property located at 3336-3340 Helms Avenue (the "Property").	All	Standard	
2.	A copy of the Resolution approving the Project, and a copy of these Conditions of Approval, shall be printed on the plans submitted as part of any building permit application for the Project.	Current Planning	Standard	
3.	All building permit applications for the Project shall include sufficient information and detail to clearly reflect compliance with all applicable requirements of the Culver City Municipal Code (the "CCMC") and with these Conditions of Approval.	Current Planning	Standard	
4.	The land use permit to which these Conditions of Approval apply (the "Land Use Permit") shall expire one year from the date of final approval of said Land Use Permit, if the use has not been exercised. As provided in CCMC Section 17.595.030 – "Time Limits and Extensions", an applicant may request an extension of said expiration date by filing a written request with the Planning Division prior to the expiration of the land use permit.	Current Planning	Standard	
5.	The tentative map shall expire three years after its approval by the Planning Commission, except that approval of the tentative map shall be voided if the approval of the project's Site Plan Review expires.	Public Works	<b>Special</b>	
6.	Pursuant to CCMC Section 17.630.010.C.4 – "Posted Notice", the public notification sign(s) installed in accordance with the public notification requirements for the Land Use Permit shall be removed within ten days after the end of the appeal period or the final decision by the City Council on the Land Use Permit,	Current Planning	Standard
