

ORDINANCE NO. 2018-_____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF CULVER CITY, CALIFORNIA APPROVING COMPREHENSIVE PLAN AMENDMENT NO. 7, P2016-0208-CP FOR THE CULVER STUDIOS, LOCATED AT 9336 WASHINGTON BOULEVARD IN THE STUDIO ZONE.

(P2016-0208-CP)

WHEREAS, The Culver Studios Comprehensive Plan, CP No. 87-01, was approved by the City Council on January 25, 1988, and has subsequently been amended; and

WHEREAS, on November 16, 2016, The Culver Studios, (the “Applicant”) filed an application for a Comprehensive Plan Amendment (CPA No.7) for the Culver Studios to permit the construction, as modified, of five new buildings resulting in a net increase of 345,007 sq. ft. of development; the demolition of 12 buildings and stages; the construction of a new multi-level parking structure located off of Van Buren Place; and a below grade parking structure; the retention of 12 buildings and stages; and a Historic Preservation Program Certificate of Appropriateness for the rehabilitation of four historically designated bungalows, the Mansion (Building C), and the Front Lawn. This Project applies to the West Parcel (Lots 182 through 190 of the Nolan Park Tract, Lots 1 through 3 excluding that portion dedicated for Washington Boulevard (80 feet side) street purposes and 1 through 6 of Tract 2530), addressed 9336 Washington Boulevard; and

WHEREAS, in accordance with the California Environmental Quality Act (CEQA), the City prepared a Draft Environmental Impact Report (Draft EIR) on the Project which was made available for a 46-day public review period ending on November 6, 2017. Comments on the Draft EIR were received with responses provided in the Final

1 Environmental Impact Report (Final EIR). Project impacts were identified, and mitigation
2 measures provided as contained in the Mitigation Monitoring Program; and

3 WHEREAS, between November 6, 2017 and November 30, 2017, the
4 Applicant modified the Project as originally submitted, choosing Alternative 6 described in the
5 Draft EIR, which reduces the amount of new development by retaining existing Stage 7/8/9, a
6 historical resource, and foregoing construction of new Building M. The resulting impacts to
7 historical resources and traffic and circulation were lessened, but remain significant and
8 unavoidable due to operational impacts at seven (7) intersections, and demolition of Stage
9 2/3/4, a historical resource; and
10

11
12 WHEREAS, on December 13, 2017, after conducting a duly noticed public
13 hearing on the subject applications, including full consideration of the applications, plans,
14 staff report, environmental information and all testimony presented, the Planning
15 Commission (i) by a vote of 4 to 0, recommended to City Council Certification of the
16 Environmental Impact Report, recommended to City Council adoption of the Mitigation
17 Monitoring Program, and recommended adoption of a Statement of Overriding
18 Considerations, in accordance with the California Environmental Quality Act (CEQA),
19 including findings required by CEQA, P2016-0208-EIR; and (ii) by a vote of 4 to 0,
20 recommended to the City Council approval of a Development Agreement, P2016-0208-DA;
21 and (iii) by a vote of 4 to 0, recommended to the City Council approval of Comprehensive
22 Plan Amendment No. 7, P2016-0208-CP, and Historic Preservation Program Certificate of
23 Appropriateness, P2016-0208-HPCA, as set forth herein below.
24
25

26 NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF CULVER CITY,
27 CALIFORNIA, ORDAINS AS FOLLOWS:
28
29

1 SECTION 1. Pursuant to the foregoing recitations and the provisions of Culver
2 City Municipal Code (CCMC), the following findings are hereby made:

3
4 **Comprehensive Plan Amendment No. 7 for The Culver Studios:**

5 As outlined in CCMC Title 17, Section 17.560.020, the following required findings for a
6 Comprehensive Plan Amendment are hereby made:

7 **A. The proposed Comprehensive Plan can be substantially completed within 4**
8 **years.**

9 Comprehensive Plan Amendment No.7, the Project, includes a construction schedule
10 beginning in May 2018 and ending on or before November 2020 (2.5 years) as
11 projected at this time and assuming a January 2018 final Project approval. The Project
12 construction schedule would occur over a single phase and would be segmented into
13 focus zones within the Project site, to minimize both disruptions to neighboring uses
14 and to internal, continuing operations. Construction will be staggered between
15 demolition and new building based on the focus zone. Due to the proximity to
16 residences, Linwood Howe elementary school, and the downtown, measures to
17 reduce construction impacts have been included and are a part of the Project Design
18 Features, Mitigation Measures, and Conditions of Approval, and construction related
19 staging, coordination, timing, traffic, and communications are contained in the
20 Construction Management Plan and the Construction Traffic Control Plan.

21
22 **B. The proposed development is capable of creating an environment of sustained**
23 **desirability and stability, or adequate assurance will be provided such objective**
24 **will be attained.**

25 The Project is intended to provide for the long-term stability and viability of The Culver
26 Studios campus and will help maintain the City's economic base in film and media
27 production. The Project will help upgrade the 100-year old movie studio for modern
28 media production while also preserving the important historic aspects of the property
29 centered around the Mansion building, a cultural icon of The Culver Studios and the

1 City. Some of the property historic stages will be preserved and repurposed for
2 continued media entertainment production purposes. As a part of CPA No. 7,
3 sustainability and mobility elements are included to achieve an environmentally
4 responsive project. Project features include low impact development, energy
5 efficiency, water conservation, and improved water quality. Mobility measures will
6 enhance active transportation, multimodal connectivity, first and last mile travel to the
7 Culver City Expo Station, and streetscape improvements. As a part of the Project, a
8 development agreement is proposed to establish the applicant's contributions to a City
9 Mobility Fund and for various other enhancements to the mobility network.

10
11 **C. The proposed uses will not be substantially detrimental to present and potential**
12 **surrounding uses, but will have a beneficial effect.**

13 CPA No. 7 maintains the permitted uses for the Project site, including "office", "stage",
14 and "support" uses. The Project redistributes these uses providing for more "office"
15 space. Office uses are considered compatible with adjacent residential, school, and
16 commercial uses surrounding the Project site. The Project will maintain a secured
17 perimeter and restrict operations within internal spaces. CPA No. 7 includes walls and
18 fences to help shield and buffer the commercial operations of the Project site from
19 sensitive residential and school uses. CPA No. 7 includes Project site improvements
20 that reflect best practices in sound attenuation and site planning to better protect
21 residents from commercial operations. Along Ince Boulevard, landscaped setbacks
22 have been added to buffer and beautify the site perimeter. New and improved gates
23 and entries will direct traffic northerly to the downtown area, rather than through
24 residential areas to the south. The new parking structures will accommodate existing
25 and future employees, visitors, and fleet vehicles. The Project provides for more than
26 the Code required number of parking spaces. Truck parking will be eliminated from
27 Ince Boulevard and moved on-site. The new Van Buren Parking Garage will include a
28 wider setback, be screened, have a ventilation system to reduce contaminants, and a
29

1 walled elevation to help reduce vehicle noise impacts. A small linear park is proposed
2 along Van Buren Place to be designed with neighborhood input as a community asset.
3 Street trees will be protected. No public access from Van Buren Place is allowed to
4 the Project. Setbacks have been added to new buildings Y and K to protect privacy
5 and views of adjoin residences. The Project provides a new stable daytime population
6 that will patronizing downtown businesses and benefit the local economy.

7
8 **D. The streets and thoroughfares serving the development are suitable and**
9 **adequate to carry anticipated traffic, and the development will not generate**
10 **traffic that will overload the adjacent street network.**

11 The proposed Comprehensive Plan Amendment No. 7 is in compliance with the
12 California Environmental Quality Act (CEQA) as more fully detailed in the Project's
13 Environmental Impact Report (EIR). As a part of the Project EIR, a Traffic Analysis
14 was completed which studied several surrounding intersections in both Culver City
15 and Los Angeles. The Project was found to result in significant operational level of
16 service impacts at several intersections surrounding the Project site. Mitigation has
17 been provided to reduce impacts, but impacts remain significant and unavoidable at
18 seven (7) intersections including:

- 19
20 3. Duquesne Ave/Lucerne Ave (Culver City, AM peak hour)
21 8. Washington Blvd/Culver Blvd (Culver City, AM peak hour)
22 13. Robertson Blvd/Exposition Blvd/Venice Blvd (City of LA, AM & PM peak hours)
23 14. National Blvd/Washington Blvd (Culver City, AM peak hour)
24 33. Overland Ave/Venice Blvd (City of Los Angeles, AM peak hours)
25 38. Robertson Blvd/National Blvd (City of Los Angeles, AM & PM peak hours)
26 42. Duquesne Ave/Braddock Dr (Culver City, AM & PM peak hours)

27
28 The EIR provides mitigation for traffic and transportation impacts that include TDM
29 measures for the Project site tenants, such as ridesharing, site design to encourage

1 walking and bicycling, contribution to a bike share service, unbundled parking, car-
2 share, transit pass subsidies and other measures that are intended to enhance
3 mobility.

4
5 Mitigation (TRAF-7) is included to restripe the southbound approach to the intersection
6 of Ince Boulevard and Washington Boulevard to provide for two, left-only turn lanes to
7 Washington Boulevard and a shared through/right turn lane to Ince Boulevard and the
8 entry to the Project site gates. Also included are restricted right-turns from Ince
9 Boulevard gates to avoid travel through residential streets. Mitigation (TRAF-8) is
10 included to restripe the Canfield Ave/Washington Blvd/Culver Blvd intersection
11 controlling turn movements.

12
13 Through the Project Development Agreement, a contribution to the City's Mobility fund
14 would be made to enhance multimodal connections in order to reduce vehicle miles
15 traveled burdens on area intersections.

16
17 The Project is considered an infill site. Regional goals and objectives call for economic
18 enhancements particularly at infill sites well served by transit.

19
20 The Project will result in increased traffic levels on some existing commercial streets
21 due to increased development. The EIR Traffic Analysis did not find impacts on
22 residential streets around the Project site but did find that intersections to the north in
23 both Culver City and Los Angeles and along Duquesne Avenue will be impacted.
24 Project related traffic is not expected to use surrounding residential streets due to
25 traffic calming improvements previously constructed to discourage cut-through traffic.

26
27 The Project gate entries have been designed with angled driveways, signage, and
28 pavement markings that permit "left turn only" movements out of the Project site along
29 Ince Boulevard. A proposed single tenant to occupy the Project could facilitate better

1 and less impactful traffic patterns by imposing rules to control employee and visitor
2 ingress and egress consistent with traffic study recommendations and neighborhood
3 protection goals.

4
5 Project design and circulation features that orient traffic to the north of the property
6 away from residential neighborhoods, including the Culver/Main tunnel connection to
7 the underground parking garage, will prevent an overload on the surrounding street
8 network and help minimize adverse circulation conditions.

9
10 **E. The proposed development is compatible with the surrounding area.**

11 The Project has been designed to provide for increased development while minimizing
12 the impacts upon the surrounding area, particularly residential properties. The
13 challenges of developing within a historic property constrained by residential
14 development to the south, west, and east, have been addressed in the CPA No. 7. A
15 greater proportion of media related office use will make the Project more compatible
16 with sensitive residential and school uses compared to “support” and “production”
17 uses that may generate more noise and truck traffic. The Project will not exceed the
18 code established height limits. Project design incorporates setbacks and step backs,
19 building articulation, and green screen features where possible in order to lessen
20 massing impacts to surrounding areas. The Van Buren Parking Garage will include an
21 exhaust and ventilation systems with quiet fans and duct silencers to maintain certain
22 noise reduction levels during specified times. To address noise impacts, a concrete
23 wall is provided along the first level of the Van Buren Parking Garage. The location of
24 parking structures and office buildings are appropriate for placement with in the
25 Project site and as conditioned will have less negative impacts on surrounding
26 adjacent uses.

1 Construction activities will create temporary neighborhood impacts. The EIR identified
2 construction impacts associated with transportation and traffic and provides mitigation
3 measures, however, impacts were still found to be significant. Measures include
4 prohibiting trucks from using residential streets to the south, east, and west.
5 Construction traffic haul routes will be directed to Ince Boulevard and Washington
6 Boulevard, deliveries and pickups will be scheduled at non-peak hours, access will not
7 be restricted for surrounding uses, and any lane closures will be scheduled at off-peak
8 periods.

9
10 To ensure reduced construction related noise impacts to surrounding residential uses,
11 the Project will utilize quiet air compressors and similar equipment, where available.
12 Further, noise barriers such as noise blankets with a noise reduction coefficient to
13 block the distances between the construction equipment and residential areas during
14 construction will be used. Standard construction conditions which limit hours of
15 construction and address construction related noise will be enforced.

16
17 **F. The types and locations of the proposed commercial development can be**
18 **economically justified.**

19 The Project provides for increasing market demand for digital media production space
20 associated with new and changing technologies consistent with current economic
21 trends. The Culver Studios is currently functioning well as an independent rental-
22 based studio, but the Project will provide a more campus-like work environment with
23 less emphasis on filming within large sound stages with expansive sets, and more
24 emphasis on smaller work spaces for creating computer-generated media content for
25 on-line streaming and other distribution means. The Project is also known as the
26 Innovation Plan due to its emphasis on new and emerging technologies. The Project
27 changes realign the mix of site uses from traditional movie and similar entertainment
28
29

1 production to more digitally focused media office space. New office development can
2 more easily adapt to changes in markets for decades into the future.

3
4 **G. The Comprehensive Plan is in conformance with the General Plan, or a**
5 **concurrent General Plan Amendment is in process.**

6 Comprehensive Plan Amendment No. 7 is in conformance with the General Plan. The
7 office, production, and support uses that comprise the Studio are consistent with the
8 General Plan Studio designation for the Project site. The Project also helps achieve
9 many of the economic development goals and objectives of the General Plan
10

11 **H. Any exception from the standards and requirements of this Title is warranted by**
12 **the design and amenities incorporated in the Comprehensive Plan, and is**
13 **desired by the Council.**

14 The Project does not call for any exceptions to standards and requirements in the
15 Culver City Municipal Code. The Project's development conforms to the height
16 limitations. The Project provides more than the required parking. CPA No. 7 provides
17 other standards for the Project's development including setbacks developed to help
18 buffer future development from nearby residential properties.

19
20 **I. Existing and proposed utility services are adequate for the proposed uses.**

21 Utility and infrastructure studies have been prepared to address the development in
22 CPA No.7 and are analyzed in the Project EIR. System upgrades to wet utilities:
23 water, wastewater, and drainage; and dry utilities: electricity, natural gas,
24 telecommunications will be provided to meet Project needs. Service providers have
25 indicated that with upgrades, utilities can accommodate the increased development on
26 the Project site.

J. The Comprehensive Plan has complied with all applicable City requirements.

CPA No. 7, which supersedes all previous Comprehensive Plans for the Project site, has been prepared to comport with all applicable requirements and policies of the City. Pursuant to the Zoning Code, the Studio zone allows for motion picture and television studio facilities and related media support facilities. Comprehensive Plan Amendment No. 7 will be in conformance with the Studio zoning district and General Plan Land Use designation for the property. Further, the Zoning Code establishes that all development standards in the Studio zone may be established in a Comprehensive Plan. A Comprehensive Plan allows for flexibility in site planning and design for specific or special land uses and locations such as historic properties. Accordingly, setbacks for structures are established in Comprehensive Plan Amendment No. 7 to allow for such flexibility as related to particular buildings. Building Y and various buildings fronting Ince Boulevard contain reduced building setbacks. However most contain above grade setback, step-backs and building offsets with enriched landscaping to minimize impacts upon residential properties. In many cases the Project meets or exceeds at grade setback requirements. The new office buildings and new Van Buren Parking Garage conform to the maximum height limit of 56 feet, permitted in the Studio Zone. Conditions of Approval are established to ensure conformity with the Culver City Municipal Code.

Such measures shall include,</p> <p style="margin-left: 40px;">a) Mobility Fund</p> <p style="margin-left: 80px;">The Applicant will contribute to the City’s Mobility Fund as described in the Project Development Agreement with mobility improvements earmarked for roadway and circulation improvements to enhance multimodal connectivity to and from the Project site with the Culver City Expo Station.</p>	CDD/ PW/ Trans.	Special	
------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------	----------------	--

1 b) Designated Ride Share Carpool Area.
2 The Project shall include designated
3 parking and loading areas for ride
4 share vehicles located adjacent to
5 Gate 2. A car pool area shall be
6 provided as part of the TDM
7 measures.

8 c) Rideshare Subsidy
9 In order to facilitate the use of
10 rideshare services and reduce
11 potential single occupant vehicle trips,
12 for a period of five years after
13 occupancy, the Developer shall
14 ensure that the Project tenants
15 provide employees with a voucher for
16 ridesharing services to the Culver City
17 Expo Station.

18 d) EV Charging Stations ~~and~~
19 The Project shall provide
20 ~~approximately 114~~ 6% of total parking
21 spaces EV ready, ~~parking spaces with~~
22 50% supplied with Electric Vehicle
23 Supply Equipment (EVSE) ~~and~~
24 operational upon occupancy, located
25 on each of the parking levels.

26 Active Transportation Improvements

27 a) Pursuant to a Development
28 Agreement between the City and the
29 Developer, the Developer will
contribute to a dedicated mobility fund
the amount \$1 per sq. ft. of a
net new development (\$345,000) for
City transportation and mobility
improvements which may include
(biking and pedestrian improvements
or micro transit) that the City is

currently considering or may consider.

b) Short-term Bicycle Parking – The Developer will provide ~~30~~ 68 short-term bicycle parking spaces within the Project site.

c) Long-term Bicycle Parking; The Developer will provide **62** bicycles parking spaces within the Project site to facilitate and encourage tenants and employees to commute by bicycle.

d) End-of-Trip Facilities; The Developer will provide “end of trip facilities” including showers, lockers, secure bike storage, and bike repair for tenants or employees who bike or walk to work.

TAP Card Subsidy:

a) The Developer will subsidize for the purchase of up to 50 TAP cards for a period of three years for employees who opt to take Expo instead of personal vehicles to commute to work, and will not be provided onsite parking accommodations; or the Developer will provide Cash-Out Alternative (i.e. cash-out bonus to individual tenants who opt to use other commuting modes such as carpools, shuttles, bicycles, or walking). The cash-out bonus, if provided, will count towards the 50 employee obligation.

<p>1</p> <p>2</p> <p>3</p> <p>4</p> <p>5</p> <p>6</p> <p>7</p> <p>8</p> <p>9</p> <p>10</p> <p>11</p> <p>12</p> <p>13</p> <p>14</p> <p>15</p>	<p>b) TAP Card Maintenance; The Developer will ensure that Project tenants can procure and register TAP cards on an ongoing basis and provide evidence of such notification shall be provided to the Building Division</p> <p>c) The Developer will annually provide evidence of TAP Card subsidies to the Planning Division.</p> <p><u>Walkability:</u></p> <p>a) The Project will promote “walk to work” and “walk to shop” programs for Project tenants and post neighborhood maps with approximate walking distances and times to local neighborhood amenities and transit connections.</p>

89.	<p>All onsite and offsite improvements and all conditions of approval except those which are deferred pursuant to a bond or letter of credit as determined and approved by the Building Official, Fire Marshal, Planning Manager, and/or City Engineer shall be completed prior to issuance of any certificate of occupancy. Prior to issuance of any certificate of occupancy the following shall be provided to and approved by the City:</p> <ul style="list-style-type: none"> A. Five full sets of as-built plans that shall include at a minimum the site plan, grading and utility plan, landscape and irrigation plan, floor plan for each level of the Project, parking structure plan, roof plan with all mechanical equipment identified as to purpose and source and all offsite improvements; and B. One set of as-built plans as described above in a digital format compatible with the City's computer system. 	All	Standard	
90.	<p>The applicant shall work with the City to implement a Transportation Demand Management/Commute Trip Reduction Program (TDM Program). The TDM Program shall include measures to reduce the number of vehicle trips associated with the development of the site in order to reduce such vehicular trips and air emissions related to the Project. Said implementation shall include a Culver Studios representative to serve as the coordinator (Program Coordinator) of this TDM Program. The Program Coordinator shall submit annual reports to the Transportation Department with</p>	Trans.	Special	

1 information of the implemented TDM
2 Program, results of annual TDM surveys, and
3 analysis of program effectiveness.
4 Transportation Department will review and
5 confer with Culver Studios coordinator to
6 develop program revisions, as necessary, to
7 attain trip reductions. In addition to the
8 transportation demand management
9 measures that are required by the CCMC
10 Transportation Demand and Trip Reduction
11 Ordinance, CCMC Municipal Code §
12 7.05.015, the Program shall include all of the
13 standard employee commute trip reduction
14 methods including, but not limited to, the
15 following:

- 16 a) Bicycle route map information;
- 17 b) Financial rewards program for participation
18 in trip reduction efforts;
- 19 c) Telecommuting
- 20 d) Flexible work hours (arrival and departures
21 outside of commute peak periods);
- 22 e) Guaranteed return trip and/or guaranteed
23 emergency trip for employees participating
24 in rideshare or other transit programs;
- 25 f) Personalized commute assistance offered
26 by on-site employee transportation
27 coordinator;
- 28 g) Organization and participation in
29 vanpool/carpool programs;
- h) Promotional information of transit and
rideshare agencies serving the area
including the address, telephone number,
website, routes, maps, schedules and fees
of these agencies;
- i) Rideshare matching service for employees;
- j) Trip reduction program marketing and
recruitment;
- k) Collaboration with Culver City
Transportation Department to promote
alternative transportation choices.

PRIOR TO CERTIFICATE OF OCCUPANCY OR FINAL INSPECTION				
91.	Establish two (2) transit stops near the intersection of Ince Blvd. and Washington Blvd. (near TCS gate 2) for the City's Micro-transit Project, if required. These stops each need to include a three-seat bench, trash receptacle, sign post, and red-painted curb. The bench and trash receptacle shall be located to the back of sidewalk adjacent to the property to accommodate pedestrian clearance, ADA accessibility, and bus stop requirements.	Trans.	Special	
92.	Two (2) sets of Off-Site Improvement Plans prepared by a civil engineer registered in the State of California shall be submitted to the Engineering Division for review, approval and permitting for all proposed improvements within the Public Right of Way.	Public Works/ Engr.	Special	
93.	The applicant shall construct a right-turn lane for southbound Ince Boulevard at the entrance to Gate 3 2A . The right-turn lane shall have a 30 foot reverse taper and 100 feet of storage. Ince Boulevard shall be widened by 2 feet leaving an 8 foot wide sidewalk in order to provide for the right-turn lane into Gate 3. The widened 32 foot roadway shall have a 12 foot northbound lane, a 10 foot southbound lane, and a 10 foot southbound right-turn lane. The Offsite Improvement Plan shall design the street widening and show all necessary relocations of above ground facilities including, but not limited to, catch basins, street lights, street trees, and parking meters. All parking meter heads and poles not being reused shall be salvaged and returned to the City's	Public Works/ Engr.	Special	

	<p>maintenance yard. A separate signage and striping plan shall be prepared for the right turn lane and for the installation of new parking tees for parking spaces being realigned due to the right turn lane transition. The plan shall indicate the number parking spaces that will be eliminated because of the right-turn lane and transition.</p>			
<p>94.</p>	<p>The applicant shall reconstruct the existing driveway at Gate 3 and Gate 2a and provide an angled entry/exit driveway having a similar angle as Gate 2. Reconstruction of the driveway shall include geometric features, street striping, and signage to discourage motorists from turning right when exiting the driveway. The entryway shall have two 12 foot wide entry lanes, a 14 foot wide exit lane, and an 8 foot wide median separating the entry and exit traffic.</p>	<p>Public Works/ Engr.</p>	<p>Special</p>	
<p>95.</p>	<p>The drive approach for Gate 4 shall be reconstructed to provide access for fire and safety vehicles. The width of the new drive approach shall be 20 feet and shall be constructed per Culver City's Special Use Driveway Approach CC-101-2.2, Case 1, with W=20 feet, Y=10 feet, and X=3 feet. The sidewalk adjacent to the new approach shall be reconstructed and both the drive approach and new sidewalk shall be constructed with 4,000 psi 6-inch thick concrete on a 4-inch crushed miscellaneous base (CMB). The new drive approach shall be relocated as far southerly, towards Carson Street, as possible without having to relocate the existing street light. The top of "X" of the new drive approach shall be no closer than 5 feet to the base of the existing street light. The existing drive approach for Gate 4 shall be removed</p>	<p>Public Works/ Engr.</p>	<p>Special</p>	

	<p>and the excess portion of the drive approach shall be reconstructed with curb, gutter, and sidewalk. New parking spaces and parking meters shall be installed along the vacated portion of this drive approach. One new street tree and tree wells shall also be planted in this area. The tree species shall be the same as the existing street trees and shall be a minimum 24" box in size.</p>			
<p>96.</p>	<p>All existing street lights on Ince Boulevard along the project's frontage and two existing streetlights along the project's frontage on Van Buren Place shall be upgraded to low voltage induction type lighting. This work shall include, but not limited to, the replacement of light fixtures, ballasts, and the installation of new pull boxes, conduit, and wiring. A new service connection and a 200 amp meter cabinet, having space for 8-2 pole breakers, shall be provided as directed by and to the satisfaction of the City Engineer. The existing street light poles may be reused provided they are not damaged during the removal of the existing wire. All streetlights north and south of project site shall be maintained and kept in operation.</p>	<p>Public Works/ Engr.</p>	<p>Special</p>	
<p>97.</p>	<p>The westbound Washington Boulevard left turn lane to southbound Ince Boulevard shall be extended easterly from 118 feet to 150 feet. The applicant shall modify the center median raised island to accommodate the extended left-turn lane and shall modify the striping and raised island at the exit of the parking structure to inhibit left turns out of the parking structure. The applicant shall be responsible for the geometric design, striping and signing plans, and to construct the improvements to the satisfaction of the City</p>	<p>Public Works/ Engr.</p>	<p>Special</p>

~~The Project shall be responsible to design and restripe the southbound approach to change the right turn only lane to a through /right lane.~~

The Project shall be responsible to extend the westbound Washington Bl. left-turn lane ~~to the greatest length possible to the satisfaction to the City of Culver City.~~ The Project shall be responsible to ~~pay for the~~ design and construction ~~of the left-turn lane~~ to the satisfaction of the City Engineer. The design shall address how motorists exiting the Ince Parking structure will be prohibited to make left turns out.

~~The Project shall conduct a "Look-Back" Traffic Study to address the left-turn storage for westbound Washington Bl. at Ince Bl. for the 95th percentile queue. At no later than six months after 85 percent occupancy, the applicant or subsequent owner shall pay for a City-selected traffic consultant, to conduct a traffic study, including new traffic counts, a queuing analysis, delay to motorists, traffic operations of the signalized intersections of Washington/Ince and Culver/Ince, field observations and an accident analysis. The traffic study will recommend whether the westbound Washington Bl. at Ince Bl. should be retained or eliminated. Based on the traffic study findings, and City observations, the City will determine if the left-turn lane should be eliminated. If the City determines that the left-turn lane should be eliminated, the Project shall be responsible to pay for traffic improvements to address any secondary impacts or undesirable conditions created by the elimination of the left turn lane at~~

1 ~~locations in the cities of Culver City and Los~~
2 ~~Angeles. The traffic improvements include,~~
3 ~~but not limited to, mitigating the intersections~~
4 ~~of Culver Bl./Ince Bl., National Bl./Venice Bl.,~~
5 ~~La Cienega Bl./Venice Bl., and extending the~~
6 ~~left-turn lane for westbound Culver Bl. at Ince~~
7 ~~Bl.~~

8 Washington Bl. and Culver Bl:

9 The Project shall be responsible to lengthen
10 the left-turn lane for westbound Culver
11 Boulevard at Washington Boulevard (also
12 referred to as Ince Bl.) to the greatest extent
13 possible to the satisfaction of the City
14 Engineer. The left-turn lane shall begin just
15 west of the left-turn lane for the parking
16 structure.

17 ~~The Project shall show in a conceptual design~~
18 ~~the widening required to mitigate the project's~~
19 ~~impact, and prepare a preliminary estimate to~~
20 ~~widen the roadway. The Project shall be~~
21 ~~responsible to pay for the design and~~
22 ~~installation of the roadway improvements to~~
23 ~~mitigate the impacts.~~

24 Robertson Bl./Exposition Bl. & Venice Bl:

25 ~~(City of Los Angeles): The traffic study~~
26 ~~indicated that mitigation is infeasible due to~~
27 ~~the lack of right of way to allow widening and~~
28 ~~reconfiguration. The applicant's traffic~~
29 ~~engineer shall coordinate with LADOT to~~
~~determine any alternative mitigation~~
~~measures the City of Los Angeles may~~
~~require.~~

National Bl. and Washington Bl:

~~The Project shall show in a conceptual design~~
~~the widening required to mitigate the project's~~
~~impact, and prepare a preliminary estimate to~~

1 widen the roadway. The Project shall be
2 responsible to pay for the design and
3 installation of the roadway improvements to
4 mitigate the Project's impacts.

5 Overland Ave. and Culver Bl:

6 The Project shall show in a conceptual design
7 the widening required to mitigate the project's
8 impact, and prepare a preliminary estimate to
9 widen the roadway. The Project shall be
10 responsible to pay for the design and
11 installation of the roadway improvements to
12 mitigate the impacts.

13 Overland Ave. and Venice Bl:

14 (City of Los Angeles): The traffic study
15 indicated that the project would cause a
16 significant impact at the intersection. It
17 indicated that mitigation is infeasible due to
18 the lack of right of way to allow widening and
19 reconfiguration. The applicant's traffic
20 engineer shall coordinate with LADOT to
21 determine any alternative mitigation
22 measures the City of Los Angeles may
23 require.

24 Robertson Bl. and National Bl:

25 (City of Los Angeles): The report indicated
26 that the project would cause a significant
27 impact at the intersection. It indicated that
28 mitigation is infeasible due to the lack of right
29 of way to allow widening and reconfiguration.
The applicant's traffic engineer shall
coordinate with LADOT to determine any
alternative mitigation measures the City of
Los Angeles may require.

Duquesne Ave. and Lucerne Ave &

Duquesne Ave. and Braddock Drive:
Developer is required to pay \$174,000 (29%)

~~for the installation of two traffic signals at Duquesne Ave. / Lucerne Avenue, and Duquesne Ave. / Braddock Drive. The remaining \$426,000 (71%) of the cost of such traffic signal improvements shall be provided as a public benefit, pursuant to the Development Agreement. In the event circumstances preclude the installation of one or both of the identified traffic signals, said funds may be used by the City for other traffic signal improvements within Culver City.~~

Project Entrance Gates:

The Project shall design all the entrance gates to the satisfaction of the City. Right-turn lanes shall be constructed for each driveway, and the driveways shall be configured to provide only right-turns in and left turns out of the gates. The design shall provide adequate sight distance for drivers exiting all the gates on Ince Boulevard to insure that motorists are able to see pedestrians coming from their right on the sidewalk. The project shall be responsible for all traffic control measures to enforce the right-turns in and left turns out restrictions.

The Project shall be responsible pay for any traffic control measures and traffic control officers needed to prevent Project traffic from entering any of the gates via any residential street, including but not limited to, Lindblade St., Pointsettia St., Kruger St., Hubbard St., Carson St., and Lucerne Ave.

110.	All graffiti shall be removed from the Property within 48 hours of its application.	Building/ Planning/ Public Works	Standard	
	The Property Owner shall maintain all street trees along the property frontage at his/her sole cost and expense.	Public Works	Standard	
111.	All mitigation measures set forth in the EIR Mitigation Monitoring Report Program dated November 30, 2017, relating to the Project (including any reports of the type contemplated by the California Environmental Quality Act) shall be completed as specified therein.	Planning	Special	
112.	All of the existing street trees including the tree in front of the new emergency driveway off of along the Studio's frontage Van Buren Place will be preserved and will not be removed.	Planning	Special	
113.	<p>Subject to CCMC Chapter 7.05, the Applicant, or property owner, shall be subject to the following Transportation Demand Management (TDM) Plan:</p> <p>A. The TDM plan shall be flexible and utilize as many measures as may be necessary to achieve the required trip reductions. Elements of the TDM plan shall parallel and be consistent with City of Los Angeles TDM Ordinance No. 168700 to the greatest extent possible.</p> <p>B. The Applicant, or property owner, shall <u>use February 2016 driveway traffic counts</u></p>	Public Works/ Traffic	Special	

as a baseline for comparison to determine if TDM goals are achieved. ~~take baseline traffic counts before construction of the Project to isolate all traffic associated with the existing Culver Studios.~~

C. The TDM plan that shall reduce proposed Project trips by at least 10% (i.e., reduce AM peak-hour trips from 491 to 442 trips and reduce PM peak-hour trips from 468 to 421 trips). To determine whether Project trips have been reduced to the required levels, the Applicant or property owner shall contract with a City approved consultant to produce at the Applicant's, or property owner, expense, annual monitoring reports of proposed Project driveway traffic volumes for three normal business weekdays. The traffic volumes shall be taken on weekdays determined by the City. The Applicant, or property owner, shall pay the cost of the City conducting up to a total of five annual reports. The City shall determine when to conduct the first monitoring report, which shall occur after at least 85 percent occupancy is achieved.

When there are at least three consecutive annual reports demonstrating continuous compliance with the TDM trip reduction levels, the Project shall be deemed to have satisfied the TDM mitigation measure requirement. The Applicant, or property owner, shall be responsible for all the costs associated with the monitoring program, including the annual monitoring reports and a \$5,000 per year review fee by City staff.

D. The Applicant or property owner shall
