

ORDINANCE NO. 2021-____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF CULVER CITY, CALIFORNIA, ADOPTING A CLASS 32 CATEGORICAL EXEMPTION AND APPROVING COMPREHENSIVE PLAN AMENDMENT, P2021-0174-CPA, FOR A PROPOSED 3-STORY, 7,022 SQ. FT. COMMUNITY CENTER, SIX (6) DWELLING UNITS, RECONFIGURED COMMUNITY GARDEN, AND ASSOCIATED SITE IMPROVEMENTS AT 10808-10860 CULVER BOULEVARD IN THE OPEN SPACE (OS) ZONE.

(Comprehensive Plan Amendment, P2021-0174-CPA)

WHEREAS, on June 30, 2021, AUX Architecture (the "Applicant") filed an application for a Comprehensive Plan Amendment (CPA), to allow the construction of a 3-story, 7,022 sq. ft. community center, six (6) low-income dwelling units, reconfigured community garden, and related site improvements (the "Project"). The Project Site is more specifically described as Lots 9 through 30 of Tract No. 9974, of Los Angeles County Assessor's Parcel Number 4210-021-900, in the City of Culver City, County of Los Angeles, State of California; and

WHEREAS, in order to implement the proposed Project, approval of the following application is required:

Comprehensive Plan Amendment, P2021-0174-CPA: for the construction of the proposed three-story community center, dwelling units, and reconfigured community garden, with related site improvements, to ensure the Project complies with all required standards and City ordinances and to establish all onsite and offsite conditions of approval necessary to address the site features and ensure compatibility of the proposed Project with the development and uses on adjoining properties and in the surrounding neighborhood; and

WHEREAS, pursuant to CEQA Section 15332, Class 32 – In-Fill Development Projects, the Project is Categorically Exempt; and

1 WHEREAS, on November 2, 2021, during a public meeting on the subject
2 application, including full consideration of the applications, plans, staff report, and all
3 testimony presented, the Parks, Recreation, and Community Services Commission by a vote
4 of 4 to 0, recommended to the City Council approval of Comprehensive Plan Amendment,
5 P2021-0174-CPA; and
6

7 WHEREAS, on November 10, 2021, after conducting a duly noticed public hearing
8 on the subject application, including full consideration of the applications, plans, staff report,
9 environmental information and all testimony presented, the Planning Commission by a vote of
10 5 to 0, recommended to the City Council adoption of a Class 32 Categorical Exemption, in
11 accordance with the California Environmental Quality Act, finding the Project will not result in
12 significant adverse environmental impacts, and approval of Comprehensive Plan
13 Amendment, P2021-0174-CPA; and
14

15 WHEREAS, on December 13, 2021, after conducting a duly noticed public hearing
16 on the subject application, including full consideration of the applications, plans, staff report,
17 environmental information, Parks, Recreation, and Community Services Commission
18 recommendations, Planning Commission recommendations, and all testimony presented, the
19 City Council, by a vote of ___ to ___, introduced an ordinance adopting a Class 32 Categorical
20 Exemption, in accordance with the California Environmental Quality Act, finding the Project
21 will not result in significant adverse environmental impacts and approving Comprehensive
22 Plan Amendment, P2021-0174-CPA, (the "Ordinance"), as set forth herein below.
23
24

25 NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF CULVER CITY,
26 CALIFORNIA, RESOLVES AS FOLLOWS:
27
28

SECTION 1. Pursuant to the foregoing recitations and the provisions of the Culver City Municipal Code (CCMC) Section 17.250.030.E, the following required findings for a Comprehensive Plan Amendment are hereby made:

1. The proposed Comprehensive Plan can be substantially completed within 4 years.

The CPA consists of two (2) new phases; the first being a relatively small addition for which the construction is anticipated to take approximately nine (9) months. Permits will be applied for and secured as soon as possible, with construction commencing immediately after. Phase 3, which includes the six modular units and reconfigured community garden, does not have a defined timeline, but is expected to be completed within the four (4) year CPA time period since the units will be modular and small (325 sq. ft. each) in size. Although implementation will occur after Phase 2 is complete, it is a much smaller scope of work and is expected to take less time in construction than Phase 2.

2. The proposed development is capable of creating an environment of sustained desirability and stability, or adequate assurance will be provided such objective will be attained.

The proposed Creative Community Center will expand upon the original Comprehensive Plan approval allowing continuation of use of the prior AmVets Post 2 facility, which hosted meetings and events and provided services (e.g., job training, housing assistance, etc.), focused on veterans. The community center will be a similar resource with a focus on creative, cultural, and educational objectives that will complement the existing museum facility and surrounding educational and social service providers (e.g., Upward Bound, Culver City Unified School District). The proposed housing and reconfigured community garden under Phase 3 of the CPA will serve to provide low-income housing opportunities, while preserving a community garden use as a continued resource to the community. The community center will also provide services for tenants of the housing, creating a synergy between the two components. Surrounding uses include residential neighborhoods to the north, south, and west of the subject parcel, while Veterans Park is located to the east. Further, the proposed development will serve to revitalize the existing facility and this general area within the corridor, enhance the visual aesthetic of the site, and activate the streetscape. By developing services and programs in coordination with existing community organizations and establishing a resident base onsite, the proposed development will create an environment of sustained desirability and stability.

3. The proposed uses will not be substantially detrimental to present and potential surrounding uses, but will have a beneficial effect.

The uses proposed as part of the CPA include a community center, affordable housing, and a reconfigured community garden. The community center will be a continuation of

the previously approved use for the prior AmVets building with both physical and programmatic enhancements meant to serve the community. The operator has and will continue to take steps to engage other local community serving groups and organizations, such as Upward Bound House, the Culver City Unified School District, and others, to create services and programs of a beneficial effect to the surrounding community and overall City. The housing will serve low-income population and will have services provided through the community center. Surrounding properties are zoned for, and developed with, primarily residential uses (single- and multi-family), as well as recreational and event-related uses at Veterans Park (e.g., sports facilities, auditorium, meeting rooms, etc.). The proposed uses are very similar and will be synergetic with those existing and potential surrounding uses; therefore, the proposed will not be substantially detrimental. In addition, based on the parking demand study and transportation analysis, there are no expected detrimental effects relating to parking and traffic from the proposed uses.

4. The streets and thoroughfares serving the development are suitable and adequate to carry anticipated traffic, and the development will not generate traffic that will overload the street network surrounding the OS Zone.

The subject site is served by three (3) surrounding streets and one (1) alley, which include Culver Boulevard, Coombs Avenue, and Elenda Street, ranging from 60 to 100 feet width, and 20 feet for the alley. In addition, based on the scope and small size of the Project, a traffic study and Vehicle Miles Travel (VMT) or Level of Service (LOS) traffic analysis are not required. However, a Transportation Analysis was prepared for the Project, which analyzed the proposed Project and concluded the number of trips anticipated to be generated by the Project will be below the threshold to warrant further analysis. Therefore, the expected traffic generated are not anticipated to overload the street network, and the existing streets and thoroughfares serving the Project are suitable and adequate for the anticipated traffic.

5. The development will account for, and adequately address, parking needs to reduce potential parking impacts to surrounding neighborhoods and on users of the facilities.

The Project site is currently served by six abutting and adjacent public parking lots, along with the other uses on the property (e.g., scout house and tennis courts) and the Veterans Park property. Together, the parking lots provide 305 parking spaces. Phase 3 of the development will reduce this pool by 21 spaces for a total of 284 parking spaces. Based on the existing (i.e., Wende Museum) and proposed areas and uses of the Project, a Parking Demand Study was conducted. The demand study concludes there is adequate parking supply available to accommodate the additional parking demand and reduced supply of the Project associated with Phases 2 and 3. Further, if the closest parking lots (Lots 1 and 2) are at capacity, the findings conclude that there is sufficient parking supply in the combined six off-street public parking lots to accommodate the additional Project demand.

1 **6. The proposed development is compatible with the surrounding area.**

2 The proposed CPA development includes expansion of the former AmVets building for
3 use as a community center, which would include similar activities as the prior use, such
4 as meetings, events, performances, and community services, as well as the
5 development of six (6) affordable dwelling units, and reconfiguration of the community
6 garden. The community center is proposed to be 3-stories, up to 39'-4" high to the roof
7 line, with projections up to 54'-5" high, while the proposed dwelling units will be one-
8 story modular structures. The 3-story building is designed to locate the taller mass of
9 the building toward the center of the building, away from the alley and residential uses to
10 the south and away from the sidewalk along the north. Surrounding uses include similar
11 uses as Veterans Park and one- and two-story single- and multi-family residences to the
12 north, south and west. Therefore, the uses and the scale of the proposed development
13 will be compatible with the surrounding area.

14 **7. The Comprehensive Plan is in conformance with the General Plan, or a concurrent
15 General Plan amendment is in process.**

16 The General Plan designation for the site is Open Space, which per the Land Use
17 Element is established to protect open space resources that include public or private
18 land, and is designed and intended to preserve and encourage future parks, open space
19 and recreation opportunities. The proposed CPA will allow the rehabilitation and
20 expansion of the former AmVets building to create a community center that will continue
21 the prior utilization of the building for meetings, events, and providing services, but will
22 also have creative and cultural performances. In addition, the CPA will allow the
23 development of six (6) one-story affordable dwelling units, measuring just 325 sq. ft.
24 each, and the reconfiguration of the existing community garden. As a community center
25 used in the above-described manner, the building and site continues to be a community
26 resource that is similar to the uses of the Veterans Park site, which is also designated
27 Open Space. This is consistent with the General Plan goal of creating a community that
28 provides cultural opportunities. The Zoning Code serves to implement the goals and
29 objectives of the General Plan; accordingly, the Zoning Code allows for the residential
30 component to be established within the corresponding Open Space (OS) Zone when in
31 conjunction with non-residential uses and when meeting additional standards, such as
32 ensuring any displaced park space is replaced with an equivalent amount of park space
33 on the Project site. Accordingly, the Project proposes to replace and reconfigure the
34 community garden space located where the residential dwelling units are proposed.
35 Therefore, all proposed phases of the CPA will be in conformance with the General Plan
36 designation.

37 **8. Any exception from standard City land use law, rules or regulation requirement is
38 warranted by the design and amenities incorporated in the Comprehensive Plan
39 and is desired by the Council.**

40 Given the unique nature of the Zoning and General Plan designations, as well as of the
41 existing uses, some exceptions from standard development standards are warranted by

1 the design and amenities incorporated in the Comprehensive Plan. For example, due to
2 the constrained site size and geometrics, the Project does not strictly follow the
3 standards of Table 4-2 since the site is not located in any of the commercial zones listed
4 in that table. Further, the building design provides height and setbacks that are
5 compatible and sensitive to the surrounding development, including adjacent residential,
6 while creating a design that serves the needs of the intended use and that provides
7 desirable design features. The affordable housing will be 325 sq. ft. modular units,
8 rather than the minimum standard 350 sq. ft. and will not be provided with a separate
9 designated 100 sq. ft. of common open space. The units are proposed accordingly due
10 to cost and site size constraints, and consideration of the immediate proximity to open
11 space and park amenities, as well as to preserve as much of the community garden
12 amenity within the same location and to maintain the mass and scale of the building
13 design to a minimum to minimize potential visibility from adjacent residential properties.

9 **9. Existing and proposed utility services are adequate for the proposed uses.**

10 The site is currently developed with a number of uses, including the structure that will be
11 expanded upon to create the proposed community center. As a developed site within an
12 urbanized setting, utility services are currently provided for the site. Any necessary new
13 utility service equipment will be designed and installed at a capacity and locations
14 suitable for serving the proposed development and uses. Further, review of the Project
15 by the City's by the City's Public Works Department has determined that the proposed
16 utility services and existing utilities that will serve the site are adequate for the proposed
17 uses.

16 **10. The Comprehensive Plan has complied with all applicable City requirements.**

17 The Comprehensive Plan Amendment has been prepared in conformance with the
18 Culver City Municipal Code, including the Zoning Code and applicable Building Codes.
19 This includes submittal and review of proposed site plan and uses, preliminary building
20 plans, preliminary landscape and lighting plans, preliminary civil engineering plans.
21 Review by various City Departments of these plans and materials, has determined that
22 the proposed Comprehensive Plan Amendment is in compliance with all applicable City
23 requirements.

22 **11. The proposed development will not degrade the safety and security of residential
23 properties adjacent to any OS Zone.**

24 The proposed development consists of a renovation and expansion to the existing
25 building formerly used as AmVets Post 2 for meetings, events, and providing services.
26 The proposed use of the building will be similar in nature and will expand focus on
27 creative, cultural, and educational programming. In addition, it will create a connection
28 with the proposed housing component, by providing services to the residents of those
dwelling units. The proposed development will incorporate a number security features
including extending the existing fencing and providing appropriate lighting and
landscape, as indicated in the Safety and Security section of the proposed

1 Comprehensive Plan Amendment. The Safety and Security section further indicates the
2 development will incorporate security devices, such as video surveillance cameras and
3 motion sensors. Further, the Project will improve the safety and security of the site and,
4 thus, of the adjacent residential properties.

5 **SECTION 2.** Pursuant to the foregoing recitations and findings, the City Council of
6 the City of Culver City, California, hereby introduces an Ordinance adopting a Class 32
7 Categorical Exemption and approving Comprehensive Plan Amendment, P2021-0174-CPA,
8 subject to the conditions of approval set forth in Exhibit A and code requirements listed in
9 Exhibit B attached hereto and made a part thereof.
10

11 **SECTION 3.** Pursuant to Section 619 of the City Charter, this Ordinance shall
12 take effect thirty (30) days after the date of its adoption. Pursuant to Sections 616 and 621
13 of the City Charter, prior to the expiration of fifteen days after the adoption, the City Clerk
14 shall cause this Ordinance, or a summary thereof, to be published in the Culver City News
15 and shall post this Ordinance or a summary thereof in at least three places within the City.

GENERAL				
1.	Street trees, tree wells, and irrigation shall be installed, to the satisfaction of the City Engineer and Current Planning Manager, in conformity with the City's approved Urban Forest Master Plan, and where appropriate, the Washington National TOD Oriented Streetscape Plan details including benches and trash receptacles. All new (and existing) street trees shall be supplied with irrigation water from the overall site irrigation system which shall include a timer and a rain sensor. All new (and existing) street trees, landscaping, and irrigation shall be indicated on the overall site landscaping/ irrigation plan.	Public Works/ Planning	Standard	
2.	The Applicant shall be responsible for implementing all three phases of the Project as described in the Comprehensive Plan Amendment and all conditions will be implemented and cleared on a per phase basis. Phase 3 of the Project shall be implemented in collaboration with the City.			
3.	At the sole cost and expense of the Property Owner, any curbs, gutters, sidewalks, streetlights, street light wires and conduits, traffic signal equipment, street pavement, and any other City infrastructure which are damaged or broken from construction of the Project shall be repaired and reconstructed in conformity with APWA Standards and to the satisfaction of the City Engineer.	Public Works	Standard	
4.	The project shall be subject to Holiday Moratorium dates as required by the December 17, 2009 Public Works/Engineering Holiday Slowdown Policy memo, in which work in the public right-of-way is restricted or prohibited on certain days in November and December.	Public Works	Standard	
5.	Fire sprinkler main lines shall not be allowed to discharge into the public right-of-way, and they shall discharge into the sanitary sewer system.	Public Works	Standard	
6.	The applicant shall obtain an encroachment permit for encroaching into the public right-of-way.	Public Works	Special

7.	The project will be required to place a pull box near the proposed network room as well as underground conduit from the network room to the pull box for future Culver Connect fiber. Pull box and conduit shall be on private property.	Public Works	Special	
8.	Drainage devices, concrete curb and gutter, sidewalk, and drive approach, roadway pavement shall be designed to the latest edition of the American Public Works Association (APWA) Standard Plans	Public Works	Special	
9.	On-site improvement plans prepared by a civil engineer registered in the State of California shall be submitted to the Engineering Division for review, approval and permitting. Among other things, the on-site improvement plans shall include detailed on-site drainage and grading of the site indicated by topographical lines and spot elevations. This plan shall be approved for on-site construction only.	Public Works	Special	
10.	Trash enclosures shall be provided and shall have a gated opening that is at least 10 feet wide, and a 6-inch high by 6-inch-wide concrete curb along the inside perimeter wall. Each enclosure shall also have at least a 6-inch-thick concrete slab that drains at a one percent gradient out of the enclosure. Additional grade may be necessary to include a floor drain that leads to the sewer for maintenance purposes. Final approval for the size, location, and type of equipment needed for the adequate storage and disposal of all solid and recyclable waste generated by the Project shall be obtained from the City's Environmental Programs and Operations Manager. A fire suppression sprinkler system shall be provided within any covered trash enclosure area as required by the Fire Marshal. All refuse containers assigned to or otherwise used by the Project shall be stored on-site in the trash enclosures.	Public Works/ Fire/ Current Planning	Standard	
11.	All Project related solid and recyclable waste material handling shall be in accordance with	Public Works	Standard

	detailed dimensions of the paths of travel/aisle widths, and the widths of maneuvering areas and clearances within the bicycle parking areas. If an enclosure is constructed to secure long-term bicycle parking, the enclosure shall provide the following interior dimensions: parking area footprint length for each bicycle of 72-inch; aisles width of 48-inches between bicycle parking areas; a minimum 30-inch separation between parallel bicycle racks; and, a minimum 24-inch separation between the bicycle rack and any adjacent enclosure wall. These requirements are consistent with the Association of Pedestrian and Bicycle Professional (APBP) recommended Bicycle Parking Guidelines, 2nd Edition. The development plans submitted for Building Permit shall provide detailed information on the type of all bicycle parking provided, and detailed dimensions of the paths of travel/aisle widths, the widths of maneuvering areas and clearances. Prior to issuance of any Public Works Department/Engineering Division Permit for the Project, the developer shall obtain a determination from the Public Works Department Administration staff that the final bicycle parking layout is in compliance with these bicycle parking requirements. All bicycle parking required above, shall be installed, maintained and managed by the developer or their successors, and approved by the Public Works Director or their designee, prior to issuance of any Certificate of Occupancy.			
14.	The Project shall meet all provisions of CCMC Section 7.05.015 – “Transportation Demand and Trip Reduction Measures”. The applicant shall indicate compliance with all CCMC Section 7.05.015 Transportation Demand and Trip Reduction Measures on the Building Permit Plans	Trans./ Public Works/ Planning	Standard

	to be submitted for review and approval by Transportation Department. The Project shall incorporate the following Mobility and Trip Reduction Measures: 1. A bulletin board, display case, or kiosk displaying transportation information in a prominent area accessible to the greatest number of employees shall be installed. Such required information shall include, but is not limited to, the following: a. Current maps, routes and schedules for public transit routes serving the site; b. Telephone numbers for referrals on transportation information including numbers for the regional ridesharing agency, transportation management associations, and local transit operators; c. Ridesharing promotional material supplied by commuter-oriented organizations; d. Bicycle route and facility information, including regional/local bicycle maps and bicycle safety information; and e. A listing of any other facilities and resources that may be available for carpoolers, vanpoolers, bicyclists, transit riders and pedestrians at the site. 2. With approval from Public Works, designated loading area(s) for ridehail vehicles along project adjacent public right-of-way or an onsite designated loading area for shared-ride vehicles. 3. Promotion of walking through a “walk to work” program in coordination with the on-site office employees and a posted neighborhood map with approximate walking distances and times to local neighborhood amenities. 4. Transit Subsidies – The Project will subsidize the purchase transit passes or other transit fees for any employee or resident of the Project upon request who opt to use public transit instead of

	personal vehicles; or, the Project will offer a cash-out bonus to individuals who opt to use other modes of commuting options such as carpools, car share, shuttles, bicycles, or walking. The Project owner or property management firm shall provide evidence and/or accounting annually to the City of such subsidy.			
15.	The Project shall upgrade the adjacent bus stop at EB Culver Blvd at Elenda St, to include one (1) new bus shelter, one (1) new bench with back support and arm rests, one (1) new trash receptacle, one (1) real-time information display, and one (1) new signpost with concrete base per Culver CityBus Bus Stop Standard. The bus stop furniture shall be located to the back of sidewalk adjacent to the property to accommodate pedestrian clearance and comply with ADA accessibility and bus stop standards. The final location, layout and bus stop amenities shall comply with Culver CityBus Bus Stop Standard and approved by Transportation Department.	Trans.	Standard	
16.	Prior to issuance of any Public Works Department and/or Engineering Division permit, the applicant shall provide street improvement plans to Transportation Department showing the layout of bus stop furniture, bus stop signage and bus pad; the bus stop door/furniture zone shall be free of obstruction (other street furniture, tree well, utility box, etc.); the final location, layout and bus shelter equipment shall be approved by Transportation Department. The site plan drawings shall show the sidewalk dimensions and other existing and proposed sidewalk features such as tree wells, utilities, and furniture and all require bus-related Improvements.	Trans.	Special	
17.	The Project shall comply with all the following requirements. An egress plan showing compliance with CBC Chapter 10 shall be part of the plan submittal	Building	Special

	and shall be binding on any subsequent owners, and tenants or occupants of the Property. After recordation, a certified copy bearing the Recorder's number and date shall be provided to the Current Planning Division.			
23.	The Applicant and/or Property Owner shall indemnify, hold harmless and defend (at the Applicant's and Property Owner's sole cost and expense, with legal counsel approved by the City in its sole discretion) the City, its elected and appointed officials, officers, employees, agents, contractors and consultants from and against any and all claims, lawsuits, judgments, liability, injury or damage arising from or in any manner connected to any and all permits or approvals (e.g. entitlements, building permits, and land lease) relating to the Project, including without limitation associated and reasonably incurred attorneys' fees and court and litigation costs arising out of the defense of any such claims and/or lawsuits, and actual attorneys' fees and court and litigation costs that may be awarded by the court and required to be paid by the City. The obligations required by this Condition shall be set forth in a written instrument in form and substance approved by the City Attorney and signed by the Applicant and Property Owner.	City Attorney	Standard	
24.	A Comprehensive Construction Management Plan (CMP) shall be submitted to Building & Safety as part of the Building Permit plan check approval process and shall be approved prior to issuance of the Demolition and / or Building Permit. The comprehensive CMP shall include all plans specified in the conditions of approval. In addition, the plan will identify the areas of construction staging, temporary power, portable toilet, and trash and material storage locations. The CMP shall show all areas of the public right-of-way which may be affected by the construction of the project. During construction, sidewalk access shall be maintained at all times along the project's frontage.	All Depts	Standard

PRIOR TO DEMOLITION PERMIT ISSUANCE				
	In addition to the above, the CMP shall include the following components: a. <u>A Pedestrian Protection Plan</u> shall identify all areas of pedestrian protection and indicate the method of pedestrian protection or pedestrian diversion when required. When pedestrian diversion is required, the Pedestrian Protection Plan must also be approved by the City Engineer. b. <u>A Construction Traffic Management Plan</u> shall be prepared by a traffic or civil engineer registered in the State of California. The Construction Traffic Management Plan shall be reviewed and approved by the City Engineer and Current Planning Manager prior to the issuance of any Project demolition, grading, or excavation permit. The Construction Traffic Management Plan shall also be reviewed and approved by the City's Fire and Police Departments. The City Engineer and Current Planning Manager reserve the right to reject any engineer at any time and to require that the Plan be prepared by a different engineer. The Construction Traffic Management Plan shall contain, but not be limited to, the following: A. The name and telephone number of a contact person who can be reached 24 hours a day regarding construction traffic complaints or emergency situations. B. An up-to-date list of local police, fire, and emergency response organizations and procedures for the continuous coordination of construction activity, potential delays, and any alerts related to unanticipated road conditions or delays, with local police, fire, and emergency response agencies. Coordination shall include the assessment of any alternative access routes that might be required through the Property, and maps

	showing access to and within the Property and to adjacent properties. C. Procedures for the training and certification of the flag persons used in implementation of the Construction Traffic Management Plan. Flag persons with certified training shall be provided for work site traffic control to minimize impacts to traffic flow and to ensure the safe movement of vehicles into and out of the Property. D. The location, times, and estimated duration of any roadway closures, traffic detours, use of protective devices, warning signs, and staging or queuing areas. E. The location and travel routes of off-site staging and parking locations. F. Estimated number of trucks per hour for dirt hauling, concrete pouring, deliveries, etc. c. <u>A Demolition Debris Recycling Plan</u> shall list the material to be recycled and the name, address, and phone number of the facility of organization accepting the materials. Reasonable efforts shall be used to reuse and recycle construction and demolition debris, to use environmentally friendly materials, and to provide energy efficient buildings, equipment, and systems. d. <u>A vector/pest control abatement plan</u> prepared by a pest control specialist licensed or certified by the State of California shall outline all steps to be taken prior to the commencement of any demolition or construction activity in order to ensure that any and all pests (including, but not limited to, rodents, bees, ants and mosquitoes) that may populate the Property do not relocate to or impact adjoining properties. e. The CMP shall address implementation of the following <u>measures during construction</u>:

	meets the Secretary of the Interior's Professional Qualifications Standards (Qualified Archaeologist) to oversee an archaeological monitor who shall be present during construction excavations such as demolition, clearing/grubbing, grading, trenching, or any other construction excavation activity associated with the project. The frequency of monitoring shall be based on the rate of excavation and grading activities, proximity to known archaeological resources, the materials being excavated (younger alluvium vs. older alluvium), and the depth of excavation, and if found, the abundance and type of archaeological resources encountered, as determined by the Qualified Archaeologist). Full-time field observation can be reduced to part-time inspections or ceased entirely if determined appropriate by the Qualified Archaeologist. Prior to commencement of excavation activities, an Archaeological and Cultural Resources Sensitivity Training shall be given for construction personnel. The training session shall be carried out by the Qualified Archaeologist and shall focus on how to identify archaeological and cultural resources that may be encountered during earthmoving activities and the procedures to be followed in such an event. In the event that historic or prehistoric archaeological resources (e.g., bottles, foundations, refuse dumps, Native American artifacts or features, etc.) are unearthed, ground-disturbing activities shall be halted or diverted away from the vicinity of the find so that the find can be evaluated. An appropriate buffer area shall be established by the Qualified Archaeologist around the find where construction activities shall not be allowed to continue. Work shall be allowed to continue outside of the buffer area. All archaeological resources unearthed by project construction activities shall be evaluated by the Qualified Archaeologist and the Gabrielino Tribe. If the resources are Native American in origin, the Gabrieleno Tribe shall consult with the City and

	Qualified Archaeologist regarding the treatment and curation of any prehistoric archaeological resources. If a resource is determined by the Qualified Archaeologist to constitute a “historical resource” pursuant to CEQA Guidelines Section 15064.5(a) or a “unique archaeological resource” pursuant to Public Resources Code Section 21083.2(g), the Qualified Archaeologist shall coordinate with the Applicant and the City to develop a formal treatment plan that would serve to reduce impacts to the resources. The treatment plan established for the resources shall be in accordance with CEQA Guidelines Section 15064.5(f) for historical resources and Public Resources Code Sections 21083.2(b) for unique archaeological resources. The treatment plan shall incorporate the Gabrielino Tribe’s treatment and curation recommendations. Preservation in place (i.e., avoidance) is the preferred manner of treatment. If preservation in place is not feasible, treatment may include implementation of archaeological data recovery excavations to remove the resource along with subsequent laboratory processing and analysis. The treatment plan shall include measures regarding the curation of the recovered resources that may include curation at a public, non-profit institution with a research interest in the materials, such as the Natural History Museum of Los Angeles County or the Fowler Museum, if such an institution agrees to accept the material and/or the Gabrielino Tribe. If no institution or the Gabrielino Tribe accept the resources, they may be donated to a local school or historical society in the area (such as the Culver City Historical Society) for educational purposes. Prior to the release of the grading bond, the Qualified Archaeologist shall prepare a final report and appropriate California Department of Parks and Recreation Site Forms at the conclusion of archaeological monitoring. The report shall include a description of resources unearthed, if any, treatment of the resources, results of the artifact

	processing, analysis, and research, and evaluation of the resources with respect to the California Register of Historical Resources and CEQA. The report and the Site Forms shall be submitted by the Applicant to the City, the South Central Coastal Information Center, and representatives of other appropriate or concerned agencies to signify the satisfactory completion of the project and required standard conditions of approval. If human remains are encountered unexpectedly during implementation of the project, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to PRC Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission (NAHC). The NAHC shall then identify the person(s) thought to be the Most Likely Descendent (MLD). The MLD may, with the permission of the land owner, or his or her authorized representative, inspect the site of the discovery of the Native American remains and may recommend to the owner or the person responsible for the excavation work means for treating or disposing, with appropriate dignity, the human remains and any associated grave goods. The MLD shall complete their inspection and make their recommendation within 48 hours of being granted access by the land owner to inspect the discovery. The recommendation may include the scientific removal and nondestructive analysis of human remains and items associated with Native American burials. Upon the discovery of the Native American remains, the landowner shall ensure that the immediate vicinity, according to generally accepted cultural or archaeological standards or practices, where the Native American human remains are located, is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the MLD
