

ATTACHMENT NO. 5

RESOLUTION NO. 2022- P017

1
2 A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF CULVER
3 CITY, CALIFORNIA, (1) APPROVING SITE PLAN REVIEW, P2021-0103-SPR
4 AND ADMINISTRATIVE USE PERMIT, P2021-0103-AUP; AND (2)
5 RECOMMENDING TO THE CITY COUNCIL APPROVAL OF DENSITY AND
6 OTHER BONUS INCENTIVES P2021-0103-DOBI, FOR A PROPOSED MIXED
7 USE PROJECT CONSISTING OF A 6-STORY BUILDING WITH 104 MULTI-
8 FAMILY RESIDENTIAL DWELLING UNITS THAT INCLUDE 5 VERY LOW
9 INCOME AND 11 WORKFORCE UNITS, ABOVE 19,012 SQUARE FEET OF
10 GROUND FLOOR COMMERCIAL SPACE AT 12727 WASHINGTON
11 BOULEVAR IN THE COMMERCIAL GENERAL (CG) ZONE SUBJECT TO
12 CONDITIONS OF APPROVAL.

(Site Plan Review, Administrative Site Plan Review, and
Density and Other Bonus Incentives,
P2021-0103-SPR, -AUP, -DOBI)

13 WHEREAS, on April 26, 2021, Bastion Development Corporation (the "Applicant"), filed
14 applications for a Site Plan Review, Administrative Use Permit, and Density and Other Bonus
15 Incentives to allow construction of a new 67 foot high, 6-level, 126,001 square foot mixed use
16 building with 19,012 square foot, ground floor commercial space and 104 residential units that
17 includes 5 very low-income and 11 workforce housing units, in the Commercial General (CG)
18 Zone (the "Project"). The Project site is described as Lots 64 through 68 and a portion of Lot
19 69 of Tract No. 5951, with Los Angeles County Assessor numbers 4236-020-001 through and
20 4236-020-006; and,
21

22 WHEREAS, the Project includes in the City of Los Angeles, a 56-foot high, 5-level
23 41,624 square foot, multi-family residential development with 40 units that includes 3 extremely
24 low-income units, in the Los Angeles R3-1 Zone. The Los Angeles portion is described as Lots
25 70 and 71 of Tract No. 5951, with Los Angeles County Assessor number 4236-020-030 and a
26 15-foot-wide alley to be vacated to the Applicant by the City of Los Angeles; and,
27

28 WHEREAS, while both portions of the Project are designed as one development with
29 integrated vehicular, pedestrian, and residential amenities access, the Project is subject to

1 separate Zoning review and entitlement processing required by the two jurisdictions, City of
2 Culver City and City of Los Angeles, and Culver City is processing the above noted entitlements
3 only for the Project's Culver City portion; and,

4 WHEREAS, to implement the proposed Project, approval of the following applications is
5 required:
6

7 1. Site Plan Review P2021-0103-SPR: To ensure the Project is in compliance with
8 the required standards, design guidelines, and ordinances of the City; minimize potential
9 adverse effects on surrounding properties and the environment; and protect the integrity and
10 character of the residential, commercial, and public areas of the City;
11

12 2. Administrative Use Permit: For residential tandem parking, to ensure that the
13 alternative parking provided for some of the Project's required parking complies with all
14 required standards and City ordinances and to establish conditions of approval to ensure the
15 uses are compatible with the Project site and surrounding area; and,
16

17 3. Density and Other Bonus Incentives P2021-0103-DOB: To ensure
18 implementation of State law requirements for density bonuses and other bonus incentives
19 comply with the goals and policies of the Housing Element of the City's General Plan; and,
20

21 WHEREAS, the Project qualifies for a Sustainable Communities Project Exemption
22 (SCPE) pursuant to California Environmental Quality Act (CEQA) Guidelines as analyzed in
23 the SCPE Report dated August 10, 2022 (Attachment No. 7 to the Staff Report). The SCPE
24 report describes in detail the Project's eligibility for said exemption pursuant to SB 375
25 streamlined CEQA review, and there are no potentially significant adverse impacts upon the
26 environment, based on the CEQA SCPE, as further described below:
27

- 28 I. The Proposed Project qualifies as a transit priority project pursuant to Public Resources
29 Code Section 21155(b) because the Proposed Project is consistent with the general use
designations, density, building intensity, and applicable policies specified for the project

1 area in the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS)
2 prepared by the Southern California Association of Governments (SCAG) pursuant to
3 Public Resources Code Section 21155(a); and contains more than 50% residential use;
4 provides a minimum net density greater than 20 units an acre; and is within one-half
5 mile of a major transit stop or high-quality transit corridor included in the SCAG
6 RTP/SCS per PRC Section 21155(b) and, as described below, all criteria in 21155.1(a)
7 and (b) are met by the Proposed Project, including environmental criteria, land use
8 criteria, and at least one criterion (affordable housing) in PRC Section 21155.1(c).; and

9 II. The Proposed Project meets all eight requirements of State Public Resources Code
10 Section 21155.1(a) that stipulates projects seeking an SB375 exemption meet the eight
11 criteria and as described in the SCPE Report that was prepared for the Project; and,

12 III. The Proposed Project meets all seven land use criteria of State Public Resources Code
13 Section 21155.1(b) that stipulates projects seeking an SB375 exemption meet the seven
14 land use criteria as described in the SCPE Report; and,

15 IV. State Public Resources Code Section 21155.1(c) further requires the Project to meet
16 one of three additional criteria to be eligible for the SB375 exemption. The Project will
17 provide 8 Low Income or lower units resulting in more than 5% of the 144-overall number
18 of dwelling units provided to Very Low Income or lower households. All restricted
19 affordable units within the Project, both in Culver City and Los Angeles, are covenanted
20 for 55 years.; and,

21 WHEREAS, on August 24, 2022, after conducting a duly noticed public hearing on the
22 subject application, including full consideration of the application, plans, staff report,
23 environmental information and all testimony presented, the Planning Commission (i) by a vote
24 of 4 to 1, adopted Sustainable Communities Project Exemption, in accordance with CEQA,
25 finding the Project will not result in significant adverse environmental impacts; (ii) by a vote of
26 4 to 1, conditionally approved Site Plan Review and Administrative Use Permit, P2021-
27 0103—SPR/AUP; (iii) by a vote of 4 to 1, recommended to the City Council approval of
28 Density and Other Bonus Incentives, P2021-0103- DOBI; and (iv) by a vote of 4 to 1, as part
29 of the DOBI recommendation, recommended the City Council approval of the following
30 Concessions in return for 5 very low income and 11 workforce units:

I. Relief from the 56 FT height limit to allow a height of 67 FT and an additional 5 FT of
parapet wall.

II. Relief from setbacks to:

- a. Allow a 0-setback on portions of the street facing levels above the ground floor that normally require a 5-foot setback above the street facing ground level.
- b. Allow a 0-setback for the rear portion of the Project abutting the Los Angeles portion of the Project that has a residential Zone and that would normally require a 10-foot setback for the first 15 feet of height followed by a 60-degree clear zone above the 15 feet.

as set forth herein below.

NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF CULVER CITY, CALIFORNIA, RESOLVES AS FOLLOWS:

SECTION 1. Pursuant to the foregoing recitations and the provisions of the Culver City Municipal Code (CCMC), the following findings are hereby made:

Site Plan Review:

As outlined in CCMC Title 17, Section 17.540.020, the following required findings for a Site Plan Review are hereby made:

- A. The general layout of the project, including orientation and location of buildings, open space, vehicular and pedestrian access and circulation, parking and loading facilities, building setbacks and heights, and other improvements on the site, is consistent with the purpose and intent of this Chapter, the requirements of the zoning district in which the site is located, and with all applicable development standards and design guidelines.**

The general layout of the Project is consistent with the Commercial General (CG) zoning district, Mixed-Use Development Standards, and State Density Bonus Law. The Project design is compatible with the surrounding commercial neighborhood and contributes to the revitalization of the commercial corridor with development of a vacant lot, an old, underutilized commercial building, and surface parking lot. The building design and massing is consistent with the CG Zone standards, applicable concessions/waivers, and State Density law.

The 67 foot, 6-story structure in Culver City and the 56 foot, 5-story portion in Los Angeles is designed to respect the scale of existing developments. The 6-story building is oriented toward Washington Boulevard, a primary arterial and commercial corridor that is developed with 1 to 5-story commercial and mixed-use developments. The ground floor commercial uses are the same as surrounding ground floor commercial uses in the area, including the mixed-use project west of the Project Site.

The 5-story portion faces Zanja and Meier Streets in Los Angeles and this area includes 1 to 3 story medium density residential developments with limited commercial uses. The Project on Zanja Street places residential units on the ground floor with outdoor porches, enhancing the residential character of Zanja Street that includes dwelling units across

1 the street. The 6-story portion with ground floor retail and greater residential density
2 faces Washington Boulevard and is a continuation of the medium to high density
3 commercial uses along the commercial corridor. This portion will also add a third mixed
4 use project within a quarter mile radius, adding to the Project's compatibility with
5 surrounding mixed-use developments.

6 Ground floor open spaces are integrated with the public sidewalk continuing the
7 pedestrian path along the commercial corridor. On-site vehicle and pedestrian
8 circulation and parking and loading are oriented into the rear ground floor area and are
9 designed to limit spill over into adjacent properties. Adequate public and private
10 sidewalks and walkways accommodate Project users and the Project development
11 within an entire City block eliminates conflict with adjacent lots. Height and setbacks
12 are consistent with State Density Bonus Law that allow greater height and less or more
13 setbacks than what the Code permits with concessions.

14 **B. The architectural design of the structure and the materials and colors are
15 compatible with the scale and character of surrounding development and other
16 improvements on the site and are consistent with the purpose and intent of this
17 Chapter, the requirements of the zoning district in which the site is located, and
18 with all applicable development standards and design guidelines.**

19 The Project's building uses the irregular, triangle-shaped Site to design an irregular "L"
20 shaped structure above a 2-story podium that fills most of the Site. The bottom of the L
21 is in Culer City and is 6 levels when combined with the 2-story podium underneath it.
22 The rest of the structure is in Los Angeles and is 5 levels (3 stories above the podium).
23 Both sections of the building share a residential garden terrace and swimming pool
24 above the 2-story podium, a ground floor garage and loading area, and 2 levels of
25 subterranean parking.

26 The design is modern using broad straight and vertical lines. Parapets, recessed
27 balconies, and offset street facing building frontages break structure massing. A 7-foot
28 building step back for a distance of 64 feet along Washington Boulevard makes the
29 building look like 2 separate structures when viewed at angles from either east or west
of the Project Site. Ground floor commercial spaces, outdoor dining along Washington
Boulevard, and setbacks ranging from 8 to 16 feet providing outdoor seating, activate
the Project's streetscape and walkability.

Finished exteriors include stucco, exterior cladding, wood color panels, exposed
concrete wall, metal store fronts, roof screens, clear glass, and dark gray handrails,
creating a varied façade. The color palette consists of yellow, grey, and tan or wood
tones. The Washington Boulevard pedestrian-oriented streetscape is continuous,
unbroken sidewalk from Meier to Zanja Streets because surface and subterranean
garage access is off Meier and Zanja Streets. The continuous Washington Boulevard
frontage eliminates visual impacts created by parking garages and driveways.

Project residential massing at 5 stories is compatible with the 1 to 3 level apartment
buildings facing Zanja and Meier Streets while the 6-story mixed used portion is

1 compatible with commercial and mixed-use developments along Washington
2 Boulevard. Articulation and varied colors and materials are similar to the multi-color,
3 modular looking mixed-use project directly west of this Site. The Project is designed to
4 conform to applicable provisions of the Mixed-Use Development Standards, Commercial
5 General (CG) Zone, and applicable City development standards, and State Density Law
6 allowed concessions.

- 7 **C. The landscaping, including the location, type, size, color, texture, and coverage
8 of plant materials, provisions for irrigation, and protection of landscape elements
9 has been designed to create visual relief, complement structures, and provide an
10 attractive environment and is consistent with the purpose and intent of this
11 Chapter, the requirements of the zoning district in which the site is located, and
12 with all applicable development standards and design guidelines.**

13 The Project includes street trees along Meier Street, Washington Boulevard, and Zanja
14 Street within the City and Los Angeles. An additional landscape strip along Zanja Street
15 provides an additional buffer between the sidewalk and the Zanja Street frontage.
16 Pedestrian oriented plazas and outdoor seating in front of the retail spaces on
17 Washington Boulevard create opportunities for sidewalk café and public spaces,
18 promoting active pedestrian friendly street scenes. Landscape features, including trees,
19 shrubs, and ground covering are on the second-floor residential opens space deck. A
20 sixth-floor open space, landscaped deck offers a leisure and lounge area with a fire table
21 and seating and dining areas for Project residents. The landscape tree palette
22 comprises London Plane, Purple Orchard, Peppermint Willow, Brisbane Box, Princeton
23 Sentry Ginkgo, and Marina Strawberry. A wide variety of drought tolerant shrubs like
24 Foxtail Agave, Blue Flame Agave, Dawe's Aloe, and Island Bush Snapdragon provide
25 additional landscape accents and buffering. These various landscape features provide
26 an attractive view of the Project from various angles and reduces the Project's sense of
27 massing by adding a flora along various levels and facia.

- 28 **D. The design and layout of the proposed project will not interfere with the use and
29 enjoyment of neighboring existing or future development, will not result in
vehicular or pedestrian hazards, and will be in the best interest of the public
health, safety, and general welfare.**

The Project location occupies an entire City block and there are no adjacent
developments that could potentially be impacted by the Project. The Project is designed
with vehicular access that will not interfere with other nearby properties and higher
massing with a commercial component is oriented towards Washington Boulevard, a
commercial corridor. The lower, less intense residential only portion faces residential
multi-family developments along Zanja and Meier Streets. Overall Project height is
placed at the west and south leaving only 2 levels at the north and east consistent with
the 1 to 3 level apartment buildings north and east of the Site. Pedestrian access is
adequately provided with extra wide sidewalks along Washington Boulevard that are a
combination of private and public walkways. Standard residential sidewalks front the
project along Zanja and Meier Streets resulting in sufficient space for pedestrians to
access the site without impacting other properties.

1 The Project's design and layout will not create conflicts with the use and enjoyment of
2 adjacent commercial areas and future development and will reduce the possibility of
3 vehicular or pedestrian hazards. The overall improvement of converting an underutilized
4 site to an economically functioning modern building with commercial and residential
5 uses is consistent with the City's intent to assure the on-going viability of its commercial
6 corridors and is in the best interest of the public health, safety, and general welfare.

7 **E. The existing or proposed public facilities necessary to accommodate the**
8 **proposed project (e.g., fire protection devices, parkways, public utilities, sewers,**
9 **sidewalks, storm drains, street lights, traffic control devices, and the width and**
10 **pavement of adjoining streets and alleys) will be available to serve the subject**
11 **site.**

12 The existing and proposed public service facilities necessary to accommodate the
13 Project such as: the width and pavement of the adjoining streets, traffic control devices,
14 sewers, storm drains, sidewalks, street lights, proposed street trees, fire protection
15 devices, and public utilities are provided for adequately as confirmed by the City
16 agencies that reviewed the Project during the interdepartmental review process.

17 **F. The proposed project is consistent with the General Plan and any applicable**
18 **specific plan.**

19 The Culver City General Plan Land Use Element designates the property General
20 Corridor. The property is zoned Commercial General which permits the proposed mixed-
21 use development. The application includes concessions to allow relief of certain
22 development standards to ensure affordable and workforce housing as required under
23 State Density Law. Both the residential component and commercial ground floor activity
24 is consistent with General Plan Land Use Objective 24 and Policy 24.F that encourage
25 protection and enhancement of residential and business uses in the City's Western Sub-
26 Area and emphasize retail neighborhood uses along Washington Boulevard between
27 Redwood Avenue and Washington Place. The Project is consistent with General Plan
28 Land Use Objective 6 – Commercial Corridors – because the mixed-use development
29 will revitalize the physical character and economic wellbeing of this specific portion of
the west Washington Boulevard corridor by repurposing vacant dilapidated parcels that
breaks the pattern of an otherwise active corridor.

The Project's housing component is consistent with various Housing Element policies.
It implements the Housing Element quantified objectives and Regional Housing Needs
Assessment (RHNA) 6th Cycle, 2021 to 2029 by providing 5 of the 554 very low-income
units and 99 of the 1,069 above market rate units that includes 11 workforce housing
units, as noted below:

Table 44: Quantified Objectives

	Extremely Low	Very Low	Low	Moderate	Above Moderate	Total
New Construction	554	554	604	560	1,069	3,341
Preservation	30	30	60	0	0	120
Conservation	29	30	134	38	0	231

More specifically, the housing component implements Objective 2 – Housing Supply by expanding opportunities for a variety of housing types such as provisions for studio, one-bedroom, and 2-bedroom units, all of varying sizes. The housing’s proximity to Culver City Bus Line 1 and Metro Line 33, both of which connect with the Metro E Line (Expo) Culver City station furthers Policy 2.B that promotes housing access to the LA Metro E Line Culver City Station. The Project design, as noted above in previous Findings, is compatible with surrounding commercial and mixed-use developments such as the Lucky mixed-use development across Meier Street as called for in Policy 2.C that promotes mixed use residential developments that are compatible with nonresidential uses in the area. Use of State Density Bonus Law lower parking requirements is consistent with Policy 2.G that promotes reduced parking requirements to incentivize production of affordable housing. The Project’s 5 very-low-income units, 11 workforce units, and 88 market rate units provides a diverse range of rental housing opportunities meeting the needs of Culver City’s varied socioeconomic segments, consistent with Objective 3. - Housing Affordability. The Project executes Policy 3.A because it involves granting a density increase and relief from Zoning Code required height limits and setbacks through concessions, as called for by the Zoning Code and the State Density Bonus law in return for affordable housing units for a period of 55 years.

Administrative Use Permit:

As outlined in CCMC Title 17, Section 17.530.020, the following required findings for an Administrative Use Permit are hereby made:

A. The proposed use is allowed within the subject zoning district with the approval of an Administrative Use Permit and complies with all applicable provisions of this Title and CCMC.

The Project is proposing a certain percentage of residential tandem parking for some of the required parking which is allowed in the CG Zoning District pursuant to CCMC Section 17.320.025: Alternative Parking Provisions. These proposed spaces constitute the Project Site’s alternative parking spaces that along with the standard 90-degree spaces result in the total required parking. The proposed tandem parking layout complies with all other applicable provisions regarding parking design and layout guidelines.

B. The proposed use is consistent with the General Plan and any applicable Specific Plan.

1 The Project Site has a General Corridor General Plan Land Use designation and is
2 Zoned Commercial General (CG). The proposed alternative parking provision is
3 consistent with General Plan Land Use Objective 24 and Policy 24.F that encourage
4 protection and enhancement of residential and business uses in the City's Western Sub-
5 Area and emphasize retail neighborhood uses along Washington Boulevard between
6 Redwood Avenue and Washington Place. The tandem parking will facilitate
7 development of the commercial and residential components along the corridor noted
8 above. The tandem parking will help to make the Project compliant with required parking
9 thereby providing additional support and flexibility for proposed and future ground floor
10 commercial uses. The alternative parking is provided in the subterranean parking and
11 not visible to both commercial and residential neighbors, furthering the Objective 16 that
12 encourages mutually compatible land uses.

9 **C. The design, location, size and operating characteristics of the proposed use are
10 compatible with the existing and future land use in the vicinity of the subject site.**

11 The proposed use, design, location, size, and operating characteristics of the tandem
12 parking spaces will not have an impact on adjacent uses and are therefore found to be
13 compatible with the existing and future commercial and residential land uses in the
14 vicinity of the subject site. Alternative parking spaces will be managed by the property
15 management company that will ensure each pair of tandem parking spaces are
16 assigned to one unit. All tandem spaces have adequate on-site maneuvering sufficient
17 to ensure vehicle parking and retrieval does not impact overall subterranean parking
18 access and operations. Parking operations will be contained within the Project Site and
19 will assist in meeting the Project's on-site parking requirements thereby assuring the
20 Project does not have an impact on nearby street parking spaces. Thus, existing, and
21 future land uses in the Project vicinity will not be impacted by Project tandem parking.

18 **D. The subject site is physically suitable for the type and intensity of use being
19 proposed, including access, compatibility with adjoining land uses, shape, size,
20 provision of utilities and the absence of physical constraints.**

21 The generally flat configuration and wide area of each subterranean parking level
22 ensures code compliant stall and drive aisles widths, ramp slopes, and back up area so
23 that vehicles can access parking with ease. The proposed onsite parking configuration
24 is physically suitable to accommodate alternative tandem and standard parking spaces.
25 The alternative parking spaces are compatible with the adjoining commercial and
26 residential uses because they will be managed by the property management company
27 and their location in subterranean parking levels is far enough from nearby commercial
28 and residential use that they will not impact surrounding areas. The tandem parking will
29 not impact any utilities and there are no physical constraints that would prevent the
proposed alternative parking. All required Project parking is provided on-site with
adequate drive aisles, driveways, and maneuvering areas and can be accommodated
within the Project boundaries. The alternative parking is therefore compatible with
adjoining land uses as the Project will provide its required parking.

1 **E. The establishment, maintenance or operation of the proposed use will not be**
2 **detrimental to the public interest, health, safety or general welfare or injurious to**
3 **persons, property or improvements in the vicinity and zoning district in which the**
4 **property is located.**

5 The establishment of tandem parking will not be detrimental to the public interest, health,
6 safety, or general welfare or injurious to persons, property or improvements in the
7 surrounding commercial and residential zoning districts or vicinity since the alternative
8 parking will not generate on-site or off-site parking impacts. All required and managed
9 parking will occur on the Project Site thereby lessening impacts to surrounding
10 properties. Sufficient on-site maneuvering areas within the drive-aisles will ensure
11 parking and retrieval of alternative parking will occur on-site without the need to use the
12 public right-of-way or public parking spaces.

13 **Density Bonuses and Other Bonus Incentives:**

14 As outlined in CCMC Title 17, Section 17.580.020, the following required findings for a Density
15 Bonus and Other Bonus Incentives are hereby made:

16 **A. The project would be compatible with the purpose and intent of the General Plan**
17 **and the provisions of this Title.**

18 The Culver City General Plan Land Use Element designates the property General
19 Corridor. The property is zoned Commercial General which permits the proposed mixed-
20 use development. The application includes concessions to allow relief of certain
21 development standards to ensure affordable and workforce housing as required under
22 State Density Law. Both the residential component and commercial ground floor activity
23 is consistent with General Plan Land Use Objective 24 and Policy 24.F that encourage
24 protection and enhancement of residential and business uses in the City's Western Sub-
25 Area and emphasize retail neighborhood uses along Washington Boulevard between
26 Redwood Avenue and Washington Place. The Project is consistent with General Plan
27 Land Use Objective 6 – Commercial Corridors – because the mixed-use development
28 will revitalize the physical character and economic wellbeing of this specific portion of
29 the west Washington Boulevard corridor by repurposing vacant dilapidated parcels that
breaks the pattern of an otherwise active corridor.

The Project's housing component is consistent with various Housing Element policies.
It implements the Housing Element quantified objectives and Regional Housing Needs
Assessment (RHNA) 6th Cycle, 2021 to 2029 by providing 5 of the 554 very low-income
units and 99 of the 1,069 above market rate units that includes 11 workforce housing
units, as noted below:

Table 44: Quantified Objectives

	Extremely Low	Very Low	Low	Moderate	Above Moderate	Total
New Construction	554	554	604	560	1,069	3,341
Preservation	30	30	60	0	0	120
Conservation	29	30	134	38	0	231

More specifically, the housing component implements Objective 2 – Housing Supply by expanding opportunities for a variety of housing types such as provisions for studio, one-bedroom, and 2-bedroom units, all of varying sizes. The housing’s proximity to Culver City Bus Line 1 and Metro Line 33, both of which connect with the Metro E Line (Expo) Culver City station furthers Policy 2.B that promotes housing access to the LA Metro E Line Culver City Station. The Project design, as noted above in previous Findings, is compatible with surrounding commercial and mixed-use developments such as the Lucky mixed-use development across Meier Street as called for in Policy 2.C that promotes mixed use residential developments that are compatible with nonresidential uses in the area. Use of State Density Law lower parking requirements is consistent with Policy 2.G that promotes reduced parking requirements to incentivize production of affordable housing. The Project’s 5 very-low-income units, 11 workforce units, and 88 market rate units provides a diverse range of rental housing opportunities meeting the needs of Culver City’s varied socioeconomic segments, consistent with Objective 3. - Housing Affordability. The Project executes Policy 3.A because it involves granting a density increase and relief from Zoning Code required height limits and setbacks through concessions, as called for by the Zoning Code and the State Density Bonus law in return for affordable housing units for a period of 55 years.

These density increases are consistent with expected development thresholds and build-out projections as delineated in the Culver City 1996/2000 General Plan Land Use Element, the SCAG’s Connect SoCal 2020 (2020–2045 Regional Transportation Plan/Sustainable Communities Strategy), the SCAG/HCD Regional Housing Needs Assessment 6th Cycle, 2021 to 2029, and the SCAQMD 2016 Air Quality Management Plan (AQMP).

B. The project will not be detrimental to the public interest, health, safety, or general welfare, or injurious to persons, property, or improvements in the vicinity and zoning district in which the property is located.

The Site provides adequate onsite pedestrian and vehicular circulation and complies with Zoning Code and State Density Law requirements. Potential off or on-site circulation hazards are reduced because the Project provides adequate space, surface area, and pedestrian and vehicle paths and driveways to ensure elimination of conflicts between Project residents and businesses and surrounding commercial and residential developments. Adequate sidewalks, residential only lobbies with elevators, and interior courtyards and walkways assure pedestrian access that is separated from the Project’s ground floor commercial spaces. The use and enjoyment of neighboring developments

1 are not negatively impacted or interfered with, as the new ground floor commercial
2 spaces will add to the existing commercial uses along the west Washington corridor.

3 Concessions will not be detrimental to the public interest, health, safety, and general
4 welfare because such relief of code requirements allowed under State Density Bonus
5 Law will result in 5 very low income and 11 workforce units, which is necessary to
6 achieve Culver City's housing needs and the regional housing needs as directed by the
7 6th RHNA Cycle. Further, massing of the Project, will be oriented to the south and west
8 facing commercial areas, and away from the north and east facing multi-family
9 residential areas. The 67-foot height limit is consistent with the Lucky mixed-use
10 development, across the street, that is only 1 floor less in height than this project. The
11 Project in both Los Angeles and Culver City is designed as one development and
12 setback relief the rear Culver City portion facing the Los Angeles portion does not affect
13 the project and is internal to the Project, thereby no impacting surrounding properties.

14 The Project replaces a dilapidated, semi vacant site a new ground floor commercial
15 space and 104 residential uses including affordable dwellings. The conditions of
16 approval and compliance with all CCMC requirements and other City standards and
17 guidelines will ensure the Project will not be a detriment to the public interest, health,
18 safety, or general welfare, or injurious to persons, property, or improvements in the
19 vicinity and zoning district in which the property is located. The use of both Community
20 Benefits and State Density Bonus Law density increases will compliment any future
21 mixed-use projects in the west Washington Boulevard corridor that may seek to increase
22 their density in similar fashion. Further, by increasing housing density on the site and
23 providing 5 affordable housing units and 11 workforce housing units, the Project will be
24 in the best interest of the public health, and general welfare.

25
26 **C. The number of dwellings can be accommodated by existing and planned
27 infrastructure capacities.**

28 The site is in an existing urbanized neighborhood, and is currently characterized as a
29 semi vacant, dilapidated site. Public facilities to the site currently exist and will be
upgraded, augmented, and/or replaced as required by project conditions. City review
of the Project did not determine that upgrades to the existing facilities could not be
achieved. Further, the existing and proposed public service facilities necessary to
accommodate the Project such as: the width and pavement of the adjoining streets,
traffic control devices, sewers, storm drains, sidewalks, streetlights, proposed street
trees, fire protection devices, and public utilities are provided for adequately as
confirmed by the City agencies that reviewed the Project during the interdepartmental
review process. Finally, the Project will upgrade a dilapidated and semi vacant property.

30
31 **D. Adequate evidence exists to ensure that the development of the property would
32 result in the provision of affordable housing in a manner consistent with
33 Government Code, Section 65915, or as may be amended, and the purpose and
34 intent of this Title.**

1 The Project's base density per the Zoning Code Mixed Use standards and after
2 community benefits that provide 11 workforce housing units, is 51 units. Based on State
3 Density Bonus Law, the applicant is requesting a 50% density increase in return for
4 reservation of 5 very low-income households. The Project proposes a density increase
5 of 26 units for a total of 77 units and an additional 27 units using both the Culver City
6 and Los Angeles portions to determine overall maximum density in Culver City. The
7 Project's 5 very low-income units will be covenanted for 55 years for very low-income
8 individuals or households. The covenant requiring affordability for 55 years will be a
9 Project condition. Adequate evidence exists to ensure that the development of the
10 Project site will result in the provision of affordable housing in a manner consistent with
11 Government Code, Section 65915.

8 **E. There are sufficient provisions to guarantee that the designated dwelling units
9 would remain affordable in the future.**

10 The Project will result in 104 units with 5 of those units covenanted for 55 years for very
11 low-income individuals or households. The covenant requiring affordability for 55 years
12 will be a Project condition and will be administered by the City's Housing Authority to
13 ensure compliance with State affordable housing law including residents of these units
14 meeting very low-income criteria. Certificates of Occupancy will not be granted until
15 covenants are recorded with the County and the Housing Authority has approved the
16 selection process for the tenanting of the Affordable units.

15 SECTION 2. Pursuant to the foregoing recitations and findings, the Planning
16 Commission of the City of Culver City, California, hereby (i) adopts a CEQA Sustainable
17 Communities Project Exemption, finding the Project will not result in significant adverse
18 environmental impacts; (ii) approves Site Plan Review and Administrative Use Permit, P2021-
19 0103—SPR/AUP; (iii) recommends the City Council adopt Density and Other Bonus Incentives,
20 P2021-0103-DOBI; and (iv) recommends the City Council approve height and setback
21 concessions as noted above and as part of the DOBI recommendation, subject to: the site and
22 floor plans reviewed by the Planning Commission on August 24, 2022; the conditions of
23 approval set forth in Exhibit A, attached hereto and incorporated herein by this reference; and
24 the applicable code requirements set forth in Exhibit B attached hereto and incorporated herein
25 by this reference, attached hereto and incorporated herein by this reference. The site and floor
26 plans, and Exhibits A and B, are collectively referred to as "Project Requirements."
27
28
29

1 SECTION 3. The Project Requirements are hereby imposed on the proposed mixed-
2 use development at 12727 Washington Boulevard.

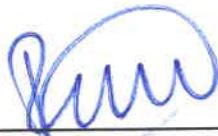

3 APPROVED and ADOPTED this 24th day of August 2022.

 12727 Washington Boulevard

NO.	CONDITIONS OF APPROVAL	Agency	Source	Compliance Verification
GENERAL				
1.	Street trees, tree wells, and irrigation shall be installed, to the satisfaction of the City Engineer and Current Planning Manager, in conformity with the City's approved Urban Forest Master Plan, and where appropriate, the Washington National TOD Oriented Street scape plan. All new (and existing) street trees shall be supplied with irrigation water from the overall site irrigation system which shall include a timer and a rain sensor. All new (and existing) street trees, landscaping, and irrigation shall be indicated on the overall site landscaping/ irrigation plan. In residential areas, all new off-site landscaping shall conform to the City's Residential Parkway Guidelines.	Public Works/ Planning	Standard	
2.	At the sole cost and expense of the Property Owner, any curbs, gutters, sidewalks, street lights, street light wires and conduits, traffic signal equipment, street pavement, and any other City infrastructure which are damaged or broken from construction of the Project shall be repaired and reconstructed in conformity with APWA Standards and to the satisfaction of the City Engineer.	Public Works	Standard	
3.	The project shall be subject to Holiday Moratorium dates as required by the December 17, 2009 Public Works/Engineering Holiday Slowdown Policy memo, in which work in the public right-of-way is restricted or prohibited on certain days in November and December.	Public Works	Standard	
4.	Fire sprinkler main lines shall not be allowed to discharge into the public right-of-way, and they shall discharge into the sanitary sewer system.	Public Works	Standard	
5.	Unless revisions are required by the City, trash enclosures shall be provided and shall each have a minimum inside dimension of 10 feet (depth) x 12 feet (width) for two 3-yard bins and shall be increased to an additional 60 square feet for each	Public Works/ Fire/ Current Planning	Standard

	<p>additional bin required, a gated opening that is at least 10 feet wide, and a 6-inch high by 6-inch-wide concrete curb along the inside perimeter wall. Each enclosure shall also have at least a 6-inch-thick concrete slab that drains at a one percent gradient out of the enclosure. An 8 feet concrete loading pad in front of the proposed trash enclosure/trash room, 10 feet minimum clear opening with gates for bin access, and separate pedestrian access door for tenant use, shall be provided. Additional grade may be necessary to include a floor drain that leads to the sewer for maintenance purposes. Final approval for the size, location, and type of equipment needed for the adequate storage and disposal of all solid and recyclable waste generated by the Project shall be obtained from the City's Environmental Programs and Operations Manager. A fire suppression sprinkler system shall be provided within any covered trash enclosure area as required by the Fire Marshal. All refuse containers assigned to or otherwise used by the Project shall be stored on-site in the trash enclosures.</p>			
6.	<p>All Project related solid and recyclable waste material handling shall be in accordance with CCMC Section 5.01.010 – "Solid Waste Management", which outlines the Sanitation Division's exclusive franchise for this service. The project shall provide adequate trash and recycling capacity and shall comply with Assembly Bills 939, 1826, and 341 waste diversion goals.</p>	Public Works	Standard	
7.	<p>Prior to the issuance of a building permit, the applicant shall obtain the approval of the City's Environmental Programs and Operations Manager for the size, location, and type of equipment needed for the adequate storage and disposal of all solid and recyclable waste generated by the project. The applicant shall submit a waste management plan to EPO for review and approval.</p>	Public Works/ EPO	Standard

NO.	CODE REQUIREMENTS	Agency	Code Compliance Verification	Check if Applicable
1.	All building permit applications for the Project shall include sufficient information and detail to clearly reflect compliance with all applicable requirements of the Culver City Municipal Code (the "CCMC") and with the Project Conditions of Approval.	Current Planning		
2.	The land use permit to which the Project Conditions of Approval apply (the "Land Use Permit") shall expire one year from the date of final approval of said Land Use Permit, if the use has not been exercised. As provided in CCMC Section 17.595.030 –"Time Limits and Extensions", an applicant may request an extension of said expiration date by filing a written request with the Current Planning Division prior to the expiration of the land use permit. Final approval shall be interpreted as the date of the last entitlement required for this land use permit issued by either the City of Culver City or City of Los Angeles.	Current Planning		
3.	Pursuant to CCMC Section 17.630.010.C.4 – "Posted Notice", the public notification sign(s) installed in accordance with the public notification requirements for the Land Use Permit shall be removed within ten days after the end of the appeal period or the final decision by the City Council on the Land Use Permit, whichever occurs last.	Current Planning		
4.	The Project shall be developed pursuant to CCMC Chapter 17.300 – "General Property Development and Use Standards".	Current Planning		
5.	All planted areas on the Property shall be landscaped and irrigated pursuant to CCMC Chapter 17.310 - "Landscaping".	Current Planning		
6.	All parking areas on the Property shall be developed pursuant to CCMC Chapter 17.320 - "Off-Street Parking and Loading" and State Density Law reduced residential parking requirements.	Current Planning
