CARSON STREET STREET TREE ADVISORY SURVEY

YES		NO
☐	Remove all of the existing street (Ficus) trees on Carson Street between Ince Blvd and Higuera Street.	☐

If your answer is **"No"** to the above question, please stop here and return the Street Tree Advisory Survey (Survey) to the Culver City Public Works Department/Engineering Division. Please read the attached cover letter for further instructions.

If your answer is **"Yes"** to the above question, please place a number next to the following recommended street trees in order of preference from "1" to "5" in the empty box left of the given street tree, with "1" being the most preferred and "5" being the least preferred.

There are a total of 27 existing ficus trees along Carson Street between Ince Boulevard and Higuera Street. The City proposes a "one" to "one" street tree replacement, using the same street tree species (the one receiving the most votes from this Survey) at all locations. In addition, the City plans on adding one or two additional street trees to fill in the currently empty spaces on the parkway that are not occupied by a tree. All new trees planted by the City will be 36" box trees.

	Remove all of the existing street (Ficus) trees along the parkway and replace them with Chinese Pistache Trees.
	Remove all of the existing street (Ficus) trees along the parkway and replace them with Chinese Elm Trees.
	Remove all of the existing street (Ficus) trees along the parkway and replace them with Fern Pine Trees.
	Remove all of the existing street (Ficus) trees along the parkway and replace them with Jacaranda Trees.
	Remove all of the existing street (Ficus) trees along the parkway and replace them with Camphor Trees.
