City Clerk  
City of Culver City

To: The Honorable Mayor and Members of the City Council  
From: Yanni Demitri, P.E., Public Works Director and City Engineer

**SUBJECT: HIGUERA STREET LANDSCAPING AND LIGHTING  
MAINTENANCE DISTRICT  
FISCAL YEAR 2023-2024 ASSESSMENT  
ENGINEER'S REPORT**

Higuera Street Landscaping and Lighting Maintenance District (hereinafter referred to as "District"), described herein, was formed by Resolution 95-R056, adopted on July 10, 1995, in accordance with the Chapter 15.01 of the Code of the City of Culver City, California.

This report consists of the following seven sections and two exhibits, which are submitted herewith, and made a part hereof:

I. Diagram of District Boundaries and Parcels

Higuera Street Landscaping and Lighting Maintenance District, consisting of certain public property and private real property within the District which is subject to assessment, is shown on that Diagram which has been filed in the Office of the City Clerk and, as a duplicate copy, in the Office of the City Engineer, and by this reference is made a part hereof (as Exhibit C). The Map must be updated each year to reflect all changes made on the County Assessor's Map that impact the District. There are a total of 76 parcels in the District.

II. Types of Maintenance

The proposed maintenance to be performed within the landscaping and lighting maintenance area consists in general of the following:

- A. Landscaping in the street median strip and the parkways twice a month.
- B. Irrigation costs of the landscaping in the median strip and in the parkways.
- C. The District area illumination has been increased above standard by the installation of 27 more luminaires than standard. The District will pay the differential energy and maintenance costs of these decorative streetlights to the extent that these additional street lights remain in service.

III. Landscaping, Irrigation, and Lighting System Plans

The District Landscaping, Irrigation, and Lighting were constructed by contract by the Culver City Redevelopment Agency (hereinafter "Agency") as parts of Project R-3059. The Agency approved the plans and specifications for that project on June 20, 1994. The work was accepted by the Agency as completed on June 17, 1996.

IV. Performance of Maintenance by City Forces and/or Contractor

The maintenance of the improvements is provided by the City of Culver City force account and/or maintenance contracts awarded by the City, and the costs thereof assessed to the benefiting properties within the District.

V. Parcel Assessments Based Upon Benefit Received

It is proposed to assess the total amount of maintenance and incidental costs for maintaining the landscaped median areas and parkways, the irrigated areas in the median and the parkways, and the differential costs of the decorative streetlights to the individual parcels of real property within the District in proportion to the benefit to be received by such parcels of real property. The proposed individual assessments are shown on the attached assessment roll.

VI. Method of Assessment

The District costs are assessed amongst the benefited properties in accordance with their lot dimensions along Higuera Street. In those cases where a residential corner property fronts on a side street other than Higuera Street, the lot dimension used for computation of the assessment is one-half of the length along Higuera Street. There are a total of 4,461.45 linear frontage feet in the assessment district. The existing assessment is \$4.35 per linear foot and it is recommended that this amount be approved again for fiscal year 2023-2024.

VII. Estimated Cost of Maintenance and Improvements

The estimated cost of maintenance and improvements for the fiscal year includes, in total or in part, the following:

- A. The total cost of maintaining and servicing all existing improvements, as described in Section II, including all incidental expenses.
- B. The amount of any surplus or deficit in the District Fund to be carried over from the previous fiscal year.
- C. The amount of any contributions to be made from sources other than assessments levied pursuant to District assessment proceedings.
- D. The amount, if any, of the annual installment of an assessment ordered by the City Council, wherein the estimated cost of any improvements shall be levied and collected in annual installments.
- E. The net amount to be assessed upon assessable lands within the assessment district is equal to the total maintenance and improvement costs, as referred to in Part A above, increased or decreased, as the case may be, by any of the amounts referred to in B., C., or D., above. The estimated and actual costs for Fiscal Year 2022/23 and estimated costs for Fiscal Year 2023/24 are shown in EXHIBIT A.

- F. Item B above may specify individual parcels within a zone that did not receive notice of or pay assessments levied by the City Council, and which assessments are carried over and added to the assessments for the current fiscal year for each such specified parcel.

**Current Status**

When the District was originally formed, the scope of the District’s maintenance did not include the parkway landscaping maintenance. At the July 14, 2003 City Council meeting, a ballot measure was approved to increase the District annual assessment that added the parkway landscaping maintenance as a function of the District. The City Council adopted Resolution No. 2003-R053 that imposed the increased annual assessment levy for the fiscal year 2003/2004.

Over the history of the District, the only assessment increase for the District was in fiscal year 2003/2004. In the interim, the costs to maintain the District have increased. In fiscal years 2007-2008, 2008-09, and 2009-10, ballot measures to increase the assessment, failed to pass and therefore were not implemented.

In December 2009, the City Council approved a reduced maintenance schedule from 4 times a month to 2 times a month in order to have expenditures be in line with assessment revenues. Also the City Council approved the removal of the lantanas around the tree wells and irrigation water usage was reduced by 30%. These reductions brought the District’s expenses in line with the revenues being received through the annual assessment.

**Recommended District Assessment for Fiscal Year 2022-2023**

There are a total of 4,461.45 linear frontage feet in the assessment district. The existing assessment is \$4.35 per linear foot and it is recommended that this amount be approved again for fiscal year 2023-2024. The District will be assessed a total of \$19,402.24.

The proposed assessment and individual assessments to the District are shown in EXHIBITS A and B, respectively.

Respectfully submitted,

---

Yanni Demitri, P.E. RCE 63388  
Public Works Director and City Engineer
