

1
RESOLUTION NO. 2025-P011

2 A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF CULVER
3 CITY, CALIFORNIA, APPROVING CONDITIONAL USE PERMIT P2025-0174-
4 CUP TO ALLOW THE ESTABLISHMENT OF A NEW VEHICLE SERVICES –
5 MAINTENANCE AND REPAIR FACILITY WITHIN AN EXISTING INDUSTRIAL
6 BUILDING LOCATED AT 10150–10200 JEFFERSON BOULEVARD IN THE
7 MIXED-USE CORRIDOR 2 ZONE.

8 (Conditional Use Permit P2025-0174-CUP, -CE)

9 WHEREAS, on July 24, 2025, Cadillac of Beverly Hills, (the “Applicant”), filed an
10 application for a Conditional Use Permit (CUP), to establish a vehicle services – maintenance
11 and repair facility within an existing 42,333 square-foot industrial building, including 39 interior
12 service bays, 67 surface parking spaces, associated façade improvements, exterior painting,
13 and no changes to the building height, footprint, or floor area in the Mixed-Use Corridor 2 (MU-
14 2) Zone located at 10150–10200 Jefferson Boulevard (the “Project”). The Project Site’s legal
15 description being a portion of Lots 3 and 5 of Tract No. 3343 in the City of Culver City with Los
16 Angeles County Assessor number of 4296-001-002;

17 WHEREAS, on June 19, 2025, the Planning and Development Director approved
18 Temporary Use Permit (TUP) No. P2025-0141, allowing temporary occupancy to the Applicant
19 to perform limited vehicle services, minor accessories installation, and car washes in order to
20 prepare vehicles for delivery to local dealerships, as conditioned; and,

21 WHEREAS, to implement the proposed Project, approval of the following applications is
22 required:

23 1. Conditional Use Permit, for operation of a vehicle services – maintenance and
24 repair facility, to ensure the Project complies with all required standards and City ordinances,
25 and to establish all onsite and offsite conditions of approval necessary to address the site

1 features and ensure compatibility of the proposed Project with the development on adjoining
2 properties and in the surrounding neighborhood; and,

3 2. Extension of Temporary Use Permit No. P2025-0141-TUP, for the continuation
4 of the uses and all conditions therein until the Applicant is issued final building permits.

5 WHEREAS, the Project qualifies for a categorical exemption, pursuant to California
6 Environmental Quality Act (CEQA) Section 15301, Class 1 – Existing Facilities; and

7 WHEREAS, on September 24, 2025, after conducting a duly noticed public hearing on
8 the subject application, including full consideration of the application, plans, staff report,
9 environmental information and all testimony presented, the Planning Commission by a vote of
10 3 to 2, adopted a Categorical Exemption, in accordance with CEQA, finding the Project will
11 not result in significant adverse environmental impacts; conditionally approved Conditional Use
12 Permit P2025-0174-CUP; and an extension of Temporary Use Permit, P2025-0141-TUP, for
13 the continuation of temporary uses, and all conditions therein, until the Applicant is issued final
14 building permits, as set forth herein below.

15 NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF CULVER
16 CITY, CALIFORNIA, RESOLVES AS FOLLOWS:

17 SECTION 1. Pursuant to the foregoing recitations, the provisions of the Culver City
18 Municipal Code (CCMC), the following findings are hereby made:

19 **Conditional Use Permit:**

20 As outlined in CCMC Title 17, Section 17.530.020, the following required findings for a CUP
21 are hereby made:

22 A. **The proposed use is allowed within the subject zoning district with the approval
23 of a Conditional Use Permit and complies with all other applicable provisions of
24 this Title and the CCMC.**

1 The Project site is located within the MU-2 Zone and has a Mixed Use Corridor 2 General
2 Plan Land Use designation. Pursuant to CCMC Section 17.220.015, "Vehicle Services
3 – Maintenance/Repair" are permitted in the MU-2 Zone subject to approval of a CUP.
4 Vehicle Service uses within this zone are further required to comply with the operational
5 standards outlined in CCMC Section 17.400.125 (Vehicle Repair Shops).

6 The Project proposes to reuse the existing building. As conditioned, all improvements
7 will conform to the development standards applicable to the MU-2 Zone, including
8 requirements related to building form, height, ground-floor height, and setbacks, as well
9 as the provisions of the CCMC, Title 17 (Zoning), Chapter 17.220.020 (Mixed Use
10 Zoning District Development Standards), and Chapter 17.400.125 (Vehicle Repair
11 Shops).

12 The MU-2 Zone does not require front yard setbacks (0 feet), and the existing building
13 complies with this standard. Buildings in the MU-2 Zone are permitted a maximum height
14 of 56 feet, with a minimum ground-floor height of 15 feet for non-residential uses. The
15 existing one-story structure has a height of 20 feet, 3 inches and is consistent with these
16 standards.

17 The site is currently enclosed by walls along the southern, eastern, and northern
18 property lines. Under the CCMC, walls and fences may be up to 8 feet in height when
19 abutting residential zones and up to 9 feet in height when abutting non-residential zones.
20 The existing walls, which are a maximum of 8 feet tall, comply with these requirements
21 and will remain in place as part of the Project.

22 In accordance with CCMC Section 17.530.025 (Conditions of Approval), conditions have
23 been applied to address potential impacts on surrounding properties. As conditioned in
24 Exhibit A – Conditions of Approval, the Project complies with all applicable zoning district
25 requirements and operational standards.

26 **B. The proposed use is consistent with the General Plan and any applicable Specific
27 Plan.**

28 The Project site is designated Mixed Use Corridor 2 in the General Plan Land Use Map
29 and zoned MU-2. In accordance with CCMC Section 17.220.015, "Vehicle Services –
Maintenance/Repair" are permitted within the MU-2 zone subject to approval of a CUP.
The MU-2 zone also allows related by-right uses such as "Accessory Installation," "Car
Washes," and "Electric Vehicle Charging Stations." Accordingly, the proposed primary
and ancillary uses are consistent with the Mixed Use Corridor 2 General Plan Land Use
designation. The Project site is not located within a Specific Plan area.

30 The proposed Project is consistent with the applicable goals, objectives, and policies of
31 the 2045 General Plan as detailed below:

1 **Land Use Element:**

2 GOAL LU (Land Use)-9: Mixed use corridors. A network of mixed use corridors
3 accommodate a diverse range of businesses, neighborhood-serving uses, and housing.

4 ***Consistent:*** *The Project Site is located along Jefferson Boulevard, a designated Mixed
5 Use Corridor 2, and will provide local business and job opportunities for the surrounding
6 community.*

7 Policy LU-9.1: Complete neighborhoods. Promote new commercial uses and revitalize
8 existing commercial areas in locations that provide convenient access to a range of
9 goods and services for Culver City's residential neighborhoods.

10 ***Consistent:*** *The Project would renovate an existing warehouse building for use as an
11 automotive service center, providing auto services to the neighborhood.*

12 Policy LU-9.2: Neighborhood-serving commercial location. Encourage existing strip
13 commercial corridors like Washington Boulevard, Sepulveda Boulevard, and Jefferson
14 Boulevard to intensify with standalone uses, concentrating neighborhood-serving
15 commercial uses into mixed use activity centers.

16 ***Consistent:*** *The Project would renovate an existing warehouse building on Jefferson
17 Boulevard for use as an automotive service center, providing neighborhood-serving auto
18 services.*

19 Policy LU-9.4: Active frontages. Require the first floor street frontage of buildings,
20 including parking structures, to incorporate commercial or other active public uses to
21 enhance pedestrian orientation along commercial and mixed use corridors.

22 ***Consistent:*** *The Project includes the customer and employee entrances from the
23 pedestrian right-of-way on Jefferson Boulevard, creating an active street frontage along
24 the mixed use corridor.*

25 Policy LU-9.5: Pedestrian and bicycle access to the corridor. Require new project
26 applications to foster pedestrian and bicycle access by providing safe, accessible
27 pedestrian connections and creating secure and convenient bike storage.

28 ***Consistent:*** *The Project includes the customer and employee entrances from the
29 pedestrian right-of-way on Jefferson Boulevard and will provide a minimum of two short-
 term and four long-term bicycle spaces, which will be provided at the existing bicycle
 rack at the rear of the building.*

GOAL LU-15: Architecture and site design. High level of quality in architecture and site
design in all renovation and construction of buildings.

Consistent: *The Project would renovate the existing warehouse building for use as an
automotive service facility, including interior and exterior architectural renovations using
high-quality materials, improvements in glazing, and general building maintenance.*

Policy LU-15.1: Walkable and inviting buildings and spaces. Require building design that
creates walkable and inviting spaces, such as locating parking behind buildings,

1 allowing for outdoor plazas and dining, and locating building frontages in close proximity
2 to the sidewalk edge, where appropriate.

2 ***Consistent:*** *The Project will maintain the existing building's entrances, which are*
3 *located at the sidewalk edge on Jefferson Boulevard. Vehicular parking will be provided*
3 *on the sides of and behind the existing building.*

4 Policy LU-15.2: Active street frontages. require active street frontages, including the
5 following: locating uses that engage the street on the ground floor; creating comfortable
6 transitions between the ground floor of a building and the street; using taller floor to floor
7 heights, greater articulation, and finer details at ground floors; creating enhanced
8 entrances; and encouraging ground-floor residential units with stoops, dooryards, or
similar features on major corridors outside core business areas.

8 ***Consistent:*** *The Project will maintain and enhance the existing building's entrance*
9 *locations with new façade materials, glazing, and lighting, which are located at the*
10 *sidewalk edge on Jefferson Boulevard, creating an active street frontage along the*
10 *mixed use corridor.*

11 Policy LU-15.3: Architectural and visual interest in new development. Encourage
12 distinctive architecture and elements that add visual interest to buildings to enhance
13 people's perceptions of Culver City as an interesting and inviting place.

14 ***Consistent:*** *The Project would renovate the existing warehouse building for use as an*
15 *automotive service facility with a modern white facade, upgraded signage, interior and*
15 *exterior architectural renovations that incorporate new glazing, painting, and maintain*
15 *the existing landscape areas.*

16 Policy LU-15.4: Quality building materials. Require high-quality, long-lasting building
17 materials on all new development projects in the city. Consider embodied carbon when
18 reviewing building material choices.

19 ***Consistent:*** *The Project would renovate the existing warehouse building for use as an*
20 *automotive service facility, including exterior architectural renovations including new*
20 *paint, new aluminum composite on the façade, new facade glazing, and new signage.*

21 **C. The design, location, size, and operating characteristics of the proposed use are**
22 **compatible with the existing and future land uses in the vicinity of the subject site.**

23 The proposed design, location, scale, and operating characteristics of the vehicle
24 service use are consistent with the permitted and conditionally permitted uses in the
25 Mixed Use Corridor 2 (MU-2) zone, pursuant to CCMC Sections 17.220.015 (Permitted
25 Uses) and 17.400.125 (Vehicle Repair Shops – Performance and Operational
25 Standards).

26 The Project site is designated Mixed Use Corridor 2 under both the General Plan Land
27 Use Map and the Zoning Map, which allows for moderate-scale mixed-use development,
28 residential, and general and neighborhood-serving commercial uses. Surrounding land
29 uses are as follows: to the north, the adjacent property is zoned MU-2 and developed
with a one-story modular building serving the Los Angeles Community College District

1 for facilities and maintenance, as well as a vacant parcel used seasonally for outdoor
2 events and festivals; to the east, properties are zoned MU-2 and largely vacant,
3 containing approximately six plugged oil wells; to the south, properties are zoned
4 Planned Development-2 (PD-2) and developed with townhomes and condominiums;
and to the west, properties are zoned Mixed Use Industrial (MU-I) with a mix of one- and
two-story industrial and office buildings.

5 Although the existing building was constructed in 1966, it remains consistent with current
6 MU-2 development standards related to building form, height, ground-floor height, and
setbacks.

7 The Project site is located along Jefferson Boulevard, classified as a Primary Arterial in
8 the 2045 General Plan Mobility Element, and further identified as both a designated
9 Truck Route and Transit Priority Corridor. On July 2, 2025, the Applicant submitted a
10 Traffic and Transportation Study Memorandum of Understanding (MOU), confirming that
11 the Project would generate a net increase of 159 daily trips, which constitutes a less-
12 than-significant impact under Vehicle Miles Traveled (VMT) thresholds. Pursuant to the
13 City's Transportation Study Criteria and Guidelines, no further VMT analysis or
mitigation measures are required.

14 All vehicle service operations will occur within the interior of the existing structure, and
as conditioned, the Project will remain compatible with surrounding land uses.

15 **D. The subject site is physically suitable for the type and intensity of use being
16 proposed, including access, compatibility with adjoining land uses, shape, size,
17 provision of utilities, and the absence of physical constraints.**

18 The Project site encompasses 1.82 acres (79,133 sq. ft.), significantly exceeding the
19 MU-2 zone's minimum lot size requirement of 10,000 sq. ft. and is well-suited for the
20 proposed Vehicle Service use. The site is generally flat, rectangular in shape, and
21 provides adequate frontage and access to Jefferson Boulevard via two one-way
22 driveways located at the north and south ends. It is surrounded by a mix of similar uses
23 including industrial, and office developments, and is fully served by local utilities. With
the conditions outlined herein, the reuse of the existing building, driveways, and surface
parking areas will provide sufficient space to accommodate the proposed Vehicle
Service operations while minimizing potential impacts related to traffic, noise, lighting,
wastewater, and adjacent land uses.

24 **E. The establishment, maintenance or operation of the proposed use will not be
25 detrimental to the public interest, health, safety, or general welfare, or injurious
26 to persons, property, or improvements in the vicinity and zoning district in which
the property is located.**

27 The proposed use is expected to have minimal impacts on the surrounding community,
28 including adjacent industrial, office, and residential uses. By reusing the existing
29 building, the Project will avoid extensive demolition, grading, shoring, and major
construction activities that typically generate traffic, noise, dust, and debris. Construction
will be limited in duration, with most work occurring within the building's interior. All

1 construction materials, equipment, personnel, and activities will be staged on site,
2 preventing spillover into the public right-of-way or onto neighboring properties.

3 Once construction is complete, daily operations of the vehicle service facility will be
4 confined within the existing structure. Electric vehicle service areas will be located in the
5 southern portion of the building to minimize noise and reduce greenhouse gas emissions
6 near residential uses. Internal combustion service areas will be situated in the northern
7 portion of the building, separated by a demising wall to further limit noise transfer to the
8 south. Additionally, the facility will be equipped with a South Coast Air Quality
9 Management District (SCAQMD) compliant air filtration and exhaust venting system, to
10 further prevent pollutants and odors from affecting the surround community.

11 Accordingly, the requested CUP would not be detrimental to the public interest, health,
12 safety, or general welfare, nor would it be injurious to persons, property, or
13 improvements in the surrounding commercial district or vicinity.

SECTION 2. Pursuant to the foregoing recitations and findings, the Planning
Commission of the City of Culver City, California, hereby (i) adopts a Categorical Exemption,
in accordance with CEQA, finding the Project will not result in significant adverse environmental
impacts; (ii) approves Conditional Use Permit P2025-0174-CUP; and (iii) approves an
extension of Temporary Use Permit, P2025-0141-TUP, for the continuation of temporary uses
and all conditions therein until the Applicant is issued final building permits. All actions and
approvals are subject to: the site and floor plans reviewed by the Planning Commission on
September 24, 2025; the conditions of approval set forth in Exhibit A, attached hereto and
incorporated herein by this reference; the applicable code requirements set forth in Exhibit B
attached hereto and incorporated herein by this reference, and. The site and floor plans, and
Exhibits A, B, and technical Attachments 1 to 10 are collectively referred to as "Project
Requirements."

1 SECTION 3. The Project Requirements are hereby imposed on the proposed vehicle
2 services – maintenance and repair facility at 10150–10200 Jefferson Boulevard.

3 APPROVED and ADOPTED this 24th day of September 2025.

RESOLUTION NO. 2025-P011
Case No. P2025-0174-CUP
10150-10200 Jefferson Boulevard

NO.	CONDITIONS OF APPROVAL	Agency	Source	Compliance Verification
GENERAL				
1.	<p>At the sole cost and expense of the Property Owner, any curbs, gutters, sidewalks, streetlights, street light wires and conduits, traffic signal equipment, street pavement, and any other City infrastructure which are damaged or broken from construction of the Project shall be repaired and reconstructed in conformity with APWA Standards and to the satisfaction of the City Engineer. Separate plans shall be submitted for street improvements, street light improvements, traffic signal, signage and striping, and sewer improvements. Landscape and irrigation plans for the public parkway area and raised medians shall be included in the street improvement plans.</p> <p>SPECIAL:</p> <p>A. The applicant shall remove and replace the existing driveway aprons. New driveway aprons shall be ADA compliant.</p>	Public Works Engineering	Standard/Special	
2.	The project shall be subject to Holiday Moratorium dates as required by the December 17, 2009 Public Works/Engineering Holiday Slowdown Policy memo, in which work in the public right-of-way is restricted or prohibited on certain days in November and December.	Public Works Engineering	Standard	
3.	Fire sprinkler main lines shall not be allowed to discharge into the public right-of-way, and they shall discharge into the sanitary sewer system.	Public Works Engineering	Standard	
4.	Trash enclosures shall be provided and shall each have a minimum inside dimension of 10 feet (depth) x 12 feet (width) for two 3-yard bins and shall be increased to an additional 60 square feet for each additional bin required, a gated opening that is at least 10 feet wide, and a 6 inch high by 6 inch wide concrete curb along the inside perimeter wall. Each enclosure shall also have at least a 6-inch-thick concrete slab that drains at a one percent gradient out of the enclosure. An 8 feet concrete loading pad in front of the proposed trash enclosure/trash room, 10 feet minimum clear opening with gates for bin access, and separate pedestrian access door for tenant use, shall be provided. Additional grade may be necessary to include a floor drain that leads to the sewer for maintenance purposes.	Public Works/ Fire/ Current Planning	Standard

GENERAL				
	Final approval for the size, location, and type of equipment needed for the adequate storage and disposal of all solid and recyclable waste generated by the Project shall be obtained from the City's Environmental Programs and Operations Manager. A fire suppression sprinkler system shall be provided within any covered trash enclosure area as required by the Fire Marshal. All refuse containers assigned to or otherwise used by the Project shall be stored on-site in the trash enclosures.			
5.	All Project related solid and recyclable waste material handling shall be in accordance with CCMC Section 5.01.010 – “Solid Waste Management”, which outlines the Sanitation Division’s exclusive franchise for this service. The project shall provide adequate trash and recycling capacity and shall comply with Assembly Bills 939, 1826, and 341 waste diversion goals.	Public Works EPO	Standard	
6.	<p>The Project shall meet all provisions of CCMC Section 7.05.015 - “Transportation Demand and Trip Reduction Measures”. The applicant shall indicate compliance with all CCMC Section 7.05.015 Transportation Demand and Trip Reduction Measures on the Building Permit Plans to be submitted for review and approval by Transportation Department.</p> <p>The Project shall incorporate one or more of the following Trip Reduction Measures:</p> <p>A. End of trip facilities including Employee Bicycle Lockers that services the required bicycle parking condition included within this document; the applicant shall provide a design that identifies number of employees served by the facility.</p> <p>i. Pursuant to CCMC Section 17.320.045 – Bicycle Parking, Table 3-6, the Applicant shall provide a minimum of 2 Short-Term bicycle spaces and 4 Long-Term bicycle spaces. Please see CCMC Section 17.320.045.B for permitted bicycle parking locations and design standards.</p>	Mobility & Traffic Engineering, Public Works, Planning	Standard

	claims and/or lawsuits, and actual attorneys' fees and court and litigation costs that may be awarded by the court and required to be paid by the City. The obligations required by this Condition shall be set forth in a written instrument in form and substance approved by the City Attorney and signed by the Applicant and Property Owner.			
15.	<p>A Comprehensive Construction Management Plan (CMP) shall be submitted to Building & Safety as part of the Building Permit plan check approval process and shall be approved prior to issuance of the Demolition and / or Building Permit. The comprehensive CMP shall include all plans specified in the conditions of approval. In addition, the plan will identify the areas of construction staging, temporary power, portable toilet, and trash and material storage locations. The CMP shall show all areas of the public right-of-way which may be affected by the construction of the project. Unless otherwise approved by the Public Works Director, sidewalk access shall be maintained at all times along the project's frontage.</p> <p>In addition to the above, the CMP shall include the following components:</p> <p>A. A Pedestrian Protection Plan shall identify all areas of pedestrian protection and indicate the method of pedestrian protection or pedestrian diversion when required. When pedestrian diversion is required, the Pedestrian Protection Plan must also be approved by the City Engineer.</p> <p>B. A Construction Traffic Management Plan shall be prepared by a traffic or civil engineer registered in the State of California. The Construction Traffic Management Plan shall be reviewed and approved by the City Engineer and Current Planning Manager prior to the issuance of any Project demolition, grading, or excavation permit. The Construction Traffic Management Plan shall also be reviewed and approved by the City's Fire and Police Departments.</p>	All Depts	Standard

STANDARD CODE REQUIREMENTS
Project Subject to some or all Code Requirements as determined by the City

NO.	CODE REQUIREMENTS	Agency	Code Compliance Verification	Check if Applicable
1.	All building permit applications for the Project shall include sufficient information and detail to clearly reflect compliance with all applicable requirements of the Culver City Municipal Code (the "CCMC") and with the Project Conditions of Approval.	Current Planning		
2.	The land use permit to which the Project Conditions of Approval apply (the "Land Use Permit") shall expire one year from the date of final approval of said Land Use Permit, if the use has not been exercised. As provided in CCMC Section 17.595.030 – "Time Limits and Extensions", an applicant may request an extension of said expiration date by filing a written request with the Current Planning Division prior to the expiration of the land use permit.	Current Planning		
3.	Pursuant to CCMC Section 17.630.010.C.4 – "Posted Notice", the public notification sign(s) installed in accordance with the public notification requirements for the Land Use Permit shall be removed within ten days after the end of the appeal period or the final decision by the City Council on the Land Use Permit, whichever occurs last.	Current Planning		
4.	The Project shall be developed pursuant to CCMC Chapter 17.300 - "General Property Development and Use Standards". A. The Project shall be developed pursuant to CCMC 17.400.125 – "Vehicle Repair Shops."	Current Planning		
5.	All planted areas on the Property shall be landscaped and irrigated pursuant to CCMC Chapter 17.310 - "Landscaping".	Current Planning		
6.	All parking areas on the Property shall be developed pursuant to CCMC Chapter 17.320 - "Off-Street Parking and Loading".	Current Planning		
7.	Signs proposed for the Project shall meet all applicable requirements of CCMC Chapter 17.330 - "Signs". All signs require a separate permit and approval.	Current Planning		
8.	The Project applicant shall obtain all permits and licenses required in connection with the development or use of the Project.	All

Project Subject to some or all Code Requirements as determined by the City

NO.	CODE REQUIREMENTS	Agency	Code Compliance Verification	Check if Applicable
9.	All work within the public right-of-way (including but not limited to curb, gutter, sidewalk, and driveways) shall be designed and completed to the satisfaction of the City Engineer. Drainage devices, concrete curbs and gutters, sidewalks, drive approaches, and roadway pavement shall be designed in conformity with all provisions of the latest edition of the American Public Works Association Standard Plans ("APWA Standards").	Public Works		
12.	Any new utilities shall be placed underground or enclosed within the building construction; no new overhead utilities shall be permitted.	Public Works Current Planning		
13.	The Project shall comply with all applicable requirements of the Culver City Energy Reach Codes as set forth in CCMC Section 15.02.1100-1180, et. seq.	Building		
14.	The Project shall comply with all applicable requirements relating to solar photovoltaic requirements as set forth in CCMC Section 15.02.100, et. seq. and as amended from time to time.	Building		
15.	Plans submitted as part of the building permit application shall include a schedule of the special inspections anticipated, the firm proposed for the special inspections, and the resumes of all proposed special inspectors. The Building Official reserves the right to reject any special inspector at any time for the duration of the Project. All special inspection reports shall be made available to the Building Official and to any Culver City Building Safety inspector as required by the Building Official. No work shall be covered without a Culver City Building Safety inspection, whether or not a special inspection was performed on such work.	Building		
16.	Upon completion of the rough grading and prior to excavation of shallow building foundations, the following reports and drawings and any supplements thereto shall be submitted to the City Engineer: <ol style="list-style-type: none"> a. An as-built grading plan prepared by the Civil Engineer. b. A certification by the civil engineer that the grading has been completed in conformance with the approved plan and California Building Code. 	Public Works
