Re: Exclusive trained applicator  
EucoFloor 404

Javier,

Euclid Chemical specializes in manufacturing a comprehensive range of products for the concrete restoration market. The majority of our materials are distributed through local channels, with specific exceptions for products tailored to the solid waste industry. Through challenging experiences, we have recognized that the solid waste sector necessitates a specialized approach and in 2014 we developed an exclusive applicator program. The applicators were required to demonstrate substantial financial resources, as well as significant investments in skill and equipment to effectively carry out these installations. In return, Euclid Chemical provides each applicator with an exclusive geographical territory, ensuring a high level of service excellence.

This initiative has proven to be a tremendous success. Since 2014, we have encountered no issues concerning the thousands of square feet of EucoFloor 404 installed across numerous projects under this program. As a result of this success, we can offer a robust project warranty to property owners in collaboration with our applicators. Please refer to page 2 of this document which details the geography for the trained applicators. Infrastructure Repair Service, Inc handles the Maryland market.

Please let me know if I can offer any additional help and we look forward to working with you in the near future.

Christopher French
