UPGRADE PARK IRRIGATION SYSTEMS

Project Number: PZ612

Department: PRC&S

Project Location: City Wide

Start Date: 20/21

Est. Completion Date: TBD

Current Project Status: Ongoing

Project Description

This capital project will be used to replace out-moded components of the existing irrigation systems at various parks including electronic controls with state of the art technology; installation of master valves and flow sensors; emergency shut-off valves; rain sensors; low-pressure compensating sprinkler heads; installation of electrical connection and Calsense controllers along the Expo National Median Project; and complying with State Water Mandates to remove turf in medians and retrofit existing irrigation to deep water existing trees. This project has a 5-year timeline. For FY 2016-17, an irrigation consultant will be hired to perform necessary irrigation audits. Updating Calsense system to complete wireless technology, working with IT and Calsense. Turf consultant will be making recommendations for irrigation and retrofits based on turf analysis. Turf consultant fees are being paid from this account. FY 2019/20 - Funds from 419 in the amount of \$75,020 were transferred into this account from various PRCS managed completed/inactive projects. FY 23/24- Move forward from Calsense radio connection to ether and/or cellular based system and replace dying connections
