Are there any plans to improve the biking and pedestrian experience on the Sepulveda Corridor? I am most interested in the area south of Sawtelle all the way to Centinella. There is a lot of ongoing construction in the area (hotels and office buildings). When completed, there should be more pedestrian, biking and car traffic. Hopefully more people will be going to the Culver City mall to shop, as well as additional commuters (maybe some who are on bikes too)! If improvements are planned, can you please describe and provide status and timelines? Thanks
