Subject: High Visibility Crosswalks at Overland/Kelmore

Dear Sub-Committee Members,

I support high visibility crosswalks at the intersection of Overland/Kelmore/Ranch to improve safety for our city. Our family uses the intersection as pedestrians regularly and wish it were safer.

Thanks for your consideration.

Subject: High Visibility Crosswalks at Overland/Kelmore/Ranch

Dear Sub-Committee Members,

I support high visibility crosswalks at the intersection of Overland/Kelmore/Ranch to improve safety for our city.

Last year, as my children were walking with their father, they were almost run over by a car even though they were on the crosswalk. This is a high traffic area near El Rincon and currently unsafe for many.

I urge you to make this happen as soon as possible.

best,

Veronica

Subject: Overland/Kelmore/Ranch

Dear Mobility, Traffic & Parking Committee Members,

I strongly support high visibility crosswalks at the intersection of Overland/Kelmore/Ranch to improve safety for our city, particularly for the safety of school children crossing at the intersection.

Please help make this happen as soon as possible.

Respectfully,
Kathleen Lambird

Subject: Overland/Kelmore/Ranch intersection

Dear Goran Eriksson, Alex Fisch, and Culver City Public Works,

Thank you for your consistent outreach over the years to the residents of Beverlywood West Townhomes regarding our safety and welfare. I appreciate how you have taken the time to listen to our concerns and relay them to appropriate departments for further action. The resulting improvements in road safety measures along Overland adjacent to our property is very much appreciated.

While my family may feel safer in vehicles and on foot in front of our property, our friends and neighbors down the block at the Overland/Kelmore/Ranch intersection do not. I know they worry about their children walking to and from Blanco Park/El Rincon. I encourage you to expedite the installation of high visibility crosswalks at that intersection to prevent future accidents, especially now that traffic speed and density is returning back to "normal" pre-pandemic levels.

Thank you,

Eleanor Lipat-Chesler
