Many people who live in Culver City do not work in Culver City. These people use cars to get to work, and as such, need a place to park these cars. Removal of on-site parking will put undue strain on our already crowded street parking. It is incorrect to think people will abandon their cars to take our one train out of town. This is pie in the sky thinking.

This is makes the traffic lane a NON-mobility lane. Traffic is dead stopped through Culver City much of the day and particularly at rush hour. Drivers use our residential neighborhoods as cut through streets, only to idle in traffic near our homes. Perhaps a toxicity study is in order to see how much exhaust we are subjected to because of these idling cars.

Some drivers, police, parking enforcement and fire use the bus lane as a convenient way to circumvent traffic. Busses, on the other hand, are few and far between. This is a failed experiment. Let's move Culver City by deleting the mobility lane.
