### Virtual Community Meeting on the Temporary Redesign of the Intersection of Ranch/Kelmore/Overland.

**WHAT:**

This is a follow-up community meeting to the one held in January of this year. On January 14, 2021, a virtual community meeting was held with you, the residents, property owners, and business owners in the Culver Crest Neighborhood, to introduce and consult with you regarding the upcoming trial of a temporary redesign of the intersection of Ranch/Kelmore/Overland. Based on the received feedback, this follow-up meeting is to respond to concerns, present a revised concept plan, and share future review and actions that are beyond the scope of this temporary trial funded by an Active Transportation Project (ATP) Quick-Build grant. Please refer to the enclosed concept redesign plan, and circulation area of this courtesy notification.

Purpose of the ATP Quick-Build grant is to fund temporary, easy to deploy improvements that enhance multi-modal traffic safety and operations. The demonstration period of about one year aims to allow for a review and fine tuning of the design and for additional community consultation. Your input at our virtual community meetings and during the temporary trial, will serve to improve the concept to be demonstrated, and ultimately, the final design and construction that will be the product of our collective collaboration.

All recommended improvements will be discussed during the upcoming March 4<sup>th</sup> meeting. To create the temporary intersection redesign, the City proposes to establish high visibility crosswalks, replace the existing stop signs with LED-enhanced stop signs, install two additional streetlights, and install delineators and apply decorative pavement markings in the new temporary island. Consideration can also be given to the use of planter boxes equipped with irrigation and sized not to impact sight lines to be placed in the temporary island. All improvements will be maintained by the City during the trial period.

The Quick Build temporary redesign is anticipated to enhance visibility and safety conditions for all intersection users, while preserving existing parking and beautifying the gateway to/from the Culver Crest Neighborhood. Please join us in this follow-up virtual meeting. Your continued input is desired and welcome, as the temporary implementation will help inform the final design and subsequent construction of the redesigned intersection.
