

Culver City Park Field Renovations

Beginning

- ▶ Culver City Ballfields were constructed on top of a landfill
- ▶ After years of the ground settling the fields were very uneven with varying degrees of grade ranging from 0-3 feet
- ▶ Youth baseball, softball, soccer, camps and events were held on the fields

Process Summarized

- ▶ Trench and recover valves
- ▶ Install dust control
- ▶ Reengineer spacing between irrigation heads
- ▶ Raise irrigation heads
- ▶ Cut and remove dead grass
- ▶ Trench for guide wire access for fencing
- ▶ Raise field, build wood line
- ▶ Install approximately 1,400 tons of varying types of soil/brick dust
- ▶ Grade, level, compact fields
- ▶ Remove, repair, install fencing/gates
- ▶ Install approximately 90,000 sq. ft. sod
- ▶ Laser level fields

End Result

- ▶ Fields significantly more level
- ▶ Watering pattern more efficient
- ▶ Better playing surface
- ▶ Stronger grass
- ▶ Longer lasting
- ▶ Overall BEAUTIFUL fields!
- ▶ Added bonus of Parks Crew feeling so much pride from their work!
- ▶ Culver City Little League held a wonderful Opening Day!
