Subject: Costco Fuel Expansion

Good idea to expand the existing gas station as presently the lines to fuel are quite long and a reduced wait time will reduce exhaust emissions from idling cars.

Of course, this also applies to the one lane of non-movement in our downtown area as well.

Subject: Costco gas station

Hello,

I have lived on Walnut Ave for 28 years.

The illegal traffic racing done my street has killed pets and caused accidents.

Every day I witness illegal turns that cross to the wrong side of the street to speed down Walnut to Venice Blvd. More than once I have almost been hit as I cross the street. I have come close to a head on collision with cars on the wrong side of the street at the intersection. We have been neglected because neither Culver City and Los Angeles take responsibility for the out of control traffic. The addition of more cars and more frustrated drivers in the neighborhood which will be the outcome of more gas station pumps (or they wouldn't be putting them in) will only continue to make it a dangerous place to walk and drive.
