

1 Systems and Equipment; Chapter 20, Aviation Facilities; Chapter 23, Motor Fuel-  
2 Dispensing Facilities and Repair Garages; Chapter 48, Motion Picture and  
3 Television Production Studio Sound Stages, Approved Production Facilities and  
4 Production Locations; Chapter 57, Flammable and Combustible Liquids; Appendix  
5 Chapter 4, Special Detailed Requirements based on Use and Occupancy; Appendix  
6 B, Fire-Flow Requirements for Buildings; Appendix C, Fire Hydrant Locations and  
7 Distribution; and Appendix D, Fire Apparatus Access Roads, are proposed to be  
8 adopted by the City Council as changes to the 2019 edition of the California Fire  
9 Code, and are reasonably necessary because of local climatic, geological or  
10 topographical conditions that create fire hazards and inhibit fire safety response  
11 access and response time, as set forth in this resolution.  
12

- 13 a. Culver City's climate is primarily influenced by the Pacific Ocean and is  
14 characterized by infrequent rainfall and winds which come from the west  
15 during the daytime and from the north and northeast during the nighttime,  
16 with intermittent Santa Ana winds occurring from September to March.  
17 These conditions create the potential for high velocity winds with high  
18 temperatures that are conducive to uncontrolled, rapidly spreading wind  
19 driven fires. Enforcement of the Fire Code including these amendments  
20 to the Fire Code are necessary to limit exposure from buildings not having  
21 built-in fire protection systems and immediate containment of a fire is the  
22 only method by which fire can be controlled during high wind conditions.  
23 Accordingly, built-in fire suppression systems would provide the only  
24 adequate measure to mitigate the potential hazards and damage caused  
25 by such fires.  
26  
27  
28

1 b. Culver City is in the vicinity of several known active and potentially active  
2 earthquake faults including the San Andreas, Newport-Inglewood,  
3 Overland and Charnock faults. The City has and is likely to continue to  
4 experience seismic events including ground shaking and liquefaction of  
5 sufficient magnitude to cause substantial damage to structures.  
6 Significant damage is likely to be accompanied by a substantial number  
7 of fires that will exceed the fire department suppression capabilities.  
8 Seismic activity also has the potential to cause damage to streets,  
9 roadways and overpasses to the San Diego Freeway and La Ballona  
10 Creek that would hamper and delay emergency vehicle response.  
11 Accordingly, enforcement of the Culver City Fire Code Amendments is  
12 necessary to provide minimal levels of protection for un-protected  
13 structures and built-in fire suppression systems would provide the only  
14 adequate measure to mitigate the potential hazards and damage caused  
15 by such fires.  
16  
17

18 c. The topography of the City is such that structures are situated in close  
19 proximity to each other, with only about 1% of the 5 square miles that the  
20 City occupies vacant. In addition, these lots are often very narrow or on  
21 hilly terrain, which limits access to side yards for fire suppression and  
22 placement of ladders for rescue operations. These conditions increase  
23 the threat to life and property and contribute to the ability of fires to spread  
24 quickly between buildings because of their proximity to each other. The  
25 City also has two large residential hillside areas that are within a State  
26 designated "Very High Fire Hazard Severity Zone." There is the potential  
27  
28

1 for rapidly spreading fires in these hillside areas due to the topography of  
2 the terrain. Accordingly, built-in fire suppression systems would provide  
3 the only adequate measure to mitigate the potential hazards and damage  
4 caused by such fires.

5 2. Based on Climatic, Geological or Topographical reasons, the City has  
6 incorporated amendments to the 2019 California Fire Code in detail in Ordinance  
7 No. 2019-\_\_\_\_.

9 3. That the Clerk of the City of Culver City shall file a copy of the change  
10 or modifications in the adopted Ordinance no. 2019-\_\_\_\_, together with a copy of this  
11 Resolution with the California Building Standards Commission, and shall obtain an  
12 endorsed copy from said Department to be filed with the City of Culver City.

14 APPROVED and ADOPTED this \_\_\_\_\_ day of \_\_\_\_\_ 2019.

17 \_\_\_\_\_  
18 MEGHAN SAHLI-WELLS, MAYOR  
19 City of Culver City, California
