EXECUTIVE SUMMARY

Introduction

In accordance with the agreement held between the city of Culver City, CA and Faithful+Gould Inc., this completed report provides a combined executive summary of the individual building Facility Condition Assessments for Culver City.

This report provides an overview summary containing: a summary of the scope of the work provided, a summary of the buildings, a building expenditure summary, a distribution of immediate (Year 1) needs by building system, prioritization of work and an identification of work type over the study period. A Facility Condition Index (FCI) is calculated for the facilities, which is used in Facilities Management to provide a benchmark to compare the relative condition of a group of facilities. The FCI is primarily used to support asset management initiatives of federal, state, and local government facilities organizations.

The report provides a summary of the anticipated primary expenditures over the 10-year study period. Further details of these expenditures are included within each respective report section and within the 10-year expenditure forecast, in Appendix A. We have included categorization for Priority 1 expenditures, which include Fire/Life Safety Equipment that must be replaced to maintain normal and necessary operation to the building's needs. Priority 1 items such as these may be considered for replacement due to industry standard useful life even if the asset is deemed operational during the time of assessment.

We note that the Current Replacement Values (CRVs) as outlined in this report are direct like-for-like replacements using construction methods and materials readily available at the time of a building's construction. As time progresses, upward pressures of inflation as well as evolution of building standards and codes will increase the overall construction costs of a given building. Our current replacement values only factor the current size, style, and construction type of the building. Any expansion, upgrade, or enhancement of the building type, architecture, or construction is not considered as part of The Current Replacement Value nor is accounted for in this report.

Our cost rates to produce life cycle and replacement cost estimates are based on our knowledge of the local regional market rates. We have included within the costs of this report a 48% soft cost uplift to the net construction rates and included an inflation escalator of 2% per year throughout the ten year study period.

Limiting Conditions

This report has been prepared for the exclusive and sole use of Culver City. The report may not be relied upon by any other person or entity without the express written consent of Faithful+Gould.

Any reliance on this report by a third party, any decisions that a third party makes based on this report, or any use at all of this report by a third party is the responsibility of such third parties. Any reuse without written verification or adaptation by Faithful+Gould for the specific purpose intended will be at user's sole risk and without liability or legal exposure to Faithful+Gould.

The assessment of the building/site components was performed using methods and procedures that are consistent with standard commercial and customary practice as outlined in ASTM Standard E 2018-15 for PCA assessments. As per this ASTM Standard, the assessment of the building/site components was based on a visual walk-through site visit, which captured the overall condition of the site at that specific point in time only.

No legal surveys, soil tests, environmental assessments, geotechnical assessments, detailed barrier-free compliance assessments, seismic assessments, detailed engineering calculations, or quantity surveying compilations have been made. No responsibility, therefore, is assumed concerning these matters. Faithful+Gould did not design or construct the building(s) or related structures and therefore will not be held responsible for the impact of any design or construction defects whether or not described in this report. No guarantee or warranty, expressed or implied, with respect to the property, building components, building systems, property systems, or any other physical aspect of The property is made.

The recommendations and our opinion of probable costs associated with these recommendations, as presented in this report, are based on walk-through non-invasive observations of the parts of the building which were readily accessible during our visual review. Conditions may exist that are not as per the general condition of the system being observed and reported in this report. Opinions of probable costs presented in this report are also based on information received during interviews with operations and maintenance staff. In certain instances, Faithful+Gould has been required to assume that the information provided is accurate and cannot be held responsible for incorrect information received during the interview process. Should additional information become available with respect to the condition of the building and/or site elements, Faithful+Gould requests that this information be brought to our attention so that we may reassess the conclusions presented herein.

The opinions of probable costs are intended for global budgeting purposes only. Faithful+Gould has no control over the cost of labor and materials, general contractor's or any subcontractor's method of determining prices, or competitive bidding and market conditions. The data in this report represent an opinion of probable cost of construction and is made on the basis of the experience, qualifications, and best judgment of the professional consultant familiar with the construction industry. Faithful+Gould cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from this or subsequent cost estimates. The scope of work and the actual costs of the work recommended can only be determined after a detailed examination of the site element in question, understanding of the site restrictions, understanding of the effects on the ongoing operations of the site/building, definition of the construction schedule, and preparation of tender documents.

Scope of Work Provided

Faithful+Gould visited the city of Culver City to undertake Facility Condition Assessments (FCA) for the city-owned and operated buildings and facilities.

The Facility Condition Assessments (FCAs) include an assessment of the architecture, mechanical, electrical, and plumbing elements. The assessments determine the current condition of the facilities, identifying physical or operational deficiencies, and provide cost estimates and prioritized schedules of repair work over a ten-year period. Our cost rates to produce life cycle and replacement cost estimates are based on our knowledge of the local and regional market rates. The data in this report represents an opinion of probable cost of construction and is made on the basis of the experience, qualifications, and best judgment of the professional consultant familiar with the construction industry.

The assessments were conducted using facility information, equipment inventories and a visual only (non-invasive) inspection of the facilities. The assessment of the building/site components was performed using methods and procedures that are consistent with standard commercial and customary practice as outlined in ASTM Standard E 2018-15 for property condition assessments. As per this ASTM Standard, the assessment of the building/site components was based on a visual walk-through site visit, which captured the overall condition of the site at that specific point in time only.

We followed the five key steps listed below to effectively manage facility and infrastructure assets:

- 1. Establish baseline asset inventory of city facilities.
- 2. Establish meaningful baseline data about asset conditions through a detailed, structured assessment process.
- 3. Estimate short- and long-range asset renewal needs using the data obtained from actual field analysis.
- Utilize decision-support models to determine priorities and reinvestment rates to obtain desired asset conditions.
- 5. Communicate the asset condition and impact on mission support to governing boards, senior management and line management responsible for maintaining the portfolio.

Six-Phase Methodology

Our approach to FCA has been key to our success in delivering strategic advice to clients for more than 60 years. Our deliverable is best described through the six phases of our project methodology and plan, shown below, which outlines the key high-level tasks and milestones. Each of our proposed services will follow the same six-phase methodology and execution plan.

The FCAs reviewed substructure systems, shell systems, interior systems, service systems, equipment and site systems. Each facility condition assessment calculated an FCI and gave an overall condition rating for the property.

The Facility Condition Index (FCI) is the ratio of accumulated Total Cost (TC) (Deferred Maintenance, Capital Renewal, and Plant Adaptation) to the Current Replacement Value (CRV) for a constructed asset. It is calculated by dividing the TC by the CRV and ranges from zero for a newly constructed asset, to one for a constructed asset with a TC value equal to its CRV. Acceptable ranges vary by "Asset Type', but as a general guideline the FCI scoring system is as follows:

Deferred Maintenance + Capital Renewal + Routine Maintenance

FCI =

Current Replacement Value of the Facility(s) (CRV)

If the FCI rating is 60% or greater then replacement of the asset/building should be considered instead of renewal.

Condition	Definition	Percentage Value
GOOD	In a new or well -maintained condition, with no visual evidence of wear, soiling or other deficiencies	0% to 5%
FAIR	Subject to wear, and soiling but is still in a serviceable and functioning condition	5% to 10%
POOR	Subjected to hard or long -term wear. Nearing the end of its useful or serviceable life.	Greater than 10%
V-POOR	Subjected to hard or long -term wear. Has reached the end of its useful or serviceable life. Renewal now necessary	Greater than 60%

Facility Details

Culver City maintains a portfolio of twenty five facilities that provide a variety of services to the Culver City community. The buildings vary widely in construction, style, and date in service and include:

- Cardiff Parking
- City Hall
- Culver West Park
- Fire Station #1
- Fire Station #1 Fuel Bldg
- Fire Station #1 Garage EOC
- Fire Station #2
- Fire Station #3
- Fire Training Yards
- Ince Parking Structure
- Ivy Sub-Station
- Misc Building Fire Station #2
- Municipal Plunge
- City Hall Parking
- Police Station
- Police Station Annex
- PW Maintenance Yard
- Senior Center
- Syd Kronenthal Park
- Teen Center
- Transfer Station
- Transportation Facility
- Veteran's Memorial Auditorium
- Watseka Parking

This report is a summary of the findings for each building as well as an aggregated overview of the Culver City Portfolio.

Facility Condition Needs Index (FCI)

The table below lists information regarding each building with their, gross rate/SF, current replacement value, total capital needs, immediate capital needs, FCI rating, and building condition rating.

Key

Condition	Definition	Percentage Value
GOOD	In a new or well -maintained condition, with no visual evidence of wear, soiling or other deficiencies	0% to 5%
FAIR	Subject to wear, and soiling but is still in a serviceable and functioning condition	5% to 10%
POOR	Subjected to hard or long -term wear. Nearing the end of its useful or serviceable life.	Greater than 10%
V-POOR	Subjected to hard or long -term wear. Has reached the end of its useful or serviceable life. Renewal now necessary	Greater than 60%

Individual Building FCI Summary

Facility	Gross	Current	Immediate	Total Capital Needs	Current Year FCI	Year 10 FCI
· ·	Square	Replacement	Capital Needs (\$)	Over 10 Year Study	Rating %	Rating %
Cardif Parking	130,950	\$14,872,466	\$348,013	\$650,352	2.3%	4.4%
City Hall	75,964	\$31,681,643	\$473,796	\$5,430,957	1.5%	17.1%
City Hall Parking	197,723	\$21,354,084	\$428,908	\$1,172,694	2.0%	5.5%
Culver West Park	4,004	\$1,368,387	\$326,359	\$726,894	23.8%	53.1%
Fire Station #1	4,004	\$11,200,077	\$126,394	\$879,482	1.1%	7.9%
Fire Station #2	10,495	\$2,559,324	\$194,520	\$1,058,618	7.6%	41.4%
Fire Station #3	6,030	\$5,540,054	\$15,984	\$375,403	0.3%	6.8%
Fire Station One - Fuel Building	375	\$63,675	\$0	\$7,659	0.0%	12.0%
Fire Station One - Garage EOC	9,454	\$1,917,450	\$97,956	\$510,057	5.1%	26.6%
Fire Station One - Generator	588	\$382,722	\$137,184	\$139,554	35.8%	36.5%
Fire Training Yards	2,465	\$962,739	\$319,693	\$332,433	33.2%	34.5%
Ince Parking Structure	284,581	\$29,881,005	\$39,188	\$800,435	0.1%	2.7%
Ivy Sub-Station	7,740	\$2,242,683	\$695,601	\$778,443	31.0%	34.7%
Misc Building - Fire Station 2	1,125	\$677,955	\$80,659	\$158,618	11.9%	23.4%
Municipal Plunge	12,350	\$4,401,185	\$265,611	\$501,152	6.0%	11.4%
Police Station	37,900	\$15,319,283	\$1,140,223	\$3,169,587	7.4%	20.7%
Police Station Annex	3,500	\$296,175	\$4,662	\$215,836	1.6%	72.9%
PW Maintenance Yard	82,112	\$15,144,441	\$2,950,440	\$3,438,594	19.5%	22.7%
Senior Center	27,237	\$12,069,285	\$278,973	\$1,698,248	2.3%	14.1%
Syd Kronenthal Park	12,351	\$1,512,735	\$530,622	\$710,570	35.1%	47.0%
Teen Center	10,897	\$3,703,221	\$710,623	\$1,094,269	19.2%	29.5%
Transfer Station	29,144	\$6,698,013	\$1,832,828	\$1,840,723	27.4%	27.5%
Transportation Facility	50,000	\$43,197,648	\$1,935,620	\$2,994,483	4.5%	6.9%
Veteran's Memorial Aud	49,393	\$11,237,144	\$5,739,394	\$5,892,567	51.1%	52.4%
Watseka Parking	111,930	\$14,835,789	\$1,699,121	\$3,342,430	11.5%	22.5%
Totals	1,162,312	\$253,119,183	\$20,372,371	\$37,920,056	8.0%	15.0%

Condition Rating

The Culver City portfolio consists of twenty-five facilities which are currently rated in poor through good condition. ten are rated in good condition, four are rated in fair condition, and eleven are in poor condition. Culver City's portfolio as a whole has a current FCI rating of 8.0%, and is considered in overall fair condition. In year ten of the study period the condition ratings will change if there is no capital investment the overall FCI rating in year ten will increase to 15.0% which is overall poor condition.

The chart below indicates the percentage of buildings with their current FCI condition rating

Value of Current Needs: \$20,372,371

The chart below indicates the cumulative effects of the FCI ratio over the study period to the various buildings, assuming the required funds and expenditures are NOT provided to address the identified works and deferred maintenance each year.

Need will grow to \$37,920,056 over 10-years

Summary of Expenditure Findings

Culver City has immediate capital needs of \$20,372,371 with a total of \$37,920,056 in capital needs over a 10-year study period.

Key Findings	Metric
Immediate Capital Needs (included in FCI)	\$20,372,371
Year 10 Capital Needs	\$37,920,056

The chart below provides a summary of yearly anticipated expenditures over the ten-year study period for Culver City. Further details of these expenditures are included within each respective report section. The results illustrate a total anticipated expenditure over the study period of \$37,920,056 assuming there are **no** expenditures in the ten-year study period.

The charts below provide a summary of what impact varying funding levels per year will have on the accumulative yearly need over the ten-year study period for Culver City. A comparison is also made with the Facility Condition index and how the funding levels will impact the condition rating.

Scenario 1 chart illustrates a funding profile as fully funded each year. The FCI Index will remain at 0% (Good).

Scenario 2 chart illustrates the proposed annual funding of \$1,000,000 per year. In this scenario, Year 1 will have an unfunded current Deferred Maintenance need of \$19,372,371. This unfunded need will grow over the next 10-years to \$27,920,056. The FCI will start at 7.7% and increase to 11.0%.

Scenario 3 chart illustrates an example annual funding of \$3,000,000 per year with an initial boost of \$5,000,000 for the first three years. Year 1 will have an unfunded current deferred maintenance need of \$15,372,371. This unfunded need will decrease over the next 10-years to \$1,920,056. The FCI will start at 6.1% and decrease to 0.8%.

Below is a comparison chart that tracks the FCI of each of the above three scenarios across the study period.

The chart below shows a 10-year cost expenditure by building. As can be seen, Veterans Memorial Auditorium has the largest anticipated expenditure identified at \$5,892,567.

Property	CRV	GSF	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	Total

Prioritization of Work

Faithful+Gould has prioritized the identified work in order to assist with analyzing the deficiencies found during the assessment. The baseline prioritization model is not just based on replacement year or criticality but uses four key data attributes to build an overall importance metric for every recommendation: system type, the cause or nature of the issue, timing and building mission incorporated into the model with relative weighting to provide an overall priority score. Priority categories are shown below:

10-Year Needs per year by Priority

14 Culver City

Needs Sorted by Plan Type

Faithful+Gould has prioritized the identified work according to the Plan Type or deficiency categories in order to assist with analyzing the deficiencies found during the assessment.

The charts below illustrates the breakdown of expenditure according to the Plan Type or deficiency category to providing an opportunity to strategically plan and effectively direct funding. As can be observed from the chart below, Deferred Maintenance of \$17,582,454 is the highest expenditure during the study period.

15 Culver City

Conclusion

The Culver City portfolio consists of twenty-five primary structures located across the city. Ten are rated in good condition, four are rated in fair condition, eleven are in poor condition. Culver City's portfolio as a whole has a current FCI rating of 8.0%, and is considered in overall fair condition. In year ten of the study period, the condition ratings will change if there is **no** capital investment the overall FCI rating in year ten will increase to 15.0% which is overall poor condition. The Facility Assessments determined that there is a total of \$37,920,056in recommended expenditures required over the ten-year study period. There is an immediate need of \$20,372,371.

The most pertinent area of expenditures is Deferred Maintenance with \$17,582,454 allocated to it early in the study period. The study found that \$16,754,094 should be allocated to Capital Renewal, \$2,589,597 to Routine Maintenance, and \$983,460 and \$10,452 allocated to ADA and Functionality respectively.

There is \$10,005,803 rated as a Priority 1 - Currently Critical expenditure, which is for systems that have currently failed, present a hazard to staff or public safety, or require upgrade to comply with current code. As part of this assessment, there are some Priority 1 and Deferred Maintenance expenditures that have been categorized for replacement despite their observed condition due to the end of the asset's remaining useful life. Though the asset may be functional, failure is anticipated imminently. The resulting asset failure may result in equipment downtime, possible life/safety concerns, or remediation costs higher than the asset replacement expenditure.

There is \$12,233,279 rated as a Priority 2 - Potential Critical expenditure, which is a system or component that is nearing end of useful life, and if not addressed will cause additional deterioration and added repair costs.

Finally, there is \$15,680,974 categorized as Priority 3 – Not Critical expenditure, which is an asset that is expected to remain useful through the course of the study period with no need for replacement.

APPENDIX A

10-Year Expenditure Forecast

Name	Lifecycle	Life Cycle Description	Description	Priority	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	Total
