<b>Design D</b>	46%	24%	19%	11%

***Proximity of Respondents to Tellefson Park (n = 125)***

	<b>Responses</b>	<b>Percentage</b>
<b>Less than 1/2 mile away</b>	60	48%
<b>1/2 to 3 miles away</b>	53	42%
<b>Further than 3 miles away</b>	12	10%

## Tellefson Park Design Voting Results - Tellefson Park Playground Data Summary and Comments

1	Thank you for this opportunity to chime in. We would love to see Tellefson revitalized. Any of these options would be wonderful. Good luck, and we look forward to seeing what you do!
2	SHADE. The play structures need SHADE. Please don't waste pur money by building playground equipment without proper shade. Not only does this put my young children with too much sun exposure (as well as myself) but the playground is nearly unusable most of the day because of it. All the playgrounds need more shade. (Except for Carlson Park of course)
3	Would like a toddler swing for all designs.
4	like crab like climbing - (rock)
5	We are so excited for these improvements... very much needed!
6	My kids and I think Design B is most ideal, but I notice that much of all the play ground designs offer little to no shade and especially the 2-5 yo structures are tiny and would make it hard for multiple kids to play in freely and comfortably. Thank you for updating the park!
7	It's about time!!
8	Glad to see the park is getting updated. It needs it.
9	Primary concern is safety. Some of the designs would appeal to older kids, but in my experience the younger children spend the most time at the park.
10	So happy that you are redoing the playground!
11	The Culver City park closest to me has no swings for toddlers or kids. It is very sad and now I must drive to a park with swings. Please consider more swings and swings in all parks. Thank you.
12	Option 2 provides the best environment for challenging play for children and has the most flexibility for creative use and room to grow. As children's needs for play evolve a newer concept with a non tradition design will allow for more variety of use.
13	Include slides!!
14	Thanks a lot for putting this to a vote.
15	Thank you for to express my voice by voting today.
16	We love the monkey bars!!
17	I live at the end of the street and the grand kids love going there to the park and there really nothing there and they love to climb so I like b the best
18	For the 2 to 5 year olds play area there should be both smaller slides and a toddler swings, not one ore the other as toddlers of that age are limited on what they can do.
19	All of the designs have great features. It's extremely important to have sunnsail for the 2-5 play area water it is. Especially fir the slides. They get so hot and impossible to use. All sun sail would be great for other areas as well since it's sunny most of the time. Swings should be included for both age categories in any design. Park is always lacking if there are no swings. It is nice to have sand box for 2-5 since it's not included anywhere. At that age it's developmentally necessary for them. Also surfacing should be tested to be nontoxic and have appropriate certifications. Although we live further from the park, it's next to activities, such as Zooga yoga and it would be nice to have a great playground there.

20	Thank you! We're excited!
21	Thank you!
22	We would love an additional slide. Potentially an alternative to the "toddler play structure , (unclear mark) Slide that would be suitable for multi ages and a swing set that would be suitable for multiple ages, plus some other play feature such as a sand pit, for toddlers.
23	Will the surface under the playground chosen be made w/ rubberized material for safety?
24	Shade is so important. Kids playing with the sun beating down on their heads is not good. Only design A seems to incorporate any shade. I would vote for other designs over A if they incorporated shade.
25	Number one is the only one with shade/sun cover which while I like it more anyway was the deciding factor.
26	Design B is fantastic since it is so different from all the other playgrounds out there. A,C,D are not all that unique.
