To: City Managers/Chief Administrative Officers

2020 CENSUS FUNDING ALLOCATIONS

On November 9, 2018, the California Complete Count Director informed counties that they could opt-in to an agreement with the State of California to conduct outreach related to the California Complete Count (CCC) 2020 Census. The State funding allocation for the County of Los Angeles to promote participation in the 2020 decennial census is \$9,393,090. The State "expect[s] that counties w[ill] collaborate with cities within their jurisdiction on outreach efforts" focused on geographic areas and demographic populations referred to as "hard-to-count" (HTC) or "least likely to respond" areas. Per the direction of the Board of Supervisors, on March 21, 2019, our Office executed the opt-in agreement with the State of California on behalf of the County.

The County intends to allocate funding to support "on the ground" outreach efforts in cities and unincorporated areas (UAs), focused on HTC areas under three (3) funding allocation agreements as follows:

Contractors for Cities & UAs Outreach	Funding Base	Operations	Administration	County Administration	Contractor Allocation (Ops & Admin)
City of Los Angeles	\$3,105,384	\$2,794,846	\$ 155,269	\$ 155,269	\$2,950,115
City of Long Beach	\$ 339,096	\$ 305,186	\$ 16,955	\$ 16,955	\$ 322,141
Administrative Community - Based Organization for Region 8 (ACBO)	\$3,103,051	\$2,792,745	\$ 155,153	\$ 155,153	\$2,947,898
Total	\$6,547,531	\$5,892,777	\$ 327,377	\$ 327,377	\$6,220,154

City Managers/Chief Administrative Officers May 3, 2019 Page 2

The City of Los Angeles, the County UAs, and the City of Long Beach comprise approximately two-thirds of the HTC block groups within Los Angeles County. Therefore, Los Angeles County decided to allocate direct funding to the City of Los Angeles and the City of Long Beach.

The State designated the California Community Foundation (CCF) as the Administrative Community-Based Organization (ACBO) for Los Angeles County. Additionally, the State's Strategic Plan requires partnership and coordination between State, counties, cities, CBOs, and others to avoid duplication of effort and to identify methodologies to address outreach gaps. As part of this designation, CCF will be responsible for coordinating funding to and outreach efforts of 65 cities and 45 UAs Countywide that have HTC block groups.

Census Regions

Based on the State requirements, cities and UAs will have an opportunity to participate in one of seven Regional Tables that will include CBOs and others to determine the best strategies to leverage funding and resources to achieve the highest self-response rate for the 2020 Census. Attachment I to this memo is a map of LA County Census Outreach Regions. Although the map reflects eight regions, only seven of the regions have HTC areas making the cities and UAs in those regions eligible for State funding. Participation by the County and Cities of Los Angeles and Long Beach at the Regional Tables will be essential to ensure a coordinated outreach and education effort.

Funding can be used for a broad range of activities, including but not limited to, support for CBOs and faith-based organizations, city department outreach efforts including 2020 Census events and promotional materials/banners/bus wraps, local media, and Census Action Kiosks (locations where the public can access a computer to complete the Census questionnaire). The three contracting entities, CCF and the cities of Los Angeles and Long Beach, will be required to meet all State and County contracting and monitoring requirements under their separate agreements.

"Adopt a Block Group"

Because State funding for cities and UAs is intended for "least likely to respond" or HTC areas, all cities and UAs will be required to identify and ensure that HTC block groups have been "adopted" Countywide. Due to the U.S. Census Bureau and the State of California using different variable characteristics to identify HTC block groups, the County determined that it would designate funding to cities based on the higher allocation of the two methodologies and included any city or UA that had HTC block groups based on either methodology. Attachment II to this memo provides the funding allocations for each

City Managers/Chief Administrative Officers May 3, 2019 Page 3

city/UA eligible to receive funding and identifies those cities and UAs ineligible for funding (because they do not contain HTC areas). Attachment III identifies each mapped region's HTC areas using the U.S. Census Bureau's Low Response Score methodology. Attachment IV identifies each mapped region's HTC areas using the State of California's CA-HTC Index methodology. The maps in Attachments III and IV use color coding to distinguish HTC areas. The darker an area is shaded on the map, the more difficult it is to count. The areas shaded in red on the maps are considered the hardest to count.

There are 21 cities and 66 UAs that do not have any HTC block groups and therefore do not reflect a funding allocation. Nevertheless, these cities and UAs are encouraged to participate at a Regional Table to keep abreast of material developments regarding Census 2020 education and outreach efforts in their respective regions including toolkits and projects supported by the County and other entities. Furthermore, all 88 cities and 111 UAs will benefit from a regional broad-based outreach campaign, including outreach through regional programs delivered by County departments and other sectors.

If you have any questions, please contact Avianna Uribe at (213) 974-6837 or at auribe@ceo.lacounty.gov.

Sincerely,

SACHI A. HAMAI

Chief Executive Officer
