### MTP - ACTION ITEM - (1) Receive a Presentation on Proposed On-Street Parking Meter Rates; and 2) Discuss and Provide Direction to Staff.

**Meeting Date:** April 11, 2024

**Contact Person/Dept.:** Andrew Maximous/Public Works

**Phone Number:** (310) 253-5628

**Fiscal Impact:** Yes  No       **General Fund:** Yes  No

**Attachments:** Yes  No

**Public Notification:** E-Mail via GovDelivery (04/09/2024): Meetings and Agendas - Mobility, Traffic & Parking Subcommittee; Notify Me - Construction, Street Maintenance and Closures; Stay Informed - Bicycle & Pedestrian / Culver CityBus / Construction, Street Maintenance and Closures

**Department Approval:** Yanni Demitri, Public Works Director & City Engineer (04/08/2024)

### RECOMMENDATION

Staff recommends the Mobility, Traffic & Parking Subcommittee receive a presentation on proposed changes to Culver City's on-street parking meter rates, and 2) discuss and provide direction to staff.

### BACKGROUND

Parking in Culver City (City) is a limited resource that is in high demand. The Public Works Department operates approximately 1,990 on-street parking meters within the City that generate an average of \$82,000 in revenue per month.

On-street parking meters allow cities to manage on-street parking demand to promote efficient turnover and increase availability for the public to utilize or visit the adjacent land uses. The main tools to effectively manage on-street parking supply are parking rates, duration of stay, and time of operation. Of these, parking rates play a key role in traveler mode choice.

The City's current rates were adopted in 2013 and revised in 2016. The rates range from \$0.25 to \$1.50 per hour based on their location within the City. Staff has analyzed the current on-street parking rates at various neighboring cities and is proposing that the City consider adjusting the parking meter rates to align with other cities in the region, reduce unnecessary on-street circulation and congestion, increase parking availability, and allow the City to more efficiently manage on-street parking demand.

## **DISCUSSION**

The Public Works Department operates approximately 1,990 on-street parking meters throughout the City. The City has established three separate pay rates for different areas of the City ranging from \$0.25 to \$1.50 per hour. Below is a breakdown of the location, approximate number of existing meters, and pay rates within the City.

<b>Location</b>	<b>Number of Meters</b>	<b>Existing Rate /hr</b>
Downtown District	128	\$1.50
Outside of Downtown	1,079	\$1.00
Industrial Businesses	739	\$0.25

By comparison, the City parking garages are free for the first hour, then \$1.00 for each 30 minutes with a \$12 maximum per day.

In 2023, total monthly transactions at the City's parking meters have ranged from 60,000 to 106,000 with approximately 80% of the transactions being made with credit cards.

In 2015, the City installed meters with a 10-hour maximum duration to accommodate employee parking for local businesses.

The use of parking pricing is an effective way to assist in the reduction of on-street traffic congestion, encourage shifts to more sustainable transportation modes, and facilitate efficient use of limited parking resources. Staff proposes to change the \$0.25 per hour meter rate to \$1.00 per hour to bring it in line with neighboring cities, help offset the credit card transaction fees, and improve parking demand management.

In addition, staff recommends that the existing 10-hour duration of stay be phased-out over a period of two years and changed to a maximum duration of 2 hours. This proposed change is intended to reinforce the short-term use of the parking spaces as well as the goals and objectives of the City’s Complete Streets Resolution and the Transportation Demand Management Ordinance. Staff anticipates that the proposed rate increases to the on-street parking meters would increase turnover of the parking spaces thereby creating increased availability. Staff plans to reach out to each affected business association to solicit feedback, hear concerns, and explore other options regarding employee parking.

**10 Hour Meter Summary**

Location	Number of Meters	Existing Max Duration	Proposed Max Duration*	Existing Rate /hr	Proposed Rate /hr**
Washington Blvd (near 405 Freeway)	28	10 hrs	2 hrs	\$0.25	\$1.00
Sepulveda Blvd	2	10 hrs	2 hrs	\$0.25	\$1.00
Culver Blvd	6	10 hrs	2 hrs	\$0.25	\$1.00
Jefferson Blvd	163	10 hrs	2 hrs	\$0.25	\$1.00
Fox Hills	111	10 hrs	2 hrs	\$0.25	\$1.00
Culver City Park	81	10 hrs	2 hrs	\$0.25	\$0.75
Washington Blvd East/Adams/Fairfax	114	10 hrs	2 hrs	\$0.25	\$1.00
Arts District	142	10 hrs	10 hrs	\$0.25	\$1.00
Robertson Blvd	16	10 hrs	2 hrs	\$0.25	\$1.00
National Blvd	38	10 hrs	2 hrs	\$0.25	\$1.00
Overland Ave	16	10 hrs	2 hrs	\$0.25	\$1.00
Lindblade St	22	10 hrs	2 hrs	\$0.25	\$1.00

\* Proposed duration will be introduced over a 2-year period after community outreach.

\*\* Proposed rate would begin on July 1, 2024

In 2019, the City Council authorized the deployment of 550 single-space parking meters and 30 multi-space pay stations. The implementation of these meters and pay stations has been delayed due to the pandemic and staffing limitations. The new meters are located on side streets off of arterial streets and adjacent to commercial properties. The pay stations are slated to be installed in and around the Hayden Tract where sidewalks are narrow. The full list of locations can be found in the November 18, 2019 City Council staff report and shown on a citywide map. Both documents are attached to this report.

Those locations were slated to be set following the previous practice of rates and durations that include 10 hour maximums and \$0.25 per hour. The summary below shows the proposed rates and durations at the new meter locations consistent with the changes proposed to the rest of the City in this report.

Staff made a presentation to the Finance Advisory Committee at its January 10, 2024 meeting. The Committee voted unanimously in support of the staff recommendations with provisions to provide a \$0.75/hour rate at on-street parking around City parks.

Staff reached out to the Culver City Chamber of Commerce and Culver City Arts District to receive their feedback. Staff recommends that the 10-hour duration remain in the Arts District until receiving data and analysis from an upcoming parking study.

***New Meter Summary***

Location	Approximate No.	Proposed Max Duration	Proposed Rate /hr
West Washington Blvd	202	2 hrs	\$1.00
Fox Hills – Centinela Ave	30	2 hrs	\$1.00
Downtown	6	2 hrs	\$1.50
Hayden Tract	301	2 hrs	\$1.00
Janisann Ave	7	2 hrs	\$1.00

***Next Steps***

Revise resolution based on feedback from the Committee. Staff will present the new parking meter rates resolution to the City Council in May 2024. Implementation of the new meter rates is tentatively scheduled for July 1, 2024.

**FISCAL IMPACT**

Based on the City’s current parking meter occupancy rates, the proposed rate increase for meters outside of the City’s downtown area from \$0.25 per hour to \$1.00 per hour is estimated to generate an additional amount of approximately \$100,000 per month. However, it is likely that the proposed rate increase and proposed duration decrease will have an impact on the City’s parking meter occupancy rates. The extent of this impact is unknown at this time, but it is anticipated to change the occupancy rates.
