Department Approval: Charles D. Herbertson, Public Works Director / City Engineer

BACKGROUND

To comply with stormwater quality mandates for trash, metals, bacteria and other pollutants, the City of Culver City has partnered with Costco to build and operate a stormwater and runoff diversion

facility along Washington Blvd and Glencoe Ave. The facility will capture dry weather runoff and stormwater and store it for diversion to the sewer system and future irrigation needs.

DISCUSSION

The Public Works Department's Environmental Programs & Operations Division invites members of the public to a virtual community meeting regarding the Washington Blvd Stormwater and Urban Runoff Diversion Project. City staff and representatives from the City's consultant CWE will be presenting the project and answering questions.

The Washington Boulevard Stormwater and Urban Runoff Diversion Project is slated to begin construction in summer 2021.

Additional information about the project can be found at:
