### **RECOMMENDATION**

Staff recommends the City Council adopt a Resolution incorporating Sepulveda Boulevard from Venice Boulevard to the Southerly City Boundary Near Franklin Avenue Project, on the list of City projects to be funded by SB1 (The Road Repair and Accountability Act of 2017).

### **BACKGROUND/DISCUSSION**

In April 2017 Senate Bill (SB) 1 (The Road Repair and Accountability Act) was signed into California law. This measure was in response to California's significant funding shortfall to maintain the State's multimodal transportation network. SB 1 increases several taxes and fees to raise over \$5 billion annually in new transportation revenues. Moreover, SB 1 makes adjustments for inflation every year so that the purchasing power of the revenues does not diminish as it has in the past with other gas tax subvention funds. SB 1 prioritizes funding towards maintenance and rehabilitation and safety improvements on state highways, local streets and roads, and bridges and towards improvement of the state's trade corridors, transit, and active transportation facilities. A Proposition to repeal SB1 was defeated in the November 2018 election.

The California Transportation Commission (CTC) is charged with oversight of several SB 1-funded

programs, including reporting on the use of local streets and roads funding. A vast majority of the new revenues for cities will come out of the newly created Road Maintenance and Rehabilitation Account (RMRA). Cities receiving RMRA funds must comply with all relevant federal and state laws, regulations, policies, and procedures.

Prior to receiving RMRA funds in a fiscal year, a city must submit to the CTC a list of projects proposed to be funded with these funds. All projects proposed to receive funding must be adopted by resolution of the city council at a regular public meeting. The list of projects must include a description and the location of each proposed project, a proposed schedule for the project's completion, and the estimated useful life of the improvement.

Also, a city is required to sustain a maintenance of effort (MOE) by spending at least the annual average of its general fund expenditures during the 2009-10, 2010-11, and 2011-12 fiscal years for street, road, and highway purposes from a city's general fund.

**Eligible** projects include:

- Road Maintenance and Rehabilitation
- Safety Projects
- Railroad Grade Separations
- Complete Streets Components (including active transportation purposes, pedestrian and bicycle safety projects, transit facilities, and drainage and stormwater capture projects **in conjunction** with any other allowable project)
- Traffic Control Devices
- Other (match funds for eligible project advancement)
- Pursuant to Article XIX Section 2(a) of the constitution: "The research, planning, construction, improvement, maintenance, and operation of public streets and highways (and their related public facilities for nonmotorized traffic), including the mitigation of their environmental effects, the payment for property taken or damaged for such purposes, and the administrative costs necessarily incurred in the foregoing purposes."

The Sepulveda Boulevard from Venice Boulevard to the Southerly City Boundary Near Franklin Avenue Project is eligible to receive SB1 funds since it is a road maintenance and rehabilitation project. This Project involves the replacement of three inches of asphalt and reconstruction of areas of failed asphalt. The proposed schedule for construction is May 2023 to August 2023, and the estimated useful life of the improvement will be 20 years.

## **FISCAL ANALYSIS**

According to the May 2022 California Department of Finance report on Local Street and Roads Projected Revenues, Culver City is projected to receive \$1,974,088 of gas tax funds for Fiscal Year 2022/2023. Of this amount, the RMRA portion is projected to be \$881,447.

As mentioned in the report, the City is required to sustain a maintenance of effort (MOE) by spending at least the annual average of its general fund expenditures during the 2009-10, 2010-11, and 2011-12 fiscal years for street, road, and highway purposes from the city's general fund. The annual average for Culver City is \$3,868,626 and this is the minimum required MOE in order to receive the RMRA gas tax funds. Current eligible expenditures are well above this amount, and staff does not foresee any issue with meeting the MOE requirement.

## **ATTACHMENTS**

1. 2022-06-13-CC-ATT-Proposed Resolution

## **MOTION**

That the City Council

Adopt a Resolution incorporating the Sepulveda Boulevard from Venice Boulevard to the Southerly City Boundary Near Franklin Avenue Project on the list of City projects to be funded by SB1 (The Road Repair and Accountability Act).
