Department Approval: Yanni Demitri, Public Works Director / City Engineer

BACKGROUND

In response to California's drought, in 2016 the City Council adopted new residential parkway landscaping guidelines, which were primarily aimed at reducing water use through replacement of traditional water-thirsty grass with native, indigenous, and other low-to-moderate water use plant species.

The Subcommittee will receive a presentation and discuss highlights of the approved residential parkway landscaping guidelines. In addition, the guidelines in their entirety are attached to this report.
